''Boxcar rates covering volume movements to shipper distribution centers, processing plants, rail-sponsored distribution center programs, Distribution Services of America (Conrail) and Total Distribution Services Inc. (CSXT) will be increased a similar amount,'' SP said.

(SP and Burlington Northern railroads, in a separate announcement, said they were increasing the rates for moving canned goods under their Doorstep Delivery Service program by $250 per trailer, effective April 2.)

''These price increases are to provide a solid financial foundation to

insure an adequate fleet size of the quality necessary to support the expected strong demand of the food production industry,'' according to George Woodward, SP executive vice president-distribution services.

SP will upgrade 450 insulated boxcars this year to ''support shipper needs '' Woodward said.

''Southern Pacific will switch this year from paper to an electronic public quote system to simplify the administration for this important and growing segment of its traffic base,'' he said.

#90045b0111 02/14/1990 ~Business Wire

AGOURA HILLS, CA. (FEB. 14) BUSINESS WIRE - Bishop Inc. (NASDAQ:BISH) Wednesday reported revenues of $2,413,000 for the first quarter of fiscal 1990 ended Dec. 31, 1989, as compared with revenues of $2,286,000 in the first quarter of fiscal 1989.

For its first quarter of fiscal 1990, the company incurred a net loss of $38,000, or 2 cents per share, vs. a net loss of $79,000, or 4 cents per share, in the comparable quarter of fiscal 1989.

John J. Theiss, president and chief executive officer, stated that the increase in revenues was the result of significant inroads made by the InterCad Division into new Fortune 1000 accounts and continued strong demand from its existing customer base.

This has resulted in a growth in engineering workstation system sales by the company during the first quarter which was well in excess of market growth trends. According to Theiss, InterCad's exceptional technical proficiency in systems integration and implementation, as well as its aggressive marketing programs, have opened vast new markets and opportunities for the company to pursue.

Partially offsetting the increase in sales of workstation systems was the further decline in sales of printed circuit design products due to advances in automated printed circuit board design through computer-aided design.

Sales of commercial products remained relatively constant in relation to the prior year's first quarter, despite what appears to be a general softness in demand for traditional engineering and architectural capital equipment goods due to slower economic conditions.

Theiss mentioned that the company's first quarter typically reflects lower overall revenues due to seasonal customer buying trends.

Bishop's operating companies are primarily engaged in the marketing and distribution of engineering, architectural and design products.

#90045b0112 02/14/1990 ~Business Wire

SCOTTSDALE, AZ. (FEB. 14) BUSINESS WIRE - Giant Industries Inc. (NYSE:GI) reported a 63 percent increase in net income for fiscal 1989 compared to 1988 on a 29 percent increase in revenues for the same period.

Net income for 1989 was the highest in the company's history and amounted to $10.9 million or $1.51 per share on revenues of $303.1 million compared to net income of $6.7 million or 99 cents per share on revenues of $234.5 million for 1988.

For the fourth quarter of 1989 net income was approximately $1.4 million or 20 cents per share on revenues of $84.9 million compared to net income of $1.4 million or 21 cents per share on revenues of $59.2 million for the fourth quarter of 1988.

The company successfully completed its initial public offering and simultaneously merged with an exploration and production company in December 1989. The merged company was accounted for as a purchase and accordingly only the operating results for the month of December are included in the above figures. Had the purchase occured on Jan. 1, 1988, net income for 1989 would have increased 60 percent to $12.3 million or $1.30 per share on revenues of $307.9 million from $7.7 million or 84 cents per share of net income of $239.5 million of revenues for 1988.

The company further stated that despite lower refinery margins during the fouth quarter, 1989 refinery gross margins were $6.40 compared to $5.62 during 1988. In addition, the refinery operated at 103 percent of its rated capacity for 1989, a 1 percent increase over 1988. At Dec. 31, 1989 the company had 26 retail units compared to 17 as of Dec. 31, 1988.

Expansion plans, such as increasing the refinery's crude oil capacity by approximately 45 percent over the next three to five years, increasing the crude oil gathering pipeline capacity, and developing 10-12 retail units per year are proceeding as scheduled.

In addition, the company is negotiating to purchase a chain of nine retail units in 1990 and reviewing the feasibility of developing additional

travel centers on Interstate 40 and Interstate 10.

     #90045b0142 02/14/1990 ~Business Wire
WEST COLUMBIA, SC (FEB. 14) BUSINESS WIRE - Ron L. Wells, president of Wells American Corp. (ASE: WAC), Wednesday announced the company's third quarter results for fiscal 1990.

Sales for the third quarter ended Dec. 31, 1989 were $1,603,719, compared to $3,112,201 for the like period in fiscal 1989. The company incurred a net loss of $840,137, or 17 cents per share for the third quarter as compared to a net loss of $783,661, or 15 cents per share for the comparable period is fiscal 1989.

Wells indicated that the advertising impasse reported in the second quarter continued to adversely impact the company's sales during the third quarter. This resulted in additional cost cutting measures and the suspension of production in January of 1990.

The company has since continued to explore a number of business initiatives, including potential new product offerings and the possibility of continuing the production of select product lines through licensing agreements.

Wells American's common securities are traded on the American Stock Exchange under the ticker symbol ''WAC''. For further information about Wells American write to Robert K. (Ken) King, executive vice president, at the company's headquarters. The address is 121 Executive Center Drive, Suite 122, Columbia, S.C. 29210.

#90045b0172 02/14/1990 ~Business Wire

LAS VEGAS (FEB. 14) BUSINESS WIRE - Southwest Gas Corp. announced 1989 earnings of $2.15 per share, up 2 cents from 1988's previous record level of $2.13 per share.

The company's 1989 net income applicable to common stock was $40,910,000, compared to $39,320,000 in 1988. During 1989, the average number of shares outstanding was 19,013,000, compared to 18,476,000 during the prior year.

Consolidated net income for 1989 was $42,685,000, an increase from the previous record-setting mark of $41,187,000 recorded in 1988. The gas segment's contribution to consolidated net income increased 32 percent from $24,506,000 in 1988 to $32,425,000 in 1989. The earnings increase from gas operations was principally attributable to increased operating margin, customer growth and a significant reduction in the company's operating expenses, according to Kenny C. Guinn, chairman and chief executive officer.

Net earnings from the company's financial services subsidiary, PriMerit Bank, were $14,171,000 (contributing $10,260,000 to consolidated net income after deducting tax-effected carrying costs associated with its acquisition by Southwest) in 1989, compared to $20,787,000 (contributing $16,681,000 to consolidated net income after deducting tax-effected carrying costs) in 1988.

The bank's 1989 contribution to consolidated net income was lower than the previous year due mainly to relatively high short-term interest rates and an unusually flat yield curve that persisted throughout the year, offset by exceptionally strong income from its real estate development activities Guinn stated.

Of greater significance in terms of implications for the company's future, said Guinn, PriMerit emerged substantially unscathed from the enormous changes in the thrift industry's regulatory environment that were put into place in 1989.

PriMerit met the new, more stringent capital requirements emanating from the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), which sent shock waves through much of the industry. In doing so, it required no capital infusion from Southwest. Moreover, its credit quality remains excellent.

For the fourth quarter of 1989, consolidated net income was $22,126,000, a 34 percent increase from the $16,492,000 recorded during the same quarter a year ago.

The increase was primarily attributable to a $10 million increase in operating margin from the company's gas operations, partially offset by a reduction in PriMerit's contribution of approximately $1.5 million.

Fourth quarter 1989 per share earnings were $1.13, on an average of 19,231,000 common shares outstanding, compared to 86 cents on an average of 18,669,000 shares outstanding for the corresponding period in 1988.

HOUSTON (FEB. 14) BUSINESS WIRE - Houston Biomedical Inc. (NASDAQ/BSE:HBII) Wednesday announced the acquisition of MTD Therapy Associates Inc. for an undisclosed amount of cash and debt, part of which may be converted into common stock in the future.

MTD provides physical therapy, occupational therapy and related rehabilitation services to patients in the home on a contractual basis with home health agencies and at the hospital/clinic through its supplemental staffing function. Founded in 1984, MTD had annual revenues of approximately $575,000 in 1989.

Gene Morris, chief operating officer of HBI, said: ''MTD has a solid base of business in a health care field where there is a shortage of skilled providers. At the same time, MTD will significantly complement MedSource and give it the ability to provide a wider range of home care services.''

MedSource Home Health Care Inc., a medicare certified agency that provides nursing services in the home and supplemental hospital staffing, was purchased by HBI on Oct. 30, 1989. Morris went on to say that the company continues to look for other acquisition opportunities to enhance its health care services business.

     #90045b0181 02/14/1990 ~Business Wire
PHOENIX (FEB. 14) BUSINESS WIRE - Del Webb Corp. (NYSE/PSE:WBB) the nation's leading developer of active adult communities, Wednesday

announced that it has secured approximately 1,570 acres to build an active adult community near Palm Springs, Calif.

The property is an assemblage of more than a dozen parcels currently in an unincorporated portion of Riverside County. The property's southern boundary is Interstate 10, while Washington Street forms its western boundary. Washington Street is the main access route into the cities of La Quinta and Indian Wells off 1-10.

The Palm Springs area includes the cities of Indio, La Quinta, Indian Wells, Coachella, Palm Desert, Rancho Mirage, Cathedral City and Desert Hot Springs as well as Palm Springs.

Philip J. Dion, chairman and chief executive officer, said the land acquisition represents an outstanding opportunity in one of the country's best housing markets.

''Riverside County has been a leader in the nation's housing market for the past several years and the Palm Springs area has long been regarded as a second home and retirement destination. We have spent considerable time and resources researching the Southern California market and investigating development opportunities. We have found there is tremendous demand here for an active adult community and are confident we can create a community of which our company and area residents will be very proud,'' Dion said.

Dion also announced that Webb Senior Vice President Frank Pankratz will relocate from Phoenix to the area to direct development of the new community. Webb plans to open an office locally within 30 days.

Pankratz joined Webb in 1987 as president of The Foothills, a 4,140-acre master-planned community in Phoenix of which Webb is a partner. In 1988, he was promoted to senior vice president of real estate for the corporation. Pankratz had been involved with several other major Arizona and California real estate developers before joining Webb.

''Frank will continue to oversee our California operations and work closely with Steve Maloney, president of our California subsidiary,'' Dion said. The office, located in Costa Mesa, is working on additional community development opportunities in Northern and Southern California.

Webb research has shown that more than one-third of the people living in the Palm Springs area are retirees, many of whom have moved to the area from other parts of California. Dion noted that the well-known reputation of the Palm Springs area was a factor in site selection.

''Nearly a million people from outside California visit the Palm Springs area every year, with particularly large numbers from the Midwest, Northwest and Canada,'' Dion said. ''The market for an active adult

community is vast.

''There are nearly 3.5 million age-qualified households in California alone. When we include the Midwest, an area where were have always enjoyed strong sales support, we're adding another significant base from which to draw active adults. Our job is to create a community that will have broad market appeal,'' he said.

The community, which will be age restricted to adults 55 and older, is planned to include single family attached and detached residential units; a Billy Casper/Greg Nash designed 18-hole championship golf course; at least one major recreation center with a host of athletic facilities, arts and craft studios and meeting rooms; commercial development and several church sites. Home prices are expected to begin in the low $100,000 range.

Dion said Webb has already begun internal discussions regarding the site's master plan. The community hopes to submit the formal plan for approval during 1990. ''As with our other active adult communities in Phoenix, Tucson and Las Vegas, we make a major commitment to the local community,'' Dion said. ''We plan to work closely with local government agencies to insure the compatibility of our project within the greater Palm Springs area.''

Pending the necessary approvals, Dion said he hopes that development and home sales activity could begin in 1991. Development of the community is expected to continue for approximately 10 years.

As with other Webb adult communities, climate and proximity to services played an important role in the site selection process. Dion noted that the climate of the Palm Springs area is comparable to that of Phoenix where Webb pioneered its Sun City active adult communities. Webb's Arizona communities have more than 36,000 homes and approximately 65,000 residents.

Its newest community, Sun City Las Vegas, opened in January of 1989 and has sold more than 1,200 homes since sales began. During its first year of operation, Webb posted more sales than any other builder in Las Vegas.

''There are numerous shopping centers within a few miles of our site that will provide residents with easy access to shopping, dining and other services. In addition, there are many excellent medical facilities in the Palm Springs area, including Eisenhower Medical Center, Desert Hospital and John F. Kennedy Memorial Hospital, which provide world-class medical services,'' Dion said.

''We believe this project is a major step forward in our expansion plans and consistent with our strategy of geographic diversification. The California market offers Webb tremendous opportunities, and we are excited about the potential,'' Dion said.

Listed on the New York Stock Exchange, Del Webb Corp., headquartered in Phoenix, is a community development company primarily engaged in the building of master-planned active adult communities. For more information about Webb's Palm Springs area community, call 1-800-4-Del-Webb; or write to Del Webb Corp., 2231 E. Camelback Rd., Dept 2501, Phoenix AZ 85016.

#90045b0186 02/14/1990 ~Business Wire

SCOTTSDALE, AZ (FEB. 14) BUSINESS WIRE - DataMag Inc. (NASDAQ:DMAG) announces quarterly results.

For the three months ended Dec. 31, 1989, net sales were $113,036 compared to $525,427 for the comparable quarter the prior year. Sales results were adversely affected by further delays in large shipments of cartridges anticipated for the quarter to an OEM customer.

Sales of diskettes were adversely affected by the discontinuation of 3.5 inch sub-contracting operations by Cummins Electronics of Hermosillo, Sonora, Mexico, and will continue to be adversely affected by intense price competition from foreign manufacturers.

As previously discussed in the company's Sept. 30, 1989 form 10-K, the $1 million note entered into and funded on Jan. 12, 1990, is currently providing cash for operating deficits. Because orders previously anticipated have been delayed, those proceeds are anticipated to last until April, rather than May or June as stated in the Sept. 30, 1989 form 10-K. Additional financing may be required, which is currently being negotiated. There is no assurance that the company will be able to obtain such additional financing.

The company's ability to continue in business is dependent on its ability to produce and sell quality tape cartridges of sufficient quantities to generate positive cash flow from operations.

During the quarter being reported the company incurred a negative gross margin as a direct result of lower manufacturing volume, completion of the move and closing of the Michigan facility and depreciation costs relating to 3.5 inch and 5.25 inch equipment not currently being utilized. The company believes gross margins will improve as production levels increase.

Selling, general and administrative expenses increased from $312,051 in the prior year quarter to $345,026 in the reporting quarter. This

increase was due to travel and final expenses relating to the closing of the Michigan facility.

Interest expense decreased from $75,191 for the prior year quarter to $21,578, primarily due to a refund for overcharges in previous quarters.

As a result of the above factors, the company incurred a net loss of $803,850 (14 cents per share) in the current period compared to a loss of $623,906 (16 cents per share) in the comparable prior year period.

#90045b0197 02/14/1990 ~Business Wire

SAN DIEGO (FEB. 14) BUSINESS WIRE - PS Group Inc. (NYSE:PSG) reported net income for the year 1989 of $2.9 million, or 45 cents per share, compared with net income for the year 1988 of $44.1 million, or $6.23 per share.

Net income for 1988 was derived from the gain resulting from the termination of PSG's pension plan, which was partially offset by a charge related to the discontinuance of the oil and gas business. Results for both 1989 and 1988 were reduced by an extraordinary charge related to the early retirement of debt.

For the fourth quarter of 1989 PSG recorded a net loss of $4.8 million, all from continuing operations (77 cents per share) vs. a net loss of $1.7 million (25 cents per share) in the fourth quarter of 1988 ($.3 million, or 5 cents per share, from continuing operations).

Fourth-quarter 1989 results included greater losses than planned from the travel distribution business due to lower ticket prices (resulting in lower average commissions) combined with lower demand for both commercial and leisure travel. 1989 results also include a pretax charge of $5 million for the writedown of the carrying value of certain high-yield securities held in the company's investment portfolio.

This writedown to estimated realizable value was prompted by the January 1990 bankruptcy filing by Allied and Federated department stores, the issuers of certain debt securities held by the company at Dec. 31, 1989. Because of the substantial decline in quoted market values of high-yield securities, PSG's carrying value of high-yield securities (after writedown) still exceeded quoted market prices by $8 million at Dec. 31, 1989.

PSG does not believe that current market quotations reflect the ultimate amount to be realized on these securities. At Dec. 31, 1989, the market

value of all securities (both debt and equity) held by PSG for investment exceeded carrying value by $15 million.

     #90045b0211 02/14/1990 ~Business Wire
TUCSON, AZ (FEB. 14) BUSINESS WIRE - Arizona Commerce Bank (ASE:AZB) plans to record, for the fourth quarter of 1989, approximately $600,000 in one-time costs related to the recent consolidation of the bank's Tucson offices.

The bank is consolidating its three Tucson banking offices into one downtown Tucson location. Because the decision to consolidate was made in 1989, expenses related to the consolidation will be recorded in 1989. These expenses include: write-offs of goodwill, furniture, fixtures and leasehold improvements; buy out of leases; and severance payments to affected employees.

F. Lee Jacquette, chairman and chief executive officer, said that the Tucson consolidation is necessary for Arizona Commerce Bank to cope with the difficulties affecting many financial institutions in Arizona. The bank has announced that the consolidation is expected to produce ongoing annual savings of approximately $500,000.

The bank also announced that it expects to add an additional $1.8 million to its loan-loss reserve for the fourth quarter of 1989 and to charge off an additional $1.8 million in problem loans, thereby deepening the loss for the quarter and the year.

Arizona Commerce Bank estimates that these two additional charges will increase its loss for 1989 to about $5.6 million, with $3.9 million of the loss occurring in the fourth quarter.

In December, the bank announced that it would add $950,000 to its loan-loss reserve for the fourth quarter of 1989. Jacquette said that, ''Since then, the bank has experience further deterioration in its loan portfolio as additional information about borrowers became available at year end.''

#90045b0217 02/14/1990 ~Business Wire

STAMFORD, VT (FEB. 14) BUSINESS WIRE - Patten Corp. (NYSE:PAT) Wednesday reported operating results for the three months ended Dec. 31, 1989.

Third quarter sales of real estate were $21.5 million compared to $32.4 million for the three months ended Jan. 1, 1989. Net loss for the quarter was $5.1 million, or 30 cents per share.

The softer real estate market in the Northeast led to a decrease in sales volume and lower gross margins on the sales of real estate during the period. The downturn in the real estate market, and the economy in general, has had an adverse effect on the company's ability to sell inventory at historical rates of sale and margins.

The effects of economic and real estate market fluctuations in the

Northeast continue to be somewhat mitigated by the company's operations in such areas as the Southeast and the West.

The net loss for the third quarter includes a pre-tax charge against operations of $5.6 million. The provision covers such items as non-refundable deposits made on properties the company has determined not to purchase, preacquisition spending on certain projects the company has determined not to purchase, inventory valuation adjustments and other costs associated with the consolidation of certain offices.

#90045b0604 02/14/1990 ~Business Wire

TUPELO, MI (FEB. 14) BUSINESS WIRE - Hancock Fabrics Inc. (NYSE:HKF) Wednesday announced unaudited results for its fourth fiscal quarter of 1989 and for the full fiscal year ended Jan. 28, 1990.

Sales for the quarter ended Jan. 28, 1990 were $90.0 million, up from $82.2 million in the same quarter last year. Net earnings for the quarter were $7.8 million, or 66 cents per share, compared with net earnings of $6.7 million, or 52 cents per share in the fourth quarter of 1988.

For the 52 weeks to date, sales were $345.8 million, up from $315.4 million in 1988. Net earnings were $26.0 million, or $2.11 per share, compared with net earnings of $22.0 million, or $1.71 per share in the 52 weeks of 1988.

In commenting on the results, Morris O. Jarvis, chairman and chief executive officer, stated, ''Fiscal 1989 marked the 13th consecutive year of revenue and earnings growth for Hancock Fabrics Inc. Consistently strong comparable store sales, higher gross margins and excellent expense management combined to produce the company's best year ever.

''Considering the start-up costs to open 43 new stores and remodel 32 others, we are especially pleased with the expense control results this year.''

''Our commitment to accelerated growth paid off in 1989 in both comparable sales gains and unit expansion. Sales from existing stores increased 6.3 percent for the year as our marketing program matured and the new sales incentive plan for store managers gained momen- tum.

During the quarter, Hancock opened 18 stores and closed two, finishing the year with 43 openings and seven closings. At Jan. 28, 1990, the company operated 402 stores in 30 states under the names ''Hancock Fabrics,'' ''Minnesota Fabrics,'' ''Fabric Warehouse,'' and ''Fabric Market'' and

supplied about 200 independent wholesale customers.

Hancock Fabrics Inc. is a retail and wholesale merchant of fabrics, crafts and related home sewing and home decorating accessories.

#90045b0619 02/14/1990 ~Business Wire

NEW YORK (FEB. 14) BUSINESS WIRE - Frank B. Hall & Co. Inc. (NYSE:FBH) Wednesday reported financial results for the fourth quarter and year ended Dec. 31, 1989.

For the fourth quarter of 1989, the company reported a net loss from continuing oprations of $3.2 million, or 28 cents per share, compared with a net loss from continuing operations of $5.3 million, or 40 cents per share, for the fourth quarter of 1988.

The pretax loss from continuing operations for the quarter was $2.2 million vs. $4.5 million for the same period in 1988. For the fourth quarter of 1988, the company recorded an extraordinary charge of $9.1 million, or 38 cents per share, which increased the net loss for that period to $14.4 million, or 78 cents per share.

Revenues for the fourth quarter of 1989 rose 9 percent to $105.1 million from $96.6 million for the same period last year. The strong revenue growth contributed to the reduction in the operating loss for the period.

The company attributed the revenue growth in the quarter to a significant increase in new business production, which more than offset the effects of continued soft pricing in the property and casualty insurance industry.

Also, to a lesser degree, strategic acquisitions completed in 1989 had a positive impact on comparative quarterly revenues.

For the year ended Dec. 31, 1989, Hall reported a net loss from continuing operations of $36.2 million, or $1.97 per share, compared with a net loss from continuing operations of $21.4 million, or $1.74 per share, for 1988.

The company reported a loss from discontinued operations of $50 million in the second quarter of 1989 which increased the net loss for 1989 to $86.2 million, or $3.78 per share.

Revenues totaled $383.7 million for 1989, compared with $366.9 million in 1988. The increase in the net loss from continuing operations resulted primarily from increased expenses for new production and management

resources, severance costs relating to selected staff reductions, new education and incentive programs and office automation.

Frank B. Hall, headquartered in New York, is a leading provider of insurance brokerage and employee benefits consulting services in the United States and abroad. The company had revenues in 1989 of $384 million and has approximately 200 offices and affiliates in over 50 countries.

HERCULES, CA (FEB. 14) BUSINESS WIRE - Bio-Rad Laboratories Inc. (AMEX:BIO.A and BIO.B) announced Wednesday that sales and operating earnings in 1989 established new records.

Sales rose 19 percent to $236.3 million, and earnings per share rose 6 percent to $1.33 before an extraordinary charge in the fourth quarter for losses resulting from the Oct. 17 Northern California earthquake.

The company said that write offs and costs associated with the earthquake resulted in an after tax charge of $1.2 million (15 cents per share). Although the Research Products division operations were disrupted, instrument production is now back to pre-earthquake levels; and the division's research and development and marketing activities will be fully re-established in newly leased facilities by the end of the first quarter.

The company cautioned, however, that its 1990 occupancy expense will increase by approximately $1.7 million as a result of the earthquake-induced moves.

All segments of the company's business, research products, clinical diagnostics and analytical instruments contributed to 1989's record results.

Bio-Rad Laboratories is a multinational manufacturer and distributor of research products, clinical diagnostics, and analytical instruments based in Hercules, Calif.

NEW YORK (FEB. 14) BUSINESS WIRE - Informix Corp. (NASDAQ:IFMX) Wednesday announced a 40 percent increase in revenues and a 338 percent increase in earnings for the year ending Dec. 31, 1989.

Revenues for the year were $145 million, compared to revenues of $103,505,000 for the year ended Dec. 31, 1988.

The comparison of the fourth quarter and year ended Dec. 31, 1989 to the fourth quarter and year ended Dec. 31, 1988 is as follows:

	Year 1989	Year 1988	Increase in percent
Revenues	$ 145,000,000	$ 103,505,000	40

Net income	6,379,000	1,458,000	338
Earnings per share	48 cents	12 cents	300

	Quarter 1989	Quarter 1988	Increase in percent
Revenues	$ 43,212,000	$ 27,917,000	55
Net income	2,706,000	(2,613,000)	--
Earnings per share	20 cents	(21 cents)	--

During 1989, Informix introduced and shipped Informix OnLine, the industry's first fault tolerant OLTP database engine to support multimedia database applications. OnLine lets users integrate information objects such as word processing documents, graphs, spreadsheets, scanned and digitized images, facsimiles and voice into a UNIX-based database application.

OnLine works with Informix-Star, new distributed database software that was also introduced and shipped in 1989. With Informix-Star, OnLine users can access and manipulate data from Informix databases on multiple, remote servers.

Informix also shipped its Wingz graphic spreadsheet for the Macintosh, and announced a mulitplatform strategy that will make it available across all major graphical desktop platforms during 1990. The company also shipped SmartWare II, an upgraded version of the company's long-time leading integrated office automation software package.

During 1989, the company signed several major distribution agreements. Informix signed its single largest office automation contract with MLTM, the French Ministry of the Sea, Land and Travel, for SmartWare. The company also announced that it won three major DBMS product awards from the U.S. Navy.

Informix also signed its first agreement for the retail distribution of its SQL DBMS products with Ingram Micro D, and a worldwide OEM agreement with Unisys.

In early January, Informix announced its solution for seamlessly linking desktop computers with Informix SQL databases. With the Informix Wingz-DataLink interface, non-SQL literate users can create database queries through simple point-and-click options, and developers can create custom graphical interfaces for accessing and manipulating data stored in Informix databases.

The company has wholly owned subsidiaries in the United Kingdom, France, Germany, The Netherlands, Sweden, Australia, Singapore, Italy, Spain and Canada.

LOS ANGELES (FEB. 14) BUSINESS WIRE - Businessland Inc. is on the move in Los Angeles.

The international leader in the distribution, integration and support of microcomputer and workstation systems has replaced its familiar storefront locations in Santa Monica and Torrance with new regional branch offices which can offer Fortune 1000 companies a wide range of consultation, network design, installation, user training, sales and support services.

With the opening of these two new branch office facilities, Businessland now has a total of five Los Angeles area branch locations including offices in: Santa Monica, Torrance, Glendale, Woodland Hills and downtown Los Angeles.

Located in upscale business parks and executive office blocks, the new branch offices feature comfortable reception areas, private conference rooms, state-of-the-art learning centers and fully integrated demo rooms featuring the industry's leading operating systems, hardware and software products and networking environments.

The new locations reflect Businessland's integrated approach to consultive systems sales and comprehensive information system management, and represent the services of the entire company, except both Businessland Rents and government sales, which operate from separate depots.

With the recent opening of new stores in San Jose, Austin and Tempe, Businessland's retail subsidiary, ComputerCraft, continues to expand its presence across the United States. Today ComptuerCraft stores in California, Arizona, Nevada and Texas serve the needs of small-medium sized businesses and professionals. Businessland plans to expand the ComputerCraft chain into the top 50 U.S. computer markets.

Now operating in Los Angeles, San Jose, Phoenix, Ariz., Atlanta and the District of Columbia, the new branch offices are designed to provide corporate accounts with an unprecedented level of comprehensive information management services that distinguishes Businessland from its competitors.

Founded in 1982, Businessland Inc., is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates microcomputer products from selected manufacturers to create systems tailored to specific customer

needs and provides the high-level service and support to maximize their productivity.

COSTA MESA, CA (FEB. 14) BUSINESS WIRE - Two new contracts with banks headquartered in New York City, Bankers Trust Co. and Dime Savings Bank of New York, were announced today by FileNet Corp. (NASDAQ:FILE), the leading manufacturer of image processing systems.

The combined value of the contracts is $1.2 million.

New York banks continue to pace the financial services industry in adopting image processing technology to automate paper-intensive operations and to improve customer service. FileNet systems, which convert documents to digitized images and automate the flow of these images, as well as of data and text, throughout an organization, are already installed in leading New York banks, including Barclays, Chase Manhattan, Chemical Bank, and National Westminster.

In addition, financial institutions throughout the United States and abroad are using FileNet systems in such applications as loan servicing, retirement accounts management, international funds transfer investigations, trust files management, consumer finance, signature verification, and credit card customer service.

''In a highly competitive business environment, technologies that enhance customer service as well as productivity offer strong competitive advantages,'' said FileNet President Ted Smith. ''Banks are being very aggressive in using image processing technology to deliver superior customer service.''

FileNet Corp. is the worldwide leader in manufacturing and marketing image processing systems used in fundamental business applications. A pioneer in its field, FileNet today has more than 300 system installations in 25 countries.

The image processing market is projected to generate U.S. sales of approximately $1.7 billion in 1993. The company, which is headquartered in Costa Mesa, has sales offices in the United States, Canada, France, and Germany. FileNet systems also are sold in 21 other countries by Ing. C.

Olivetti & C., S.p.A. and other distributors.

NEW YORK (FEB. 14) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) announced Wednesday that it has enhanced its European distribution capabilities by signing an agreement with Top Log International for the Pan-European distribution of Informix's complete line of UNIX-based information management software.

The two-year contract is valued at $10 million.

This new agreement expands Informix's previous relationship with Top Log, enabling Informix to concentrate on major value-added resellers, (VARs), original equipment manufacturers (OEMs) and corporate accounts, while Top Log focuses on low-end, high volume accounts.

Top Log will distribute Informix's leading information management software throughout the United Kingdom, France, Germany, Spain and Benelux. They will be the sole outside distributor of Informix's line of database management software in France and Spain.

Informix products available through Top Log include Informix-OnLine, the first fault tolerant OLTP database engine with support for multimedia database applications; and Wingz, Informix's graphical spreadsheet for multiple desktop platforms. With Informix's recently introduced Wingz-DataLink technology, users can access Informix SQL databases via the graphical environment of Wingz.

Users will be able to access data directly into the worksheet or user the HyperScript programming capabilities in Wingz to create a completely customized graphical database application. Top Log will also distribute the Informix-4GL family of application development tools; Informix-SQL, a menu-driven database management system; the Informix-ESQL line of software tools for embedding SQL statements into C, COBOL, and Ada programs; and the SmartWare II integrated office automation software package.

Informix and Top Log will provide training, consulting, technical support and maintenance services for each of the products.

Top Log, a subsidiary of Metrologie International, specializes in the

distribution and support of UNIX-based software throughout Europe. Top Log has 12 years of experience in the volume distribution of software.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

SAN JOSE, CA (FEB. 14) BUSINESS WIRE - Businessland Inc., an international leader in the distribution, integration and support of microcomputer and workstation systems, has moved from its familiar storefront, walk-in location to the Crown Central Towers in downtown Phoenix.

Businessland's new Phoenix branch office is part of the company's first phase transition to regional branch office locations, replacing its familiar storefront locations with executive branch sales offices which will offer a wide range of consultation, network design, installation, user training, sales and support services.

Businessland's new Phoenix branch office will target Fortune 1000 clients in an upscale, professional executive branch office setting which more accurately reflects the company's integrated approach to consultive systems sales. Businessland Phoenix will represent the services of the entire company with the exception of both Businessland Rents and government sales, which operate from separate depots.

Complementing the Crown Central Tower branch office location is Businessland's subsidiary ComputerCraft, based in Tempe, Ariz. With the recent opening of new stores in San Jose, Austin and Tempe, Businessland's retail subsidiary, ComputerCraft, continues to expand its presence across the United States.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates microcomputer products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, five in Canada and two in West Germany. It reported sales of $1.2 billion in fiscal 1989.

The new Businessland Phoenix branch office is located at Crown Central Tower, Suite 250, 3550 N. Central Ave., Phoenix, AZ, 85002; Telephone 602/266-6111.

#90045b0638 02/14/1990 ~Business Wire

ATLANTA (FEB. 14) BUSINESS WIRE - Businessland Inc., an international leader in the distribution, integration and support of microcomputer and workstation systems, has consolidated storefront sites in Norcross, Smyrna and Buckhead into a spacious new third-floor branch office suite at 7000 Central Parkway near downtown Atlanta.

Atlanta is one of five U.S. cities selected to lead the company's transition from its familiar storefront locations to executive branch offices which more accurately reflect the company's integrated approach to consultive systems sales.

Businessland's new Atlanta branch office will represent the services of the entire company with the exception of both Businessland Rents and government sales, which operate from separate depots, providing Fortune 1000 clients with a wide range of consultation, network design, installation, user training, sales, service and support.

With the recent opening of new stores in San Jose, Calif., Austin, Texas, and Tempe, Ariz., Businessland's retail subsidiary, ComputerCraft, continues to expand its presence across the United States. In Atlanta, Businessland's small- to medium-sized business customers and professionals will continue to be served by Businessland's Buckhead center until ComputerCraft makes its debut in that market.

Today, ComputerCraft stores in California, Arizona, Nevada and Texas serve the needs of small- to medium-sized businesses and professionals. Businessland plans to expand the ComputerCraft chain into the top 50 U.S. computer markets over the next few years.

Located in upscale business parks and executive office blocks, branch offices in Los Angeles, San Jose, Phoenix, Atlanta and Washington have been recently opened to service corporate accounts with the comprehensive consultation and connectivity expertise, training and support services that distinguishes Businessland from its competitors.

Businessland's 6,000- to 7,000-square-foot Atlanta branch office location offers a state-of-the-art executive sales environment in which Businessland representatives can consult with customers in a low-pressure, by-appointment-only setting.

Founded in 1982, Businessland Inc. is the world's largest company-owned microcomputer systems integration company and connectivity specialist. The company tests integrates microcomputer products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

NEW YORK (FEB. 14) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) announced Wednesday that it has signed a Cooperative Software Program (CSP) agreement with International Business Machines Corp.

This agreement gives IBM the rights to market and sell Informix's line of information management products for IBM's family of AIX-based hardware platforms.

Informix plans to support AIX platforms with Informix OnLine, the first database engine to combine fault tolerant online transaction processing performance with multimedia capabilities. With OnLine, users can integrate information objects such as word processing documents, graphs,

scanned and digitized images, facsimiles and voice into an SQL-based relational database.

Other Informix products include Wingz, its leading graphical spreadsheet for multiple desktop platforms. With the recently introduced Wingz-DataLink technology, users will be able to access corporate data from any Informix SQL database via the graphical environment of Wingz. Users can access this data directly into a Wingz worksheet or use the HyperScript programming language in Wingz to create a completely customized graphical database application.

Informix's products for IBM AIX platforms also include its full line of application development tools. These include the Informix-4GL family of fourth generation programming tools that dramatically reduce application development time; Informix-SQL, a menu-driven relational database mangement system; and the Informix-ESQL family of development tools for embedding SQL into C and COBOL programs.

Informix's application development tools are currently available for the IBM Personal System/2 and IBM-RT hardware families running AIX. Wingz and OnLine are currently scheduled to be available for IBM AIX platforms during the first half of 1990.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems robust application development tools, and graphical- and character-based productivity software for delivering information to every significant desktop platform.

The company has wholly owend subsidiaries in the United Kingdom, France, Germany, The Netherlands, Sweden, Australia, Singapore, Italy, Spain and Canada.

#90045b0644 02/14/1990 ~Business Wire
ISSAQUAH, WA (FEB. 14) BUSINESS WIRE - Egghead Discount Software (NASDAQ: EGGS), North America's largest volume personal computer software merchant, Wednesday reported that improved margins and tighter operating controls led to a profit on record sales during the company's third quarter ended Jan. 6, 1990.

Egghead's third quarter fiscal 1990 sales increased 27 percent to $116.3

million compared to third quarter 1989 sales of $91.9 million. The company's net income rose 19 percent to $774,000 or 5 cents per share compared to third quarter 1989 earnings of $649,000 or 4 cents per share after restatement for a change in accounting principle. Included in the company's third quarter expenses is approximately $3 million in increased reserves for anticipated litigation expenses, store closures and relocations.

For the first nine months of fiscal 1990, Egghead's sales increased 37 percent to $337.1 million compared to $245.3 million last year. The company lost $8.8 million or 54 cents per share for the first nine months of fiscal 1990 compared to a profit of $762,000, or 5 cents per share in the like period of fiscal 1989 after restatement for the change in accounting principle.

''Third quarter results reflect an improvement in gross margin during the holiday selling season,'' said Stuart M. Sloan, Egghead chairman and chief executive officer. The company's gross margin rate increased to 19.8 percent in the third quarter from 16.7 percent in the second quarter of fiscal 1990, but declined from 21.4 percent in the third quarter a year ago.

Further operating improvements in the third quarter included a decrease in selling, general and administrative (SG&A) costs to 17.4 percent of net sales, compared to 18.4 percent in the like quarter a year ago, and 18.5 percent during the prior quarter. SG&A represented 15 percent of net sales before the reserves for litigation, store closures and store relocations.

Forty-nine percent of Egghead's total third quarter revenues were from retail stores and 50 percent from direct sales. During the third quarter, retail sales were up 15 percent over the same period last year while direct sales increased 38 percent. Egghead's third quarter comparable retail store sales declined 4.3 percent from third quarter 1989, an improvement from the second quarter 1990 decline of 4.9 percent.

Included in Egghead's third quarter results are increases in reserves of $2 million for estimated legal fees related to litigation announced in 1989 and $1 million to close or relocate selected Egghead stores during the next 12 months.

''We intend to close an additional five stores we don't believe will meet our profitability requirements and relocate five others to sites more convenient for our customers,'' said Matthew J. Griffin, executive vice president/administration. ''As we get better information from our field managers and our systems, we get better at evaluating each of our sites,'' Griffin continued. ''We're striving to be in the best possible locations in each of our markets.''

During the third quarter of fiscal year 1990, Egghead opened one store and closed three, operating 204 stores at quarter's close. The company employed 151 direct sales representatives at quarter end.

Egghead Discount Software is the largest volume personal computer software merchant in North America, currently serving consumers and businesses through its company-operated chain of 200 retail stores, 153-person direct sales force, and eight computer software training facilities in six markets.

AMSTELVEEN, NETHERLANDS (FEB. 14) BUSINESS WIRE - KLM announced Wednesday that J.F.A. de Soet, who became deputy president of KLM Royal Dutch Airlines in 1973 and has been president of KLM since September 1987 will be retiring on December 31st 1990, as he will have reached retirement age.

The supervisory board of KLM has decided to appoint Pieter Bouw as his successor as president. Bouw is 48 years of age. He joined KLM in 1967 and has held various positions in the company. From 1976 to 1982 he was head of the cargo marketing department, followed by three years as area manager Europe and Africa. On October 15th, 1985 he was appointed area manager for KLM in the United States of America. He was appointed as member of the management on September 1st 1987.

The KLM supervisory board has also decided to appoint Leo M. Van Wijk as managing director on the management as of January 1st, 1991. Van Wijk is 43 years of age. He joined KLM in 1971. After working in various positions in the company, including several in the fields of automation, cargo and passengers, he was appointed head of marketing in 1984. His appointment as deputy head of commercial services followed in 1987. Van Wijk has headed the KLM corporate strategy project group since June 1st 1989.

#90045b0649 02/14/1990 ~Business Wire

HUNTINGTON STATION, N.Y. (FEB. 14) BUSINESS WIRE - American Technical Ceramics Corp. (AMEX Symbol:AMK), Wedensday announced sales and earnings for the second quarter ended Dec. 31, 1989.

Net sales for the second quarter ended Dec. 31, 1989 decreased 13 percent to $5,661,000, as compared to net sales of $6,508,000 in the same period of the prior fiscal year. The company had a loss of $407,000 or 10 cents per common and common equivalent share, for the second quarter ended Dec. 31, 1989, compared with net income of $130,000, or 3 cents per common and common equivalent share, for the prior year second quarter ended Dec. 31, 1988.

Net sales for the six months ended Dec. 31, 1989 decreased 12 percent to $10,929,000 as compared with net sales of $12,428,000 for the prior fiscal year period. The net loss for the six months ended Dec. 31, 1989 was $280,000, or 7 cents per common and common equivalent share, compared with net income of $248,000, or 6 cents per common and common equivalent share for the prior fiscal year period.

Commenting on the loss for the three and six months ended Dec. 31, 1989,

management of the company said, ''The loss is primarily the result of approximately $680,000 in settlement costs related to a lawsuit that started in February 1988. The Company agreed to settle the matter so as to limit its potential exposure and focus its attention on its normal business.''

The sales decline for the three and six months ended Dec. 31, 1989 is primarily attributable to lower domestic sales of Hi-Rel products due to cutbacks in the defense sector of the economy, as well as to the overall competitive market pressure on prices and the general slowdown in the electronics industry.

International sales, representing 46 percent of the company's total sales, were slightly higher than the levels recorded in the comparable quarter during the prior fiscal year.

American Technical Ceramics Corp. designs, develops, manufactrures and markets ceramic and porcelain capacitors. The company's products are focused primarily in the premium priced, high reliability market for UHF and microwave applications.

BELMONT, CA (FEB. 14) BUSINESS WIRE - Oracle Corp., the world's largest supplier of database software and services, Wednesday announced its Third-Party Network Products Program, designed to allow customers to fill all of their networking needs from one source.

In addition to the ORACLE tools, applications, and database software, Oracle now offers third-party network software and hardware that customers can use to completely configure their enterprise network.

The first vendors in Oracle's Third-Party Network Products Program provide products based on the de facto industry standard communications protocol, TCP/IP (Transmission Control Protocol/Internet Protocol):

-- Fibronics International of Lowell, Mass., with KNET TCP/MVS and K2000 Ethernet Controllers for IBM MVS mainframe systems, which allow transparent data sharing via TCP/IP to and from an IBM host.

-- FTP Software of Wakefield, Mass., with PC/TCP Network Software for DOS a hardware-independent TCP/IP solution for personal computers running the MS-DOS operating system.

-- Racal InterLan of Boxborough, Mass., with a TCP gateway for Novell NetWare, which allows personal computers on a Novell LAN to share data with heterogeneous TCP/IP hosts. Racal InterLan also offers the NP622 and NP622A TCP/IP software and protocol processors for UNIX systems running Interactive System's 386/ix or AT&T's UNIX System V Release 3.2.

-- The Wollongong Group of Palo Alto, Calif., with WIN/TCP for VMS, to facilitate DEC VAX TCP/IP connectivity.

Oracle develops network products and services that enable customers to operate, administer, and maintain distributed heterogeneous enterprise networks. The foundation of Oracle's network product strategy is SQL Net -- the enabling technology for client/server computing and distributing database architecture of the ORACLE relational database management system (RDBMS).

LOS ANGELES--(BUSINESS WIRE)--First Interstate Bancorp (NYSE:I) Wednesday announced that a partnership affiliated with Kohlberg Kravis Roberts & Co. (KKR) would be purchasing approximately 3.38 million shares of common stock pursuant to First Interstate's current public offering.

The KKR partnership may also purchase up to an additional 112,275 shares if the underwriters exercise their rights under the over-allotment arrangements in connection with the offering. The purchase price of each share will be $33.

First Interstate and the underwriters have executed an underwriting agreement and the underwriters will offer the remaining shares to the public at the same price.

The offering is structured as a dual syndication with 6,000,000 shares being offered in the United States and 1,500,000 shares being offered concurrently outside the United States. The underwriters have been granted an option to purchase up to an additional 1,125,000 shares of

common stock to cover over-allotments.

''KKR has been a perceptive and knowledgeable owner of our stock, and we look forward to continuing our relationship with them,'' said Joseph J. Pinola, chairman and chief executive officer of First Interstate.

''This purchase is a significant and tangible demonstration of confidence in First Interstate as an investment,'' noted Edward M. Carson, president of First Interstate.

George R. Roberts, founding partner of KKR, said: ''First Interstate has a capable and experienced management team, unique banking franchise and solid core deposit base. We believe that the company's program to improve its operations and earnings will significantly improve the long-term value to stockholders.

''We look forward to continuing our role as long-term investors in the company.''

The KKR affiliate has owned approximately 4.6 percent of First Interstate's stock for more than one year, having purchased it in the open market.

As a result of the purchases contemplated in this offering, the KKR partnership will own approximately 9.98 percent of the company and it has agreed with First Interstate for a period of two years not to increase its ownership to more than 9.98 percent of First Interstate's shares. No restrictions on disposition of shares are involved, with limited exceptions.

#90045b0653 02/14/1990 ~Business Wire

MOUNTAIN LAKES, NJ (FEB. 14) BUSINESS WIRE - Computer Horizons Corp. (NASDAQ:CHRZ) Wednesday announced the amendment of its outstanding preferred stock shareholder rights plan to, among other things, lower from 20 percent to 15 percent of the outstanding shares of common stock, par value $.10, the share ownership threshold at which ''flip-in'' rights are triggered. The amendment contains a ''grandfather'' clause exempting any person currently owning more than 15 percent of the outstanding shares of common stock provided that they subsequently acquire no more than a maximum of an additional 1/2 of 1 percent of the outstanding shares (but in no event not more than 20 percent). Computer Horizons announced that an aggregate of approximately 2,378,700 shares of Common Stock is outstanding.

In announcing the amendment, Chairman and President John J. Cassese stated ''The Board of Directors adopted the Rights Plan in July 1989 to discourage attempts to take over control of the Company in a manner or on terms not approved by the Board as being in the best interests of the Company and the shareholders. In light of the recent stock purchases by Compagnie Generale d'Informatique (''CGI'') through its subsidiary CGI Corp. and the statement made by CGI and CGI Corp. in their Schedule 13D filings, the Board believes that today's amendment is a prudent further step for the protection of Computer Horizons' shareholders.'' According to the most recent such Schedule 13D filing, CGI Corp. holds 390,000 shares of Computer Horizons common stock, representing approximately 16.4 percent of the outstanding share figure announced by Computer Horizons.

Each outstanding share of Common Stock of Computer Horizons bears one preferred stock purchase right (a ''right'') issued under the Company's preferred stock shareholders right plan. Each Right entitles the holder to buy one one-hundredth (1/100) of a share, subject to adjustment. Each one one-hundredth (1/100) of a share of Series A Preferred Stock has voting, dividend and liquidation rights and preferences substantively equivalent to one share of Common Stock. The Rights will be exercisable and transferrable separately from the Common Stock only if a person or group acquires 15 percent (subject to the grandfather clause) or more of Computer Horizons Corp.'s Common Stock or announces a tender offer that would result in the ownership of 15 percent or more of the Common Stock.

The Rights also provide, in substance, that should any person or group acquire 15 percent (subject to the grandfather clause) or more of the Company's Common Stock, each Right, other than Rights held by the acquiring person or group, shall entitle its holder to purchase for $30.00 shares of Computer Horizons Corp. Common Stock having a market value of $60.00 (subject to adjustment). Additionally, if the company subsequently engages in a merger or other business combination with another person in which the Company is not the surviving corporation, or in which the outstanding shares of the Company's Common Stock are changed or exchanged, or if more than 50 percent of the Company's assets or earning power is sold or transferred, a Right would entitle a Computer Horizons Corp. shareholder, other than the 15 percent holder or group, to purchase for $30.00 shares of the acquiring person having a market value of $60.00 (subject to adjustment).

PORTLAND, OR (FEB. 14) BUSINESS WIRE - WTD Industries Inc. (NASDAQ:WTDI) reported net income of $33,000, or 1 cent per share -- a virtual break-even performance for the three months ended Jan. 31, 1990.

WTD earned $720,000, or 11 cents per share, in the comparable 1989 quarter.

Record third quarter sales of $104.7 million were up significantly over the $89.2 million for the 1989 period which was the previous record third quarter.

For the nine months ended Jan. 31, 1990, net income was $8.6 million, or $1.33 per share, a new record, up 109 percent from the prior year of $4.1 million, or 65 cents per share.

Record lumber and chip volumes helped produce record sales of $346.8 million for the first nine months of fiscal 1990, compared to $265.5 million for the same period last year, the previous nine-month record.

''While log costs compared to seasonally down lumber prices did not allow profitable operations during most of the third quarter, we look forward to increasing demand and a better pricing environment throughout the fourth fiscal quarter,'' stated Bruce L. Engel, WTD president. ''We believe that the company will report its eighth consecutive record earnings year -- up from $1.40 in 1989,'' he concluded.

On Jan. 15, 1990, WTD announced that its board had approved an open market common stock repurchase program of up to 800,000 shares. As of Jan. 31, 1990, the company repurchased 35,000 shares.

WTD Industries Inc. is America's fastest growing lumber company. With 34 lumber, plywood, and veneer facilities in Oregon, Washington, Montana, New York, California, South Dakota and Vermont, WTD is the fourth largest producer of lumber in the United States and the eighth largest in North America according to ''Forest Industries'' magazine's 1988 ranking. WTD products are sold domestically and internationally by TreeSource Inc., WTD's wholly owned subsidiary.

BELLEVUE, WA (FEB. 14) BUSINESS WIRE - Thousand Trails Inc. (OTC:TRLS) Wednesday announced net earnings of $1.6 million, or 6 cents per share, for the second fiscal quarter of 1990, which ended Dec. 31, 1989, and net

earnings of $3.1 million, or 13 cents per share, for the six month period then ended.

Aggregate revenues were $22.5 million and $47.2 million for the quarter and six month period, respectively.

This compares to net earnings of $2 million, or 9 cents per share, on total revenues of $20.6 million for the quarter ended Dec. 31, 1988, and net earnings of $5.5 million, or 23 cents per share, on total revenues of $45.9 million for the six month period then ended. The quarter and six month period in 1988 included extraordinary gains of $.7 million, or 3 cents per share, and $1.9 million, or 8 cents per share, respectively, from utilization of tax loss carryforwards. All tax loss carryforwards for financial statement purposes were fully utilized at June 30, 1989.

Thousand Trails Inc. operates one of the largest membership-based destination campground resort systems in the United States. The company owns, operates and sells memberships in a network of 39 campground resorts in 15 states and in British Columbia, Canada. Over 110,000 families are members.

#90045b0657 02/14/1990 ~Business Wire

SAN ANTONIO, TX (FEB. 14) BUSINESS WIRE - Kinetic Concepts, Inc. (NASDAQ: KNCI) Wednesday reported 1989 fourth quarter net earnings of $6.0 million or $.12 per share compared with $7.7 million or $.15 per share for the fourth quarter of 1988.

Total revenue in the fourth quarter of 1989 was $46.5 million compared with $41.5 million reported in the fourth quarter of 1988.

For the full year 1989, net earnings were $24.9 million or $.49 per share compared with $25.3 million or $.52 per share in 1988. Net earnings for 1988 were reduced by $.07 per share due to a non-recurring item. Earnings per share for the full year differ from the sum total of the reported quarterly earnings per share due to rounding differences.

Total revenue for 1989 was $176.5 million, compared with $153.2 million reported in 1988. There were 50.5 million average shares outstanding in 1989 compared with 48.7 million for 1988.

The Company said that rental revenue in the 1989 fourth quarter grew 16 percent to $43.1 million, up from $37.1 million in the fourth quarter of 1988. The company added that revenue in the fourth quarter of 1989 from

air suspension beds was $28.4 million and revenue from Kinetic Therapy beds was $11.0 million, both up from the prior year. Kinetic Therapy revenue in the fourth quarter was down slightly from the preceding 1989 third quarter because of lower RotoRest placements due to the normal seasonal downturn in serious trauma accidents.

James R. Leininger, Kinetic Concepts' chief executive officer said, ''We saw continued steady improvement in our business in the fourth quarter led by our KinAir III, FluidAir and TheraPulse products. However, as anticipated, fourth quarter selling and administrative expenses as a percent of revenue were higher, resulting in net earnings remaining at the same level as in the third quarter of 1989.

''Cash flow provided by operating activities was $15.6 million during the fourth quarter. This strong cash flow allowed us to pay our first-ever quarterly cash dividend of $.03 per share and reduce our long-term debt from $32.3 million at September 30, 1989 to $23.9 million at year end 1989. We expect Kinetic Concepts' cash flow to continue to be strong in 1990.''

Kinetic Concepts designs, manufactures and rents a full line of specialized beds that provide therapeutic benefits for acutely ill patients. -0- T

#90045b0663 02/14/1990 ~Business Wire

NEW YORK (FEB. 14) BUSINESS WIRE - Viacom Inc. (ASE:VIA) reported increased revenues and increased segment earnings from operations for the year ended Dec. 31, 1989 versus the like period last year in an announcement today by Sumner M. Redstone, chairman of the board, and Frank J. Biondi, Jr., president and chief executive officer.

The company's strong operating performance for the year resulted in revenue gains for comparable operations of 20 percent over 1988 and an increase in segment earnings from operations of 31 percent.

However, the sale of the Long Island and Cleveland cable systems in February 1989 limited reported revenue gains to 14 percent and segment earnings from operations gains to 23 percent over the prior year.

For 1989, revenues were $1.436 billion versus $1.259 billion in 1988, and segment earnings from operations were $252.0 million versus $205.3 million in 1988.

The company reported net earnings attributable to common stock of $113.6 million or $2.13 per share for the year ended Dec. 31, 1989, reflecting a gain on the sale of the Long Island and Cleveland cable systems. These results compare favorably to the net loss attributable to common stock of $188.8 million or $3.54 per share for the year ended Dec. 31, 1988.

Due principally to an increase in the non-cash charge to earnings associated with the long-term deferred incentive compensation plan, which reflects the increased market value of Viacom common stock, and also due to the impact of the cable systems which were sold, consolidated earnings from operations for the year ended Dec. 31, 1989 of $151.6 million were down 8 percent from the prior year earnings from operations of $163.9 million.

Excluding the impact of the long-term incentive plan and the cable systems which were sold, earnings from operations would have been $211.5 million, an increase of 23 percent over 1988.

The company positioned itself for growth during the third quarter of 1989 through the restructuring of bank debt under more favorable terms. Additional improvements in the company's capital structure include the exchange of Preferred Stock for Junior Debentures on March 31, 1989 and the subsequent redemption of $200 million of these debentures on Nov. 20, 1989.

Net interest expense of $312.2 million increased 8 percent over net interest expense of the prior year, reflecting the write-off of $30.5 million of deferred financing costs and non-cash interest expense associated with the Junior Debentures of $53.2 million. Preferred Stock

dividend requirements of $17.5 million in 1989 were significantly reduced from $65.7 million in 1988. Following the exchange, Preferred Stock dividends are no longer required.

#90045b0668 02/14/1990 ~Business Wire

HAYWARD, CA (FEB. 14) BUSINESS WIRE - Kenneth Anderson, chief executive officer of Monitek Technologies Inc. (NASDAQ:MTEK) announced a third quarter net loss of $7,937, 0 cents per share, on revenues of $1,934,131 vs. a loss of $65,308, 2 cents per share, on revenues of $2,036,502 for the similar previous year period.

For the nine months ended Dec. 31, 1989, the company showed net earnings of $27,914, 1 cent per share, on revenues of $5,920,479 vs. previous year loss of $428,240, 14 cents per share, on revenues of $5,475,888.

Anderson stated that third quarter revenue and earnings figures were somewhat disappointing, as a result of an unexpected downturn in customer orders in November and December of 1989. However, bookings have bounced back to higher than normal levels in January and early February, and the company's management believes that the previous slowdown was primarily the result of an industry-wide curtailment of year-end spending, and not the beginning of a long-term trend.

In addition, because of unsatisfactory test marketing results, the company has made the decision to sell its Polymer Controller directly to customers rather than through an exclusive arrangement with a large chemical supplier. This had a negative effect on third quarter revenues, which is expected to continue for the short-term, during the shift from OEM to direct sales.

Anderson cited a number of recent developments that he feels could have a significant impact on future sales, including negotiations with a major biotechnology firm to license the company's Cell Density analyzer, and the acceptance by a number of petrochemical companies of the Micro Pure analyzer for oil-in-water monitoring.

As of Dec. 31, 1989, Monitek had net working capital of $3,456 million, cash of $1,807 million, and shareholders' equity of $4,043 million, or $1.34 per share. Total shares outstanding are 3,010,000.

#90045b0674 02/14/1990 ~Business Wire

INDIANAPOLIS (FEB. 14) BUSINESS WIRE - The Somerset Group Inc. (OTC:SOMR) reported a loss from continuing operations for the year ended Dec. 31, 1989, of $654,000, or 36 cents per share, and a net loss, which includes results of discontinued radio operations, of $1,487,000, or 82 cents per share, which compares to 1988 income from continuing operations of $2,789,000, or $1.54 per share, and 1988 net income of $1,959,000, or $1.08 per share.

During the fourth quarter, the company recorded a loss from continuing

operations of $1,036,000, or 57 cents per share, and a net loss, including the discontinued operations, of $1,095,000, or 60 cents per share.

Consolidated 1989 sales from continuing operations amounted to $17,522,000, a decrease of 18 percent from sales of $21,311,000 recorded in 1988. The decrease resulted from lower sales of the company's precast and prestressed concrete products and services, as demand for new office buildings and other commercial construction declined during the year.

During the fourth quarter, First Indiana Corp., a 21.8 percent owned subsidiary, completed a restructuring of its balance sheet, which included early retirement of long-term, fixed-rate borrowings, and additions to the bank's allowances for losses on commercial real estate loans and real estate owned. The company's equity in losses of First Indiana Corp. amounted to $1,247,000 during the fourth quarter and $521,000 for the year.

The discontinued operations consist of the company's radio broadcasting stations, which were placed for sale in September 1989 following a decision by the board of directors to withdraw from the industry. The sale of the largest of the three stations was completed on Jan. 29, 1990, for a sale price of $12 million and an estimated pre-tax gain in excess of $2 million.

The Somerset Group Inc. is a diversified public holding company which through its divisions and subsidiaries engages in three primary lines of business -- banking, construction products and services, and environmental testing.

Through its 21.8 percent investment in First Indiana Corp., whose principal subsidiary is First Indiana Bank, a Federal Savings Bank, the company operates retail banking and real estate lending centers in strategic metropolitan communities.

The company provides construction products and engineering services through its American Precast Concrete Division, one of the largest manufacturers, marketers, and installers of precast/prestressed concrete building components in the Midwest.

#90045b0676 02/14/1990 ~Business Wire

LEBANON, TN (FEB. 14) BUSINESS WIRE - Cracker Barrel Old Country Store Inc. (NASDAQ/NMS:CBRL) Wednesday announced results for its second quarter and six months ended Jan. 26, 1990.

For the second quarter, net sales increased 29 percent to $48.3 million compared with $37.5 million a year ago. Income before income taxes increased 54 percent to $2.6 million compared with $1.7 million last year.

Net income for the second quarter increased 57 percent to $1.7 million compared with $1.1 in the year-earlier period. Earnings per share increased 38 percent to 18 cents compared with 13 cents in the second quarter last year.

For the six months ended Jan. 26, 1990, net sales increased 26 percent to $99.1 million compared with $78.4 million a year ago. Income before income taxes was up 46 percent to $8.8 million compared with $6.0 million last year.

Net income for the first half of fiscal 1990 increased 49 percent to $5.6 million compared with $3.7 million in the prior-year period. Earnings per share were up 26 percent to 58 cents compared with 46 cents in the like period last year.

Commenting on the results for the quarter, Dan W. Evins, chairman and president, said: ''Same store restaurant sales for the quarter increased 7.9 percent compared with last year, including 4.9 percent in real terms. Same store gift shop sales were up 19.7 percent.

Headquartered in Lebanon, Cracker Barrel Old Country Store, Inc. operates 81 restaurants located in Tennessee, Georgia, Kentucky, Indiana, South Carolina, Florida, Alabama, North Carolina, Ohio, Virginia, West Virginia and Illinois. The company's shares are traded in the National Market System with the NASDAQ Symbol CBRL.

ST. LOUIS (FEB. 14) BUSINESS WIRE - Emerson Electric Co. and McGill Manufacturing Company Inc., jointly announced Wednesday, in connection with the proposed acquisition of McGill by Emersub XXVI Inc., a subsidiary of Emerson, that Emerson and the Federal Trade Commission have entered into an agreement containing a Consent Order which will permit Emerson to complete the acquisition of McGill.

The principal provision of the Consent Order requires Emerson to divest the McGill mounted ball bearing business, which accounted for approximately 16 percent of McGill's 1989 revenues.

Emersub XXVI has commenced a cash tender offer for all outstanding shares of common stock of McGill for $93 per share of common stock. The tender offer and the waiting period under Hart-Scott-Rodino are scheduled to expire at 12 midnight on Feb. 14, 1990.

McGill, based in Valparaiso, Ind., manufactures bearings and products, primarily for industrial use.

Emerson Electric Co., based in St. Louis, manufactures a broad range of electronic, electrical and other products for consumer, commercial, industrial and government and defense markets.

#90045b0685 02/14/1990 ~Business Wire
SEATTLE (FEB. 14) BUSINESS WIRE - Aldus Corp. (NASDAQ: ALDC) Wednesday announced revenues and earnings for the fourth quarter and fiscal year ended Dec. 31, 1989.

For 1989, the company reported revenues of $87.9 million and net income of $15.5 million, compared with revenues of $79 million and net income of $14.6 million in 1988. Earnings per share were $1.21, vs. $1.15 in 1988. Revenues increased by 11 percent over 1988, and net income increased by six percent.

For the fourth quarter ended Dec. 31, 1989, the company reported revenues of $23.7 million, compared to the $23.6 million reported in the fourth quarter of 1988.

Net income for the quarter was $4.6 million, up from the $4.3 million the company earned for the same period a year ago. The company recorded earnings of 36 cents per share, compared with 34 cents per share for the fourth quarter of 1988.

"Our fourth quarter results were better than expected as a result of strong sales in our European markets and the shipment of our Japanese-language version of PageMaker 3.0 for the PC in December," said Bill McAleer, vice president of finance. "Domestic revenues benefited from the effective promotional programs implemented during the quarter."

On Feb. 6, 1990, the company signed a definitive agreement to acquire Silicon Beach Software, a privately owned San Diego software publisher. Silicon Beach's line of graphics, multimedia, and publishing software - all priced below $500 - gives Aldus a suite of entry-level products to complement its own line of advanced software products.

The acquisition will be made through a merger in which shares of Aldus common stock will be exchanged for the outstanding shares of Silicon Beach. The number of shares to be exchanged in the merger will be determined in approximately three weeks when the acquisition closes.

In a separate announcement that day, the company announced the newest version of its popular desktop publishing package, Aldus PageMaker 4.0 for the Macintosh, which will be released in the second quarter of 1990.

Milestones for Aldus during 1989 included the release of Aldus Persuasion 2.0, a desktop presentations program for the Macintosh; Aldus PageMaker for OS/2 Presentation Manager, the first desktop publishing package available under the new OS/2 operating environment; Aldus PageMaker Color Extension for the Macintosh; and a Japanese-language version of Aldus PageMaker for the PC.

In 1989, the company also announced Aldus PrePrint, a program for generating four-color separations from the desktop. To date, more than 500,000 copies of Aldus software have been sold worldwide.

CONTACT: Aldus Corp., Seattle, Jane Dauber, (206) 628-6674 or Fleishman Hillard, Los Angeles, Scott Tagliarino, (213) 629-4974.

#90045b0687 02/14/1990 ~Business Wire

WILMINGTON, MA (FEB. 14) BUSINESS WIRE - Dynamics Research Corp. (NASDAQ: DRCO) announced Wednesday that revenues were $88.5 million and net income was $3.6 million or 71 cents per share for the year ended Dec. 30, 1989, a decline of 4.7 percent and 11.7 percent respectively from the previous year.

For the quarter ended Dec. 30, 1989, revenues were $29.0 million and net income was $1.7 million or 34 cents per share, a decline of 4.4 percent and 3.0 percent respectively from the comparable quarter in 1988

Albert Rand, president said "The defense markets have been characterized by significant changes during the past year. In spite of this, we maintained our continuity in long-standing defense programs. The company's net income is respectable at four percent of revenues, given the slight decline in business level. Return on average shareholder equity was 16 percent for the year."

Dynamics Research Corp. provides a wide range of specialized technical services to the Department of Defense and also manufactures components for industrial measurement and control.

HOUSTON (FEB. 14) BUSINESS WIRE - Team Inc. (ASE:TMI) Wednesday announced that its board of directors declared a $.025 per share dividend payable on March 12 to stockholders of record Feb. 26.

This dividend is for the quarter ended Nov. 30, 1989.

The company extended the record date to Feb. 26 in order to coincide with the expiration of the conversion right in connection with the recent call of its 13 percent convertible subordinated debentures. Debenture holders who convert on or prior to Feb. 26 will receive the dividend.

Team Inc. provides repair, specialty and transportation services primarily to industrial customers and privatized services to governmental entities. The company has 50 operating locations in 23 states and serves the international market through licensee arrangements in 10 countries.

#90045b0691 02/14/1990 ~Business Wire
LOS ANGELES (FEB. 14) BUSINESS WIRE - MEDCO Research Inc. (NASDAQ:MEDR/BSE:MRE.B) Wednesday announced it has submitted a new drug application (NDA) to the U.S. Food and Drug Administration (FDA) for the intraveneous use of ADENOSCAN as an adjunct to thallium-201 scintigraphy

in patients unable to exercise adequately.

Thallium-201 scintigraphy is a noninvasive nuclear cardiac imaging procedure widely used to establish the diagnosis of and to predict the severity of underlying coronary artery disease and the attending risk of heart attack.

ADENOSCAN is an adenosine product. MEDCO's first adenosine product, ADENOCARD was approved for marketing by the FDA in October, 1989 for the treatment of paroxysmal supraventricular tachycardia.

It is estimated that more than 1 million patients undergo thallium-201 scintigraphy studies in the United States every year. These studies require the use of adequate physical exercise as the method of ''stress.'' However, a significant group of patients are unable to exercise adequately due to a variety of physical limitations.

For these patients, the thallium-201 scintigraphy studies are of very limited value and the only well established alternative is to submit to cardiac catheterization which is a traumatic and invasive procedure involving certain risks. Therefore, the medical community has been searching for drugs that can demonstrate the capability of substituting pharmacologic stress for physical stress in this patient population.

To the company's knowledge, no drug has been approved by the FDA to date for the specific indication.

The company submitted its NDA application requesting the FDA to approve ADENOSCAN for marketing as an adjunct to noninvasive thallium-201 scintigraphy in patients unable to exercise adequately. In clinical trials sponsored by the company, pharmacological stress with ADENOSCAN was compared to exercise stress during thallium cardiac imaging.

The side effects of the drug were generally mild and transient. The company believes that ADENOSCAN, if approved for marketing by the FDA, has the capability of making an important contribution to the growing field of cardiac imaging.

MEDCO Research is engaged in the acquisition and development of new drugs primarily for the diagnosis and treatment of cardiovascular diseases.

#90045b0694 02/14/1990 ~Business Wire

SALT LAKE CITY, UT (FEB. 14) BUSINESS WIRE - Questar Corp. (NYSE: STR) achieved its highest net income in four years in 1989, with all principal business lines improving their earnings over a year earlier.

The diversified energy company had 1989 net income of $50,757,000, or $2.55 per share, compared with $25,851,000, or $1.28 per share, a year ago. The net income comparison included a $19,932,000, or $1.03 per share, after-tax write-down of oil and gas properties in 1988 under the full-cost accounting method. Excluding the write-down, Questar's 1988 net income was $45,783,000, or $2.31 per share.

"We are pleased with the across-the-board improvement by our principal businesses in the face of continuing challenges in their respective industries," said R.D. Cash, Questar chairman, president and chief executive officer.

"Each has developed successful strategies to move forward despite such obstacles as volatile oil and gas prices and changes in federal regulation of the interstate pipeline industry. These businesses provide a strong, flexible foundation as we pursue growth opportunities in the 1990s."

Questar's net income for the fourth quarter of 1989 was $17,072,000, or 84 cents a share, compared with $14,160,000, or 72 cents a share, for the year-earlier period.

Questar's natural gas transmission subsidiary, Questar Pipeline Co., earned a record $21,077,000 in 1989 compared with $18,271,000 for the previous year. The comparisons do not include earnings by Questar Energy Co., the pipeline's former marketing affiliate, of $1,525,000 in 1989 and $1,189,000 in 1988.

Questar Energy was merged with an exploration and production subsidiary in early 1990 to respond to federal regulatory requirements and to consolidate marketing activities.

Questar Pipeline's results reflected an 11 percent increase in deliveries through its system during the year to a near-record 191.4 million decatherms (Dth). Transportation of gas increased 19 percent to 135.4 million Dth.

The growth helped to offset price discounting due to competitive market conditions and lower sales for resale and firm transportation for Mountain Fuel Supply Co., Questar's retail natural gas distribution utility.

#90045b0698 02/14/1990 ~Business Wire

DALLAS (FEB. 14) BUSNIESS WIRE - Atmos Energy Corp. (NYSE:ATO) announced that it has filed for a rate increase with the Kentucky Public Service Commission (KPSC) for its Western Kentucky Gas Co.

The request for a rate increase of approximately $8.9 million per year was filed on Feb. 13, to be effective March 15. The KPSC may suspend a rate increase request for up to five months to permit a full investigation. By Kentucky statute, the KPSC must act on the filing within 10 months of the filing date.

In making Wednesday's announcement, Charles K. Vaughan, Atmos chairman, said, ''Western Kentucky Gas Co.'s last rate adjustment was in 1986. Several factors have combined to cause the company to file for an increase at this time, including increases in operating and maintenance expenses and the need to earn a reasonable return on plant additions since the last rate case.''

Vaughan added that large industrial customers now have other energy options available to them. ''In this rate filing, we are proposing cost of service based rate structures by customer class which will allow us to be more competitive in retaining and expanding this very important segment of our business,'' he said.

Atmos Energy Corp. provides natural gas service to more than one-half million customers in Texas, Louisiana and Kentucky through its operating companies - Energas Co., Trans Louisiana Gas Co. and Western Kentucky Gas Co.

MELBOURNE, Australia (FEB. 14) BUSINESS WIRE - BHP-Utah Minerals International, wholly owned by Broken Hill Proprietary Company Limited (NYSE:BHP) and London-based Hanson PLC Wednesday announced that they have signed a Letter of Intent for the acquisition by BHP of Hanson's 70 percent interest in Mount Goldsworthy Mining Associates.

The acquisition will increase BHP's interest in the Mount Goldsworthy Iron Ore Project and its related infrastructure to 100 percent. According to Mr. Gavin McDonald, Managing Director of BHP-Utah Iron Ore:

-- ''Mount Goldsworthy has made, and will continue to make, an important contribution to Australia's export earnings. Through Utah, BHP has had a long term association with Goldsworthy and, in taking up the Hanson interest, it will be pleased to continue the association.''

-- ''BHP has a high level of confidence in the long term outlook for the iron ore export industry. The acquisition of Goldsworthy will complement its existing Pilbara iron ore operations and will broaden its ability to benefit from the opportunities in this important market.''

-- ''Both the BHP-Utah Iron Ore and Goldsworthy operations have experienced management and workforce and technical skills capable of contributing to their mutual benefit as well as giving opportunities for cross utilization of Port and other infrastructure facilities in the Pilbara.''

-- ''Goldsworthy will continue to operate as a significant iron ore producer but within the framework of BHP-Utah Iron Ore headquartered in Perth. Its incorporation within this larger group will be of benefit to employees and customers.''

Completion is expected to take place in March when further information will be made available.

The Broken Hill Proprietary Company Limited is an international resources company with three principal lines of business: oil and natural gas, minerals, and steel. Headquartered in Melbourne, it operates on six continents. U.S. operations are headquartered in San Francisco.

SUNNYVALE, CA (FEB. 14) BUSINESS WIRE - Sensor Control Corp.

(NASDAQ:SNCO) on Wednesday, announced second quarter earnings of approximately $145,000 for the three months ended Dec. 31, 1989 on sales of approximately $1,180,000.

This resulted in an earnings per share of 7 cents for the quarter. Year to date earnings for Sensor Control Corp. are approximately $344,000 on sales of approximately $2,328,000 and an earnings per share of 16 cents.

Sensor Control Corp. is comprised of four companies focused on the design, manufacture and marketing of sensor instrumentation for industrial customers.

Gentran manufactures pressure sensors for the plastics, rubber and other industries. Linear Laboratories provides a broad range of noncontact infrared temperature measurement devices for a variety of industrial markets.

Another company, Gamma Instruments, manufactures high speed noncontact gauges that measure metal thickness and a comprehensive data acquisition and reporting package used with the gauges. A fourth company, Tactile Robotics Systems, has developed a tactile sensing system that gives robots the ability to determine the size, shape, orientation and identity of parts by touch using fiber optics technology.

#90045b0712 02/14/1990 ~Business Wire

PURCHASE, NY (FEB. 14) BUSINESS WIRE - JWP Inc. (NYSE: JWP), a worldwide technical services company, specializing in facilities and information systems, announced Wednesday that 1989 revenues and net income for the fourth quarter increased by 77 percent and 42 percent to $561 million and $11.4 million, respectively, compared to the year ago period.

Revenues and net income for the year increased by 88 percent and 40 percent to $1.74 billion and $38.8 million, respectively. Earnings per share for the year and the fourth quarter increased to $1.90 and 53 cents, from $1.48 and 42 cents in the prior year.

During 1989, internal growth continued to be strong and backlog increased to $1.2 billion at year end, compared to $700 million as of Dec. 31, 1988. ''Based on our strong backlog and continuing robust growth in our markets '' Dwyer added, ''we project that 1990 earnings will grow by at least 20 percent over 1989.''

Profit margins in the fourth quarter were virtually unchanged compared to

the third quarter of 1989, after adjusting for seasonal factors of the Company's water business and additional lower-margin international revenues.

The acquisition of United Kingdom-based Drake & Scull added about $75 million of revenues and a slight profit for the fourth quarter after acquisiiton costs. The purchase of Drake & Scull reflects the Company's optmistic outlook for the long-term potential of the international marketplace.

This acquisition is non-dilutive and, as with its domestic business, JWP expects to gradually increase its international margins.

Regarding the potential sale of the Queens County, New York portion of JWP's subsidiary, Jamaica Water Supply, both the City of New York and the Company have submitted valuation appraisals to the Supreme Court of the State of New York. The Court has scheduled a trial for April, 1990.

JWP is the premier technical services company in the world specializing in facilites and information systems. The Company is also establishing itself as a leader in the environmental systems and services industry, including ownership of the largest investor-owned water utility in New York State.

#90045b0724 02/14/1990 ~Business Wire

NEW YORK (FEB. 14) BUSINESS WIRE - The Leslie Fay Companies Inc. announced Wednesday that it had achieved record sales and net income for the 1989 fiscal year.

Net sales for the 52 weeks ended December 30, 1989, were $786,257,000 compared to $682,690,000 for the 53 weeks ended December 31, 1988, an increase of 15.2 percent, while net income for the year was $25,762,000, or $1.35 per share, compared to $22,251,000 or $1.17 per share for 1988, an increase of approximately 15.8 percent.

John J. Pomerantz, Chairman and Chief Executive Officer of Leslie Fay stated, "We feel fortunate that we were able to achieve record results for the year. 1989 was an extremely difficult year for the apparel industry, to a great extent as a result of the uncertainties in the retail climate and the retailers' promotional activities.

"1990 is expected to be another year of challenges, but we also consider it a year of opportunity, and the programs we have put in place should bear fruit, particularly during the last half of the year. We remain committed to maintaining and increasing our market share, to continued growth and development of the Leslie Fay 'super-brand' and to exploring the possibilities for new products and acquisitions."

For the 13 weeks ended December 30, 1989, net sales and net income were $171,739,000 and $2,396,000 ($.13 per share), respectively, compared to $165,187,000 and $4,677,000 ($.24 per share) for the 1988 13 week period.

The 1989 fourth quarter results were affected by a pre-tax reserve provision of $1,900,000 ($ .06 loss per share after taxes) on account of the $2,157,000 accounts receivable owed to the company by the Allied/Federated Stores at the time of their bankruptcy, by a pre-tax write-off of $665,000 ($.02 loss per share after taxes) on account of the closing of the Knitivo division and by greater than planned markdowns in certain divisions.

Pomerantz also stated, "We believe our strong financial position will better enable us to meet the challenges that lie ahead. In January, the Company issued $75,000,000 of Senior and Subordinated Notes to two insurance companies at favorable interest rates and used the proceeds primarily to repay subordinated debt which would have been due commencing

August 1990.

"Giving effect to such issuance, working capital at December 30, 1989, was $167,520,000 up from $130,118,000 at December 31, 1988. Stockholders' equity increased to $159,651,000 from $133,786,000."

Leslie Fay is a leading manufacturer of women's dresses, suits, blouses, sportswear and activewear. Its common stock is listed on the New York Stock Exchange under the symbol LES.

CHANTILLY, VA (FEB. 14) BUSINESS WIRE - Verdix Corp. (NASDAQ: VRDX) Wednesday announced record revenues for the fiscal 1990 third quarter ending Dec. 31, 1989 of $2,986,811 compared to $2,575,713 in the third quarter of fiscal 1989, a 16 percent increase.

Net income for the quarter was $668,546, or 6 cents per share compared to $550,523, or 5 cents per share for the like quarter of the previous fiscal year, a 21 percent increase.

Revenues for the nine month period ending Dec. 31, 1989 increased by 14.7 percent to $7,777,262 compared to $6,780,553 in the like period last year.

The company reported net income for the nine month period of $1,216,536, or 10 cents per share, compared to $1,109,934, or 9 cents per share for the like period last year.

E. Gary Clark, president and chief executive officer said, ''The resumption of growth in the third quarter reflects, in part, the results of the increased expenditures to produce future growth reported last quarter. We expect this resumption of growth will be a continuing trend.''

NYON, Switzerland (FEB. 14) BUSINESS WIRE - International 800 Telecom Corp. (PHLX:TLL) announced Wednesday the retirement of 5.4 million shares of its common stock reducing the total outstanding common shares to 5,227,975.

The reduction was accomplished by a restructuring agreement involving the former parent of International 800 Telecom Corp. (Telecom) and Network Data Systems Ltd. (Network), a Canadian public owned corporation.

The transaction reduces the ownership position of Worldwide 800 Services Inc. to 461,000 shares of common stock or 9 percent from 5,861,000 shares or 55 percent. Network, the owner of 2 million shares of Telecom, as a result increased its position from 19 percent to 38 percent.

A one time extraordinary gain of $1.8 million will be reported by Telecom in the quarter ended March 31, 1990 as a result of the restructuring.

The transaction may require the approval of the Federal Communications Commission (FCC) and as a result all documents are being held in escrow pending said clearance by corporate counsel.

#90045b0738 02/14/1990 ~Business Wire
BROOKFIELD, WI (FEB. 14) BUSINESS WIRE - In a letter to shareholders Payco American Corp. (NASDAQ:PAYC) announced the following financial results.

Payco American Corp. has just completed the most profitable year in the history of the company.

During 1989, the company achieved new record high levels of accounts received for collection, revenues and profits.

The net income and net income per share for 1989 was $4,063,000 and 81 cents, respectively. Such results represent a 56 percent improvement in performance in relation to the comparable statistics of 1988.

In 1989, the company experienced a significant increase in accounts received for collection. A total of $2,301,000,000 of accounts were

received for collection, representing a 25 percent increase compared to 1988. The accounts received for collection in 1989 included approximately $76,000,000 from the company's contract with the General Services Administration (GSA).

Operating revenue for 1989 was $95,737,000 which represents an increase of 20 percent compared to 1988. Such an increase results from an increase in accounts received for collection, as well as the related high levels of actual collections and ZeroLoss activities during the year. Included in the 1989 revenue is approximately $545,000 relating to work performed under the GSA contract.

Operating expenses rose to a level of $89,310,000 or an 18 percent increase over 1988. The primary factor impacting this increase is salaries and benefits, as well as other variable expenses that tend to fluctuate with the levels of accounts received for collection.

Revenue increased 17 percent during the fourth quarter of 1989 compared to the same period in the prior year. The corresponding 1989 fourth quarter net income and net income per share was $849,000 and 17 cents respectively. Such profit performance represents a 50 percent increase compared to the fourth quarter of 1988.

In the first quarter of 1990, the company purchased certain assets of Doctors Business Bureau of Tucson, Ariz. Doctors Business Bureau is a collection agency specializing in services for the health care industry. The assets acquired include the ability to continue to provide collection service for its approximately 150 clients, as well as the right to future revenues derived from existing account inventory.

#90045b0746 02/14/1990 ~Business Wire

DALLAS (FEB. 14) BUSINESS WIRE - National Heritage Inc. (NYSE:NHR) Wednesday reported net income of $525,000, or 3 cents per share, for the second fiscal quarter ended Dec. 31, 1989, vs. $1,695,000, or 10 cents per share, a year earlier.

Second quarter revenues rose to $27,730,000, compared with $21,086,000 in the year ago quarter.

For the six months ended Dec. 31, 1989, net income was $189,000, or 1 cent per share, vs. $2,769,000, or 16 cents per share, for the first half of fiscal 1989. Revenues totaled $50,454,000, compared with $41,748,000 a year earlier.

Chairman Hugh C. Shurtleff indicated that higher revenues for the period were due to the expansion of National Heritage's pharmacy operations and Medicaid rate increases at the long-term care facilities managed by the company.

Second quarter earnings were adversely affected by a number of adjustments including a $353,000 reserve for uncollectible accounts due to contractually subordinated management fees and a $225,000 charge related to the pharmacy unit's inventory and accounts receivable.

In addition, the company incurred $275,000 of expenses in the second quarter for consulting services provided in reviewing the accounting and property management function of the Healthcare Management Group.

Results of this review, completed in December 1989, have enabled National Heritage to implement procedures to enhance cash flow by maximizing reimbursements and controlling expenses at many of the company's facilities. Shurtleff noted that these procedures should result in improved operating margins in future periods.

As previously reported, National Heritage is engaged in preliminary discussions with privately held Life Care Centers of America regarding a possible combination of the two businesses. These discussions call for the establishment of a new company comprised of the combined assets and operations of Life Care along with selected assets and operations of certain affiliates.

It is anticipated that securities of the new company would be publicly traded, with Life Care and its affiliates maintaining a controlling interest in the new company.

National Heritage Inc. is one of the nation's leading managers of nursing homes, retirement centers and assisted living facilities.

CHESTNUT HILL, MA (FEB. 14) BUSINESS WIRE - The Neiman Marcus Group Inc. (NYSE: NMG) announced Wednesday that it has signed a letter of intent to open a Neiman Marcus store at the Long Island Galleria in Westbury, N.Y.

The new Neiman Marcus store will contain approximately 140,000 gross square feet and is targeted to open in the fall of 1993 as part of a new Long Island Galleria shopping center being created by Westfield Inc.

Richard A Smith, chairman and chief executive officer of The Neiman Marcus Group, said, ''The Long Island store, together with our existing store in Westchester, N.Y., and a planned store in Paramus, N.J., will establish a strong Neiman Marcus presence in greater metrpolitan New York, one of the country's major retail markets.''

Neiman Marcus currently operates 23 stores nationally and has an expansion program with an objective of opening up to 10 new stores by 1995. Its most recent new store opened in October 1989 in the Galleria at Tysons II in McLean, Va. Additional stores have been announced for locations in Denver Minneapolis and Cleveland.

The Neiman Marcus Group, which is 60 percent owned by General Cinema Corp. of Chestnut Hill, Mass., also includes Bergdoff Goodman and Contempo Casuals.

NEW YORK (FEB. 14) BUSINESS WIRE - Ehrlich Bober Financial Corp. announced Wednesday that it expects to receive approximately $2 million in connection with the March 1989 sale of its investment in Money Management Systems Inc. The payment is based upon a settlement agreement entered into with respect to the contingent purchase price and payment is expected

between Feb. 28, 1990 and June 1, 1990. The company has already realized a gain of $1,076,000 in connection with the sale, in its fiscal year ended June 30, 1989.

Ehrlich Bober, through Ehrlich Bober & Co. Inc., is an investment banking company that originated, underwrites, trades and markets municipal securities.

TUSTIN, CA (BUSINESS WIRE)--Trimedyne Inc. (NASDAQ:TMED) Wednesday announced eight patients with plaque (fatty) blockages in peripheral (leg) vessels have been successfully treated in a clinical study using its new holmium "cold" laser.

Trimedyne's cold laser uses extremely rapid, high energy pulses to vaporize obstructions in blood vessels at normal body temperature, without creating heat.

In commenting on the results, Howard K. Cooper, president of Trimedyne, said, "We are very pleased with the positive results from our initial human clinical trials. In each successful case, the patient was spared the risk and expense of surgery and was able to leave the hospital within 48 hours."

The patients were treated at the Arizona Heart Institute in Phoenix by Doctors Edward B. Diethrich and Dr. Oswaldo Santiago. A ninth patient with an extensive blockage in a leg artery was later successfully treated with Trimedyne's cold laser at this institution and the laser treatment was broadcast live by satellite closed circuit television on Feb. 12 to approximately 600 physicians attending the International Congress of Vascular Surgeons in Phoenix.

Trimedyne is the leading manufacturer of proprietary lasers and laser catheters for removing blockages from blood vessels.

SCHENECTADY, NY (FEB. 14) BUSINESS WIRE - The Korea Electric Power Corp. (KEPCO) of South Korea has invited GE to enter contract negotiations for the supply of power generation equipment - including four of the company's most advanced combustion turbines - that will be installed at a $570 million combined-cycle plant to be built on Ildo, an island in Incheon Bay west of Seoul.

The plant, which is scheduled for full combined cycle service in late 1992 will consist of four advanced combined-cycle GE STAG 107F units, each using one 150-MW-Class GE MS7001F (7F) gas turbine-generator and one new GE steam turbine-generator rated at 83 megawatts.

Fueled by liquified natural gas, the plant will produce more than 900 megawatts of electric power at a greater than 50 percent efficiency.

''This selection is particularly gratifying to GE,'' said Del Williamson, vice president and general manager of GE Industrial and Power System Sales. ''We passed one of the most open, rigorous and through evaluations ever given to our equipment and technology in the worldwide marketplace to win this bid over our global competition. We now look forward to working with KEPCO and other Korean suppliers to implement this very strategic project.''

The four 7F gas turbines will be built at GE's gas turbine manufacturing facilities in Greenville, S.C. The four steam turbines and all eight generators will be manufactured at GE facilities in Schenectady, N.Y.

The 7F belongs to GE's family of advanced technology gas turbines which have been ordered by five worldwide electric utilities. KEPCO's selection brings to 19 the number of GE advanced technology gas turbines chosen by major utilities to answer their generating needs of the 1990s.

TAMPA, FL. (FEB. 14) BUSINESS WIRE - Eastern Environmental Services Inc. (NASDAQ: EESI) Wednesday announced revenues for the six months ended Dec. 31, 1989 of $12,459,491 as compared to $9,112,222 for the comparable period of 1988.

Quarterly revenues were $4,413,114 compared to $4,378,500 for 1988. Net income for the quarter ended Dec. 31, 1989 was $117,833 or three cents per share as compared to net income of $277,851 or seven cents per share for the like quarter of the previous year.

The results were adversely impacted by lower than expected margins on asbestos abatement and increases in certain overhead expenses. At Dec. 31 1989 the Company had working capital of approximately $5,733,286 and a current ratio of 3.1 to 1 compared with working capital of $6,815,857 and a current ratio of 4.2 to 1 at June 30, 1989.

Second quarter results are not necessarily indicative of results for the Company's full fiscal year.

#90045b0779 02/14/1990 ~Business Wire

BROOMFIELD, CO. (FEB. 14) BUSINESS WIRE - Ball Corp.'s Relay Mirror Experiment (RME) satellite was launched aboard a Delta II rocket from Cape Canaveral Wednesday.

RME will conduct an innovative experiment demonstrating the latest advances in Ball's fast-steering mirror technology.

The Delta II launch vehicle will deploy the RME spacecraft into a low-Earth orbit. Designed to test a ground-based laser system, the RME spacecraft, payload experiment package, and other required hardware have been built for the Strategic Defense Initiative Organization (SDIO). Valued at $80 million, RME represents Ball's largest aerospace contract to date. All five divisions of Ball's aerospace systems group had major roles in the project, which took three and one-half years to complete.

''The experiment's objective is to determine how accurately and with what stability a laser beam can be directed and tracked using fast-steering mirror technology,'' says Ball vice president and RME program manager, John Simpson.

Two separate ground stations and a satellite communications network are required to support the experiment. The primary ground site is the Air Force Maui Optical Station on Mount Haleakala, Maui, Hawaii. As the RME spacecraft passes over the two ground stations, they will direct two low-power laser beams at the spacecraft: one from the optical station and the second beam from the scoring control site. The spacecraft relay mirror will reflect a beam back down to Earth toward a target board

located at the experiment scoring and control site. Ball used 12 fast-steering mirrors, including a 24-inch relay mirror, in the RME spacecraft experiment payload and the two ground stations.

''Ball's fast-steering mirror technology can used for such diverse applications as base communications, space telescopes, tactical sensors, medical laser imaging, laser weapons systems,'' says Simpson. ''We are an industry leader in developing the fast- steering mirror technology that rapidly points a beam of light toward a designated target.''

The RME spacecraft was built at the company's space systems division in Boulder, Colo. Ball Corp. manufactures and markets packaging, industrial and consumer products, and provides aerospace systems and professional services to the federal sector. The company participates in the domestic glass container industry and Canadian packaging market through two joint venture companies, Ball-InCon Glass Packaging Corp. and Ball Packaging Products Canada, Inc. The company reported 1989 sales of $1.22 billion.

#90045b0794 02/14/1990 ~Business Wire

BLUE BELL, PA (FEB. 14) BUSINESS WIRE - Unisys announced Wednesday that it has added a data compression feature to its 5073/0899 18-track cartridge tape subsystems on 1100/2200 mainframes.

The data compression feature increases the data storage capacity of on-site systems by up to 500 percent. Also included is an ASCII-to-EBDIC and EBDIC-to-ASCII data format hardware translator.

The new software, which is sold as an upgrade to existing Unisys 5073 cartridge tape controllers, contains an algorithm that detects repeating strings of data in a tape block and converts or compresses the data in a shorter string. Compression ratios will vary depending on the system environments and data structure. In general, the larger the block size, the greater amount of tape compaction.

''Unisys 1100/2200 mainframe customers in communications, airlines, government, and banking will be the primary market for this product,'' said Marlin Kovaleski, vice president, peripherals for the Unisys computer systems group.

''This simple software upgrade will extend the life of the cartridge tape units they already have. They can store more data without attaching more systems and slowing the data storage and retrieval process--in fact, the data compression feature actually speeds up the read/write process somewhat.''

First customer shipments are slated to begin in March. The new Unisys os 1100 data compression feature is priced at $14,850.

Unisys is a $10 billion manufacturer of commercial information systems, defense systems and related services. It has more than 80,000 employees and 60,000 customers in over 100 countries.

#90045b0806 02/14/1990 ~Business Wire

DALLAS (FEB. 14) BUSINESS WIRE - Abatix Environmental Corp. (NASDAQ:ABIX) (Common), ABIXW (Warrants) Wednesday announced unaudited record sales and earnings for the fourth quarter and year ended Dec. 31, 1989.

For the year ended Dec. 31, 1989, sales were $8,649,000, an increase of 125 percent from $3,841,000 in fiscal year 1988. Net income for 1989 rose 236 percent to $501,000 or 26 cents per share from $149,000 or 15 cents per share in the prior year.

Sales for the fourth quarter of 1989 increased 155 percent to $2,221,000 from $870,000 one year earlier. Net income increased to $121,000 or 6 cents per share from $6,000 or 1 cent per share in the fourth quarter of 1988.

Gross margins in fiscal year 1989 were 27 percent as compared with gross margins in 1988 of 26 percent. Pre-tax profit margins also increased, rising to 9 percent for the current year, up from 6 percent in the prior year.

Calculations for the fourth quarter and fiscal year ended Dec. 31, 1989, were based on weighted average shares outstanding of 2,029,166 and 1,898,311 respectively, an increase of 97 percent and 86 percent over the 1,028,261 and 1,022,082 shares outstanding in the same periods in 1988. The increase in the weighted average number of shares outstanding was principally the result of the Company's initial public offering in March 1989.

Terry W. Shaver, President, commented, ''Fiscal 1989 was a year of exceptional growth for our Company. Revenues increased dramatically as we

opened many new accounts throughout the country and expanded business with our loyal customer base. In its first year of operation, our Hayward, California office turned in an excellent performance, as did our existing Dallas and Beaumont distribution centers.

''In fact, demand for our products in Texas reached such high levels that early this month we opened a new distribution center in Houston. We place a strong emphasis on the development of our sales and customer service staffs and believe this corporate policy can be credited for our increased sales.

''Although our industry continues to be very competitive, we have been able to lower our product costs and obtain excellent terms from our suppliers. As a result, Abatix's gross margins continue to improve. The achievement of record net income levels in fiscal 1989 was the result of the effective management of overhead expenses associated with our higher sales levels, and improved pre-tax profit margins.''

Looking ahead, Shaver said, ''By serving the hazardous waste and industrial safety industries, while continuing to grow our core business of providing supplies to the asbestos abatement market, we have and will continue to successfully diversify our customer base and increase the market for our products. With four distribution centers now opened, we are prepared to serve an expanded customer base.''

Shaver concluded, ''We are pleased that our commitment to customer service and strong sales efforts have resulted in record operating results for the past fiscal year. We are confident that Abatix is well positioned to capitalize on the opportunities in our markets in fiscal 1990.''

Abatix Environmental Corp. distributes personal safety and protection products and durable and non-durable equipment and supplies to the asbestos abatement, industrial safety and hazardous materials industries.

The Company has distribution centers in Dallas, Beaumont and Houston, Texas and in Hayward, California from which it services customers throughout the Southwest, Midwest and Pacific Coast including asbestos abatement contractors, and toxic waste remediation, chemical, petrochemical and general industrial companies.

#90045b0810 02/14/1990 ~Business Wire

ROCHESTER, NY (FEB. 14) BUSINESS WIRE - Vari-Care, Inc. (NASDAQ:VCRE) Wednesday announced unaudited financial results for the first quarter ended Dec. 31, 1989.

Revenues for the first quarter of fiscal 1990 were $12,202,000, up 8 percent from the $11,268,000 in the same period last year. The company reported net income of $373,000 vs. $360,000 in the prior year's first quarter. Earnings per share for the fiscal 1989 and fiscal 1990 first quarters were 7 cents.

Robert H. Hurlbut, president of Vari-Care, stated, ''The revenue growth for the quarter reflects favorable changes in room rates and higher use of ancillary services provided by the Company to its Medicare patients, and was achieved despite a slight reduction in overall occupancy.

''Revenues rose at a more rapid rate than net income as a consequence of the lower margins associated with providing ancillary services to Medicare patients, as well as increased expenses arising from recruitment and

retention of qualified nursing personnel.'' Hurlbut continued, ''We substantially reduced the loss at our Texas facilities through a combination of rate adjustments and cost control measures. We must continue to focus on building our Texas census which will enable us to turn that region into a profitable one for Vari-Care.

''Alabama and Florida continue to generate excellent returns. Arizona, once a problem region for our Company, is now producing satisfactory results and we believe we can do the same in Texas. Our expansion program in Florida, scheduled for completion this fall, will add 164 new beds to our capacity,'' Hurlbut concluded.

Vari-Care Inc. provides a full range of recuperative and healthcare services including skilled nursing, intermediate and personal care, retirement apartments, home health care, adult day care, and meals-on-wheels.

The company operates 24 long-term healthcare facilities in Alabama, Arizona, Florida and Texas with a capacity of 2,585 residents. Vari-Care now has two projects under construction, a new 120-bed facility, ''The Renaissance'' in Naples, Fla. and a 44-bed addition to The Boulevard Manor Nursing Center in Boynton Beach, Fla., which will be coming on line in 1990.

The company also has a 68-unit retirement apartment complex in Texas.

#90045b0811 02/14/1990 ~Business Wire
NEW YORK (FEB. 14) BUSINESS WIRE - The following is a summary of a presentation Wednesday at the New York Society of Security Analysts by John H. Croom, chairman and chief operating officer of The Columbia Gas System Inc.

John H. Croom, chairman and CEO of The Columbia Gas System Inc., said Wednesday that Columbia is positioning itself to contribute to the national energy strategy and to help clean up the environment during the 1990s through the use of natural gas.

Croom said he was ''bullish on the future of natural gas and even more bullish on the role Columbia Gas will carve our of this 'decade of gas'''

Addressing the New York Society of Security Analysts, Croom said that because on environmental and other opportunities, the Columbia System is looking forward to financial improvements in the years ahead.

''Columbia can profit in this new era for gas,'' Croom said. ''Our integrated natural gas system provides Columbia with a spectrum of opportunities and we have strategies to profit in each of our principal business segments.''

Last week Columbia reported 1989 earnings of $3.21 a share, a 30 percent increase over 1988, and earlier this month, the corporation's board of directors increased the common stock dividend 10 percent. In addition, Croom said Columbia's 1990 capital expenditure program will amount to $675 million, the most ambitious in the company's history. The expenditures will support Columbia's market growth strategies and expanded oil and gas exploration and development efforts.

He reported that 1989 was a year of achievement for Columbia, especially in the marketing arena, where Columbia's transmission companies began penetrating new markets in Virginia, North Carolina, Tennessee, New Jersey and New England. Included are projects that will use gas for cogeneration (the simultaneous production of electricity and thermal energy from one fuel) and electric power generation.

Croom said the pending Clean Air Act could result in natural gas being used for many more such projects in the 1990s. In Columbia's operating area there are some 17 potential cogeneration projects in the works and approximately 19 high-emission power plants in close proximity to existing facilities. Obtaining even a modest share of this competitive market could result in many billions of cubic feet of new natural gas flowing through Columbia's pipelines, he noted.

In addition, he said the company's transmission companies reached a

comprehensive settlement with their customers. The settlement, Croom said resolved scores of regulatory proceedings and makes it possible for Columbia's transmission companies to plot a clear road map for future market growth.

The chairman also reported that Columbia's distribution and oil and gas segments were performing well. Distribution companies added a record 40,000 new customers in 1989 and strategies are in place to increase the use of natural gas through new technologies. Greatly-expanded oil and gas efforts, and the streamlining of the company's Appalachian exploration and production operations should realize significant returns in the oil and gas segment in the 1990s.

Croom, who has 36 years of experience in the natural gas business, says he has never seen such widespread support for natural gas.

''That doesn't mean that all companies will prosper in this new era,'' he said, ''but for those who plan strategically, who are customer-oriented and who act rather than react, the opportunities just ahead are very exciting.''

#90045b0812 02/14/1990 ~Business Wire

NEW YORK (FEB. 14) BUSINESS WIRE - The following is a summary of a presentation Wednesday at the New York Society of Security Analysts by Gerald W. Klein, president and chief operating officer of Checkpoint Systems Inc.

Wednesday, at a presentation before the New York Society of Security Analysts, Gerald W. Klein, president and chief operating officer, positioned Checkpoint as a company that can grow revenues 20-30 percent per year and return earnings of 30 percent on equity.

Checkpoint owns 21 percent of the existing $325 million Electronic Article Surveillance (EAS) market. According to Donnelley Marketing Information Services, the potential U.S. EAS market includes 54,000 mass merchandisers 205,000 supermarkets, 172,000 apparel and shoe stores, 51,000 drug stores and 14,000 video outlets. Only 10 percent of this market has been penetrated and according to Klein, a similar market exists internationally. International shipments represent approximately 30 percent of Checkpoint's business.

''CRIME is a growth business,'' Klein commented. Shoplifting worldwide is estimated to be in excess of $50 billion with $30 billion in the U.S..

Growth companies need protection against economic downturns. Checkpoint, serving primarily retail establishments, enjoys this protection because historically, shoplifting and control-type expenditures have increased during recessions.

Checkpoint has demonstrated market leadership in developing, marketing, selling and servicing Electronic Signatures systems with over 44,000 disposable tag systems installed worldwide. ''Our closest competitor has less than one half this number of installations,'' Klein said. Disposable tags and their related process technology are Checkpoint's sustainable competitive advantage.

These circuits replace pricing labels generally used by retailers and incorporate pricing data, uniform barcoding and security with deactivation into one circuit. Additionally, they allow for the simultaneous use of an EAS system with retailers scanning devices. Klein stated, ''Our number one variable for long-term growth and profitability is perceived product and service quality. We have engaged PIMS (Profit Impact Marketing Strategy) to perform ongoing double-blind quality audits which compare Checkpoint to all U.S. competitors with measurable market share. The results to date put us in a leadership position and we plan on staying there.''

In summary, Klein reviewed the attributes of Checkpoint which make it ''a superior long term investment with solid growth characteristics.'' They included being recession and inflation resistant, having the potential for superior growth, market leadership, pricing flexibility due to superior products and services, superior financials, exceptional management, and the ability to exploit new market opportunities.

To showcase the ability to exploit new market opportunities, chairman of the board and CEO, A.E. Wolf, concluded the program with a live demonstration of the company's source tagging program aimed at integrating Checkpoint EAS circuits into products and packaging before they arrive at stores. ''We derived the name 'Impulse' for this program because it supports self-service and impulse buying,'' Wolf said.

#90045b0814 02/14/1990 ~Business Wire

MURRAY HILL, NJ (FEB. 14) BUSINESS WIRE - C.R. Bard Inc. (NYSE:BCR) Wednesday released additional financial information for the year 1989 as a supplement to the summary data released Jan. 24, 1990.

There are no changes from the data released earlier.

As indicated in the Jan. 24 summary, sales increased 3 percent, while net income decreased 17 percent and earnings per share were down 14 percent due primarily to circumstances related to Bard's New Probe angioplasty catheter.

Included in the figures for maketing, selling and administrative are research and development expenditures of $36.2 million, up 6 percent from the 1988 level of $34.1 million.

Excluding R&D, marketing, selling and administrative expenses were up 3 percent, in line with the sales growth. Interest expense for 1989 totaled $10.9 million, up from $7.8 million a year ago.

Capital expenditures for the year were $29.9 million, up 13 percent from the 1988 spending of $26.4 million.

Bard's financial condition at year-end 1989 remains strong. Cash and short-term investments exceed $11 million and the company's total debt to total capitalization ratio is 22 percent.

Complete financial information will be available in Bard's 1989 annual report, scheduled for distribution on March 14.

C.R. Bard Inc., headquartered in Murray Hill, is a leading multinational developer, manufacturer and marketer of health care products.

#90045b0822 02/14/1990 ~Business Wire
NEW YORK (FEB. 14) BUSINESS WIRE - Sanmark-Stardust Inc. (AMEX:SMK) Wednesday reports its results for the second quarter and six months ended Dec. 31, 1989 (table follows).

For the three months ended Dec. 31, 1989, sales totaled $36,531,000, as compared to sales of $34,716,000 during the three months ended Dec. 31, 1988. Income from operations for the recently ended second quarter amounted to $1,763,000 vs. $1,767,000 in the prior year's second quarter.

Net income during the second quarter of fiscal 1990 totaled $355,000, or two cents per share, vs. net income of $1,715,000, or 11 cents per share, during the like period last year.

Commenting on the results, Mark M. David, chairman of Sanmark-Stardust, said, ''Although we did report an increase in sales, operating income during the recently ended quarter was unchanged as compared to last year's level due principally to higher manufacturing overhead costs.

''Our net income, however, was affected by several non-operating factors involving non-recurring events. During the recently ended quarter, the Company sold a manufacturing facility at a loss of $138,000. During the like period last year, the Company sold certain plant and equipment at a gain of $368,000.

''In both instances, the Company did not discontinue any product line, but is utilizing existing facilities in an effort to improve overall efficiency. Also, our results for the recently ended quarter include the recognition of an unrealized loss of $420,000 on marketable securities.

''Finally, there was an unusually high income tax provision in the recently ended second quarter due principally to certain capital losses for which no income tax benefit could be provided. This is in contrast to an unusually low income tax provision in the like period last year due to the utilization of prior period tax losses incurred by the Movie Star companies.

Sanmark-Stardust Inc. designs, manufactures, markets and sells an extensive line of ladies sleepwear, robes, leisurewear, loungewear, panties and daywear; men's work and leisure shirts; children's clothing; and also operates 29 retail outlet stores.

NORWALK, CT (FEB. 14) BUSINESS WIRE - The Perkin-Elmer Corp. (NYSE: PKN)

reported Wednesday that net revenues in its second quarter which ended On Jan. 31, 1990 increased to $218.4 million from $200 million a year earlier. Income from continuing operations in the quarter was $12 million, or 28 cents per share, compared with $13.6 million, or 32 cents per share, last year.

For the first six months of Fiscal Year 1990, net revenues were $402.3 million vs. $373.9 million a year earlier. Income from continuing operations in the first half was $20.5 million, or 47 cents per share, compared with $23.2 million, or 54 cents per share, last year.

Orders in the quarter rose to $219.7 million from $203.8 million a year ago. For the six month period orders were $405 million compared with $377.6 million a year earlier.

"The quarterly growth in orders was primarily in analytical instruments, the major portion of our business," said Horace G. McDonell, chairman and chief executive officer.

"Instrument orders were quite satisfactory given the recent slackness of this market and the fact that we were preparing, in the quarter, for a very heavy slate of new product introductions," he said.

"Early in the third quarter, we are introducing an array of new products that directly address the needs of the growing biotechnology, pharmaceutical and environmental markets. However, a broad shift in overall product mix, along with a reduction in inventories to make way for new products, put pressure on profit margins in the second quarter," McDonell noted.

During the quarter, Perkin-Elmer completed the sale of two business units: its German aerospace subsidiary, Bodenseewerk Geraetetechnik, G.m.b.H. (BGT), to Diehl Group and its Electro-Optics Technology Division to Hughes Aircraft Co. The company also announced an agreement to sell its Applied Optics Operations to Optical Corporation of America.

STAMFORD, CT (FEB. 14) BUSINESS WIRE - GEO International Corp. announced that earnings for its first fiscal 1990 quarter, ended Dec. 31, 1989, were $183,000, or 1 cent per share, on revenues of $39.5 million.

In the prior year comparable quarter, the company reported a loss of $1.6 million, or 10 cents per share, on revenues of $40 million.

John E. McConnaughy Jr., chairman and chief executive of GEO, said all business segments showed improved operating results over the prior year comparable period.

Oilfield operations reflected the largest gain as activity levels improved in the industry. Graphic Systems profits improved despite lower sales. Prior year manufacturing inefficiencies on a new product were corrected by the end of last year, McConnaughy said.

GEO International Corp. provides: equipment, inks and supplies to the graphic arts industry, production equipment and supplies to the oil and gas industry and non-destructive testing services to assure quality to many industries. GEO trades on the New York Stock Exchange and the Pacific Stock Exchange under the symbol GX.

GEO International Corp.

LAWRENCEVILLE, NJ (FEB. 14) BUSINESS WIRE - Multi Soft Inc. announces extended asynchronous communications support for its INFRONT cooperative processing products.

INFRONT has always provided asynchronous support for peer-to-peer processing and for its software distribution and change management functions. The capabilities announced Wednesday extend that asynch support to allow INFRONT to provide SAA/CUA interfaces for any existing applications that use VT220 or 3101 terminals or emulation.

These front-end programs can be built with no changes whatever to the host applications. And, as INFRONT applications are independent of the

communications path being used, applications can support both asynch and 3270-based links with no changes in the PC code.

''The range of applications and user platforms supported by our products has been significantly extended with this new offering,'' said Charles Lombardo, chairman of Multi Soft. ''Our clients can now use the full power of INFRONT, including EasySAA, to develop and deliver the widest possible range of SAA/CUA applications.''

''This new functionality allows our users to easily support the delivery of applications and data over dial-up networks to field personnel using laptops. Our users are also taking advantage of this capability to deliver information services directly to their own customers,'' noted Miriam Jarney, executive vice president at Multi Soft.

With the extended asynchronous support, INFRONT users can communicate to hosts through VAXs, IBM Series 1 machines, any of the packet switched networks, and the IBM Information Network.

The extended support is provided through a special HLLAPI/asynchronous interface built by Multi Soft. This interface also provides access to the DEC terminal server, VT220 emulation through the IBM 3708, and 3101 emulation via packet switched networks.

This support allows INFRONT front end programs to communicate with IBM mainframe applications over asynch lines. Front-end programs can also be built for applications on asynch hosts such as the DEC VAX.

Multi Soft Inc. (NASDAQ:MSOF) is a subsidiary of Multi Solutions Inc. (NASDAQ:MULT) and has provided state-of-the-art cooperative processing software and solutions for production operating platforms and communications environments since 1985.

#90045b0851 02/14/1990 ~Business Wire
BURLINGTON, MA (FEB. 14) BUSINESS WIRE - Xylogics Inc. (NASDAQ:XLGX) Wednesday announced revenues for the first fiscal quarter ended Jan. 27, 1990 were $8,597,000 compared to $7,004,000 in the same quarter of 1989.

Net income was $267,000, or 10 cents per share, compared to $425,000, or 15 cents per share, in the first quarter of 1989.

Bruce J. Bergman, Xylogics chairman and chief executive officer, noted that revenue increased by $1,593,000 or nearly 23 percent over the first quarter of 1989. He attributed this to sales of new products, including the Annex II terminal server product line which was acquired in the first quarter of fiscal 1989, and communications controllers.

As anticipated and reported earlier, revenue from the company's data storage controllers declined from a year ago because of a decrease in sales to the company's largest customer.

Bergman said the decline in earnings was in line with earlier estimates and resulted from the combined effects of a decline in overall gross margin rate due to changes in product mix aand higher expense levels.

These expense levels were put into place during 1989 to support higher revenue levels at that time and the company's expanding product line. Bergman noted, however, that expenses were reduced in the first quarter below the levels incurred during the latter part of fiscal year 1989.

Headquartered in Burlington, Mass., Xylogics Inc. is a leading supplier of data storage controllers, communications controllers, and terminal servers. Xylogics products are sold to OEMs, systems integrators, resellers, and distributors worldwide for computer systems based on leading, ''industry standard'' architectures.

#90045b0856 02/14/1990 ~Business Wire

PISCATAWAY, NJ (FEB. 14) BUSINESS WIRE - Rheometrics, Inc., a manufacturer of sophisticated materials testing instruments, Wednesday reported sales of $12.1 million for the six month period ended December 31 1989 compared to $12.4 million reported a year ago.

The Company incurred a net loss of $497,000 ($(.16) per share) for the six months, versus net earnings of $393,000 ($.13 per share) for the same period last year.

Second quarter sales amounted to $7.3 million. These revenues were less than the record $9.1 million achieved in the same period last year. Second quarter earnings amounted to $2,000, compared to $1.2 million ($.39 per share) for the comparable quarter in 1988.

Dr. Joseph M. Starita, Chairman and Chief Executive Officer, said that ''domestically, second quarter revenues were strong. Both orders and shipments were higher than the second quarter of last year. While the performance of our Japanese subsidiary continues to be according to plan, European sales are lower than last year, primarily due to the transition to a new management team. The team, which includes a recently-hired European sales manager and a sales manager in France, is expected to be in place by April.''

Dr. Starita pointed out that the 55 percent gross profit margin was lower than anticipated partially due to start up problems associated with the introduction of newly designed products. These problems appear to be in hand and are not expected to impact the second half. Additionally margins are expected to improve over the balance of the year due to higher sales volume and a more favorable sales mix. Last year, profit margins were higher for the corresponding period partially due to the exchange rate advantage at that time.

''Our earnings were also affected by long-term investments in personnel in order to meet the growth objectives of the Company,'' he noted.

Rheometrics, Inc. manufactures sophisticated rheological instruments for the plastics, coatings, food, biomedical and adhesives industries. The Company's common stock trades on the NASDAQ National Market System under the symbol ''RHEM.''

#90045b0859 02/14/1990 ~Business Wire

MIAMI (FEB. 14) BUSINESS WIRE - Biscayne Holdings Inc. (AMEX:BHA) Wednesday reported net sales of $10,463,000 and net income of $312,000 (four cents per share) for the fourth quarter ended Dec. 31, 1989.

This compares with net sales of $8,909,000 and a loss from continuing operations of $104,000 (one cent loss per share) for the fourth quarter of 1988.

For the year ended Dec. 31, 1989, net sales were $39,989,000 compared with $38,546,000 in 1988. Net income for 1989 was $523,000 (seven cents per share), which compares with income from continuing operations of $1,354,000 (17 cents per share) in 1988.

Net income of $9,829,000 ($1.20 per share) and $15,317,000 ($1.93 per share) for the fourth quarter and year ended Dec. 31, 1988, respectively, included income from and gain on the sale of discontinued operations of $7,465,000 (91 cents per share) and $9,612,000 ($1.21 per share), respectively, and utilization of tax loss carryforwards of $2,468,000 (30 cents per share) and $4,351,000 (55 cents per share), respectively.

There were no comparable contributions to income in 1989.

Net income for the 1989 fourth quarter and full year included net charges of $64,000 (one cent per share) and $1,035,000 (12 cents per share), respectively, related to non-cash losses from Biscayne's 30 percent investment in SPI Partners L.P. (''SPI'').

The losses generated by SPI primarily relate to the amortization of assets which reduce the taxability of the partnership's earnings. Commenting on the results, Chairman Earl W. Powell stated: ''Before considering the non-cash losses from our equity investment in SPI, income from continuing operations for the year ended Dec. 31, 1989 was 19 cents per share vs. 17 cents per share in 1988.

Our investment in SPI has proven to be a sound one. Through positive cash flow and the sale of the Universal/Allied Imaging Division, SPI reduced its long-term debt from $46.5 million at Dec. 31, 1988 to $33.3 million at Dec. 31, 1989.

Biscayne, headquartered in Miami, is a manufacturing company specializing in the apparel industry. Biscayne's Andy Johns Fashions division designs and distributes women's and children's outerwear, and its Varon & Sons division manufacturers toddlers' and girls' underwear.

LISBON, IA (FEB. 14) BUSINESS WIRE - BioTechnica Agriculture Inc., Wednesday announced that it has submitted an application to the U.S. Department of Agriculture for permission to field test genetically engineered corn plants.

The field test will be conducted by Plant Sciences Research Inc., a BioTechnica subsidiary, at its Corn Breeding Station near Lisbon, Iowa. The company currently intends to begin the test in late spring, pending approval by the USDA and review by the Iowa Department of Agriculture, according to Dr. David Glass, vice president of government and regulatory affairs.

''Last month, BioTechnica announced that company scientists has been the first to demonstrate that corn plants processing an introduced gene were stable, fertile, and capable of transmitting the gene to the next generation of plants,'' Glass said.

The test in Lisbon will allow researchers to study the growth of the experimental corn under actual field conditions and obtain seed for genetic studies. The test also will include the gathering of environmental data for use in future field tests.

BioTechnica Agriculture is a fully integrated crop seed company conducting advanced research in biotechnology. The company is developing corn, soybean, alfalfa and wheat plants genetically altered to improve yield, nutrition and insect resistence.

BioTechnica Agriculture already has conducted one field test with genetically engineered tobacco plants and three field tests with engineered strains of soil bacteria that naturally provide nitrogen nutrients to alfalfa and soybeans. The company is now seeking approval from the Environmental Protection Agency for two further field tests of nitrogen-fixing bacteria on alfalfa, to be conducted this spring in Wisconsin.

Plant Science Research Inc., oversees BioTechnica's plant and microbial

research, which is conducted at seven Midwestern field research breeding stations, as well as in laboratories and greenhouses in Minnetonka, Minn., and Cambridge, Mass.

BioTechnica Agriculture and Plant Science Research are subsidiaries of BioTechnica International Inc. (NASDAQ:BIOT) Cambridge, Mass.

NEW YORK (FEB. 14) BUSINESS WIRE - FITCH FINANCIAL WIRE (FFW). BayBanks Inc.'s (NASDAQ:BBNK) 'BBB+' on its 5 percent convertible debentures due 1994 is placed on FitchAlert for a possible downgrade.

The asset quality of BayBanks' operating subsidiaries has deteriorated sharply. Total nonperforming assets at year end 1989 were about $270 million, nearly triple the total problem credits twelve months earlier.

While a $75 million addition to the reserve for possible loan losses during 1989 represented more than a four fold increase over 1988's provision, the aggregate reserve now represents a weak 31 percent of nonperforming assets.

In 1990, we expect at best a sluggish year for profitability and earnings, with the level of problem assets continuing to rise.

WHITE PLAINS, NY (FEB. 14) BUSINESS WIRE - IBM Wednesday announced that it has started shipping selected models of the Personal System/2-a Model 70 that contain 386-a microprocessors manufactured by IBM.

The company, however, will continue to rely on Intel Corp. for the bulk of its 386 microprocessor requirements, and will be using the IBM chips primarily as a second supply source for the PS/2-a.

The 32-bit IBM microprocessors, manufactured in Essex Junction, Vt., are the result of a technology exchange agreement between IBM and Intel, in which IBM received a license to manufacture the 386 processor.

The 386 microprocessors are plug-compatible with Intel microprocessors, and will run all existing software designed for PS/2 386-based systems.

The IBM chips currently are manufactured in 16 megahertz (MHz) and 20 MHz clock speeds.

The IBM 386 microprocessors are produced using Complementary Metal Oxide Semiconductor (CMOS) technology -- a manufacturing process that produces chips that are denser and consume less power than those made using other types of technology. Circuit patterns on the chip are as small as 1

micrometer wide (one-millionth of a meter) -- nearly 100 times thinner than a sheet of typing paper.

#90045b0888 02/14/1990 ~Business Wire

WAYNE, PA (FEB. 14) BUSINESS WIRE - Laurentian Capital Corp., a life insurance holding company based in Philadelphia, is pleased to report a profitable and successful turnaround for the organization in 1989.

The positive contributions from the group of companies resulted in a significant earnings gain from the previous year. The company Wednesday announced a profit of $770,000 or 4 cents a share for the fourth quarter, as compared to a loss of $(1,086,000) or 7 cents per share for the comparable period in 1988. The net income for the year amounted to $3,436,000 or 19 cents per share as compared to a 1988 loss of $(3,775,000) or 25 cents per share.

The 1988 amounts have been restated as the result of SFAS 97. The improved business performance has thus resulted in a $7.2 million profit turnaround between 1988 and 1989. Earnings per share for the year ended Dec. 31, 1989 were based upon 16,229,000 average shares outstanding in 1989 as compared with 16,207,000 in 1988.

Consolidated revenues for the quarter were $35,250,000 a 19.6 percent increase over the $29,470,000 reported for the comparable quarter in 1988. Total revenues for the year were $141,406,000 and represented a slight decline of .5 percent from the $142,089,000 reported in 1988.

The company's investment portfolio continues to improve in performance through the conversion of low and non-income producing assets into high quality fixed income instruments. Investment income amounted to $42,890,000 for the year, which is an increase of $11,236,000 or 35.5 percent over 1988. The improved quality and yield of the investment portfolio continues to be a major contributor moving into 1990. Permanent impairments of $480,000 were recorded during the fourth quarter.

Laurentian Capital Corp. (ASE: LQ) has assets of approximately $891 million and total life insurance in force in excess of $7 billion.

#90045b0900 02/14/1990 ~Business Wire

SHREWSBURY, NJ (FEB. 14) BUSINESS WIRE - Wellman Inc. (NYSE: WLM) Wednesday reported record net income of $54.5 million for its fiscal year ended Dec. 31, 1989, a 43 percent increase from net income of $38 million in the year ended Dec. 31, 1988.

Earnings per share also rose significantly, up 39 percent to $1.84 per share from comparable 1988 earnings per share of $1.32.

Sales for 1989 increases 39 percent to $437.8 million vs. $314.6 million in 1988. Operating income grew 51 percent in 1989, to $91.5 million from $60.5 million in the prior year.

In the fourth quarter of 1989, net earnings increased 51 percent to a record $16 million from $10.6 million in the same period of 1988. Earnings per share rose 38 percent to 51 cents per share from 37 cents in the fourth quarter of 1988. Fourth quarter sales were $167.4 million, a 99 percent increase from fourth-quarter 1988 sales of $84 million.

The Man-Made Fibres Division led the sales increase in 1989, primarily due to augmented production capacity from a 60 million pound expansion brought on line in the first quarter of 1989 and the acquisition of Fiber Industries on Nov. 1, 1989. The Fiber Industries acquisition more than doubles Wellman's sales on an annualized basis.

During the quarter, Wellman charged to expense approximately $550,000 related to the acquisition of Fiber Industries and incurred an increase of $1.1 million in LIFO reserves. These were offset, to some degree, by a $1.1 million business interruption insurance claim from Hurricane Hugo.

Wellman, the nation's largest recycler of plastic and fibre waste, manufactures high-quality polyester and nylon fibres and plastic resins for specialty markets. The company is also one of the largest manufacturers and distributors of polyester textile fibres in the United States, marketing its fibre under the Fortrel tradename.

#90045c0493 02/14/1990 ~Comtex

WASHINGTON (FEB. 14) COMTEX - Country Wide Trnasport Services Inc. filed a Form 8-K with the NASD announcing on Jan. 30, 1990 the agreement in principle to a settlement of two related class action lawsuits against the company, certain of its former directors, its current chairman and the managing underwriter of the company's public offering of stock in 1987.

The lawsuits, which were filed in Los Angeles in Feb. 1989, had alleged the defendants were liable under federal and state securities laws and common law principles by reason of various alleged misstatements and omissions in the company's prospectus for the sale of its stock, its quarterly earnings reports and other public statements made in 1987 and 1988.

Pursuant to the settlement no defendants admits any wrongdoing and the parties to this settlement waive the rights against each other.

Country Wide is an irregular-route truck-load common carrier that transports a wide variety of commodities throughout the continental United States.

#90045c0495 02/14/1990 ~Comtex

WASHINGTON (FEB. 14) COMTEX - VMS Mortgage Investors LP, VMS Mortgage Investors LP II, VMS Mortgage Investors LP III, VMS Strategic Land Fund II and VMS Strategic Land Trust have filed Form 8-K reports with the NASD.

The reports deal with the liquidity problems of VMS Realty Partners, which has suspended most payments to lenders and to its eight publicly-owned mortgage lending programs.

VMS Realty has advised VMS Mortgage Investors LP that it will be required to increase the reserve for loan losses relating to its mortgage loan portfolio by an amount between $28 and $33 million.

VMS Mortgage Investors LP III will be required to increase its loan loss reserves between $17 and $20.4 million and VMS Mortgage Investors LP II must increase its loan loss reserves between $16 and $19.2 million.

VMS Realty Partners also said that the proposed consolidation between VMS Strategic Land Fund II and VMS Strategic Land Trust into a single real estate investment trust is unlikely to be carried out due to the liquidity problems of VMS Realty Partners.

GNN (TICKER: GNN) announced that it feels that an analysis prepared last year by Goldman Sachs is not a true evaluation of the company today and was based on incomplete information.

-30- 396
#90045c0502 02/14/1990 ~Comtex
SCHEDULE 14D9

SEC - AMENDMENT NUMBER: 2

ANNOUNCEMENT:

Jetronic (TICKER: JET) has signed a standstill agreement with a shareholder group led by Flagship Acquisition Corp. and JettAir Holdings after it rejected FAC's tender offer.

The agreement grants Jetronic an option for five years to purchase shares held by JettAir at more than 25 percent below the group's purchase price for the shares and prohibits the shareholder group from making a tender offer for the company or purchasing its securities.

In exchange, Jetronics will pay the group $100,000 and the group will drop its tender offer.

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 4

GROUP LED BY FLAGSHIP ACQUISITION CORP OWNS 201,000 SHARES (8.18%) OF JETRONIC INDUSTRIES INC (TICKER: JET) OF PHILADELPHIA, PA.

ANNOUNCEMENT:

Pursuant to a 5-year standstill agreement, Flagship will terminate its $3.50 per share tender offer.

The agreement prohibits further investment or involvement in future tender offers for securities of Jetronic by the group and its affiliates and gives Jetronic rights to purchase its stock held by the group at $2.61 to $3.55 per share.

The federal securities action begun by Jetronic and its shareholders will be dismissed with prejudice.

-30- 815
#90045c0514 02/14/1990 ~Comtex
SCHEDULE 13D

Gabelli sold 365,123 common shares to DiGiorgio (TICKER: DIG) at $30 per share pursuant to a tender offer.

-30- 329
#90045c0515 02/14/1990 ~Comtex
SCHEDULE 13D

SEC - AMENDMENT NUMBER: 9

ANNOUNCEMENT:

On Feb. 7, 1990, the proposal previously filed as exhibit no. 9 to this schedule expired by its terms.

Rosewood is still evaluating alternative courses of action with respect to First Executive (TICKER: FEXC).

On Feb. 10, Rosewood entered a letter agreement with J.P. Morgan & Co. Inc. engaging them to act as Rosewood's financial advisor for a period of one year with respect to the possible acquisition of First Executive by merger, consolidation, other business combination, by purchase of all or substantial amount of the business, stock or assets of First Executive.

#90045d0780 02/14/1990 ~French/German News Agency
LONDON (FEB. 14) - Anglo-American conglomerate Hanson said Wednesday that its taxable profit rose 15 percent in the last quarter of 1989 over the same period the previous year to 225 million pounds (380 million dollars).

Turnover was down 5.9 percent however at 1.81 billion pounds (three billion dollars).

-30- 493
#90045p0001 02/14/1990 ~PR Newswire
NEW YORK (FEB. 14) PR NEWSWIRE - British Airways (NYSE: BAB) today announced a net profit of 46 million pounds sterling ($74 million) for the third quarter ended Dec. 31, 1989, an increase of 39 percent from 33 million pounds over the same period in the previous fiscal year.

Pre-tax profit for the three months from Oct. 1 to Dec. 31, 1989, was 71 million pounds ($114 million), up 39 percent from 51 million pounds at Dec. 31, 1988. This figure includes gains from the sale of one Boeing 747-200 and one BAC One-Eleven aircraft.

Operating surplus for the quarter increased 20 percent to 78 million pounds ($126 million) from 65 million pounds. Group revenue for the quarter increased 13 percent to 1.193 billion pounds ($1.92 billion) from 1.053 billion pounds.

Primary earnings per American Depositary Share (ADS) for the third quarter rose 39 percent to 0.64 pounds ($1.03) from 0.46 pounds.

For the nine months ended Dec. 31, 1989, the net profit was 214 million pounds ($345 million), up 21 percent from 177 million pounds. The record pre-tax profit was 330 million pounds ($531 million), up 21 percent from 273 million pounds.

Group revenue for the nine months rose to 3.7 billion pounds ($6 billion) from 3.3 billion pounds, up 14 percent.

With the convertible capital bonds issued in the U.K. in October, 1989, raising a gross 320 million pounds, the repayment of finance leases on two aircraft and repayment of certain loans reduced the airline's borrowings by 159 million pounds, from 948 million pounds at this stage a year ago to 789 million pounds.

As a result, the net debt to total capital ratio was 22 percent. Total

share capital and reserves of the group, including the convertible capital bonds, was 1.3 billion pounds, compared with 790 million pounds a year ago.

Airline operating costs rose in the third quarter by 13.2 percent to 1.08 billion pounds, with the fuel bill increasing by 47.5 percent, following a 43.8 percent rise in the average sterling price per gallon.

Aircraft depreciation and operating lease costs rose by 25 percent, largely due to the introduction of new aircraft, including five Boeing 747-400s, and staff costs rose by 6.1 percent to 260 million pounds, after benefiting by 14 million pounds from the lower pension contributions.

In the quarter, total traffic on scheduled services increased by 7.5 percent against a capacity increase of 5.6 percent.

Almost 5.8 million passengers were carried, up 6.7 percent and the passenger load factor increased from 68.2 percent to 69.4 percent. Yield per revenue passenger mile increased by 7.6 percent to 10.5 pence (16.9 cents).

In the nine months, total scheduled traffic increased by 8.5 percent over the prior year against a capacity increase of 4.9 percent. More than 18.1 million passengers were carried, an increase of 3.4 percent with a passenger load factor of 72.4 percent against 70.5 percent.

American dollar equivalent amounts are translated at the exchange rate at Dec. 31, 1989, of $1.61 to one against the pound sterling.

One American Depositary Share equals 10 U.K. ordinary shares.

#90045p0026 02/14/1990 ~PR Newswire

NEW ORLEANS (FEB. 14) PR NEWSWIRE - Brock Exploration Corp., headquartered in New Orleans, reported net income of $370,000 or $.09 per share on revenues of $2.7 million for the quarter ended Dec. 31, 1989.

These results compare with net income of $73,000 or $.02 per share on revenues of $1.8 million for the quarter ended Dec. 31, 1988.

Net income for the nine months ending Dec. 31, 1989 was $811,000 or $.20 per share on revenues of $7.5 million as compared to last year's nine month income of $274,000 or $.07 per share on revenues of $5.8 million.

The company's strategy of buying reserves instead of drilling has been

very rewarding. In 1985, the company commenced buying reserves and has only occasionally participated in the drilling of wells. The reserves at March 31, 1985 were 1,615,000 oil equivalent barrels and on March 31, 1990 are expected to be 3,900,000 oil equivalent barrels. These acquisitions were financed internally and with corporate debt.

#90045p0027 02/14/1990 ~PR Newswire

WARREN, N.J. (FEB. 14) PR NEWSWIRE - Immunomedics, Inc. (NASDAQ: IMMU), announced today that it has signed an agreement with Frosst Radiopharmaceuticals ("Frosst"), a division of Merck Frosst Canada Inc., to file an investigational new drug (IND) application for ImmuRAID-CEA-Tc-99m in Canada.

Under the agreement, Frosst will seek IND approval on behalf of Immunomedics from the Health Protection Branch, the Canadian equivalent of the U.S. Food and Drug Administration, sponsor clinical studies and evaluate the Canadian market in anticipation of finalizing a Canadian distribution arrangement between the two companies. Financial terms of the agreement were not disclosed.

ImmuRAID CEA-Tc-99m is a monoclonal antibody-based rapid labeling kit developed by Immunomedics which uses technetium 99m ("Tc-99m"), the most frequently used isotope in nuclear medicine, to target certain tumors. Immunomedics is currently conducting Phase III U.S. clinical trials of this product for the diagnosis of colorectal cancer, the third leading cause of death from cancer in the United States and among the most prevalent forms of cancer in other western countries.

"We are excited about the prospect of working with a strong partner in Canada. Immunomedics' collaboration with Frosst is consistent with our goal of pursuing strategic alliances with leading pharmaceutical companies " said Russell C. McLauchlan, president of Immunomedics.

Immunomedics is a biopharmaceutical company applying innovative technology to the development of new methods and products using antibody-based radioisotopes and drugs for diagnosis and therapy of cancer, infection and other diseases. The company maintains corporate headquarters in Warren, N.J., and research facilities on the campus of the University of Medicine and Dentistry of New Jersey in Newark.

#90045p0029 02/14/1990 ~PR Newswire

GOLDSBORO, NC (FEB. 14) PR NEWSWIRE - Goldtex, Inc. (NASDAQ: GLTX) today reported results for the second quarter and six months ended January 21, 1990. For the quarter, Goldtex reported a net income of $213,409 on sales of $5,835,312, compared to a net income of $326,826 on sales of $6,201,225 for the year earlier quarter. On a per share basis, the net income in the 1990 period was $.09 compared to $.14 in the 1989 period.

For the six months ended January 21, 1990, Coldtex reported a net loss of $162,149 on sales of $10,083,936, compared to a net income of $329,264 on sales of $11,049,842 for the year earlier six months period. On a per share basis, the net loss in the 1990 period was $.07, compared to a net income of $.14 in the 1989 period.

Will Hopper, President, stated, "The improvement in operations during the second quarter compared to the first quarter of fiscal 1990 reflects progress made in improving quality and manufacturing efficiencies which have suffered since the consolidation of the company's dyeing and finishing operations in May 1989 from its leased facilities in Kinston, N.C. While the progress in manufacturing performance has been significant the Company is still operating considerably below expected quality and efficiency levels. On January 8, 1990, the Amalgamated Clothing and Textile Workers Union filed a petition with the National Labor Relations Board seeking an election for representation of the company's production and maintenance workers. An election will be held in early March to decide the matter. While the Company does not anticipate material adverse long term financial consequences regardless of the election outcome, the Company is expending considerable funds to oppose the attempt to organize its workers, which will unfavorably affect near term results."

Goldtex, Inc., headquartered in Goldsboro, North Carolina is engaged in the printing, dyeing and finishing of fabrics for others on a commission basis.

#90045p0031 02/14/1990 ~PR Newswire

SANTA MONICA, CA (FEB. 14) PR NEWSWIRE - Sharply higher earnings characterized Fremont General Corp.'s fourth quarter results, James A. McIntyre, chairman and chief executive officer, announced today.

For the three months ended Dec. 31, 1989, net income was $9,491,000 or $1.18 per share, compared to $465,000, or $.04 per share, for the like period a year earlier. Per-share calculations are based on 8,105,000 weighted average shares for 1989 against 10,226,000 for 1988. Revenues were $127,157,000 compared to $97,596,000 (as restated) in the fourth quarter of 1988.

For the year ended Dec. 31, 1989, earnings were ahead of the prior year: $17,551,000, or $2.17 a share, versus $15,171,000, or $1.48 a share in 1988. The most recent year's earnings would have been significantly higher except for a second quarter provision of $11.3 million, or $1.39 a share, to cover potential losses on loans in the Fremont Financial Corporation subsidiary. Revenues for 1989 increased 18 percent to $466,547,000 from $395,283,000 for 1988 (as restated).

McIntyre said the improve operating earnings were primarily due to much better performance by its workers' compensation insurance companies. He added that the market value of the company's $1 billion investment portfolio is greater than its book value, and that it contains less than $10 million in non-investment grade bonds.

Fremont General is a holding company engaged through subsidiaries in insurance and financial services.

SOUTHFIELD, MI (FEB. 14) PR NEWSWIRE - Federal-Mogul Corporation (NYSE: FMO) today announced its 1989 sales and earnings which were somewhat lower than the 1988 results.

President and Chief Executive Officer Dennis J. Gormley reported net sales for the year ended Dec. 31, 1989, of approximately $1.1 billion, compared to nearly $1.2 billion for the previous year.

The company reported earnings available for common shares of $29.2 million or $1.26 a share in 1989, compared with results of $41.7 million, or $1.67 a share, after a $1.7 million or 7 cents a share extraordinary loss in 1988.

The 1989 earnings included $5.3 million, or 23 cents a share in gains on the disposition of several businesses, less the cost of other reorganization activities completed in the first half of 1989. Excluding these and similar small net gains in 1988, earnings in 1989 were $23.9 million, or $1.03 a share compared with $40.9 million, or $1.64 a share in the prior year.

The decline in 1989 earnings can be directly attributed to three factors, Gormley said: 1. the earnings of business units sold contributed $7.6 million, or 30 cents a share more in 1988 than in 1989; 2. extreme foreign exchange losses which amounted to $7.1 million, or 31 cents a share in 1989, compared to $0.8 million, or 3 cents a share in 1988; and

3. a general decline in original equipment and replacement business in the last half of 1989.

Net sales in the 1989 fourth quarter were $250.2 million, down from the prior year's $268.1 million due to businesses sold. Earnings available for common shares in the 1989 fourth quarter were $0.8 million or 4 cents a share. This was well below last year's record fourth quarter of $9.3 million, or 38 cents a share.

Headquartered in Southfield, Federal-Mogul operates 37 plants, more than 70 distribution centers and four major research facilities throughout the world. Its products range from a variety of precision parts for the transportation, farm equipment, construction and manufacturing industries to aerospace components.

SOUTHFIELD, MI (FEB. 14) PR NEWSWIRE - Dennis J. Gormley, president and chief executive officer of Federal-Mogul Corporation (NYSE:FMO), today announced the company recently signed a letter of intent to acquire selected assets and a significant portion of the business of R.E. Dietz Co. of Syracuse, N.Y.

Dietz is a 150-year-old family-owned business which has long served NAPA and other aftermarket customers with quality lighting products for automotive and truck applications. Federal-Mogul manufactures and distributes similar products under the Signal-Stat brand name from two Indiana facilities.

Although terms of the agreement were not disclosed, Gormley said Federal-Mogul plans to acquire certain of Dietz's inventories, tools, equipment, product drawings and customer lists relating to its lighting product line. Dietz will continue to manufacture these products for Federal-Mogul for an unspecified period of time.

"I'm very excited about the acquisition of the Dietz lighting business," Gormley said. "It is very complementary to our Signal-Stat business in both products and customers."

Headquartered in Southfield, Federal-Mogul operates 37 plants, more than 70 distribution centers and four major research centers throughout the world. Its products range from a variety of precision parts for the transportation, farm equipment, construction and manufacturing industries to aerospace components.

WEST BEND, WIS. (FEB. 14) PR NEWSWIRE - The board of directors of the Gehl Company (NASDAQ-NMS: GEHL) has elected James L. Packard a director. He replaces Wyatt W. Dawson Jr., who has resigned after serving on the board of the capital goods manufacturer for 13 years.

Packard, 47, is president of Regal-Beloit of South Beloit, Ill. He joined Regal-Beloit in 1979 as the vice president/general manager of the Durst Division, was elected president in 1980 and chief executive officer in 1984. Prior to joining Regal-Beloit, Packard was operations manager for Pepsico, a division of Frito-Lay. Packard also serves as director of the First National Bank and Trust Company of Beloit, Wis.

Dawson, 66, is president of his own company, Outdoor Specialists, Inc., of Plano, Texas. He is a former vice president of Rexnord, Inc., of Milwaukee.

Gehl Company designs, manufactures, distributes, sells and finances capital goods equipment used worldwide in the agricultural and light industrial and construction industries.

Gehl Company, whose shares were publicly traded for the first time Nov. 21 1989, is headquartered in West Bend. Manufacturing facilities are located in West Bend; Yankton and Madison, S.D.; and Myerstown, Pa.

DUBLIN, IRELAND (FEB. 14) PR NEWSWIRE - CRH plc, the Irish international building materials group, today announced it has acquired three companies through its U.S. holding company, Oldcastle, Inc., for a total consideration of $22.4 million including debt assumed. There is full asset backing for the consideration.

Betco Block and Products, Inc. ("Betco"), Goria Enterprises, Inc. ("Goria") and Eastern Prestressed Concrete Systems ("Eastern") had a combined trading profit of $4.9 million on sales of $40.7 million in 1989.

Oldcastle Southern Region Coming within

Oldcastle's Southern region, Betco has operations in Bethesda, Md., and Gainesville, Va., manufacturing concrete masonry and paving products and wholesaling clay brick and related building products. Betco serves the

new housing and non-residential construction markets in the booming metropolitan area around Washington, D.C. A significant portion of the company's business is also derived from sales of its patio products to major D-I-Y chains in the Mid-Atlantic states.

Based in Greensboro, N.C., Goria's product line includes concrete masonry, patio and interlocking pavers and concrete burial vaults. Like Betco, the company has been an innovator in serving the D-I-Y sector. Goria's new state-of-the-art paver plant should facilitate penetration of this emerging growth product segment in Goria's and Betco's populous markets.

Betco's management team led by its president, Peter Hoyt, will remain in place while Pierre Goria will stay on as chairman and existing management will continue to operate Goria in close association with both Betco and the nearby Adams Products Company which was acquired by CRH in 1987.

Commenting on the acquisitions, Joe McCullough, president of CRH Oldcastle's Southern Region, said, "These acquisitions will give us significant and growing sales in the rapidly expanding repair, maintenance and improvement market. There will be benefits from joint marketing programs to the D-I-Y sector, and the high quality burial vault product range has development potential. Also, there are excellent opportunities for product transfers between the companies and Adams Products, Oldcastle's existing subsidiary in North Carolina."

Oldcastle Northeastern Region Eastern is based in Hatfield, north of Philadelphia, and comes within Oldcastle's Northeastern region. A manufacturer of structural concrete for buildings and bridges, it supplies the populous Pennsylvania and New Jersey markets, both with strong parking deck and highway bridge programs.

The acquisition complements CRH's existing Spancrete Northeast, Inc. ("Spancrete"), prestressed concrete subsidiary. Headquartered at Albany in Upstate New York, Spancrete is a leading manufacturer of hollowcore plank and prestressed concrete building components, with facilities at Albany and Rochester, N.Y., and Cleveland, Ohio.

SECAUCUS, NJ (FEB. 14) PR NEWSWIRE - Vikonics Inc. (NASDAQ: VKSI), headquartered here, today reported a loss of $579,209, or $.27 per share, on net sales of $544,712 for the third quarter ended Dec. 31, 1989. This compares with a loss of $267,801, or $.13 per share, on net sales of $1,122,218 in the like year ago quarter.

For the nine months ended Dec. 31, 1989, the company reported a loss of $326,722, or $.15 per share, on net sales of $3,758,189, as compared to a loss of $1,231,730, or $.58 per share, on net sales of $2,323,995 in the corresponding prior year period.

According to John L. Kaufman, Vikonics' president and chairman of the board, "Operating results in the third quarter were affected adversely by delays in the awarding of new contracts from which additional revenues could have been generated. Management remains optimistic about the company's future. As a result of recent teaming agreements with major defense contractors in connection with the submission of bids for government contracts, we believe Vikonics is now positioned to take advantage of major opportunities in the high end security system market."

Vikonics Inc. designs, manufactures, markets, installs, and supports a line of sophisticated computer based security systems. The company markets its systems to defense contractors and government agencies as well as general commercial customers.

ZANESVILLE, OH (FEB. 14) PR NEWSWIRE - William A. Phillips, chairman of the board and chief executive officer of Mutual Federal Savings Bank (NASDAQ: MFBZ), a stock corporation, announced today that Mutual Federal wrote-off $20.3 million of goodwill and increased the provision for loan losses by $891,000 for the quarter ended Dec. 31, 1989. These moves were part of the restructuring plans in connection with the pending merger with Park National Corporation of Newark, Ohio. The reduction in goodwill was a result of a change in an accounting principle and the increase in the provision for loan losses was due to a more conservative review of the current loan portfolio.

Primarily as a result of the foregoing Mutual Federal reported a net loss of $20.9 million or $26.09 per share for the quarter ended Dec. 31, 1989. Net income for the three month period ended Dec. 31, 1988 was $461,000 or $.58 per share. Phillips stated that he believes future earnings will be stabilized and significantly improved as a result of the reduction in goodwill.

Mutual Federal adopted Statement of Financial Accounting Standards No. 72 ("SFAS No. 72") commencing with its fiscal year beginning Oct. 1, 1989 and recorded an adjustment to reduce goodwill by $20.3 million ($25.31 per share) for the three months ended Dec. 31, 1989. This amount represents

the cumulative effect of the retroactive application of SFAS No. 72 through Sept. 30, 1989. The retroactive application of SFAS No. 72 is permittted and encouraged under Emerging Issues Task Force Issue No. 89-19 adopted on Oct. 26, 1989.

As previously announced, Mutual Federal signed a letter of intent to merge with Park National Corporation of Newark, Ohio on Nov. 9, 1989. Consummation of the merger is subject to execution of a definitive acquistion agreement, approval of Mutual's and Park's shareholders and to certain regulatory approvals. Assuming such approvals, the merger is expected to be completed in the next four to five months.

At Dec. 31, 1989, Mutual Federal's total assets were $309.3 million and shareholders' equity was $245,000.

Mutual Federal operates ten branch offices and two mortgage lending offices in Central and Southeastern Ohio.

PASADENA, CA (FEB. 14) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE) today announced that on Feb. 13, 1990 its board of directors approved a two-for-one stock split to be issued on April 1, 1990 to shareholders of record on March 1, 1990.

The company currently has approximately 5,380,000 shares of common stock outstanding.

Jacobs recently announced record net income and earnings per share for the quarter ended Dec. 31, 1989 of $3,295,000 or $0.60 per share -- marking the third consecutive year of earnings' growth and record results for 1989. For the year ended Sept. 30, 1989, the company reported net income of $10,220,000, or $1.90 per share, on revenues of $793,577,000. In addition, the company announced that it had paid off the $9,000,000 balance on its term loan during the first quarter of 1990.

Dr. Joseph J. Jacobs, founder and chairman of the company, indicated the stock split was approved to increase the liquidity of the markets for "our common stock" now being traded more heavily than before -- on the New York Stock Exchange.

The company's shares were listed on the New York Stock Exchange, on Dec. 15, 1989. Previously the stock had been traded on the American Stock Exchange.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance and operations services to governments and industries worldwide.

HAUPPAUGE, NY (FEB. 14) PR NEWSWIRE - In a paper presented to the National Mastitis Council in Louisville, Ky., on Feb. 13, 1990, Michael P. Corby of the Diversey Corporation, a subsidiary of The Molson Companies, Ltd., reported on the effectiveness of the drug Clorpactin in replacing

antibiotic mixtures for the treatment of mastitis, an infection of the udders of dairy cows.

Clorpactin, which is manufactured exclusively by United-Guardian, Inc. (NASDAQ: UNIR) can eliminate the antibiotic contamination of the milk supplies because Clorpactin is removed in the first milking, instead of the five to eight milkings required for antibiotics. Economic factors are sometimes responsible for short-cutting this process and leaving antibiotic residues in the milk.

"Studies over a period of years have shown that Clorpactin can be more effective than a mixture of streptomycin and penicillin," says Dr. Alfred R. Globus, CEO of United-Guardian, "and leaves practically no residues in the milk."

Clorpactin has been used in the U.S. by the medical community for many years as a topical microbicide.

United-Guardian, Inc. is a manufacturer of pharmaceuticals and medical devices.

MURFREESBORO, TN (FEB. 14) PR NEWSWIRE - Pricor Incorporated (NASDAQ: PRCO) today announced operating results for the third quarter and first nine months of fiscal 1990.

Third quarter revenues were $5,376,261, an increase of 36 percent from revenues of $3,966,292, reported in the third quarter of fiscal 1989. During the third quarter of fiscal 1990, the Company's operating contribution totaled $1,152,640, up from a contribution of $927,060 reported during the same three month period a year earlier.

For the third quarter of fiscal 1990, Pricor reported net income of $153,634, or $.03 per share, as compared to a net loss of $60,913, or $.01 per share, reported in the third quarter of fiscal 1989.

The six facilities, totalling 3,000 beds, comprise the largest agreement with a private sector company in the adult corrections management industry. McCullough said the facilities should be operational by the fourth quarter of fiscal 1991.

Revenues for the nine month period ended December 31, 1989, were $14,866,300, up 43 percent from the $10,401,582 reported in the same period last year. During the first nine months of fiscal 1990 the

Company's operating contribution totaled $3,250,805, up 47 per cent from the $2,207,536 reported during the comparable period in fiscal 1989.

Net income during the first nine months of fiscal 1990 was $84,157, for earnings per share of $.02, as compared to a net loss of $428,879, or $.09 per share in the corresponding period a year earlier.

Pricor Incorporated provides educational and treatment services for youth and correctional services for juveniles and adults. The Company has contracts in Alabama, California, Tennessee, Texas and Virginia, and business interests in the United Kingdom.

The common stock of Pricor Incorporated is traded under NASDAQ symbol PRCO.

#90045p0060 02/14/1990 ~PR Newswire

LAKE SUCCESS, NY (FEB. 14) PR NEWSWIRE - Tambrands Inc. (NYSE: TMB) reported today that sales for the full year 1989 reached record-high levels. Sales for the quarter ended Dec. 31, 1989, were slightly lower than in the corresponding period in 1988, reflecting planned reductions in promotional sales in the United States and Canada. In connection with the previously announced restructuring, Tambrands incurred a one-time charge of $60 million after tax in the fourth quarter of 1989. As a result, Tambrands had a loss in the fourth quarter and modestly positive earnings for the full year.

Fourth quarter net sales in 1989 were $134,151,000, compared to sales of $134,944,000 in the same period in 1988. The net loss for the fourth quarter of 1989 was $59,032,000 or $2.64 per share. In 1988, fourth quarter earnings were $14,750,000 or $.66 per share.

For the full year 1989, net sales were $583,408,000, an increase of 4 percent over 1988 sales of $563,347,000. Net earnings in 1989 were $1,719,000 or $.08 per share, compared to 1988 earnings of $85,276,000 or $3.83 per share.

Tambrands' restructuring program includes the sale of its diagnostics and cosmetics businesses, reductions in workforce, and consolidation of

certain administrative and R&D facilities in the United States, Canada and Europe. Tambrands recently announced an agreement to sell its Physicians Formula Cosmetics subsidiary to Pierre Fabre, Inc.

Tambrands is a multinational manufacturer and marketer of personal care products, including Tampax(R) tampons, Maxithins(R) sanitary pads and First Response(R) home diagnostics.

#90045p0064 02/14/1990 ~PR Newswire

SANTA BARBARA, CA (FEB. 14) PR NEWSWIRE - Inamed Corporation (NASDAQ: IMDC, PSE: INA), headquartered here, today said its wholly owned subsidiary, McGhan Medical Corporation (MMC), has filed a suit against Mentor Corp. (NASDAQ: MNTR), with locations in California, Minnesota and Texas, for patent infringement on two patents assigned to MMC by Minnesota Mining and Manufacturing (3M Corp.) in 1985.

The suit was filed in the United States District Court (Northern District

of Texas, Dallas Division) and asks for injunctive relief, along with an accounting of damages and assessment of interest and costs, against Mentor and its Mentor Polymer Technologies Company for "producing mammary implants embodying the patented inventions."

According to MMC President T. Jan Varner, "We have repeatedly advised Mentor regarding product and process infringements on its use of MMC's 'barrier coat' in mammary implants, and our efforts to enter into a licensing agreement with Mentor with regard to the patented technology have been unsuccessful.

"Mentor's use of MMC's patented technology without a proper licensing agreement to use the technology is a direct and willful patent infringement, and MMC intends to seek all available protection provided by Federal Patent Laws of the United States and pursue remedies for any and all degrees of infringement by Mentor or any of its subsidiaries or affiliate companies. We believe this action is in the best interest of MMC's customers and is warranted to protect other companies that have entered into active licensing agreements and currently pay royalties to MMC for use of the patent and its technology."

In addition, the suit filed by MMC asks for declaratory judgment of noninfringement, invalidity and unenforceability of two U.S. patents assigned to Mentor -- the Radovan and Becker patents for certain types of tissue expanders. It is the opinion on Inamed/MMC's management that both patents are clearly invalid, notwithstanding a recent patent infringement case brought by Mentor against another Inamed subsidiary, Cox-Uphoff (CUI Corporation). To support its case, the company will present certain facts that have not yet been exposed, as well as additional facts that were "not presented properly in the prior action."

Inamed Corp. is a medical and surgical device company engaged primarily in the development and application of silicone technologies to specialty medical markets. McGhan Medical Corporation is the company's largest subsidiary and services the plastic and reconstructive surgery market.

ATLANTA (FEB. 14) PR NEWSWIRE - Sony Corp. of America (NYSE: SNE), Scientific-Atlanta Inc. (NYSE: SFA), and MAST Industries Inc. have cooperatively accomplished the world's first High Definition Television (HDTV) videoconference.

Using Scientific-Atlanta's HDB-MAC transmission system, the two-way

satellite conference registered some pioneering achievements in international video communication.

The HDTV videoconference linked MAST Industries, the design and procurement arm of The Limited Inc., one of America's leading retailers, with Hong Kong fashion manufacturers. MAST Industries' Andover, Mass.-based merchandise buyers and design officials used the HDTV videoconference to evaluate and select designs and materials for future fashions.

Sony HDTV cameras, monitors, VTRs, and projection equipment were installed in MAST offices in Hong Kong and Andover, Mass. The Hong Kong feed was accomplished via Scientific-Atlanta HDB-MAC secure transmission technology over fiber optic lines within Hong Kong with the feed then uplinked to an Intelsat satellite over the Pacific. From that satellite the signal was relayed through an AT&T ground station in the Pacific Northwest to a GE Americom satellite across the U.S., directly to MAST headquarters in Andover, Mass. A similar path carried the return signal back to Hong Kong.

A variety of organizations supported Sony, MAST Industries and Scientific-Atlanta in accomplishing this historic event. They include: Vision Accomplished of Santa Monica, Calif., which designed and coordinated the satellite network; Cable & Wireless (HK) Ltd., and Hong Kong Telephone, who collaborated on the Hong Kong fiber links; Steve Lysohir Productions, which produced the Andover, Mass. portion; and Sony HD Software Co. of Tokyo, which produced the Hong Kong portion.

MAST Industries is an international manufacturer and importer and one of the largest distributors of women's apparel in the United States, and is a division of The Limited Inc. With revenues in excess of $5 billion, the Limited, headquartered in Columbus, Ohio, operates over 3,000 retail outlets in the U.S., including The Limited, Victoria's Secret, Henri Bendel, Express, Lane Bryant, Abercrombie & Fitch, and Lerner.

Sony Corp. of America's Videoconferencing and Satellite Systems Division, headquartered in Park Ridge, N.J., provides a broad range of systems solutions for videoconferenceing and satellite transmission needs. The Advanced Systems Co., headquartered in Teaneck, N.J. is responsible for business development in the U.S. related to HDTV technologies.

Scientific-Atlanta Inc. is a leader in cable television electronics and satellite-based communications networks and is a key supplier of electronic instruments and control systems for industrial, telecommunications, and government applications.

#90045p0071 02/14/1990 ~PR Newswire

ATHLONE, IRELAND (FEB. 14) PR NEWSWIRE - Elan Corporation, plc (AMEX: ELN) today announced record revenues and profits for the quarter ended Dec. 31, 1989. Revenues increased 69 percent to 6,938,000 Irish Pounds Sterling (IRP) (US$10,783,000) compared to IRP 4,099,000 (US$6,377,000). Net profits for the quarter amounted to IRP 735,000 (US$1,143,000) compared to IRP 545,000 (US$484,000) in the same period last year. Earnings per share for the quarter were IRP 0.05 (US$0.07) compared to IRP 0.03 (US$0.05).

Revenues for the nine months ended Dec. 31, 1989 increased 116 percent to IRP 23,495,000 (US$36,551,000) from IRP 10,873,000 (US$16,915,000) in the corresponding period last year. Net profits of IRP 2,069,000 (US$3,219,000) compared to IRP 287,000 (US$447,000) in the nine month period. Earnings per share for the 9 month period where IRP 0.13 (US$0.20) compared to IRP 0.02 (US$0.03).

"We are pleased to report continued growth at Elan," said Chairman and Chief Executive Officer Donald E. Panoz. "These results are achieved on strong licensing, manufacturing and royalty income."

"Elan is now entering a period of sustained growth in revenues and profitability and is set to realize the benefits of our strategy of investing in new products and technologies and establishing a health care marketing base," said Donald E. Panoz. "I am confident that as we continue to broaden the base of the company we will also continue to achieve significant growth in our revenues and profits."

Elan Corporation, plc is a leader in the specialized health care field of drug delivery, concentrating on improved drug absorption and utilization. Elan operates research and manufacturing facilities in Athlone, Republic of Ireland; Enschede, Netherlands; Manilla, Philippines; Gainesville, Ga.; Cambridge, Mass.; and Brea, Calif.

(FEB. 14) PR NEWSWIRE - IBM will have a worldwide announcement introducing its new family of advanced workstations on Thursday, February 15. Announcement events will be held in New York and San Francisco. The media is invited to cover either or both of them.

The New York press conference will be in the auditorium of The IBM Gallery of Science and Art, 590 Madison Avenue. Doors open at 9:30 a.m. for registration and coffee. The conference will begin promptly at 10:00 a.m.

J.D. Kuehler, president, IBM Corporation, will make the announcement in New York along with G.H. Conrades, IBM senior vice president and general manager, IBM U.S. marketing & services, and N. M. Donofrio, IBM vice president and president, Advanced Workstations Division.

In San Francisco, the media is invited to join nearly 2,000 IBM customers and business partners at the Masonic Auditorium (1111 California Street). The event will feature product demonstrations by IBM and third party application developers.

Press registration and a breakfast briefing begin across the street at 8:30 a.m. at the Mark Hopkins Hotel. The presentation will begin promptly at 9:30 a.m.

T.R. Lautenbach, IBM senior vice president and general manager, IBM U.S.,

will make the announcement in San Francisco along with W. O. Grabe, IBM vice president and assistant general manager, IBM U.S. marketing & services, and P.D. Hester, director, Advanced Workstations Division Engineering Center.

Since space may be limited, reporters who wish to attend either news conference should RSVP promptly to IBM Media Relations at 212 661-4427.

PITTSBURGH (FEB. 14) PR NEWSWIRE - Genix Enterprises has signed the AM General Division of LTV Missiles and Electronics Group to a multi-year, multimillion-dollar computer operations outsourcing contract, it was announced today.

AM General is a South Bend, Ind.-based manufacturer of HUMMER High Mobility Multipurpose Wheeled Vehicles for the armed services of the United States and 18 friendly foreign countries.

Under the terms of the agreement, Genix will provide AM General Corp. with all required mainframe computer capacity, systems software, disk and tape storage, data telecommunications and technical resources necessary to support its business. AM General will continue to conduct all applications development and maintenance functions with its own staff.

According to Genix Enterprises' Senior Vice President of Marketing and Sales Cecil Sexton, Genix's concentration on computer operations allows it to provide companies such as AM General with a means of becoming more strategic in its use of information technology by eliminating the day-to-day problems associated with operating mainframe computers. Says Sexton, "Senior information technology executives are realizing that running hardware is a generic task, while applications development and the integration of business and IT strategies are strategic areas that bring additional value to the business."

AM General is the vehicle manufacturing unit of LTV Missiles and Electronics Group, which also builds missiles, rockets, space systems and avionic and electronic equipment.

Genix Enterprises is a wholly owned information services subsidiary of National Intergroup Inc. (NYSE: NII), a multibillion-dollar diversified distribution and services firm. Genix Enterprises' principal operating unit is Genix Corp., which operates a large computer processing facility in suburban Pittsburgh, through which it provides computer operations

outsourcing services to customers in a wide variety of industries.

BEVERLY HILLS, CA (FEB. 14) PR NEWSWIRE - Qintex Entertainment Inc. (QEI) (NASDAQ: QNTQE) announced today that the company, the QEI Creditors' Committee, SCS Communications Inc. (SCS), and Stephen Swid have reached an agreement for continuance of the temporary restraining order approved in Federal bankruptcy Court on Jan. 31, 1990. As previously reported, the court order restricts SCS and Stephen Swid from attempting to obtain or exercise rights with respect to the governance of QEI and its subsidiaries.

The agreement announced today would continue the temporary restraining order through Feb. 26, 1990, at which time Swid and SCS, as well as other interested parties, will have the opportunity to commence "due diligence" analysis of QEI.

As reported on Oct. 19, 1989, QEI filed for protection under Chapter 11 of the Federal Bankruptcy Code when Qintex Australia Ltd., (QAL), the principal source of QEI's working capital requirements, could not provide financing to meet a material obligation. SCS had been in negotiations with a subsidiary of QAL to obtain a proxy and purchase option on QEI shares held by the QAL subsidiary.

QEI recently named the firm of Donaldson, Lufkin & Jenrette to act as investment banker on behalf of the company. The investment banking firm is currently engaged in exploration of strategic alternatives for QEI to maximize values for creditors and shareholders, including responding to inquiries from prospective investors or purchasers.

FORT LAUDERDALE, FL (FEB. 14) PR NEWSWIRE - Flanigan's Enterprises, Inc. (AMEX: BDL), owners and operators of the "Big Daddy's" chain of cocktail lounges and retail liquor stores, today announced results for the 13 weeks ended Dec. 30, 1989. This year's results include $300,000 of income from the termination of a management agreement. The table below sets forth the results on a comparative basis with the 13 weeks ended Dec. 31, 1988.

FLANIGAN'S ENTERPRISES, INC.

	13 Weeks Ended Dec. 30, 1989	13 Weeks Ended Dec. 31, 1988
Sales	$8,244,000	$9,342,000
Net income	$ 487,000 (A)	$ 231,000
Earnings per share	$ .52	$ .25
Average number of shares outstanding	930,882	930,882

(A) -- Includes $300,000 of income from the termination of a management agreement.

In an insert to the Proxy included in the annual shareholder mailing, Flanigan's Enterprises, Inc. reported the filing of a Schedule 13-D in the amount of 8.78 percent of the company common stock. This report was erroneous in that it was not a 13-D, but a 13-G that was filed. This is believed to be for investment purposes only.

PRINCETON, NJ (FEB. 14) PR NEWSWIRE - Dataram Corp. (AMEX: DTM), a developer, manufacturer and marketer of innovative computer memory and peripheral products, today reported revenues and earnings for the third quarter and nine months of fiscal 1990.

Revenues for the third quarter which ended Jan. 31, 1990, were $5.5

million compared to the $3.5 million reported in the year-earlier period. Net earnings for the current year's third quarter were $821,000 or $.42 per share, which included a net gain after taxes of $123,000 or $.06 per share, from the sale of 60,505 shares of CSP Inc. common stock. Last year's third quarter net earnings were $331,000 or $.17 per share.

For the nine months of fiscal 1990, revenues were $13.6 million compared to the $10.4 million reported in fiscal 1989. Net earnings totalled $1.7 million, or $.89 per share, vs. $1 million, or $.54 per share, reported for the comparable period last year.

The company's Digital Equipment Corp. (DEC) memory products, WIDE WORD memory systems, and a strong showing by newly developed computer workstation memory products, were largely responsible for the improved third quarter results, according to Robert V. Tarantino, president and chief executive officer.

"Our product diversification strategy, supported by enhanced sales, marketing and engineering capabilities, continues to pay dividends," Tarantino said. "We are finding niche opportunities, developing new products to meet emerging needs, and bringing them to market quickly."

Tarantino said he was particularly pleased by the "faster than expected" earnings contributions made by workstation products introduced in the second quarter, and indicated that additional workstation offerings will be unveiled in the fourth quarter.

Although business remains disappointing for the company's Data General (DG) minicomputer memory products, Dataram's broadened product line has considerably cushioned DG's impact on overall corporate profitability.

"Operating results are essentially on plan, yet we remain cautiously optimistic concerning the fourth quarter because of well publicized problems affecting the computer industry," he stated. "We continue to monitor current developments and industry trends, but remain committed to our business plan.

#90045p0086 02/14/1990 ~PR Newswire

MCLEAN, VA (FEB. 14) PR NEWSWIRE - An electronic encryption device that mathematically encodes computer signals so they may travel in top security on ordinary local-area networks has received the full endorsement of the U.S. government.

The Xerox Encryption Unit (XEU) is the first local-area network product

developed under the government's Commercial COMSEC Endorsement Program (CCEP) that meets Type 1 standards for the protection of government information of the highest classification and sensitivity.

Following a five-year development process, Xerox announced the XEU on Aug. 24, 1989. At that time, after initial government approval, the company began accepting orders and said full endorsement and availability was expected in the fourth quarter of the year.

"We are delighted that after a lengthy development process the XEU was found to meet the tough standards of the National Security Agency," said Jay Nussbaum, president, Xerox Integrated Systems Operations.

"Since it enables government computer users to send both classified and non-classified information on the same local-area networks, it greatly extends the value of these LANs by eliminating the need to install expensive shielding or to set up new, secure networks," Nussbaum added. The Xerox Encryption Unit meets the specifications of IEEE 802.3 and Ethernet.

It is installed between a workstation or a personal computer and a network connection. Once activated, the XEU encodes information as it passes from the workstation to the network and decodes information being received. Government-supplied algorithms and key variables are used in the encoding process.

The XEU measures approximately 3-by-10-by-12 inches and is encased in an injection-molded, plastic housing. Because of its design, the XEU is considered an unclassified controlled cryptographic item.

The Xerox Encryption Unit is priced at $4,995. It is being sold to the government and its prime contractors through the Custom Systems Division of Xerox Integrated Systems Operations, with headquarters here.

DENVER (FEB. 14) PR NEWSWIRE - Atlas Corporation (NYSE: AZ) today reported net income of $1,882,000, or $.32 per share, for the second quarter ended Dec. 31, 1989, compared to net income of $1,854,000, or $.31 per share (see note below), for the second quarter ended Dec. 31, 1988.

For the six-month period ended Dec. 31, 1989, Atlas' net income was $2,221,000, or $.37 per share, compared to a net loss of $64,000, or $.01 per share (see note), sustained during the comparable period last year.

Mining revenue for the second quarter ended Dec. 31, 1989, was $8,751,000, compared to mining revenue of $6,307,000 for the second quarter ended Dec. 31, 1988, an increase of 39 percent. Mining revenue for the six months ended Dec. 31, 1989, was $15,642,000, up 26 percent from mining revenue of $12,431,000 reported for the comparable period last year. Atlas' increased mining revenues for the six-month period ended Dec. 31, 1989, are the result of a 28 percent increase in gold production over the comparable period last year.

Atlas reported $1,591,000 in income from continuing operations for the second quarter ended Dec. 31, 1989, compared to income from continuing operations of $1,548,000 for the second quarter ended Dec. 31, 1988. For the six months ended Dec. 31, 1989, Atlas reported income from continuing operations of $1,460,000, compared to a loss from continuing operations of $541,000 for the comparable period last year.

Atlas' increased second quarter earnings reflect the sale in October of a portfolio stock investment for $1,500,000, and a resulting gain of $1,255,000.

During the second quarter, Atlas produced 21,000 ounces of gold from its Gold Bar Mill in Nevada, and mining revenue was recognized at an average of $416 per ounce. The company is projecting that it will produce 80,000 ounces of gold during fiscal year 1990.

EDISON, NJ (FEB. 14) PR NEWSWIRE - Dataflex Corporation (NASDAQ-NMS: DFLX) announced today that it had achieved its first $9 million revenue month in January, 1990. Jeffrey Lamm, chairman, stated, "we are very pleased with January's results. This growth in revenue was primarily the result of an on-going sales and marketing effort which has resulted in the addition of major new customers over the last several months."

Additionally, Dataflex announced that for the fourth consecutive quarter, IBM has selected it as a Northeastern "PC Dealer of the Quarter," in recognition of the company's industry-leading level of sales, support and service of IBM products. Dataflex was selected from over 60 IBM dealers from North and Central New Jersey. IBM's Northeastern "PC Dealer of the Quarter" is an honor that is bestowed upon dealers that exceed the "standards of excellence" as established by IBM. Criteria for this selection includes sales volume, end-user support, application and technical expertise as well as maintenance capabilities.

Richard C. Rose, president of Dataflex, state: "We are very proud of this achievement, and elated that IBM continually recognizes the achievements of our company."

ALAMEDA, CA (FEB. 14) PR NEWSWIRE - Aquanautics Corporation (NASDAQ: AQNT) has received from the U.S. Patent Office formal notices of allowance for its two patent applications titled "Polyalkylamine Complexes for Ligand Extraction and Generation" and "Macrocyclic Amine Complexes for Ligand Extraction and Generation." The patents will issue within the next few months.

These patents result from several years of research by Aquanautics' scientists, and cover broad families of chemical compounds which are the heart of Aquanautics' oxygen control technology. The patents also cover ways of making and using these compounds. The chemicals have uses in various oxygen control technologies (such as Aquanautics' "artificial gill") and in oxygen scavenging applications. These chemicals can "capture and release" oxygen, acting very much like hemoglobin in blood. For instance, the compounds can pick up oxygen in a location where it is plentiful, and release it into a container in a highly purified state. Conversely, oxygen can be collected inside a container where it is undesirable, and exhausted to the outside.

N. Ross Buckenham, Aquanautics' president and chief executive officer, said "These two patents are significant additions to Aquanautics' collection of issued patents, and strengthen our position in the field of oxygen management control technology. We are pursuing several other important patent applications both in the U.S. and abroad."

Aquanautics Corporation is a development stage separations and specialty chemical company producing new oxygen control technologies. Aquanautics' proprietary synthetic oxygen-binding molecules can be structured into a variety of systems for extracting, concentrating and/or eliminating oxygen. The company is currently developing applications for food, medical, industrial and defense markets.

RALEIGH, N.C. (FEB. 14) PR NEWSWIRE - Firstcorp, Inc. (AMEX: FCR) announced today that its Board of Directors had unanimously adopted a four part plan designed to position the Company for long term growth and profitability. The plan addresses issues steaming from adherence to new regulatory capital requirements and the downturn in the local real estate market. The major components of the plan are:

1. Merge 1st Federal of Raleigh (FFR) and 1st Federal of Durham (FFD) in order to reduce costs and improve customer service. This action was unaimously approved at a joint meeting of the two Boards of Directors on February 9, 1990. The proposed name for the resulting institution is First Federal Savings Bank of Central Carolina.

2. Increase capital by the profitable sale of one or more or the following assets:

-- 1st Security of Pinehurst
-- downtown office properties of FFR & FFD
(sale & lease back)
-- $400 million in mortgage servicing rights of FFR

3. Sell a large block of FFR's nonperforming assets to a to-be-formed liquidating REIT or similar vehicle in order to remove those assets from FFR's books. A major Wall Street firm has been selected to assist with this transaction.

4. Obtain a commercial bank charter to permit a further expansion of the profitable consumer and business loan divisions which are presently limited by savings and loan regulations.

Frank Gailor, Chairman of Firstcorp said, "This plan will benefit our customers, stockholders, and bondholders alike and implementation will begin immediately." Mr. Gailor also said, "We feel further encouraged by the momentum we've established in our real estate sales area and by our extremely high customer service rating."

Further details of the plan will be contained in the 12/31/89 quarterly stockholder report.

#90045p0099 02/14/1990 ~PR Newswire

INGLEWOOD, CA (FEB. 14) PR NEWSWIRE - Eldon Industries Inc. (NYSE: ELD) continued the consistent expansion of its business in 1989 as net sales, net income and earnings per share were the best in company history. It was the seventh consecutive year of record operating results for Eldon.

Fourth quarter results also improved from the strong levels of the prior year to establish new records for the period despite having one less week of operations than in 1988.

Net income for the year ended Dec. 30, 1989, increased 13 percent to $8,574,000, equal to 91 cents per share from $7,568,000 or 81 cents per share in 1988, as adjusted to reflect the 33 1/3 percent stock dividend effected as a 4-for-3 stock split on June 30, 1989.

Sales for 1989 totaled $112,633,000, up 11 percent from $101,400,000 in the prior year.

Net income for the fourth quarter was $2,354,000, equal to 25 cents per share, an increase of 19 percent from $1,972,000 or 21 cents per share one year earlier, as adjusted for the previously mentioned stock dividend. Fourth quarter sales were $28,652,000, representing a 10 percent improvement from $26,025,000 a year ago.

Robert Silverstein, chairman and chief executive officer, said: "The year 1989 was one of significant progress for Eldon in several important respects. We expanded our product lines and strengthened our market position in key areas. Substantial investments in facilities, equipment and systems were targeted at supporting growth and enhancing our ability to better serve customers. Even with this unusually high level of investment, we ended the year in strong financial condition, with no long- or short-term bank debt.

"Despite some softness in the domestic economy, our office products segment posted solid, double digit growth, and the Ungar segment had modestly higher sales. International sales continued to grow even faster than domestic sales, and now account for 19 percent of total sales.

"We are pleased with our performance during the fourth quarter considering that it contained 12 weeks compared with 13 weeks in the fourth quarter of 1988. In spite of the fact that there were 8 percent fewer shipping days we achieved a 10 percent increase in sales.

"We remain optimistic about our prospects for 1990. We have many new products scheduled for introduction during the year which should benefit our growth."

Eldon Industries Inc. markets worldwide Eldon Office Products, Ungar production equipment for the assembly and repair of electronic circuits, Davson information boards, signage and building directories and LP Products credenzas, cabinets and lecterns.

WOODLAND HILLS, CA (FEB. 14) PR NEWSWIRE - Perceptronics Inc. (NASDAQ: PERC) today reported net income for its third fiscal quarter, ended Dec. 31, 1989, reached $324,276, or $.09 per share, on revenues of $6,720,243. Included in net income was an extraordinary gain of $123,100, or $.03 per share, stemming from the utilization of a net operating loss carryforward.

In the comparable prior-year period, the company recorded a net loss of $2,345,922, or $.68 per share, on revenues of $8,631,464.

For the current nine-month period, Perceptronics' net income rose to $815,982, or $.24 per share -- including an extraordinary tax credit of $328,500, or $.10 per share -- from a net loss a year earlier of $2,509,363, or $.73 per share. Revenues were $20,856,150 versus $22,490,993 a year earlier.

Figures for the prior-year periods included results from a since divested subsidiary and reflected revenues from the company's SIMNET program, which is now operating at a reduced rate.

Perceptronics is engaged in research and system development -- primarily for the Department of Defense -- and in the manufacture and marketing of low-cost, intelligent computer-based systems for training, simulation and decision support.

MELBOURNE, FL (FEB. 14) PR NEWSWIRE - DBA Systems, Inc. (NASDAQ: DBAS) announced today that during the three month period ending Dec. 31, 1989, DBA recorded revenues of $8,725,000, compared to $13,928,000 recorded in the comparab ?three month period in the prior fiscal year. A pretax loss for the quarter ending Dec. 31, 1989, of $10,060,000 was recorded as compared to pretax income of $518,000 reported for the same period the prior fiscal year. A fully diluted loss per share for the quarter ending Dec. 31, 1989 of $3.75 was recorded compared to earnings per share of $.45

reported for the same period in the prior fiscal year.

The magnitudeof this quarter's loss is primarily attributable to the provision for divestiture and losses at DBA Military Products Division (MPD) at Kissimmee, Fla. DBA's remaining divisions, Imaging Systems and Electronic Systems, show positive operating margins through the quarter ending Dec. 31, 1989. "Though the decision to divest MPD was a difficult one, it will allow us to concentrate our resources to grow our profitable core businesses which are the least likely to be impacted by DoD budget reductions," said John L. Slack, DBA president and CEO.

TORONTO, ONTARIO (FEB. 14) PR NEWSWIRE - Saturn cars will be available for sale in Canada in mid-1992 through franchised dealers of Passport International Automobiles, the import division of General Motors of Canada representatives of Passport and Saturn Corporation announced today.

"We're delighted and looking forward to adding Saturn products to our existing Passport lineup," George A. Peapples, president of General Motors of Canada, told a media gathering at the Toronto International Auto Show.

"Passport and Saturn share a common goal -- to reach out to current owners of import vehicles, as well as those who intend to purchase them, with high-quality products and customer services," Peapples said.

Saturn President Richard G. "Skip" LeFauve, who joined Peapples in making the announcement, said "serving the Canadian market has always been a key strategy in our export plans. We're extremely pleased to offer our products through the high caliber Passport dealer network."

Passport International Automobiles was established three years ago as a unique import operation with a separate dealer distribution network to target Canadians who were inclined to purchase only imported vehicles.

Passport has 62 dealerships across Canada and is planning on adding an additional 30 this year.

Saturn Corporation, an independent subsidiary of General Motors, is based in Spring Hill, Tenn., and Troy, Mich. The company's mission is to develop, manufacture and market a family of high-quality, affordable cars to compete in the subcompact and compact segments of the market. Saturn products will be built at a 4 million-square-foot manufacturing and assembly complex in Spring Hill. The first cars, four-door and two- door

models, will be introduced in the United States this fall.

PARSIPPANY, NJ (FEB. 14) PR NEWSWIRE - Athlone Industries, Inc. (NYSE: ATH) today reported that net sales and earnings from continuing operations before provision for income taxes for 1989 were ahead of 1988. Net sales in 1989 amounted to $273,297,000, compared to restated net sales of $252,759,000 in 1988. Earnings from continuing operations before provision for income taxes for the year 1989 amounted to $18,601,000, compared to $17,887,000 in 1988, as restated.

Net earnings for 1989 amounted to $13,862,000 or $2.30 per common share, compared to $18,297,000 or $3.33 per common share, in 1988. The net earnings in 1988 included income from discontinued operations of

$2,915,000 or $.55 per common share compared to $262,000 or $.04 per common share in 1989.

The increase in sales and earnings from continuing operations before income taxes are attributable to the company's specialty steel operations.

During 1989, the company retired $25 million of its 15-5/8 percent subordinated notes using internally generated funds. The company presently expects, subject to market conditions, to retire about the same amount in 1990.

As previously announced, the company sold the business of its Dudley Sports division in January 1990. The company expects to realize a total of about $20 million in cash from this sale and the disposition of the other assets of this division. The company will record a net profit of about $1 million on this transaction in the first quarter of 1990.

#90045p0112 02/14/1990 ~PR Newswire

LOUISVILLE, KY. (FEB. 14) PR NEWSWIRE - Ford Motor Company's business is shifting and Ford, which today starts production of the new Explorer compact sport utility truck, may become much more truck- oriented in the future, especially in Europe, Philip E. Benton Jr., president - Ford Automotive Group, said today.

"We expect the European market to adopt the American idea that trucks are for carrying people as well as cargoes," he said. "Trucks constitute fully one-third of the industry's volume each year, and are 40 percent of the (Ford) division's North American volume."

"That percentage is heading upward because, as part of our strategy for the '90s, Ford will be building more and different kinds of trucks -- for our own customers and for our international partners."

Benton, speaking at the launch of the all-new Ford Explorer family sport/utility truck at the company's Louisville Assembly Plant, said, "I can't tell you exactly how or when this truck expansion in Europe will take place, but I'm convinced that it will -- and that Ford, with world-class products such as the Explorer, will be a leader."

Later this year, Benton pointed out, Ford will build 2-door 4X4 vehicles at the plant for Ford's partner Mazda to sell as the Navajo through its U.S. dealer network, an industry first.

Commenting on the $560 million program that led to today's Explorer production startup, Benton said, "To meet the challenge, every single employee at Louisville has taken between 80 and 120 hours of training. Nearly 300,000 hours of training in all."

"Now, every man and woman is equipped with the skills necessary to build a world-class vehicle, thanks to their own drive and initiative, to the tremendous help of the UAW, and to $13 million worth of state and local government assistance."

Benton told the 2,000 plant employees before driving the first Explorer off the assembly line, "There's no question that, as a truck producer, Ford is leading from strength.

"After all, we led the industry in truck sales in the United States for all but two of the past 13 years; during most of the '80s, the Ford pickup truck was the best-selling vehicle, car or truck, in America; in 1989, Ford led in six out of seven truck market segments.

"Sport/utility today is the fastest-growing segment of the truck market and, with the new Explorer, we will be fully competitive in that segment. We've bet nearly $600 million on that outcome."

Benton told the audience, "The hardworking team here at Louisville put this system in place without shutting the line down even one day for model changeover. I'd like to now thank each and every member of the team for that achievement."

The Ford Explorer, an all-new 2- and 4-door sport utility vehicle with 2- or 4-wheel-drive and a 4.0-liter V-6 engine, will go on sale at Ford dealerships in March.

FREMONT, MI (FEB. 14) PR NEWSWIRE - The Gerber Products Company (NYSE: GEB) board of directors today declared a regular quarterly dividend of 24 cents per share.

The dividend is payable March 10, 1990, to shareholders of record on Feb. 26, 1990. It will be the company's 179th consecutive quarterly dividend.

In other action, Robert L. Johnston, executive vice president - Gerber Products Division, was elected to the board. Johnston will fill the unexpired term of David Johnson, who resigned in January.

"Bob Johnston is the leader of our most successful operation. His exceptional performance and contribution to the company's growth makes him an ideal director for Gerber Products Company. He will add valuable judgment and insight to the board," explained Al Piergallini, chairman, president and chief executive officer.

Johnston began his Gerber career in 1955 as a sales representative in Los Angeles and moved up through the sales ranks to assistant district manager before being named product manager in 1969. He later became group product manager - non foods, and then returned to Sales as central division manager from 1980-83.

He was named manager of the Asheville, N.C., baby food plant in 1983. He was named vice president, marketing - Gerber Products Division in 1984 and became vice president, general manager of the division in 1985. He was elected a corporate executive vice president in 1986.

The board also indicated that it continues its search for a president and chief operating officer.

ROCKVILLE, MD (FEB. 14) PR NEWSWIRE - In a move designed to further its lead in online games and customer support, the GEnie service has announced the addition of the TSR Online RoundTable.

TSR, Inc. is the world's leading publisher of role-playing games and products, including the mega-hit Advanced Dungeons & Dragons game.

GEnie is an online consumer information service for personal computer enthusiasts offered by GE Information Services.

TSR, Inc., Lake Geneva, Wis., published the first role-playing game, the Dungeons & Dragons game, in 1974. Since then it has led the surge that has made role-playing one of the largest and most powerful segments of the worldwide gaming community. The release last year of the Advanced Dungeons & Dragons (2nd Edition) game was hailed industrywide as a major achievement and one of the gaming milestones of the decade.

In addition to information and news about the Advanced Dungeons & Dragons (2nd Edition) game, GEnie service subscribers also will be able to take part in live gaming, enroll in the RPGA (Role-Playing Gamers Association), purchase TSR products through an online catalog, and participate in regular online classes on role-playing and dungeon- mastering.

Regular features on the TSR RoundTable will include RPGA network events, DRAGON magazine articles available for download, previews of upcoming TSR novels, regular conferences and interviews with TSR personalities (including game designers), up to the minute information on gaming conventions and events around the world, and the chance to ask questions about any TSR product.

For further information in the U.S. and Canada on the GEnie service, please call 1-800-638-9636. GE Information Services, a division of General Electric Company, is headquartered in Rockville, Md.

HOUSTON (FEB. 14) PR NEWSWIRE - Enex Resources Corporation (NASDAQ: ENEX) announced today that it had reached a definitive agreement with respect to a plan announced on Nov. 14, 1989, providing for the repurchase of the 68.64 percent of the corporation's outstanding stock owned beneficially by Energy Development Partners, Ltd. (EDP).

Under the plan, Enex shares owned beneficially by EDP will be repurchased by the corporation in exchange for 68.64 percent of the corporation's net assets, including the corporation's interest as a general and limited partner in Enex Program I Partners L.P., Enex Oil & Gas Income Program II-1, Enex Oil & Gas Income Program II-2, Enex Oil & Gas Income Program II-3, Enex Oil & Gas Income Program II-4, Enex Oil & Gas Income Program II-5 and Enex Oil & Gas Income Program II-6 and certain of the oil and gas properties and other assets owned directly held by the corporation. Completion of the repurchase is subject to certain conditions, including

the approval of necessary proxy materials by the Securities and Exchange Commission and the approval of the shareholders of the corporation. EDP has agreed to vote its 68.64 percent of the corporation's stock in favor of the repurchase. It is expected that a shareholder's meeting will take place within 30 days after the commission's approval of the proxy materials.

Gerald B. Eckley, president of Enex Resources Corporation, commented, "This transaction allows the company to focus on its primary business of marketing and managing oil and gas investments. The company remains a strong and independent general partner managing 28 limited partnerships with interests in more than 10,000 oil and gas wells."

NASHUA, NH (FEB. 14) PR NEWSWIRE - NFS Financial Corp. (NASDAQ: NFSF) says it has reclassified certain Dec. 31, 1989 balances including a $916,000 charge-off of a nonperforming real estate loan. The company restated total loss allowances at Dec. 31, 1989 from $2,617,000 to $1,701,000.

The company also restated the year-end level of nonperforming assets from $13,498,000 or 2.64 percent of total assets to $12,869,000 or 2.52 percent of total assets.

James H. Adams, CEO, said "the charge-off does not affect previously announced 1989 earnings of $1.9 million, or 67 cents per share. In closing our books for 1989, we further reviewed specific problem assets and made several changes including this charge-off. Since we had already released year-end results that included the relevant balance sheet items, we decided to announce the changes."

#90045p0137 02/14/1990 ~PR Newswire

WARREN, OH (FEB. 14) PR NEWSWIRE - CSC Industries, Inc. announced its 1989 fourth quarter and year-end results today. Net sales for the year ending Dec. 31, 1989, were $172,198,000, a 26 percent decline from 1988's $233,328,000 in sales. This contributed to a net loss of $23,504,000, or $2.72 per share, for the year after an extraordinary gain of $8,240,000, or $0.95 per share, as a result of the restructuring of debt owed to Copperweld Corporation (NYSE: COS), CSC's former parent corporation. In 1988, net income of $3,176,000, or $0.37 per share, was reported.

In the fourth quarter ended Dec. 31, 1989, net sales declined 35 percent, to $36,259,000 from $55,636,000 in the same period in 1988. This was also a $6,652,000 decline from the third quarter's sales of $42,911,000. This decreased sales volume contributed to a loss of $13,825,000, or $1.60 per share, in this year's fourth quarter as compared to a profit of $1,304,000 or $0.15 per share, in 1988's fourth quarter. Shipments for the fourth quarter 1989 were 27 percent lower than the previous year.

The fourth quarter's results were also affected by year-end inventory adjustments, which included a $3,085,000 write-off of slow- moving inventory. Other additional adjustments of $486,000 resulted in a net year-end adjustment of $3,571,000.

Weakness in demand for steel bar products resulted in lower selling prices. Cost reduction and improvement projects, while showing results, have not been able to respond as quickly as the volume and selling price declines. This has produced downward pressure on margins due to the high fixed cost nature of the company.

The company's liquidity was improved in the fourth quarter with the establishment of an additional $20 million of borrowing capability through two new bank lenders. An additional $10 million is available if required. This has enabled the company to maintain its supplier trade credit on satisfactory terms.

#90045p0140 02/14/1990 ~PR Newswire

SAGINAW, MI (FEB. 14) PR NEWSWIRE - James L. Wolohan, president and chief executive officer for Wolohan Lumber Company (NASDAQ-NMS: WLHN), reported record sales of $272,132,000 for 1989, exceeding the previous record set in 1988 of $257,800,000, an increase of 6 percent.

Net income for 1989, before an extraordinary charge of $189,000, or 3 cents per share, in the fourth quarter for the retirement of a bond issue, decreased to $11,089,000, $1.72 per share, from $11,220,000, $1.74 per share, in 1988. The bonds were refinanced at significantly lower interest cost.

Sales were $64,915,000 for the three months ended Dec. 31, 1989, compared with $64,303,000 for the same period of 1988, an increase of 1 percent. Sales at comparable stores (stores in operation at Dec. 31, and opened prior to Oct. 1, 1988) were the same as the fourth quarter of 1988.

Net income for the fourth quarter before the extraordinary charge decreased to $2,436,000, $.38 per share, from $2,864,000, $.45 per share, for the same period of 1988. Mr. Wolohan attributed the decrease in earnings for the fourth quarter to softer consumer sales than anticipated, especially in December, and lower gross margins of 1.2 percent points to 26.6 percent in the fourth quarter vs. 27.8 percent in 1988. The lower gross margin resulted primarily from competitive pressures in both consumer and contractor sales of commodity products and an increased LIFO reserve of $320,000 over the fourth quarter of 1988.

He noted the company expects continued growth in sales and improved earnings in 1990. Capital expenditures are estimated at $10.6 million; one new store was acquired in early January and negotiations are completed or nearly completed for three more stores expected to begin operating before the end of the second quarter.

WOLOHAN LUMBER COMPANY

Three Months Ended Dec. 31	1989	1988

HAUPPAUGE, N.Y. (FEB. 14) PR NEWSWIRE - In a paper presented to the National Mastitis Council in Louisville, Ky., on Feb. 13, 1990, Michael P. Corby of the Diversey Corporation, a subsidiary of The Molson Companies, Ltd., reported on the effectiveness of the drug Clorpactin in replacing antibiotic mixtures for the treatment of mastitis, an infection of the udders of dairy cows.

Clorpactin, which is manufactured exclusively by United-Guardian, Inc. (NASDAQ: UNIR) can eliminate the antibiotic contamination of the milk supplies because Clorpactin is removed in the first milking, instead of the five to eight milkings required for antibiotics. Economic factors are sometimes responsible for short-cutting this process and leaving antibiotic residues in the milk.

"Studies over a period of years have shown that Clorpactin can be more

effective than a mixture of streptomycin and penicillin," says Dr. Alfred R. Globus, CEO of United-Guardian, "and leaves practically no residues in the milk."

Clorpactin has been used in the U.S. by the medical community for many years as a topical microbicide.

United-Guardian, Inc. is a manufacturer of pharmaceuticals and medical devices.

NIAGARA FALLS, NY (FEB. 14) PR NEWSWIRE - Sevenson Environmental Services Inc. (NASDAQ-NMS: SEVN) announced today that it has been awarded two contracts with a combined value of $6.1 million.

The first contract, which is with a private sector customer and has a value of $1 million, is for the cleanup of a former industrial waste disposal site in Niagara County, N.Y. The other contract, with a value of $5.1 million, was awarded by Allegheny County, Pa., and is for the excavation and disposal of solid waste at the Pittsburgh International Airport. Both contracts will be completed in 1990.

Sevenson provides a comprehensive range of field services for the remediation of sites and facilities contaminated by hazardous materials. The company, which is headquartered in Niagara Falls, N.Y., operates principally in the eastern United States and Canada. Since entering the site remediation business in 1979, the company has performed over 200 projects, including projects at the Love Canal and at other Superfund sites.

NEW YORK (FEB. 14) PR NEWSWIRE - Andal Corp. (AMEX: ADL) today reported a net loss of $532,000, or $.08 per share, for its 1990 fiscal first quarter which ended Dec. 31, 1989, compared with a loss of $225,000, or $.03 per share, in the comparable quarter ended Dec. 31, 1988. Revenues were $15,676,000 in the current quarter compared with $24,799,000 last year. The decline in revenues in the current quarter compared to last year resulted from the divestiture in July 1989, of 75 percent of Andal's ownership in its business of trading and distributing flat rolled steel

and tin mill products. After elimination of the divested business, pro forma revenues and net loss would have been $12,618,000 and $117,000, respectively, for the quarter ended Dec. 31, 1988.

Andal, through its Multi-Arc Scientific Coatings Division, is engaged in surface enhancement as a leading provider of thin-film metal coating services and systems. Andal also operates Salem Tube, Inc., which is in the business of manufacturing stainless steel, high nickel alloy and superalloy seamless and welded tubing.

Andal's operating performance declined from the prior year primarily because of reduced operating income from Multi-Arc's coating services business caused by softness in the automotive industry and the effects of customer strikes.

Andal owns a 21 percent interest in Steve's Homemade Ice Cream, Inc., a seller, franchisor, and distributor of premium and super-premium ice cream and frozen yogurt.

CONTACT: Michael S. Huber of Andal, 212-688-4440

DALLAS (FEB. 14) PR NEWSWIRE - National Heritage Inc. (NYSE: NHR) today reported net income of $525,000 or $.03 per share for the second fiscal quarter ended Dec. 31, 1989, vs. $1,695,000 or $.10 per share a year earlier. Second-quarter revenues rose to $27,730,000, compared with $21,086,000 in the year-ago quarter.

For the six months ended Dec. 31, 1989, net income was $189,000 or $.01 per share, vs. $2,769,000 or $.16 per share for the first half of fiscal 1989. Revenues totaled $50,454,000, compared with $41,748,000 a year earlier.

Chairman Hugh C. Shurtleff indicated that higher revenues for the period were due to the expansion of National Heritage's pharmacy operations and Medicaid rate increases at the long-term care facilities managed by the company. Second-quarter earnings were adversely affected by a number of adjustments, including a $353,000 reserve for uncollectible accounts due to contractually subordinated management fees and a $225,000 charge related to the pharmacy unit's inventory and accounts receivable.

In addition, the company incurred $275,000 of expenses in the second quarter for consulting services provided in reviewing the accounting and property management function of the Healthcare Management Group. Results of this review, completed in December 1989, have enabled National Heritage to implement procedures to enhance cash flow by maximizing reimbursements

and controlling expenses at many of the company's facilities. Shurtleff noted that these procedures should result in improved operating margins in future periods.

As previously reported, National Heritage is engaged in preliminary discussions with privately held Life Care Centers of America regarding a possible combination of the two businesses. These discussions call for the establishment of a new company comprised of the combined assets and operations of Life Care along with selected assets and operations of certain affiliates. It is anticipated that securities of the new company would be publicly traded, with Life Care and its affiliates maintaining a controlling interest in the new company.

National Heritage Inc. is one of the nation's leading managers of nursing homes, retirement centers and assisted living facilities.

#90045p0148 02/14/1990 ~PR Newswire
EL SEGUNDO, CA (FEB. 14) PR NEWSWIRE - Farr Company (NASDAQ: FARC) today announced the acquisition of a HEPA filter product line as well as the introduction of a new line of RIGA-SORB(tm) filters, both of which will expand the company's presence in high technology air filtration systems.

Farr is purchasing the HEPA filter line in a cash transaction. It is acquiring the inventory, equipment, assets and certain propriety manufacturing technology from International Filter Corporation. Farr intends to move the operation from Indio, Calif., to El Segundo.

HEPA filters are essential for the operation of "clean rooms," and find applications in the micro electronics, aerospace, pharmaceutical, biotechnology, medical, food processing and hazardous waste industries. This will be Farr's entry into this very sophisticated and technologically advanced line of filters.

Allan B. Foy, president and chairman, commented: "The market for HEPA filters in the United States alone is about $200 million annually and growing. New applications and processes continue to increase demand for more and more efficient particulate air cleaners. We see this as an important growth area for Farr and we intend to move aggressively to expand our presence in this market."

The new line of RIGA-SORB filters was created by Farr to help companies and builders meet the increasingly stringent requirements for cleaner, more healthful air in offices and industrial buildings. The filters use activated carbon to control gases, vapors and odors.

The new RIGA-SORB design offers easier maintenance and service, a long service life, high efficiency and a lower resistance to air flow than other carbon adsorption systems.

Farr Company is a leading company of filters for particulate, liquid and gaseous filtration systems. The company has nine manufacturing facilities in the United States as well as plants in Canada and England.

DALLAS (FEB. 14) PR NEWSWIRE - International Broadcast Systems, Ltd. (IBS) (NASDAQ: IBSLA) announced today that it has entered into six new

consulting agreements since the beginning of the year. The prestigious list of clients reflected by these new agreements includes the International Herald Tribune, the Billy Graham Evangelistic Association, Space Biospheres Ventures, International Motor Sports Association, The Rushnell Company and First Auto Sports Television.

"We are delighted to have such a blue-chip group of companies join our growing client base," said Earl L. Jones Jr., chairman of IBS. "We believe strongly that these new agreements reflect both IBS' strength in, and the maturation of, the international television marketplace."

While the company reported that these contracts provide for minimum fees of $450,000 for the year, slightly higher revenues are anticipated due to the unique nature of each project.

In addition to these recent consulting agreements, IBS is currently engaged in broadcast management and consulting for Television Nacional de Chile in Santiago and KTVD-TV in Denver.

With offices in Dallas, Los Angeles, Paris, Santiago and Washington, IBS distributes television programming in more than 120 countries. Additionally, the firm secures airtime and sponsorships internationally, provides product licensing and merchandising services, as well as broadcast management and consulting services to television stations domestically and abroad.

NEW YORK (FEB. 14) PR NEWSWIRE - AT&T today announced a telephone interpretation service -- aimed at businesses, institutions, government and social agencies -- that allows non-English-speaking persons to communicate immediately and easily with an English-speaking person.

Called AT&T Language Line(sm) Service, the 24-hour-a-day service provides on-line interpreters who can interpret information in 143 languages and dialects. AT&T said the service benefits non-English-speaking people who need to talk with hospitals or health care facilities, public utilities, police or fire departments, schools or businesses.

AT&T said frequently used languages include Spanish, Japanese, Russian, German, Italian and Greek, among others. Less frequently used languages available for interpretation include Armenian (Europe), Sioux (Native America), Azerbaijani (Mid-East), Wuxinese (Asia), Twi (Africa), Romanian (Europe), Tongan (Pacific) and Punjabi (India).

The service, also available internationally, can be used by a subscribing agency or business in one of two ways: when non-English-speaking people visit a facility or when they call on the telephone. For example, during a visit to a hospital by a non-English-speaking patient, an employee could telephone a toll-free number and an interpreter would come on the line to assist the patient and the staff member through a three-way conference call. On a call to the facility, the employee would merely use the toll-free number to reach AT&T Language Line Service and within seconds an interpreter would be on the telephone to assist the caller.

COLUMBUS, OH (FEB. 14) PR NEWSWIRE - Borden, Inc. (NYSE: BN) today announced that it has agreed to sell its Meadow Gold dairy plant in New Bremen, Ohio, to Milk Marketing, Inc., Strongsville, Ohio. Terms of the sale, which is expected to be completed by March 1, were not disclosed.

Milk Marketing, Inc. (MMI) is a dairy farmer-owned cooperative of about 6,500 members operating in eight states including Ohio and surrounding states. Borden has been a major customer of MMI for many years.

J. Gordon Riehl, MMI general manager, said, "We plan to continue the operation in much the same way as it is now. MMI believes that this is a good extension of our current manufacturing operations and provides additional opportunities for our dairy farmer members."

R.J. Ventres, chairman and chief executive officer of Borden, Inc., said, "The New Bremen sale will be the first one under the U.S. dairy restructuring program we announced last September. We're pleased that New Bremen will continue in operation under the proven fine management of MMI. We expect to announce additional dairy plant sales shortly, and we remain on schedule to complete the restructuring by June."

The New Bremen facility produces sour cream and cottage cheese for retail sale, and soft serve ice cream mix, dried powders and condensed milk for bulk shipments to industrial customers. The dairy has also maintained route sales and delivery of fluid milk in a 10-county area of northwest Ohio. Neither the fluid milk routes nor the Lima, Ohio, distribution branch, which had been consolidated into New Bremen last year, will be included in the sale.

Borden, Inc. is a worldwide producer of foods, non-food consumer products, and packaging and industrial products, with 1989 sales of $7.6 billion. The company ranks number one in the world in pasta, wallcoverings, forest products adhesives and vinyl wrapping films; number one in U.S. dairy; number two in salty snacks in North America; and number one or two (nationally or regionally) in 26 U.S. niche grocery products categories.

#90045p0158 02/14/1990 ~PR Newswire

MIAMI (FEB. 14) PR NEWSWIRE - Enviropact, Inc. (AMEX: ENV) today announced its 1990 fiscal second-quarter and six-months results.

Revenues for the quarter ended Dec. 31, 1989, were $2,999,000, a 28 percent increase over the comparable quarter last year after restatement to eliminate the pump and tank and drilling divisions sold in November 1989.

Revenues for the six months ended Dec. 31, 1989, were $5,833,000 a 28 percent increase over the same period a year ago after restatement.

For the second quarter, the company reported a net loss of $493,000, or $.16 per share, on 3,006,000 average shares outstanding, compared to net loss of $872,000, $.29 per share, for the same quarter last year.

For the six months, the company reported a net loss of $2,196,000, or $.74 per share, on 2,953,000 averages shares outstanding, compared to a net loss of $562,000, or $.18 per share, for the comparable period last year.

The company said the 1990 second-quarter loss includes $238,000, or $.08 per share, from discontinued operations, and $13,000, or nil per share, from the sale of its pump and tank and drilling divisions. It said the 1989 comparable quarter included net income of $20,000, or $.01 per share, from discontinued operations.

The company said the 1990 six-months loss included $334,000, or $.11 per share, from discontinued operations, and $1,318,000, or $.45 per share, from the sale of the two divisions. It said the same period a year ago included net income of $10,000, or nil per share, from discontinued operations, net income of $623,000, or $.20 per share, from the sale of a subsidiary, and a net loss of $324,000, or $.10 per share, from the early extinguishment of long-term debt.

In making the announcement, Edward C. King Jr., president and chief executive officer of Enviropact, said that recently implemented cost-containment measures showed continuing success through the end of calendar

year 1989 and early 1990. He said the company had recently opened an office in Corpus Christi, Texas, and was evaluating other expansion opportunities to increase revenues. King said he remains optimistic that barring unforeseen events, the company will return to profitability during the current fiscal year.

Enviropact offers a variety of environmental services, including environmental consulting and audits, groundwater and soil remediation, and analytical laboratory services. The company has offices in Miami, West Palm Beach, Orlando, Tampa and Jacksonville, Fla.; Yonkers, N.Y., and Corpus Christi.

#90045p0159 02/14/1990 ~PR Newswire

WASHINGTON (FEB. 14) PR NEWSWIRE Texaco Inc. (NYSE: TX) today announced the establishment of a significant new urban tree-planting initiative in three major cities with Global Releaf, a program of the American Forestry Association.

Texaco and the Texaco Philanthropic Foundation plan to provide $1 million in the first year in support of tree-planting projects in Houston, Denver and New Orleans this spring and additional locations in the fall. These tree-planting projects will be carried out by volunteers from Texaco, other businesses and community organizations and the general public.

Announcement of the initiative was made today by Texaco President and Chief Executive Officer James W. Kinnear at the Agriculture Department, where he was joined by Secretary of Agriculture Clayton Yeutter and R. Neil Sampson, executive vice president of the American Forestry Association. Kinnear noted that planning for this project has been underway for over six months and that Texaco's actions are in support of the recent call by President Bush to the private sector to participate in planting one billion trees a year across America.

Kinnear stated, "At Texaco, we see urban reforestation as more than another contribution program. It is a company-wide commitment to our natural resources involving the time and talent of thousands of Texaco people and others who we hope will join with us. It reflects Texaco's major commitment to improving the environment."

Texaco and Global Releaf are working with forestry officials in the three cities to identify appropriate public sites for tree-planting and to purchase the proper species of saplings. Texaco and Global Releaf will also work together to train Texaco volunteers to supervise the planting

and to design activities to mobilize other volunteers from throughout the communities.

Of the $1 million currently committed, approximately $250,000 will be committed in support of tree-planting activities in each of the three cities. Global Releaf will receive an additional $100,000 funding grant for urban tree research. The remainder of the funds will be used for additional tree-planting activities in these or other cities where Texaco has a presence.

Kinnear continued, "These projects are the first steps in a long- range commitment by Texaco to support urban tree-planting over a widespread area of the United States. We anticipate that the experience of this initiative can provide a foundation on which Texaco and others can build. We are pleased to have joining us in this initiative an organization with the experience and technical expertise of Global Releaf, and we look forward to working with them."

MINNEAPOLIS (FEB. 14) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR), announced today that under its marketing agreement with Control Data Corporation, Florida State University (FSU) will install a CRAY Y-MP4/432 supercomputer for use by the Supercomputer Computations Research Institute (SCRI) and the university.

The new system will be installed in the second quarter of 1990, and will run the Cray Research operating system UNICOS, which is based on AT&T UNIX System V operating system, an industry standard.

Researchers at SCRI address the computational needs of the Department of Energy (DOE) such as providing efficient, innovative solutions to complex energy-related problems and developing new algorithms. In addition, the institute provides access time to DOE-approved research programs throughout the U.S. and trains young scientists in the use of supercomputers.

"Our basic theme is that developments in computational science are applications driven," said Dr. Robert M. Johnson, vice president of research and graduate studies at FSU. "We improve computational methods as a natural consequence of doing computationally intensive scientific problems on state-of-the-art supercomputers. We are very much looking forward to the added power provided by the CRAY Y-MP system."

SCRI is a university-based, multi-disciplinary program designed to

encourage cross-disciplinary fertilization of computational techniques using high performance computers. It is primarily funded by the DOE.

Cray Research designs, manufactures, markets, and supports large-scale high-speed computer systems for scientific and engineering applications.

#90045p0162 02/14/1990 ~PR Newswire

PALO ALTO, CA (FEB. 14) PR NEWSWIRE - Syntex Corp. (NYSE:SYN) said today that the United States Food and Drug Administration (FDA) has given Syntex permission to market Synarel(R) (nafarelin acetate) for the management of endometriosis, including relief from pain associated with the disease and reduction in the size and number of endometrial lesions.

Synarel is the first drug of its class to be approved for this indication in the U.S. and the first drug approved for the management of endometriosis in this country since 1976.

Women in the United States will be the first to benefit from this promising new prescription drug therapy. Although marketing applications are pending at regulatory agencies in a number of countries, the FDA is the first regulatory agency to approve this new drug for marketing. Five months after Syntex submitted the New Drug Application, an Advisory Committee to the FDA recommended, by a vote of 9 to 0 with one abstention, that the drug be approved for marketing. The FDA completed its review on the safety and efficacy of the drug in 15 months.

Endometriosis is a painful disorder of the female reproductive tract that strikes women in their childbearing years. It affects an estimated 4 to 6 million women in the United States.

Endometriosis occurs when the tissue that normally lines the uterus (and is shed monthly with menstruation) migrates to areas outside of the uterus where it swells and bleeds during a woman's monthly menstrual cycle. It is most often found in the abdominal/pelvic region, implanted on the ovaries, the intestines, and the fallopian tubes, where it can cause blockage and infertility. The symptoms of endometriosis include severe menstrual cramps or persistent pain, pain during sexual intercourse, painful urination, and painful bowel movements.

Synarel is a gonadotropin-releasing hormone (GnRH) agonist and a synthetic derivative of a natural hormone in the brain.

"Gonadotropin-releasing hormone agonists represent a major new development

in the health care of women," said Robert L. Barbieri, M.D., associate professor of obstetrics, gynecology and reproductive biology at Harvard Medical School.

"Many endocrinologists believe that GnRH compounds are the most important advance in the hormonal therapy of gynecologic disorders since the development of synthetic estrogens and progestins. I am pleased that the FDA has been able to expedite the evaluation and final approval of this promising new therapy for endometriosis," he added.

Syntex is an international health care company which discovers, develops, manufactures and markets human and animal pharmaceutical products and medical diagnostic systems.

DALLAS (FEB. 14) PR NEWSWIRE - Atmos Energy Corporation (NYSE: ATO) today reported record revenues and net income for the first quarter of its 1990 fiscal year. The results reflect the extreme cold weather in the company's three-state service territory in December 1989.

For the first quarter ended Dec. 31, 1989, Atmos reported net income of $4.9 million, or $.81 per share, on operating revenues of $106.5 million. This compares with net income of $4.3 million, or $.71 per share, on operating revenues of $93.9 million for the three months ended Dec. 31, 1988.

Weather conditions in West Texas, Louisiana and Kentucky during the first quarter were, on a company-wide basis, 13.4 percent colder than normal and 11.9 percent colder than the previous year's first quarter. December weather more than offset the months of October and November, which were warmer than normal.

Volumes of gas sold and transported by the company during the first quarter also were at record levels, with throughput totaling 34.8 billion cubic feet (Bcf). During the first quarter a year ago, the company's total throughput was 30.8 Bcf. These totals are also reflective of the cold December weather.

Also, Atmos announced earlier today that it has filed for a rate increase for its Western Kentucky Gas Company. The proposed rates, filed yesterday with the Kentucky Public Service Commission (KPSC), would generate approximately $8.9 million in additional annual revenues. The regulatory review process could take up to ten months from the filing date.

Atmos Energy Corporation provides natural gas service to more than one-half million customers in Texas, Louisiana, and Kentucky.

NEW ORLEANS (FEB. 14) PR NEWSWIRE - Entergy Corp. (NYSE: ETR) today reported a net loss of $472.6 million for the year 1989, producing a loss of $2.31 on a per share basis.

The results, which were in line with expectations, were primarily due to the third-quarter write-off of the company's Grand Gulf 2 nuclear unit.

Fourth-quarter net income and earnings per share were also down from 1988 levels. Net income was $15.1 million, compared to $58.3 million, while earnings fell from 29 cents to eight cents per share.

Retail sales for the year showed a 2.7 percent increase due mainly to a 5.2 percent rise in industrial sales, which was brought about by various marketing incentive plans.

Total electric sales in the fourth-quarter increased 2.4 percent, largely as a result of an 18.1 percent jump in wholesale sales, prompted by a strong marketing arrangement with another utility.

In other fourth quarter events, the company paid its fifth consecutive dividend on common stock since resumption of the quarterly payments in December of 1988. In late January of this year, the board of directors voted to declare a 25 cents per share dividend, payable March 1. The board also authorized the expenditure of up to $37.5 million, in addition to the like amount previously authorized, to acquire shares of the company's common stock.

In connection with this, during the fourth quarter, the company repurchased 589,500 shares of its common stock for a total of approximately $12.4 million.

NORWOOD, MA (FEB. 14) PR NEWSWIRE - Analog Devices (NYSE: ADI) today announced revenues of $109.7 million for the first fiscal quarter ended

Jan. 27, 1990. Revenues declined 3.9 percent relative to the first quarter last year and were $1.2 million lower than sales for the previous quarter. Operating income was 6.3 percent of sales, down from 11.4 percent recorded for last year and slightly above the 6.0 percent posted for fourth quarter. Net income was $812,000, or 2 cents per share, in comparison to last year's 20 cents per share and fourth quarter's 1 cent per share.

Net income was negatively impacted by a $4.9 million, or 10 cents per share, non-operating loss, largely due to an additional reserve taken against the ADE venture capital portfolio. This reserve includes a downward adjustment in Analog's carrying value for GigaBit Logic and Numerix, based on the current negotiated terms of the impending sale of assets of those two companies. President and Chairman of the Board Ray Stata commented, "We believe these actions will substantially reduce Analog Devices' chances for further losses from the two most troubled companies in the ADE portfolio, which together have been responsible for most of Analog's non-operating losses over the last two quarters."

Joseph Hinchey, senior vice president finance, stated, "Gross margin for the first quarter was 50.0 percent of sales, compared to 53.0 percent for the same quarter one year earlier and 50.0 percent for the prior quarter. In response to continuing softness in current demand for semiconductor products, we curtailed factory production during the first quarter and reduced inventory levels by $5.3 million. Despite this reduced rate of production, gross margin remained flat to the fourth quarter, indicating continued strength in factory variable margins. We anticipate that gross margin will recover as production volumes build, as yield improvements continue, and as plans to consolidate manufacturing operations materialize over the course of the year."

Hinchey continued, "Total operating expenses were 43.8 percent of sales, $569,000 above the total recorded for the same quarter last year, but $901,000 less than fourth quarter's total. Most of the expense decline from the fourth quarter can be attributed to the company-wide shutdown for the holiday week at year end. Another favorable development this quarter " concluded Hinchey, "was the generation of approximately $12 million in cash from operations as a result of inventory reduction and constraints on capital spending. Most of this cash was used to reduce debt and repurchase $4.8 million of company stock in accordance with the stock repurchase program previously announced. We plan to continue the stock repurchase program."

With fiscal 1989 sales of $453 million, Analog Devices is a leading manufacturer of precision high-performance integrated circuits used in analog and digital signal processing applications. The company also manufactures modular and board-level products used in computerized data acquisition and measurement and control applications.

SAN FRANCISCO (FEB. 14) PR NEWSWIRE - The Nuclear Regulatory Commission (NRC) staff is proposing to fine the Pacific Gas and Electric Co. (PG&E) (NYSE: PCG) $50,000 for alleged violations of NRC requirements involving the operability of a safety system at the Diablo Canyon Nuclear Power Plant, located 12 miles southwest of San Luis Obispo, Calif. NRC Regional Administrator John B. Martin notified the company of the alleged violations by letter on Feb. 13.

During inspections conducted Oct. 17 through Dec. 11, 1989, NRC inspectors found that the following alleged violations occurred:

1) PG&E failed to take adequate actions to identify and correct excessive gaps in the containment sump screens after similar gaps were identified by the company in Unit 1 on Aug. 2, 1985. Additional excessive gaps were discovered on Nov. 26, 1989.

2) Two emergency core cooling subsystems were simultaneously inoperable for periods of about 10 to 12 hours while Unit 2 was in operation on Oct. 12, 1987, and on Aug. 23, 1988, and while Unit 1 was in operation on Sept. 7, 1988, and May 11, 1989. On those dates, the containment sump access hatch was opened to permit calibration of the sump level detectors, rendering the screen structure incapable of fully performing its function.

3) PG&E performed, on May 11, 1989, an inadequate inspection of the Unit 1 containment sump to ensure removal of all debris which could be transported within the sump and potentially restrict the flow of water in the emergency core cooling system. There was debris in the sump from at least May 11, 1989, until Oct. 17, 1989, when the debris was discovered and removed.

Collectively, these alleged violations have been categorized as a Severity Level III problem, with Level I being the most serious and Level V the least serious. The base civil penalty for Severity Level III is $50,000.

PG&E now has 30 days to submit a written statement to the NRC admitting or denying the alleged violations, explaining the reasons for them if admitted, stating the corrective actions which have been or will be taken and the date when full compliance was or will be achieved.

The company also has 30 days to pay the proposed fine or to protest it, in whole or in part. If the fine is protested and later imposed, PG&E may request a public hearing.

#90045p0185 02/14/1990 ~PR Newswire

MELBOURNE, FL (FEB. 14) PR NEWSWIRE - DBA Systems, Inc. (NASDAQ: DBAS) announced today that during the three month period ending Dec. 31, 1989, DBA recorded revenues of $8,725,000, compared to $13,928,000 recorded in the comparable three month period in the prior fiscal year. A pretax loss for the quarter ending Dec. 31, 1989, of $10,060,000 was recorded as compared to pretax income of $518,000 reported for the same period the prior fiscal year. A fully diluted loss per share for the quarter ending Dec. 31, 1989 of $3.75 was recorded compared to earnings per share of $.45 reported for the same period in the prior fiscal year.

The magnitude of this quarter's loss is primarily attributable to the provision for divestiture and losses at DBA Military Products Division (MPD) at Kissimmee, Fla. DBA's remaining divisions, Imaging Systems and Electronic Systems, show positive operating margins through the quarter ending Dec. 31, 1989.

"Though the decision to divest MPD was a difficult one, it will allow us to concentrate our resources to grow our profitable core businesses which are the least likely to be impacted by DoD budget reductions," said John L. Slack, DBA president and CEO.

The decision to divest the Military Products Division was announced on Dec. 22, 1989. Military Products Division has been adversely impacted by failures to obtain new contract awards as well as the failure of the government to exercise certain options under existing contracts within the division. Due in part to the absence of contract option awards, the Military Products Division has not been profitable this year. Once completed, this divestiture will allow DBA to concentrate its activities and staffing on its core businesses of imaging systems and electronic systems. DBA's revised business strategy will focus the company's efforts and resources on its traditional market areas where growth opportunities are expected to exist despite anticipated defense reductions.

DBA contract bookings for the first six months of this fiscal year, ending Dec. 31, 1989, totaled $26,500,000, exceeding by almost $9,000,000 contract bookings for the same period of last fiscal year. However, the uncertainty in the defense industry continues to impact current bookings and contract backlog. New bookings for the quarter ending Dec. 31, 1989 totaled $5,400,000 compared to the previous quarter ending Sept. 30, 1989, of over $21,000,000 and to the $5,700,000 booked in the 2nd quarter of last fiscal year. This reduction was due to continued contract award

delays and the cancellation of programs expected to be awarded to DBA. In addition, backlog was affected by the cancellation of some awards where government funding was withdrawn after award and where certain ongoing programs were cancelled. Nevertheless, backlog is presently in excess of $34,000,000 and DBA is cautiously optimistic about future award opportunities in the Imaging and Electronics Systems divisions.

#90045p0186 02/14/1990 ~PR Newswire

NEW ORLEANS (FEB. 14) PR NEWSWIRE - Avondale Industries Inc. (NASDAQ: AVDL) today reported income before ESOP contribution and income taxes of $31.7 million for the year ended Dec. 31, 1989, compared with $40.6 million in 1988.

An ESOP contribution of $29.0 million and income taxes of $.9 million brought income from continuing operations in 1989 to $1.8 million, or $.12 per share. That compares with income from continuing operations in 1988 of $9.1 million, or $.59 per share, after an ESOP contribution of $27.6 million and a tax provision of $3.9 million. Avondale's 1989 per share results are based on a 21.3 percent increase in the average number of shares outstanding for the year.

For the quarter ended Dec. 31, 1989, the company reported income before ESOP contribution and income taxes of $5.5 million as compared with $13.2 million in the same period in 1988. After an ESOP contribution of $7.8 million and $.6 million in income tax benefit, the fourth quarter resulted in a loss from continuing operations of $1.7 million compared with $4.8 million in income from continuing operations for the fourth quarter of 1988.

Albert L. Bossier Jr., chairman and chief executive officer, noted that the company's revenues reached a record $708.3 million for 1989, up from $570.3 million in 1988. He said: "Our backlog of approximately $2 billion, including outstanding options, translated into a new high in Avondale's construction activity during the year. Earnings, however, were affected during 1989 by the timing of profit recognition on certain recently awarded contracts and greater than expected costs incurred during 1989 on contracts completed during the year."

Bossier concluded: "Avondale has a strong balance sheet with long-term debt of only $46 million and stockholders' equity of $265 million at 1989 year end. This financial position soundly supports our long-term plans for building on the company's proven expertise in marine fabrication."

Avondale Industries Inc., headquartered in metro New Orleans, is one of the nation's leading marine fabricators. In addition to its shipbuilding operations, the company specializes in boat and LCAC construction and is a major repair contractor for commercial and Navy ships. It is also involved in the modular construction of plants and components for a variety of land-based industries.

PARIS, ONTARIO (FEB. 14) PR NEWSWIRE - The financial results of Redlaw Industries Inc. (AMEX: RDL) of Paris, Ontario for the first three months of fiscal 1990 ended Dec. 31, 1989 were today released by the company.

Consolidated sales from continuing operations for the first quarter were $20,164,000 compared to $18,742,000 for the same three months of the previous year.

Income from continuing operations and net income for the period was $703,000 or 9 cents per share. This compares to last year's first quarter income from continuing operations of $1,589,000 or 24 cents per share which was reduced by the loss from discontinued operations of $254,000 or 4 cents per share to bring the quarter's final results to net income of $1,335,000 or 20 cents per share.

#90045p0199 02/14/1990 ~PR Newswire

NEW BRIGHTON, MI (FEB. 14) PR NEWSWIRE - Dotronix, Inc. (NASDAQ: DOTX), today announced results for the second quarter ended Dec. 31, 1989.

Sales for the quarter were $4,952,435 compared to $9,752,539 for the same quarter last year. The second-quarter loss was $(757,037) or (24 cents) per share, compared to earnings of $279,081 or 8 cents per share, a year earlier. This decrease reflects the lower unit volume caused by continued strong competition and reduced demand for the company's displays used by financial institutions and those used in desktop publishing applications.

In addition, the quarter was negatively impacted by the provision of a $500,000 reserve against the company's customer note receivable. This reserve was established to reflect a decrease in value of collateral securing the note which could adversely impact the ability of the company to collect the note according to its terms. The amount outstanding on the note at Dec. 31, 1989, after deducting this reserve was $325,573.

President William S. Sadler said development continues on the company's new display products for the transportation, desktop publishing, financial and medical imaging marketplace. Sales and shipments of these new products are expected in the fourth quarter.

Dotronix, Inc., designs and manufactures DOT-X(TM) displays for a variety of electronic imaging applications including desktop publishing, airline flight information, medical imaging/diagnostics, test and measurement instruments, CAD/CAM/CAE and graphics, industrial process control, bank/brokerage terminals, broadcast television and video production, as well as closed-circuit television security systems. Dotronix has facilities in Minnesota, Colorado, Wisconsin, and Taiwan.

#90045p0208 02/14/1990 ~PR Newswire

NEWTON, MA (FEB. 14) PR NEWSIRE - Health and Rehabilitation Properties Trust (NYSE: HRP) today announced its results of operations for the year and quarter ended Dec. 31, 1989.

Gross revenues for the year ended Dec. 31, 1989 were $23,233,000. Net income and net income per share for 1989 were $7,900,000 and 76 cents, respectively. For the year ended Dec. 31, 1988, gross revenues were $18,899,000 and net income was $7,716,000 or 77 cents per share.

Gross revenues for the quarter ended Dec. 31, 1989 were $6,524,000. Net income and net income per share were $2,226,000 and 19 cents respectively. For the quarter ended Dec. 31, 1988, gross revenues were $4,918,000 and net income was $1,812,000 or 18 cents per share.

The weighted average number of outstanding shares for the years ended Dec. 31, 1989 and 1988 were 10,425,000 and 9,998,000, respectively. The weighted average number of outstanding shares for the quarter ended Dec. 31, 1989 and 1988 were 11,693,000 and 9,998,000, respectively. The increase in shares in 1989 is attributable to the issuance of 6 million shares on Dec. 6, 1989.

The decline in net income per share on an annual basis results principally from the issuance of equity in 1989 which was used to repay less expensive debt. This new equity provides a good base to allow for new investments on a leveraged basis.

David J. Hegarty, treasurer of HRP, stated that the company's cash flow rather than net income is normally considered the best measure of performance by a real estate investment trust. He stated that HRP's cash flow per share for the quarter and year ended Dec. 31, 1989 were 30 cents and $1.20, respectively, compared to cash flow per share in the quarter and year ended Dec. 31, 1988 of 28 cents and $1.13, respectively. Based on these cash flows available from operations, the company declared dividends of $1.14 for 1989 and $1.12 for 1988.

HRP also announced today that it has scheduled its 1990 Annual Meeting of

Shareholders for May 16, 1990. The record date for determination of shareholders entitled to vote at the meeting has been set at the close of business on March 21, 1990.

HRP is a real estate investment trust organized in Dec. 1986 which invests in health care related real estate. Today, HRP has a portfolio of real estate investments totaling approximately $226 million in 22 properties in 12 states. HRP Common Shares of Beneficial Interest are listed on the New York Stock Exchange.

#90045p0211 02/14/1990 ~PR Newswire

DETROIT (FEB. 14) PR NEWSWIRE - Consolidated net income for General Motors Acceptance Corporation in 1989, which includes the results of GMAC's financing, insurance, and mortgage operations, totaled $1,110.7 million. This compares with $1,187.6 million earned in 1988 and is the fifth consecutive year that GMAC has earned over $1 billion, John R. Edman chairman, reported today. During the fourth quarter, consolidated net income totaled $251.2 million, compared with $257.4 million recorded a

year earlier.

Income from insurance operations for 1989 was a record $202.7 million, compared with $164.2 million in 1988. The increase reflects improved underwriting results and higher investment earnings.

Edman attributed the decrease in consolidated earnings for the year 1989 to narrower interest margins between the gross earning rates on outstanding finance receivables and the cost of borrowed funds. He said this was partially offset by the gain on the sale of GMAC's interest in Isuzu Motors Finance Company in the first quarter of 1989. Worldwide, the cost of borrowed funds averaged 9.33 percent during 1989, an increase of 105 basis points over the 8.28 percent cost incurred in 1988.

In the United States, GMAC financed or leased 39 percent of the new GM vehicles sold, up from 30 percent in 1988. In total, 2.4 million new car and truck contracts were financed in 1989, 17 percent more than the prior year. Edman said that GM-sponsored retail incentive rate programs and the continuing success of the tiered dealer rate Quality Finance Plan account for most of this increase. Outside the United States, GMAC financed 622,000 new vehicles during 1989, 22 percent above the 511,000 units financed a year ago.

Total GMAC finance receivables outstanding were $90.5 billion at year-end, up from $84.5 billion at the close of 1988. Total earning assets of $102.2 billion were 5 percent above the prior year-end total of $97.6 billion.

The average monthly payment on new car retail contracts acquired in the United States was $292 in 1989, compared with an average of $277 in 1988. The average new car term in 1989 was 52 months, a decrease of three months from 1988.

GMAC, a wholly owned subsidiary of General Motors Corporation, offers wholesale and retail financial services to approximately 15,000 General Motors dealers worldwide and to 8.0 million retail automotive customers. In addition to its 267 offices in the United States and Canada, GMAC operates 43 branches in 19 foreign countries. Through its subsidiaries, GMAC also offers the public a variety of insurance and mortgage products as well as a number of investment opportunities, including a new, FDIC-insured Certificate of Deposit from GMAC Capital Corporation.

#90045p0216 02/14/1990 ~PR Newswire

TOYOTA CITY, JAPAN (FEB. 14) PR NEWSWIRE - Toyota Motor Corporation (NASDAQ: TOYOY) announced today in Japan its interim financial settlement for fiscal 1990 (from July 1, 1989, through Dec. 31, 1989).

Total vehicle sales for the first half of fiscal 1990 were 1,920,150 units with net sales of 3,744,193 million yen and net income of 157,388 million yen.

The interim dividend per share will be 9 yen, with 6 yen paid as a regular dividend, and 3 yen as a special dividend. Payment of dividends will begin on Feb. 26.

Production and Sales Total vehicle production for this period was 1,924,768 units, a decrease of 1.6 percent (30,894 units) from the same period of the previous year.

Overseas production was 273,924 units, an increase of 104.7 percent (140,133 units) from the same period of the previous year, thanks largely to steady progress in production at local production companies in the United States, Canada, Taiwan, and other countries.

The number of units sold in Japan amounted to 1,163,544, up 9.0 percent (96,172 units) from the same period in the previous year. This increase reflects improved product strength, resulting from the introduction of new models like the Celsior, Corona EXiV, and Deliboy, and the full model changes for the Celica, Carina ED, MR2, Starlet, Hiace, and Land Cruiser. This has been coupled with the energetic marketing efforts of the company's dealers nationwide.

Exports for the period totaled 756,606 units, down 15.3 percent (137,128 units) from the previous year, owing largely to a decrease in exports to the United States as a result of increased local production.

As a result, total sales, combining both domestic sales and exports, decreased to 1,920,150 units, down 2.1 percent (40,956 units) from the same period of the previous year.

Sales of industrial vehicles were 31,290 units, up 13.1 percent (3,628 units).

Sales of Toyota houses numbered 1,686 units, for an increase of 1.9 percent (32 units).

Breakdown of Sales Total sales of vehicles were 2,520,019 million yen, up 7,388 million yen (0.3 percent) compared with the same period of the previous year. This is because domestic sales increased by 48,215 million yen (3.1 percent), while sales from exports decreased by 40,827 million yen (4.2 percent).

Sales of component parts for overseas production were 195,364 million yen, up 114,764 million yen (142.4 percent) over the same period of the previous year.

Total sales, including vehicles, parts for overseas production, replacement parts, industrial vehicles, and others were 3,744,193 million yen, up 236,063 yen (6.7 percent) from the same period of the previous year.

Profits and Losses Operating income was 238,008 million yen, up 59,194 million yen (33.1 percent) as compared with the same period of the previous year.

The breakdown of operating income into increases and decreases is as follows (Yen in billions):

Increase:		
Effects of marketing efforts		50.0
Effects of fluctuations in exchange		50.0
Effects of rationalization		30.0
Total		130.0
Decrease:		
Increase in depreciation	20.0	
Increase in personnel costs	18.0	
Increase in enterprise tax, etc.	32.8	
Total	70.8	

Total increase	59.2

Income before taxes was 329,888 million yen, up 68,200 million yen (26.1 percent) from the same period of the previous year.

Net income was 157,388 million yen, up 27,800 million yen (21.5 percent) compared with the same period of the previous year.

Balance Sheet Total assets, including 2,887,352 million yen in current assets and 2,696,898 million yen in fixed assets, were 5,584,250 million yen at the end of the period, up 268,059 million yen (5.0 percent) from the end of the last term.

Total liabilities were 2,232,972 million yen, an increase of 72,479 million yen (3.4 percent) over the end of the previous term.

Shareholders' equity was 3,351,277 million yen, up 195,580 million yen (6.2 percent) from the end of the last term.

Business Outlook Domestically, demand should continue at the current high levels, though the world's political and economic trends are undergoing major changes, and aggressive sales policies among automakers are expected to lead to intensification of sales competition. Meanwhile, the overseas market for the Japanese automobile industry is likely to remain harsh, reflecting uncertainty regarding the future direction of the United States and European economies.

Together, these factors make it difficult to accurately forecast the future. Nevertheless, targets for fiscal 1990, which started in July 1989 and will end in June 1990, have been set approximately as follows:

Sales:	4,000,000 units	(2,080,000 units)
Domestic sales:	2,400,000 units	(1,240,000 units)
Exports:	1,600,000 units	(840,000 units)
Industrial vehicles:	62,000 units	(30,700 units)
Houses:	4,000 units	(2,300 units)
Net sales:	7,600 billion yen	(3,900 billion yen)

(Figures in parentheses are for the second half of fiscal 1990, January through June.)

With regard to profit, the company said that it is difficult to foresee future trends in the rate of exchange, etc., but Toyota expects to maintain current levels in the second half of the fiscal year.

DETROIT (FEB. 14) PR NEWSWIRE - GM Hughes Electronics Corporation (GMHE), a world leader in automotive, defense and space electronics, today reported record earnings for the fourth quarter of 1989 and record revenues for the fourth consecutive year. GMHE Chairman Robert J. Schultz stated, "These positive results were achieved despite lower defense spending and automotive production."

GMHE reported earnings attributable to General Motors Class H common stock which are based on the earnings of GMHE, of $1.94 per share for the 1989 calendar year, compared to $2.01 per share for the previous year. The 1989 earnings reflect a nonrecurring charge for costs associated with an employee separation and early retirement plan at Hughes Aircraft Company (Hughes). The plan was announced in June 1989 in order to improve Hughes' competitiveness in the 1990s. Excluding this charge, 1989 Class H earnings exceeded 1988 earnings.

Schultz reported that for the year 1989, GMHE revenues rose to $11.4 billion, up from the $11.2 billion achieved in 1988. Earnings were $781.2 million in 1989, down $20.9 million from the record $802.1 million posted in 1988, reflecting the nonrecurring charge.

In the fourth quarter of 1989, GMHE earned $183.0 million on revenues of $2.9 billion, compared with earnings and revenues of $169.5 million and $3.1 billion, respectively, in 1988.

Fourth-quarter 1989 earnings attributable to GM Class H common stock amounted to a record $0.46 per share compared with $0.43 per share in 1988.

#90045p0220 02/14/1990 ~PR Newswire

SANFORD, NC (FEB. 14) PR NEWSWIRE - TRION, INC. (NASDAQ: TRON) announced sales and earnings for the fourth quarter and the year ended December 31, 1989.

	Fourth Quarter		Year	
	1989	1988	1989	1988
Sales	$14,384,000	$19,139,000	$45,542,000	$51,979,000
Net Income	$ 15,000	$ 1,301,000	$ 1,360,000	$ 3,603,000
Net income per share	$ --	$ .21	$ .22	$ .58

First quarter 1988 net income was increased by a one-time $366,000 ($.06 per share) reduction in accumulated deferred income taxes. Per share data has been adjusted for a three-shares-for-two-shares common stock split in June 1989.

Hugh E. Carr, President, stated that results were adversely affected by a signification slowdown in the shipment of appliance air cleaners to a major brand name customer and reduced demand for Trion Ltd.'s dehumidifier products -- caused by unseansonably warm, dry weather in England. Unexpected year-end accounting adjustments in England and Canada principally to correct inventory balances resulted in a fourth quarter after-tax charge to income of $435,000 ($.07 per share).

Carr further stated that shipments of appliance air cleaners are expected to increase as plans are implemented to broaden the customer base. He also reported that improper application of new information systems at the two subsidiaries has been corrected and inventory controls have been reestablished.

Trion specializes in the design, manufacture and sale of electronic air cleaners.

#90045p0223 02/14/1990 ~PR Newswire

LOS ANGELES (FEB. 14) PR NEWSWIRE - Imagine Films Entertainment, Inc. (NASDAQ-NMS: IFEI, IFEIU, IFEIW), today reported sharply increased revenues and profits for the first quarter of fiscal 1990. Results were as follows:

IMAGINE FILMS ENTERTAINMENT, INC.
Selected Financial Data
(All amounts in thousands, except per share data)
Three Months Ended Dec. 31,

	1989	1988
Net revenues	$ 10,060	$ 301
Net income (loss)	$ 711	$ (358)
Net income (loss) per share	$ .13	$ (.07)

Commenting on these results, Brian Grazer and Ron Howard, co-chief executive officers of Imagine, said, "Our first quarter results continue the positive trend from fiscal 1989, with strong revenues and profits

reflecting the continued performance of our first three films, 'The Burbs ' 'The Dream Team' and 'Parenthood,' in the theatrical and domestic home video markets. These films were all released in the 1989 calendar year."

Imagine's next movies are "Cry Baby", expected to be released on April 6, 1990, and "Opportunity Knocks", expected to be released on March 30, 1990. "Cry Baby" is a 1950's musical love story directed by John Waters ("Hairspray") and starring Johnny Depp ("21 Jump Street"); and "Opportunity Knocks" is a comedy about a charming con man starring Dana Carvey ("Saturday Night Live") and directed by Donald Petrie ("Mystic Pizza"). Also scheduled for 1990 release is "Problem Child", a comedy about a highly spirited young troublemaker, starring John Ritter ("Skin Deep") and Jack Warden ("The Presidio"). This film is being produced with Universal Pictures.

Imagine Films Entertainment, Inc. is an independent producer of feature films. It also produces television programming through its partnership with MCA, Inc., Imagine Television, L.P. The company was founded in November 1985 by its co-chief executives, producer Brian Grazer and director Ron Howard, and went public in July 1986. Robert A. Harris, former president of the MCA Television Group, joined the company in September 1988 as president, motion pictures and television.

#90045p0226 02/14/1990 ~PR Newswire

CONCORD, NH (FEB. 14) PR NEWSWIRE - Healthsource, Inc. (NASDAQ: HLTH) today reported income before extraordinary item for the year ended Dec. 31 1989, was $5,161,000 improved from $555,000 in 1988. Earnings per share for the year on a fully diluted basis before extraordinary item increased 640 percent to $1.11 vs. 15 cents last year. Revenue for 1989 was $47,331,000, up 14.9 percent over the same period a year ago.

The company reported fourth quarter 1989 income before extraordinary item of $1,502,000, up from $290,000 reported for the comparable period a year ago. Earnings per share for the quarter on a fully diluted basis before extraordinary item were 28 cents, an increase of 250 percent over the 8 cents per share reported for the fourth quarter of 1988.

Company President Norman C. Payson, M.D., said, "We are pleased with the company's strong performance in 1989. We have had favorable financial results, maintained our close physician partnerships, and improved our strategic and capital position."

On Nov. 2, 1989, the company successfully completed an initial public offering of its stock. Payson noted, "Increased consolidation in the market provides many opportunities for our company in the future." The company has demonstrated its strength in health care cost management and plans to employ those skills in expansion into other markets. The company's enhanced capital base will be key to the expansion effort. "We will continue to be vigilant in 1990 for growth opportunities."

Healthsource, Inc. now has interests in and manages three health maintenance organizations (HMOs), which market and provide for the delivery of prepaid health care services to approximately 60,000 members. The company's HMOs operate in New Hampshire, Maine and South Carolina and have more than 1,800 participating physicians. The company's stock is traded on the NASDAQ with the symbol HLTH.

#90045p0236 02/14/1990 ~PR Newswire

BEAVERTON, OR. (FEB. 14) PR NEWSWIRE - Epitope Inc. (NASDAQ: EPTO) reported strong quarterly revenues for the first quarter of fiscal 1990.

Demand for the company's AIDS diagnostic test kits continued at a brisk level as quarterly product revenues more than doubled over the same quarter of the previous fiscal year and increased 32 percent over the fourth quarter of fiscal 1989. The first quarter's net loss of $541,000, or 8 cents per share, as compared to net loss of $870,000, or 18 cents per share, for the same quarter of 1989, reflected the significant improvement in revenues.

The first-quarter operating results also included $167,000 of grant and contract income compared to $25,000 in the prior year's period as the current quarter included a fee pursuant to the agreement between Sakata Seed America and the company's wholly owned subsidiary, Agritope Inc. and several payments under Small Business Innovation Research grants.

In December 1989, Epitope finalized a joint research and development collaboration agreement regarding antimicrobial drugs with Smith Kline & French, a unit of SmithKline Beecham, a major pharmaceutical firm. In connection with the agreement, an affiliate of the SmithKline Beecham group made an equity investment in the company of $1 million to fund research and development expenses associated with the agreement. Epitope will receive royalties on sales of products arising from the collaboration and may co-market products in the United States.

Epitope Inc. is a biotechnology company that manufactures diagnostic test kits and develops therapeutic drugs for the health-care field. The company's technology and products are directed at two significant worldwide health-care concerns: retroviral diseases, principally AIDS, and protozoan diseases, principally malaria. Agritope Inc. is an agricultural biotechnology unit of Epitope utilizing recombinant DNA and plant tissue culture technologies to develop agronomically superior new plant varieties.

A tabulation of results follows.

BELGRADE, YUGOSLAVIA (FEB. 14) PR NEWSWIRE - ICN Pharmaceuticals Inc. (NYSE: ICN) of the United States, announced today it has signed a letter of intent to merge its pharmaceutical marketing subsidiary, SPI Pharmaceuticals Inc., with Galenika, the second largest pharmaceutical company in Yugoslavia.

The announcement was made by Milan Panic, chairman and chief executive officer of ICN, and Dr. Velimir Brankovic, director general of Galenika. Panic is also chairman of SPI Pharmaceuticals Inc., ICN's pharmaceutical marketing subsidiary.

The agreement would be the first between a U.S. and an East European pharmaceutical company.

Panic said he was "proud to be a part of a business venture of such international significance."

"This proposed agreement symbolizes the new opportunities that have been created by the changing political climate in Eastern Europe," Panic said.

"But far more than a single business transaction," he said, "it is intended to improve the health of people throughout the world by opening the flow of quality pharmaceuticals between Eastern and Western countries."

Galenika, which has annual sales of $150 million, makes and markets a broad range of prescription pharmaceuticals which it distributes throughout Yugoslavia, Eastern and Western Europe, Africa and the Middle East. The research-based company has nine facilities and 5,800 employees.

SPI Pharmaceuticals, headquartered in Costa Mesa, Calif., makes, markets and distributes over 300 pharmaceutical products in over 60 countries throughout the world, principally serving the U.S., Canada, Mexico, Western Europe and the Far East. It has over 1,600 employees, nine

facilities and sales of $124 million.

Terms of the proposed agreement were not disclosed. It is subject to approval by the boards of SPI and ICN and governmental authorities in Yugoslavia.

DENVER (FEB. 14) PR NEWSWIRE - Presidio Oil Company (AMEX: PRS) today announced the completion of the sale of 10 million shares of its Class A common stock at $7.50 per share and $50,000,000 of its 9 percent convertible subordinated debentures due March 15, 2015 at 100 percent of their principal amount. The debentures are convertible into the shares of the company's Class A common stock at $9.38 per share.

The net proceeds of the two offerings amounted to approximately $120 million, and were used to pay bank indebtedness incurred in connection with the company's recent acquisition of Home Petroleum Corporation.

"The successful completion of these simultaneous public offerings substantially strengthens the company's balance sheet and significantly expands Presidio's stockholder base in both the United States and the United Kingdom, through the additional of a number of major institutional and other investors," noted George P. Giard, Jr., chairman and chief executive officer of Presidio.

Presidio is an independent oil and gas company engaged in onshore oil and gas exploration, development and production in the continental United States, primarily in Wyoming, Texas, Louisiana and West Virginia. The company also owns and operates gas gathering systems and processing facilities in Wyoming and West Virginia.

Presidio Class A common stock trades on the American Stock Exchange under the symbol PRS/A and on the London Exchange as Presidio A.

#90045p0242 02/14/1990 ~PR Newswire

TAYLOR, MI. (FEB. 14) PR NEWSWIRE - Net sales of Masco Industries (OTC: MASX) in 1989 increased 2 percent from 1988 to a record $1.7 billion. Sales of custom engineered products were comparable to 1988 as a 4-percent increase in transportation-related products sales was offset by a

23-percent decline in sales of defense products. Sales of specialty products increased 6 percent from 1988.

Net income decreased 31 percent to $56.6 million or $.70 per share, down from $82.1 million or $.90 per share in 1988.

Net sales in the fourth quarter 1989 declined from the comparable period last year. Fourth-quarter 1989 sales and income were negatively impacted by reduced volumes in Masco's transportation-related operations due to production cutbacks by automotive customers. In addition, operating results were adversely affected by margin pressures experienced by Masco's architectural, energy-related and certain other product groups due to material cost increases and softened market conditions.

Fourth-quarter 1989 results benefited from the sale of the company's Flo-Con Systems, Inc. subsidiary which resulted in a gain of approximately $57 million pretax ($38 million after-tax, or $.47 per share) and the extraordinary gain ($3.3 million after-tax, or $.04 per share) related to the early extinguishment of debt through the repurchase of convertible securities. These gains were offset by charges, principally in the fourth quarter, to income of approximately $62 million pretax ($41 million after-tax, or $.51 per share) to reflect expenses associated with the discontinuance of product lines, costs related to the restructuring of several businesses, and the uncertain future recoverability of costs related to inventory, machinery and equipment, tooling and idle facilities and additionally by the pretax effect of a $16 million charge to reflect a valuation allowance and realized losses related to marketable securities which occurred in the fourth quarter ($10.6 million after-tax, or $.13 per share).

The fourth quarter of 1988 included aggregate losses of approximately $26 million pretax ($16 million after-tax, or $.15 per share) resulting from realized losses on sales of certain marketable securities (net of reversal of a valuation allowance), and litigation settlements and other unusual expenses.

As a result of the slowing in the general economy, Masco has been experiencing a softening in a number of its markets. The company anticipate that automotive production levels will particularly be depressed over the next several months, which will continue to negatively impact near-term results. Longer term, however, Masco believes that maintaining its business strategies will provide a basis for renewed growth for the company.

Masco Industries manufactures custom engineered and other commercial and specialty industrial products.

#90045p0247 02/14/1990 ~PR Newswire

WILMINGTON, DE (FEB. 14) PR NEWSWIRE - Airgas Inc. (NYSE: ARG) reported today that earnings from continuing operations increased 56 percent to $1,027,000 or $.16 per share in the third quarter from $659,000 or $.11 per share in the same period in 1988.

Net earnings for the three months ended Dec. 31, 1989, increased to $31,905,000 from $5,281,000 in the third quarter of 1988 and net earnings per share increased to $4.60 per share from $.82 per share for the same quarter last year.

The increase in earnings from continuing operations is primarily due to lower interest costs and investment income related to proceeds received upon the sale of the company's Jackson Products operations, offset by a decline in the profitability of the company's industrial gas distribution operations and earnings related to the joint venture for the production of calcium carbide. The decline in profitability of the company's industrial gas operations was due to a higher level of operating expenses including computer conversions, safety upgrades and interests costs related to the consolidation of 41 industrial gas distribution companies acquired since Oct. 1, 1988, and costs associated with several national marketing campaigns.

The increase in net earnings is due to a $31,755,000 gain on the sale of the company's Jackson Products subsidiary ($4.56 per share) offset by a $217,000 or $.03 per share loss from discontinued operations related to the sale of the company's cryogenic manufacturing operations and a $660,000 or $.10 per share reduction of the gain estimated on the sale of the company's US Cylinder operations reported in the 1988 quarter. Net earnings for the three months ended Dec. 31, 1988, included a $3,501,000 gain on the sale of the company's cylinder manufacturing operations ($.53 per share).

Operating income in the third quarter of 1989 increased 17 percent to $4,930,000 from $4,198,000 for the corresponding quarter in 1988. Operating income from the company's industrial gas distribution business increased 31 percent to $4,012,000 in 1989, from $3,061,000 reported in the same quarter in 1988. The increase in operating income from the company's industrial gas distribution business was due to the acquisition of 41 industrial gas distribution companies since Oct. 1, 1988.

Operating income from the company's manufacturing operations was $918,000 in the third quarter of 1989, a 19 percent decrease from $1,137,000 in the third quarter of 1988. This decline resulted from lower demand for carbon products manufactured by the company's Midwest Carbide subsidiary.

The company's net sales for the third quarter ended Dec. 31, 1989 were $73,614,000, a 54 percent increase from net sales of $47,762,000 for the quarter ended Dec. 31, 1988. Net sales of industrial gases and related products increased 61 percent over the prior year to $68,425,000 due to the acquisition of 41 industrial gas distribution companies since Oct. 1, 1988. Manufacturing sales decreased to $5,189,000 in the quarter ended Dec. 31, 1989, from $5,350,000 in the same period last year.

Earnings related to the company's interest in a joint venture for the production of calcium carbide were $453,000 for the three months ended Dec. 31, 1989, a decrease from $695,000 reported in the third quarter of 1988. The decline in joint venture earnings was primarily due to lower sales and production volume at the joint venture's Ashtabula, Ohio facility.

Interest expense increased $232,000 to $3,743,000 in the third quarter of 1989 from $3,511,000 in 1988. The increase related to an increase in indebtedness due to acquisitions, offset by interest savings from the receipt of proceeds upon the sale of Jackson Products Inc. on Oct. 2, 1989.

#90045p0250 02/14/1990 ~PR Newswire

WASHINGTON, DC (FEB. 14) PR NEWSWIRE - A potential solution for recycling the plastic body panels used on General Motors' newest line of minivans was described today by a GM engineer at the Society of Plastics Industry's Composites Institute.

The possible solution is a process called pyrolysis, a decades-old technology which now is being evaluated by the tire and rubber industry to recycle scrap tires. In the pyrolysis process, materials are decomposed by extreme heat in the absence of oxygen. The process is now being developed by the General Motors Advanced Engineering Staff for use in the waste management of plastic composite panels for automobiles.

"The process may provide an attractive alternative for SMC waste management compared with landfill and other disposal methods such as incineration," said Irvin E. Poston, composites manager for GM's Advanced Engineering Staff. "We are hopeful that pyrolysis may be an environmentally sound method of SMC waste management."

GM is the largest user of composites in the auto industry. The automaker's new line of minivans, the Chevrolet Lumina APV, Pontiac Trans Sport and Oldsmobile Silhouette, as well as the Chevrolet Corvette, make use of sheet molding compound (SMC) and reaction injection molding (RIM). SMC is used for the large exterior panels and RIM for fenders and fascias.

Current emphasis is to determine if pyrolysis can be used for SMC. GM will later focus on whether it can be used for RIM.

In the pyrolysis of SMC, the organic chemicals are thermally decomposed at 1,400 F in the absence of oxygen. Once the process gets up to temperature using external fuel, the system is self-sustaining from the energy produced by the pyrolysis. The SMC contains more than enough petrochemical energy to sustain the process, and the excess gas and oil can be recovered.

The recycling of tires using pyrolysis has not yet proven to be economically feasible because the steel belts in the tires must first be removed and the oil and gas from tire pyrolysis contains sulfur. However, no such obstacles hinder the pyrolysis process for SMC, Poston said.

"SMC can be more easily shredded and fed directly into the pyrolysis unit " he said, adding, "It's felt that the pyrolysis output can be effectively utilized."

Some of the potential uses of the SMC residue from the pyrolysis process include filler in new SMC formulations and other polymer composites such as RIM formulations or adhesives, as well as filler in other materials

such as concrete and roofing shingles.

Members of the Society of the Plastics Industry SMC Automotive Alliance are participating in the General Motors tests. The Alliance is a group of plastics suppliers working to further the use of composites in the auto industry. These suppliers may actually have a bigger stake in the pyrolysis process than automakers.

GM began a series of trial runs of the process in June 1988. Poston said that while the results are encouraging, further testing and evaluation must take place before pyrolysis can be considered a viable means of waste management for SMC.

"The good news is that we're trying to solve the question of SMC waste management before it becomes a problem," said Poston.

PITTSBURGH (FEB. 14) PR NEWSWIRE - "We've gotten off to a good start in 1990 with a January that substantially exceeded our own expectations. While we do not forecast earnings, it is reasonable at this point for us to expect net income of at least $1.00 per share in the first quarter," Richard P. Simmons, chairman and chief executive officer of Allegheny Ludlum Corp. (NYSE: ALS), said today.

In further remarks before security analysts in Boston, Simmons reported that the economic outlook appears less robust for consumer durables, particularly automotive, at least for the first half. Strong demand for capital goods should continue in 1990, according to Simmons. "Allegheny Ludlum is extremely optimistic about the future as long-term demand for specialty materials is strong and new markets continue to develop," he said.

In the 1989 first quarter, Allegheny Ludlum earned $1.52 per share of common stock.

Allegheny Ludlum is a leading producer of a wide range of specialty materials, including stainless steels, electrical steels and high temperature alloys.

DETROIT (FEB. 14) PR NEWSWIRE - Michigan Consolidated Gas Company (MichCon) is attempting to make energy-related home improvements more affordable to its customers with a new low-interest-financing program. Seven-percent annual financing is available for ceiling insulation and high-efficiency gas furnaces.

"Today's 13- to 15-percent financing for home-improvement loans is one of the obstacles preventing customers from installing energy conservation measures, that can effectively reduce energy costs," said Derrick Williams supervisor of MichCon Conservation Services. Through MichCon, 7-percent financing is available up to a maximum of $2,500 for a high-efficiency gas furnace or $1,000 for ceiling insulation. Cost for a clock/programmable thermostat can be included in a loan for ceiling insulation and/or a new furnace. The maximum loan to any customer, however, cannot exceed $2,500.

Financing is available for up to five years and can be paid off in equal monthly installments on the gas bill. An applicant, however, must be a residential space heating customer of MichCon for a minimum of 90 days, and own or reside in the building undergoing the installation of the conservation measure. If a MichCon customer is a renter, the property owner must co-sign for the loan.

"Several years ago, MichCon offered a financing program on ceiling insulation and vent dampers. More than 32,000 residential customers took advantage of the program and reduced their gas consumption, showing average savings ranging from 7 to 20 percent annually," Williams said. He added that installing a high-efficiency gas furnace may reduce annual gas usage for space heating by 10 to 30 percent.

For more information on the MichCon low-interest loan program, customers in the Detroit and Ann Arbor areas can call the MichCon Conservation Services Department toll free at 1-800-482-8720. Customers in the Grand Rapids/Northern and Upper Peninsula Michigan areas can call MichCon toll-free at 1-800-632-4457.

MichCon is a natural gas distribution, transmission and storage company serving more than 1 million customers in 440 communities throughout Michigan, and is a wholly owned subsidiary of MCN Corporation (NYSE: MCN).

MANCHESTER, NH (FEB. 14) PR NEWSWIRE - Amoskeag Bank Shares, Inc. (NASDAQ: AMKG), a $2 billion bank holding company headquartered in Manchester, N.H., announced a temporary deferral of one of two previousl y announced merger proposals involving two of its four subsidiary banks.

Application to join Bank Meridian of North Hampton, N.H. with Amoskeag Bank will be postponed until later in the year. John L. Allen, president and chief executive officer of Amoskeag Bank Shares, stated, "It is our intent to complete the Bank Meridian-Amoskeag Bank Merger at an appropriate time in the future. With our continuing intensive effort to deal with loan quality in an uncertain economic environment, we determined that our corporate priorities would be best met by focusing on just one merger at this time."

The company announced its intent to undertake the two mergers in Dec. 1989 and filed applications with the New Hampshire Bank Commissioner and the Federal Deposit Insurance Corporation at that time.

MIDLAND, VA (FEB. 14) PR NEWSWIRE - Ross Industries, Inc. (NASDAQ: ROSX) today reported a net loss for the second quarter and six months ended Dec. 31, 1989, of $(139,462), or $(.11) a share, and $(50,851), or $(.04) a share, respectively, as compared to the prior year second quarter and six

months ended Dec. 31, 1988, net profits of $161,577, or $.13 a share, and $70,741, or $.06 a share, respectively.

Net sales for the second quarter of $1,420,303 represent a 26 percent decline from the prior year's record second quarter's net sales of $1,926,996. The six-month net sales of $3,246,165 were still 2 percent ahead of the prior year's six-month net sales of $3,169,940. Sales of the company's vertical form fill seal packaging and weighing machinery surpassed the sales of the mature processing machinery for the six-month period. The two groups contributed nearly two-thirds of the total sales for the period. Introduction of the Nema-4 horizontal form fill seal packaging machines was delayed until the third quarter. Management expects the new horizontal packaging machinery line to make a contribution of some significance over the last six months of the current fiscal year.

FORT WORTH, TX (FEB. 14) PR NEWSWIRE - Snyder Oil Corp. (the "Company") today announced that the Securities and Exchange Commission had declared effective a registration statement covering its offering of 23.9 million shares of common stock. The Company was formed to consolidate the business and assets of Snyder Oil Partners L.P. (NYSE: SOI), a NYSE listed oil and gas master limited partnership, and SOCO Holdings Inc., a privately held independent oil company whose subsidiary is the general partner of SOI. The proposed consolidation is subject to approval by the shareholders of SOCO Holdings and the unitholders of SOI. Both entities have called special meetings on March 23, 1990 in Fort Worth at which holders of record on Feb. 13, 1990 will be asked to approve the consolidation.

The shares of Snyder Oil Corp. have been approved for listing on the New York Stock Exchange upon notice of issuance. The shares will trade under the symbol "SNY." Proxy material describing the proposed transaction in detail will be mailed beginning today.

In the Consolidation, newly issued shares of common stock of the Company will be exchanged for all outstanding Common and Preference A Units of Snyder Oil Partners and the common stock of SOCO Holdings. Each Common and Preference A Unit will entitle the holder to receive 0.5 share and 1.35 shares of common stock of the Company, respectively. Each share of SOCO Holdings will be converted into 1.324 shares of the Company.

Beneficial owners who, as of the record date, would be entitled to receive fewer than 100 shares of Snyder Oil Corp.'s stock will receive cash in the amount of $9.76 per share otherwise issuable to them unless they specifically elect to receive stock.

On a pro forma basis as of Sept. 30, 1989, the Company had proved reserves of 12.3 million barrels of crude oil and liquids and 152.5 Bcf of natural gas, as well as natural gas processing, gathering and transmission facilities which generated revenues of approximately $10 million in the first nine months of 1989. Pro forma revenues and net income for the first nine months of 1989 approximated $59.5 million and $6.1 million, respectively. PaineWebber Incorporated and Smith Barney, Harris Upham & Co., Incorporated are acting as Dealer Managers of the offering and have rendered fairness opinions as to the common stock of the Company to be received by Snyder Oil Partners' unitholders.

SOI is a master limited partnership engaged in the production and development of oil and gas, the acquisition of oil and gas interests and in natural gas processing and transportation. The Partnership's Common and Preference Units are currently traded on the New York Stock Exchange under the symbols "SOI" and "SOI PrA," respectively. SOCO Holdings Inc. is a privately held company based in Fort Worth which is engaged in oil and gas exploration and the operation of oil and gas properties, as well as in the type of activities conducted by SOI.

WINDSOR LOCKS, CT (FEB. 14) PR NEWSWIRE - T. Daniel Clark has been named vice president in charge of corporate development, The Dexter Corporation (NYSE: DEX), according to an announcement made by K. Grahame Walker, president and CEO. He succeeds Stephen J. Raffay, who retired in January 1990.

Clark will play a key role in keeping with Dexter's strategic plan to focus on major markets that provide global growth opportunities. Global alliances will be developed through joint ventures, acquisitions, technology licenses and marketing partnerships.

In this new position, Clark brings significant marketing, operational, and senior management experience. Most recently, Clark served as president of the Dexter Water Management Systems Division located in Chagrin Falls, Ohio. Prior to this appointment in 1988, he served as executive vice president of the operation.

Clark joined Dexter in 1974 as a sales representative. In 1980, he was

promoted to product manager responsible for the Hysol(R) formulated liquids product line supplied to the electronics market. In 1984, he was named vice president of the Dexter Adhesives & Structural Materials Division and served as general manager of its Seabrook, N.H. operation. Prior to Dexter, Clark was with Shell Chemical Company where he held various management positions in marketing and sales.

Over the past few years, Clark has been actively involved with the Kiwanis Club and the Chamber of Commerce. He also served on the Adhesives and Sealants Council board of directors.

The Dexter Corporation is a Fortune 500 company producing specialty materials. Founded in 1767, Dexter is the oldest company listed on the New York Stock Exchange. Consolidated net sales and earnings for 1989 were $848.8 million and $42.9 million, respectively.

ENCINO, CA (FEB. 14) PR NEWSWIRE - Medical Properties Inc. (AMEX: MPP) today reported net income of $434,000, or $.18 per share for the fourth quarter ended Dec. 31, 1989, as compared to $515,000, or $.22 per share for the comparable prior year period. Income, primarily from rental properties, was $1,357,000 for the current fourth quarter, compared with $1,382,000 for the same quarter a year ago. The decrease in net income was primarily due to lower excess rental income and higher operating expenses.

For the year ended Dec. 31, 1989, net income was $1,895,000, or $.80 per share as compared to $1,921,000, or $.81 per share for the prior year. Income, principally from rental properties, was $5,427,000 for 1989, compared with $5,424,000 for 1988.

The company said that it expects to continue the cash dividend policy of $1.20 per share annually, payable quarterly, and that cash available from operations should be sufficient to maintain this dividend rate. The most recent quarterly cash dividend of $.30 per share was paid on Jan. 13, 1990 to shareholders of record Dec. 29, 1989.

Medical Properties is a real estate investment trust engaged in investing in income producing health care related facilities.

MADRID (FEB. 14) PR NEWSWIRE - Banco Central, S.A. (NYSE: BCM), a leading commercial bank in Spain, today reported its year-end consolidated earnings.

The 1989 consolidated pre-tax income was 67,541 million pesetas ($617 million), representing a 48 percent increase over 1988 pre-tax income of

45,599 million pesetas ($417 million).

Total revenue for 1989 was 537,845 million pesetas ($4.91 billion), up 26.7 percent from the 1988 figure of 424,383 million pesetas ($3.88 billion). Net revenue for 1989 was 245,599 million pesetas ($2.24 billion), an increase of 14.5 percent from the 1988 figure of 214,593 million pesetas ($1.96 billion).

Consolidated cash flow amounted to 138,000 million pesetas ($1.26 billion) in 1989, an increase of 21.1 percent over 1988 figures. Amortization and provisions exceeded 70,500 million pesetas ($644 million).

The ratio of consolidated profits to total average consolidated assets was 1.58 percent in 1989 compared to 1.16 percent in 1988.

The bank's loans and discounts amounted to 2,242,278 million pesetas ($20.5 billion), an increase of 15 percent over that of the prior year. The value of the equity securities portfolio was 110,965 million pesetas ($1.01 billion), an increase of 21.2 percent over that of 1988. The results do not include unrealized capital gains of 100,000 million pesetas ($914 million) which reflect stock exchange prices at year end.

At Dec. 31, 1989, premises and equipment were valued at 69,000 million pesetas ($630 million), a decrease of 5.28 percent from 1988. These figures do not take into consideration the unrealized capital gains amounting to almost 100,000 million pesetas ($914 million) at year end.

Capital stock remained stable in 1989, amounting to 49,368 million pesetas ($451 million) at year end. Shareholder equity, excluding the 1989 results, amounted to approximately 230,000 million pesetas ($2.1 billion). Year-end customer deposits and debt securities amounted to 3,220,000 million pesetas ($29.4 billion), representing an increase of 158,000 million pesetas ($1.44 million) over 1988.

The 1989 consolidated balance sheet amounted to 4,454,000 million pesetas ($40.7 billion), an increase of 358,000 million pesetas ($3.27 billion) from 1988.

ANNAPOLIS, MD (FEB. 14) PR NEWSWIRE - Second National Federal Savings Bank (NASDAQ-NMS: SNFS) has received approval from the Office of Thrift Supervision (OTS) to acquire Sunrise Federal Savings and Loan Association of Virginia.

Sunrise Federal is a $45 million thrift with a single branch office on Route 50 in Fair Oaks Mall and a mortgage banking subsidiary, both situated in Fairfax County, Va.

Second National is a $1.5 billion institution with 35 offices in Maryland, Delaware, Pennsylvania, Virginia and Washington, D.C.

"Virginia represents the final piece in our business plan to establish Second National as a regional banking presence in the 'fertile crescent,' from Philadelphia through Wilmington, Baltimore, Washington, D.C. and Northern Virginia," said Henry A. Berliner Jr., president of the company. Second National, which announced its intention to acquire Sunrise in April 1989, has been operating a loan production office in Virginia for the past two years.

NEW YORK (FEB. 14) PR NEWSWIRE - A Pan Am Boeing 747 set what it believes is an all-time speed record for a coast-to-coast commercial passenger flight on Tuesday night. Pan Am Flight 100 covered the 2,461 mile route in three hours and forty-five minutes. Pan Am will file for an official record. The flight carried a load of 227 passengers and a crew of 17.

The flight was under the command of Captain William Frisbee, chief pilot at the airline's Los Angeles base.

The flight cruised at an altitude of 33,000 feet, achieving an over-the-ground speed of 730 miles an hour for much of the trip. Average speed for the flight was 660 miles an hour.

Captain Frisbee praised the FAA air traffic controllers who monitored the flight from enroute air traffic control centers at Los Angeles, Albuquerque, Denver, Kansas City, Chicago, Cleveland and New York City. "The controllers were with us every step of the way," said Frisbee," and as each enroute center handed us off to the next, they wished us the best of luck. They were all well aware of the possibility of a speed record in the making, and thanks to their efforts, we were successful. There was a real team effort between our crew in the air and the controllers on the ground."

The flight arrived at JFK an hour ahead of schedule.

LAS VEGAS (FEB. 14) PR NEWSWIRE - Sahara Resorts (NASDAQ: SHRE) today reported revenues of $40.9 million for the quarter ended Dec. 31, 1989, as compared to $31.2 million for the comparable quarter of the previous year.

Operating income before depreciation and amortization for the quarter was $11.2 million, as compared with $7.1 million for the comparable quarter.

Net income of $133,000 or $.04 per share was reported for the quarter, as compared with net income of $364,000, or $.11 per share for the comparable quarter.

Sahara Resorts is the managing general partner of Sahara Casino Partners L.P. which owns and operates the Sahara Hotel and Casino and the Hacienda

Resort Hotel and Casino in Las Vegas and the Pioneer Hotel and Gambling Hall in Laughin, Nev.

A company wide program of expansion and renovation is underway at all three properties, as is construction of an all-new facility which will be marketed to the lucrative local Las Vegas market.

Increases over the comparable quarter are attributed to the acquisition of the Pioneer Hotel and Gambling Hall in Dec. 1988, and the expansion and renovation of the Sahara Hotel during the previous fiscal year. An increase in interest expense is attributed to three months of ownership of the Pioneer during the reporting quarter, as compared to one month during the comparable quarter.

NEW YORK (FEB. 14) PR NEWSWIRE - Raycomm Transworld Inc. (NASDAQ: RACM) president and chief executive officer, Robert Fain, today announced results for the fiscal 1990 third quarter and nine months ended Dec. 31, 1989.

For the third quarter, the company reported net income of $447,000 or $.05 per share on revenues of $12,914,000. These results compare with a net loss of $1,292,000 on revenues of $12,105,000 in the third quarter of fiscal 1989. Net income for the third quarter of the prior fiscal year includes a net gain from the sale of discontinued operations of $288,000 or $.03 per share.

For the nine-month periods, Raycomm Transworld reported net income of $838,000 or $.09 per share on revenues of $38,983,000. These results compare with a net loss of $1,976,000 on revenues of $43,158,000 for the nine-months of fiscal 1989. The fiscal 1989 period includes a net gain of $464,000 or $.05 per share from the sale of discontinued operations and an extraordinary gain from the abandonment of a foreign subsidiary of $66,000

or $.01 per share.

Commenting on the results, Fain states, "The continued improvement in net income reflects the benefits derived from Raycomm Transworld's restructuring program implemented when existing management took control. Revenues from continuing operations for the third quarter were particularly strong due to a concentrated sales effort resulting in increased volume from existing contracts as well as the addition of new contracts. We expect revenue trends to continue to be strong for the fiscal 1990 fourth quarter ending March 31, 1990 and project continued profitability but not at the same rate since traditionally profits in its fourth fiscal quarter have been impacted by higher federal and state withholding taxes."

As a result of the company's improving financial condition, Raycomm Transworld industries expects to conclude a new credit agreement on more favorable terms with its bank lender.

Raycomm Transworld Industries, Inc. is engaged, through its subsidiaries, in supplying temporary professional and technical personnel to a broad range of industries, including the aerospace, electronics and defense industries.

COUDERSPORT, PA. (FEB. 14) PR NEWSWIRE - John J. Rigas, president and CEO of Adelphia Communications Corp. ("Adelphia") (NASDAQ: ADLAC), reported the results of operations for the third quarter which ended on Dec. 31, 1989.

Third quarter results saw record levels of revenues and cash flow which were $62.6 million and $36.6 million, respectively. These results reflect the acquisitions that Adelphia completed since Oct. 5, 1988. Adelphia owned or managed for affiliates, cable television systems serving approximately 948,000 subscribers at Dec. 31, 1989. Adelphia and its subsidiaries served at Dec. 31, 1989, approximately 725,000 subscribers in its wholly owned cable television systems and 189,000 subscribers in its joint venture cable television systems including subscribers for the South Dade Systems which were transferred to the joint venture on Dec. 19, 1989.

Revenues and operating income before depreciation and amortization for the quarter were up 26.6 percent and 36.4 percent, respectively, compared with the same period last year.

Revenues in the third quarter totaled $62.6 million compared with $49.4 million for the same period last year. Third quarter operating income before depreciation and amortization was $36.6 million compared with $26.8 million for the same period last year. Third quarter net loss totaled $41.7 million, or $3.02 a share, compared with a net loss of $30.7 million or $2.22 a share, for the same period last year.

The Class A common stock of Adelphia is traded under the NASDAQ symbol "ADLAC."

WHITE PLAINS, N.Y. (FEB. 14) PR NEWSWIRE - Texaco Inc. (NYSE: TX) announced today that it has completed the sale of $50 million of Series F ESOP convertible preferred stock to a recently established Employee Stock Ownership Plan (ESOP) as part of Texaco's Employees Savings Plan, which covers Texaco's represented employees.

The company issued 67,796.61 shares of Series F ESOP convertible preferred stock to the ESOP, with a value of $737.50 per share, which is convertible into ten shares of Texaco Inc. common stock. This convertible preferred stock will have an annual dividend of $64.53 per share (a yield of 8.75 percent), payable semi-annually.

The ESOP structure is a cost-effective way of funding an improved company employees savings plan. This ESOP for represented employees has been established in connection with recent collective bargaining negotiations. The shares of Series F Convertible Preferred Stock will be allocated to employees within a 10-year period.

The ESOP completed a $50 million borrowing in the form of a variable-rate loan to purchase the convertible preferred shares from Texaco. The loan came from a syndicate of banks lead by Chase Manhattan Bank. The ten-year loan is guaranteed by Texaco Inc.

TROY, MI (FEB. 14) PR NEWSWIRE - R.P. Scherer Corporation announced today improvements in its sales and operating income for the third quarter ended Dec. 31, 1989.

For the three months ended Dec. 31, 1989, the company reported sales from continuing operations of $65.3 million, up from $59.6 million for the same period the previous year. Operating income was $10.6 million, compared with $9.4 million last year. After interest expenses and amortization of financing costs of $10.7 million, Scherer reported an after-tax loss of $4.5 million, compared to the loss of $1.9 million in December of 1988.

For the nine-month period ended Dec. 31, 1989, Scherer reported sales from continuing operations of $184.8 million, a 5-percent improvement over $175.4 million recorded for the same period last year. Operating income of $29.5 million, before restructuring expenses of $5.4 million, represents a 14-percent improvement over $25.9 million reported last year. After the interest expenses and amortization of financing costs for the period of $27.7 million, the company recorded a net after-tax loss of $21.8 million, compared to net income of $3.5 million in the prior year.

Both sales and operating income are the highest ever reported for Scherer's core business.

These results, the company commented, are in line with its plans for the current fiscal year. Scherer emphasized continued strong performance of its worldwide drug dosage delivery business. Operating improvements are

the result of restructuring undertaken by the company following the buyout led by Shearson Lehman Hutton, Inc., in June of 1989. At that time, the company decided to focus on its core drug dosage delivery systems, and divest itself of its Diversified Health Care Group. Scherer expects to substantially complete the divestiture program by June 30 of this year.

R.P. Scherer is a leading developer and manufacturer of drug dosage delivery systems. Scherer's proprietary and patented dosage delivery systems optimize the efficacy of drugs by regulating the dosage, rate of absorption, and place of release. In addition to being the world's largest developer and manufacturer of softgels, Scherer's drug dosage delivery range includes the patented Scherersol and Zydis systems. The company operates a global network of 14 facilities in 13 countries.

R.P. Scherer is now a subsidiary of RPS Corporation (OTC: RPCPP).

MIAMI (FEB. 14) PR NEWSWIRE - Royal Palm Beach Colony, Limited Partnership (AMEX: RPB) announced today the results of liquidating operations for its first quarter, the three month period ended Dec. 31, 1989.

Revenues for the first quarter of the current fiscal year were $643,000 compared with $2,735,000 in last year's first quarter.

In the current quarter, the partnership reported net income of $331,000, or $.07 per unit, compared with net income of $1,669,000, or $0.37 per unit in the first quarter last year.

Herbert L. Kaplan, president of the Partnership's managing General Partner stated that the Partnership was continuing to liquidate its remaining properties, but that the pace of asset sales had declined in the first quarter of 1990, as compared with the corresponding quarter last year, since most of the Partnership's assets have been sold. The Partnership's

reported earnings now consist primarily of interest earned on purchase money mortgages and recognition of previously deferred profits on prior installment sales of assets.

MINNEAPOLIS (FEB. 14) PR NEWSWIRE - Applied Spectrum Technologies Inc. today announced that total revenues for the 1990 first quarter were $357,000, compared with $161,000 for the year-earlier period. The company reported a net loss for the first quarter ended Dec. 31, 1989, of $451,000 or $.01 per share, compared with a net loss of $414,000, or $.01 per share, during the fiscal 1989 first quarter.

Richard Palermo, president, said, "The first quarter increase in revenues was primarily due to continued sales gains to the commercial (non-telco) marketplace. The company began distributing other manufactures' data-communications products to complement Applied Spectrum's own products. Palermo noted that net losses increased in the fiscal 1990 first quarter as a result of higher selling costs.

Palermo added, "Due to continued losses, the company's financial condition is at the point where additional financing is required. We have initiated

a program for such additional financing."

Applied Spectrum Technologies Inc. headquartered in Minneapolis, designs, manufactures and markets digital data distribution products for telecommunications applications.

NEW ORLEANS (FEB. 14) PR NEWSWIRE - Robert E. Howson, chairman of the board and chief executive officer of McDermott International, Inc. (NYSE: MDR), today reported that revenues for the three months ended Dec. 31, 1989, were $614,669,000 compared with $547,199,000 in the same quarter last year. Net income for the third quarter this year was $44,412,000 compared with a net loss of $31,829,000 for the same period a year ago. For the quarter ended Dec. 31, 1989, primary earnings were $1.19 a share and fully diluted earnings were $1.14 a share. For the same quarter last year, the primary and fully diluted loss was $.86 a share.

For the nine months ended Dec. 31, 1989, revenues totaled $1,953,551,000 compared with $1,490,296,000 for the same period a year ago. Net income for the current period was $394,000 compared with a net loss of $67,802,000 for the same period last year. The primary and fully diluted earnings for the nine months ended Dec. 31, 1989, was $.01 a share. This compares with a primary and fully diluted loss of $1.82 a share for the same period a year ago.

Results for the third quarter and nine months ended Dec. 31, 1988, have been restated to reflect the discontinuance of the Bailey Controls operations.

The company has adopted SFAS No. 96, "Accounting For Income Taxes." Consequently, the net loss for the nine months ended Dec. 31, 1988, was reduced by $52,580,000, or $1.42 a share, primary and fully diluted, to

reflect the cumulative effect on prior years of this accounting change. This change did not have a material effect on the results for the three and nine months ended Dec. 31, 1988.

McDermott International, Inc., is a leading worldwide energy services company.

#90045p0357 02/14/1990 ~PR Newswire

SAN JOSE, CA (FEB. 14) PR NEWSWIRE - EXAR Corp. (NASDAQ: EXAR) today reported revenue gains for the third quarter and first nine months of fiscal 1990, which ended Dec. 31, 1989. Net income of $1,268,000 (21 cents per share) and $4,524,000 (73 cents per share), respectively, compared with net income of $1,396,000 (23 cents per share) and $3,990,000 (65 cents per share) for the comparable periods of the prior year.

EXAR reported net sales for the third quarter of fiscal 1990 of $23,753,000, a 20 percent increase over the $19,790,000 recorded during the third quarter a year ago. Sales for the nine months of fiscal 1990 totaled $63,692,000. The 12 percent increase over the $57,009,000 reported in the comparable period of fiscal 1989 included an 11 percent increase in sales of telecommunication products and a 12 percent increase in sales of wafer services to Rohm Co. Ltd., the company's majority shareholder. In addition, the company realized significant increases in sales of consumer products marketed to customers in the Pacific Rim by the company's wholly owned subsidiary, Exar Japan Corp.

"We began our sales and marketing efforts in Japan approximately six months ago through Exar Japan Corp. and we are beginning to see the results of those efforts," said Nob Hatta, president of Exar. "The consumer products we are currently shipping traditionally have lower margins, but we are looking to the long-term benefits of establishing relationships with key Japanese manufacturers and introducing them to EXAR's ASIC capabilities," continued Hatta.

The increase in net income reflected an increase in interest income as well as the elimination of the losses related to the company's formerly 19 percent owned subsidiary which was sold effective April 1, 1989.

Founded in 1971, EXAR Corp. focuses on communications and microperipherals markets with application specific standard and custom products. EXAR also supplies a broad spectrum of solutions to ASIC users, applying the company's unique analog and "analog-plus" design expertise using in-house Bipolar, CMOS, EEPROM and BiCMOS technologies.

HOUSTON (FEB. 14) PR NEWSWIRE - General Homes Corp. (NYSE: GHO) announced a net loss of $6.9 million or 46 cents per share, for its first quarter ended Dec. 31, 1989, compared with a net loss of $13.1 million, or 87 cents per share, for the same quarter a year ago.

Revenues for the three months ended Dec. 31, 1989 were $55.7 million compared with $66.6 million for the same quarter in fiscal 1988.

Gross profit margins from home sales, as a percentage of home sales revenue, reflect an increase of 6.2 percentage points for the December 1989 quarter as compared to the December 1988 quarter. The actual increase in home sales gross profit in the December 1989 quarter is $2.5 million or a 40 percent increase over the prior year period.

Improvements in reported selling, general and administrative expenses reflect a decline of $4.6 million or 37 percent in the quarter ended Dec. 31, 1989 as compared to the quarter ended Dec. 31, 1988. This reduction in selling, general and administrative expenses is primarily a result of streamlining operations.

As of Dec. 31, 1989, General Homes had 806 homes under contract, compared

with 901 at the end of the same period in fiscal 1989.

#90045p0361 02/14/1990 ~PR Newswire

FARMINGTON HILLS, MI (FEB. 14) PR NEWSWIRE - Medar, Inc. (NASDAQ: MDXR) reported preliminary net earnings for its fourth quarter ended Dec. 31, 1989, including year-end adjustments of approximately $.02 per share on net sales of approximately $3.9 million, compared to a net loss of $.01 per share on net sales of approximately $4.0 million for the fourth quarter of 1988. Earnings per share calculations are based upon shares outstanding of approximately 5.4 million in 1988, 5.5 million for the year ended Dec. 31, 1989, and 5.6 million for the fourth quarter of 1989.

Preliminary net sales for the year ended Dec. 31, 1989, of $14.3 million represented a slight decline from net sales of $14.5 million in 1988. While sales of resistance welding controls were weak during the first half of 1989, the U.S. market strengthened in the latter half of the year. However, the Canadian resistance welding control market remained relatively weak throughout 1989.

The company reported a preliminary net loss of $.21 per share for the year ended Dec. 31, 1989, compared to a net loss of $.28 per share in 1988. The net losses in 1989 and 1988 were negatively impacted by losses from discontinued operations of approximately $.03 and $.21 in 1989 and 1988, respectively.

The company anticipates a continued strengthening in the resistance welding control market as it appears that the number of customer plant modernizations requiring resistance welding controls will increase in 1990. In addition, the company expects further growth in sales of its

vision gauging and inspection systems, especially in sales of its compact disc inspection systems.

In late 1989 and early 1990, the company has undertaken a significant cost-reduction program, which will achieve improved efficiency and economies of scale. The company anticipates improved sales and earnings in 1990.

Final audited figures for the year are expected to be announced in March.

Medar designs and manufactures computer-controlled automated equipment including vision gauging and inspection systems, resistance welding controls and computer communications systems. Medar's customers include major companies in the defense, aerospace, automobile, appliance, entertainment and consumer goods packaging industries.

#90045p0363 02/14/1990 ~PR Newswire

CLEVELAND (FEB. 14) PR NEWSWIRE - Banner Industries, Inc. (NYSE: BNR) today reported a near doubling of sales and a tripling of operating income for the fiscal second quarter ended Dec. 31, 1989, but a net loss of $7,616,000, or 53 cents per common share. The company attributed the loss primarily to lower than expected investment income and the seasonality of earnings of Fairchild Industries, Inc. which are typically higher in the second six months of the fiscal year. Fairchild Industries

was purchased by the company in June, 1989.

Operating income for the current fiscal year's second quarter was $14,361,000, up from $4,595,000 a year ago. Second quarter sales this year were $203,579,000 versus $104,333,000 in the like period last year.

For the six months this year, operating income amounted to $25,449,000 compared to $6,721,000 in the fiscal 1989 first half. Sales for the six months this year were $397,480,000, double the $199,915,000 of a year ago. The net loss for the six months this year was $7,415,000 or 55 cents per common share.

Sales and operating income figures do not include those of Rexnord Corporation in which Banner has a 40 percent equity interest.

A year ago, Banner had second quarter net income of $9,038,000, or 53 cents per common share (44 cents per common share on a fully diluted basis), and net income for the six months of $48,311,000, or $2.93 per common share ($2.27 on a fully diluted basis). Results for the comparable periods last year reflected a series of non-recurring and unusual items including a gain from the 60 percent reduction in interest of its investment in Rexnord Corporation in the first quarter.

The company said that the strong gains in sales and operating income in the current year periods were attributable to contributions of the Fairchild units as well as gains by other Banner operations.

Banner reported a strong financial position with working capital as of Dec. 31 amounting to $310,034,000 and cash and equivalents totaling $176,472,000.

Banner is a leading supplier of aerospace products, industrial products and communications services.

HOUSTON (FEB. 14) PR NEWSWIRE - Allwaste Inc. (NASDAQ: ALWS) has entered into an agreement in principle to acquire all the outstanding common stock of a privately-held company which operates a non-hazardous, liquid-waste treatment facility in Texas.

The closing of the acquisition is scheduled to occur during March 1990, and is subject to due diligence by both parties and negotiation of a final acquisition agreement. Consideration at closing will consist of Allwaste common stock, and the acquisition will be accounted for as a purchase.

Additional consideration, consisting of a combination of common stock and cash, is payable contingent upon earnings of the business over the next three years.

According to R.L. Nelson Jr., Allwaste's chairman, "Since inception, Allwaste has pursued a strategy of accessing niche opportunities in the huge 'waste' market. This proposed acquisition strengthens Allwaste's presence in the sludge dewatering and wastewater treatment business, a niche which is expected to grow with the implementation and enforcement of regulations prohibiting liquid waste disposal in landfills."

Allwaste Inc. is an environmental services company headquartered in Houston.

CONTACT: R.L. Nelson Jr., or Clayton K. Trier, 713-623-8777, both of Allwaste Inc.

KANSAS CITY, MO (FEB. 14) PR NEWSWIRE - Cerner Corp. (NASDAQ: CERN) today reported fourth quarter and year-end results for the period ended Dec. 31, 1989. Revenues increased 107 percent to $18.5 million from $8.9 million in the comparable 1988 quarter. Net earnings increased 114 percent to $1.3 million or $.33 per share from $.16 per share for the same period in 1988.

For the 12 months ended Dec. 31, 1989, revenues increased 39 percent to $56.7 million from $40.9 million in the comparable 1988 period. Net

earnings increased 4 percent to $3.6 million from $3.4 million. Earnings per share increased 4 percent to $.95 per share from $.91 per share for the same period in 1988.

Clifford W. Illig, president and chief operating officer, said, "We are very pleased with our results from the fourth quarter and for the year. Forty-five contracts were completed during 1989, increasing the number of sites with Cerner's Clinical Information Systems to over 200. Backlog ended the year at $21.1 million, up from $18.2 million a yea ago."

Illig continued, "Overriding the purely quantitative measures of our performance has been the progress Cerner has achieved in building our organization, expanding our product lines, broadening our services and strengthening our relationships with clients."

Illig added, "As we begin this new decade, Cerner is ready to build on the achievements of 1989 and our leadership position in the overall clinical information systems marketplace. Moving into 1990, we will continue to advance programs which will further strengthen Cerner's competitive position."

Cerner Corp. is a leading supplier of clinical information systems to the healthcare industry. All Cerner systems are designed around a central structure called Healthcare Network Architecture (HNA). Through HNA, Cerner is able to deliver application software products that first and foremost serve the unique needs of each clinical discipline, while allowing unprecedented management and cross-disciplinary medical applications. Cerner offers products to a broad marketplace including hospitals, HMOs, clinics and reference laboratories.

HOUSTON (FEB. 14) PR NEWSWIRE - Commonwealth Mortgage of America L.P. (NYSE: CMA) announced today results for the quarter ended Dec. 31, 1989.

For the three months ended Dec. 31, 1989, revenues were $28.7 million vs. $33.2 million for the like quarter a year ago. CMA had a net loss of $18.5 million, or 52 cents per Class A Unit, compared to a net loss of $3.7 million, or 11 cents per Class A Unit, in the preceding year.

For the six months ended Dec. 31, 1989, revenues were $59.9 million vs. $55.1 million for the comparable period last year. The net loss was $16.7 million, or 47 cents per Class A Unit, compared to $20.0 million, or 57 cents per Class A Units, for the like period last year.

The net losses for the three and six months ended Dec. 31, 1989, include a $14.9 million adjustment of amortization of purchased loan administration contracts in recognition of the sale of $1.8 billion of mortgage loan servicing announced on Feb. 1.

A total of $674 million in residential mortgage loans were produced during the quarter. This compares to $481 during the second quarter of fiscal 1989.

Commonwealth Mortgage of America L.P. operates a network of 46 residential mortgage origination offices across the United States. Through this network, CMA originates residential first mortgage loans for sale principally through mortgage backed securities offerings. The

partnership services approximately $9.9 billion in mortgage loans for investors. Commonwealth Mortgage Corp. of America is the general partner of CMA.

NIAGARA FALLS, NY (FEB. 14) PR NEWSWIRE - Sevenson Environmental Services Inc. (NASDAQ-NMS: SEVN) announced today that it has been awarded two contracts with a combined value of $6.1 million.

The first contract, which is with a private sector customer and has a value of $1 million, is for the cleanup of a former industrial waste disposal site in Niagara County, N.Y. The other contract, with a value of $5.1 million, was awarded by Allegheny County, Pa., and is for the excavation and disposal of solid waste at the Pittsburgh International Airport. Both contracts will be completed in 1990.

Sevenson provides a comprehensive range of field services for the remediation of sites and facilities contaminated by hazardous materials. The company, which is headquartered in Niagara Falls, N.Y., operates principally in the eastern United States and Canada. Since entering the site remediation business in 1979, the company has performed over 200 projects, including projects at the Love Canal and at other Superfund sites.

ST. PAUL, MN (FEB. 14) PR NEWSWIRE - St. Jude Medical, Inc. (NASDAQ: STJM) today reported fourth-quarter sales and net income and annual sales and net income for the period ended Dec. 31, 1989.

For the quarter ended Dec. 31, 1989, St. Jude Medical reported net income of $12.8 million or 53 cents per share compared to net income of $8.8 million or 37 cents per share for the fourth quarter of 1988, an increase of 45 percent. St. Jude Medical reported sales of $35.9 million for the fourth quarter compared to $29.0 million in sales for 1988, an increase of 24 percent.

For the year which ended Dec. 31, 1989, St. Jude Medical reported net income of $50.9 million or $2.14 per share compared to net income of $33.5

million or $1.42 per share for the year ended 1988, an increase of 52 percent. St. Jude Medical reported 1989 sales of $148.0 million compared to sales of $114.1 million for 1988, an increase of 30 percent.

Lawrence A. Lehmkuhl, St. Jude Medical's president and chief executive officer, stated "1989 was another very successful year for St. Jude Medical. We continued to penetrate the heart valve market, completed the conversion to a direct domestic sales organization, developed a stronger management structure by divisionalizing the company, and expanded our products offered to include cardiac assist devices. We feel the company is fundamentally stronger than it has ever been, is well positioned to continue growing in the decade ahead, and is in excellent financial condition entering 1990."

St. Jude Medical manufactures and markets medical devices for cardiovascular and vascular applications.

#90045p0389 02/14/1990 ~PR Newswire

BOCA RATON, FL (FEB. 14) PR NEWSWIRE - Radice Corporation (NYSE: RI), a Florida-based real estate development company, reported revenues of $1,465,000 and a net loss of $1,092,000 or $.10 per share for the six months ended Dec. 31, 1989.

The loss was expected for the initial six-month period following the reorganization of the company. Revenues for the comparable period of last year were $10,308,000, with resulting net loss of $257,000 or $.31 per share.

Revenues for the three-month period ended Dec. 31, 1989, were $734,000 as compared with $9,836,000 for the same fiscal quarter of last year. A net loss of $729,000 or $.07 per share was reported, as related to earnings of $233,000 or $.29 per share incurred in the second quarter ended Dec. 31, 1988.

The company does not believe that the periods for the current fiscal year are comparable with those of the prior year.

No real estate sales transactions or significant development activities were reported during the first six months of the current fiscal year. During the second quarter of last fiscal year, the company consummated the sale of two land parcels located in Pittsburgh. These sales were part of

a program to position the company for the development of a plan of reorganization.

James M. Adams III, president and chief executive officer, announced the relocation of Radice's corporate offices from Boca Raton to Orlando, Fla. Adams stated that the company serves as a real estate adviser to Stoneridge Properties of Florida, Inc. (a wholly owned subsidiary of Stoneridge Resources, Inc.), and Major Realty Corporation (NASDAQ: MAJR), which have significant land holdings in Central Florida.

The relocation of the office will enhance the administration of these real estate advisory services, including the anticipated development and operations of these properties. Further, the strong real estate market in Orlando offers the company other significant development opportunities.

The company intends to continue real estate development activities in South Florida. Presently, the company is completing the pre-development activities relative to a $14,500,000, 222-unit rental apartment project in Delray Beach, Fla., which the company anticipates to commence construction during the final quarter of this fiscal year.

Bloomfield Hills, Mich.-based Stoneridge Resources, Inc. (NYSE: SRE) owns 29 percent of the outstanding shares of Radice and 27 percent of Major Realty.

HOUSTON (FEB. 14) PR NEWSWIRE - Conquest Exploration Co. (AMEX: CQX) today reported a net loss for 1989 of $577,000, compared to a net loss of $46,805,000 for 1988. After giving effect to dividends on the company's preferred stock, the company reported a net loss attributable to common

shares for 1989 of $2,848,000, 6 cents per share, compared to a loss of $49,120,000, $1.17 per share in 1988.

The company's results for 1989 include charges of $4,044,000 representing reductions in the carrying values of certain oil and gas properties to expected future recoveries. The company reported writedowns in 1988 of $41,757,000. The company's results for 1989 include two extraordinary items: (I) the utilization of net operating loss carryforwards to reduce the provision for Federal income taxes of $192,000; and (II) the loss on the early extinguishment of the company's 9-7/8 percent convertible debentures of $158,000, net of income taxes of $82,000. The company's results of operations include the effect of the operations of Canadian Conquest Exploration Inc. from April 17, 1989, the effective date of the acquisition of that company.

Conquest Exploration Co. explores for, develops and produces oil and gas. The company's exploration operations are concentrated in the onshore and offshore areas of the Gulf Coast and certain international areas. The company's principal producing properties are located in Louisiana, Mississippi, Montana, North Dakota, Texas, Utah and Wyoming. The company also conducts exploration and production operations in Canada through its subsidiary, Canadian Conquest Exploration Inc. Conquest is headquartered in Houston. The company's common stock and debentures are listed on the American Stock Exchange and trade under the symbols CQX and CQX.A, respectively.

#90045p0411 02/14/1990 ~PR Newswire

MURFREESBORO, TN (FEB. 14) PR NEWSWIRE - Pricor Incorporated (NASDAQ: PRCO) today announced operating results for the third quarter and first nine months of fiscal 1990.

Third quarter revenues were $5,376,261, an increase of 36 percent from revenues of $3,966,292, reported in the third quarter of fiscal 1989. During the third quarter of fiscal 1990, the Company's operating contribution totaled $1,152,640, up from a contribution of $927,060 reported during the same three month period a year earlier.

For the third quarter of fiscal 1990, Pricor reported net income of $153,634, or $.03 per share, as compared to a net loss of $60,913, or $.01 per share, reported in the third quarter of fiscal 1989.

Pricor Chairman Hubert L. McCullough made the announcement saying, "We are pleased with these results and believe they demonstrate that the Company is continuing to manage its growth in an effective fashion.

"Pricor has grown substantially during fiscal 1990," McCullough added, "and we have made great progress toward realizing consistently profitable operations. The Company has reported a profit during three of its last four fiscal quarters. Our performance to date is clearly in line with where we believe we should be at this time."

According to McCullough, construction is proceeding as planned on the adult detention centers Pricor will operate and manage in six Texas counties. Bond financing of approximately $74 million for the construction of the facilities was completed by Drexel Burnham Lambert in the fall of 1989.

The six facilities, totalling 3,000 beds, comprise the largest agreement with a private sector company in the adult corrections management industry. McCullough said the facilities should be operational by the fourth quarter of fiscal 1991.

Revenues for the nine month period ended December 31, 1989, were $14,866,300, up 43 percent from the $10,401,582 reported in the same period last year. During the first nine months of fiscal 1990 the Company's operating contribution totaled $3,250,805, up 47 per cent from the $2,207,536 reported during the comparable period in fiscal 1989.

Net income during the first nine months of fiscal 1990 was $84,157, for earnings per share of $.02, as compared to a net loss of $428,879, or $.09 per share in the corresponding period a year earlier.

Pricor Incorporated provides educational and treatment services for youth and correctional services for juveniles and adults. The Company has contracts in Alabama, California, Tennessee, Texas and Virginia, and business interests in the United Kingdom.

The common stock of Pricor Incorporated is traded under NASDAQ symbol PRCO.

#90045p0412 02/14/1990 ~PR Newswire

MELVILLE, N.Y. (FEB. 14) PR NEWSWIRE - Chyron Corporation (NYSE: CHY) today reported that consolidated sales for the first half of fiscal year 1990 ended Dec. 31, 1989, were $20,794,000, an increase of 6 percent over the $19,567,000 reported for the first half of fiscal 1989. For the quarter ended Dec. 31, 1989, consolidated sales were $10,127,000, a decrease of 6 percent compared to the $10,751,000 reported for the prior year quarter.

Operating income for the current six-month period increased $1,054,000 to $630,000 from the $424,000 operating loss reported for the same period last year. Operating income for the current quarter ended Dec. 31, 1989, amounted to $313,000, compared to $333,000 for the prior year quarter.

For the current six-month period, the company experienced a loss of $503,000 before and after income taxes compared to a loss of $742,000 before a tax benefit of $127,000 and a minority interest benefit of $190,000 resulting in a net loss for the prior year of $425,000. For the current quarter, the company experienced a loss before and after income taxes of $247,000 compared to income of $135,000 before a minority interest benefit of $86,000 resulting in net income of $221,000 for the prior year period.

With respect to the proposed merger of the company with Midwest Communications Corporation (NASDAQ: MCOM), the company indicated that the transaction is subject to negotiation of a definitive merger agreement, its approval by the boards of directors of both companies, SEC clearance of the required prospectus/proxy statement and to approval by the shareholders of both companies as well as other customary conditions.

Although the company's due diligence review has not been completed, the company anticipates that a definitive merger agreement will be signed by March 10, 1990. If the agreement is signed by that date, the transaction should be consummated within 90 days thereafter.

The Chyron Group -- Chyron, DSC, CMX and Aurora -- designs, manufactures and markets digital electronic graphics equipment and systems, computer-assisted video, film and audio editing systems, special effects equipment, and paint and animation systems for the broadcast television, cable, video production, post-production, and industrial markets.

HOUSTON (FEB. 14) PR NEWSWIRE - Houston Biomedical Inc. (NASDAQ/BSE: HBII) announced today the acquisition of MTD Therapy Associates Inc. for an undisclosed amount of cash and debt, part of which may be converted into common stock in the future. MTD provides physical therapy, occupational therapy, and related rehabilitation services to patients in the home on a contractual basis with home health agencies and at the hospital/clinic through its supplemental staffing function. Founded in 1984, MTD had annual revenues of approximately $575,000 in 1989.

Gene Morris, chief operating officer of HBI said, "MTD has a solid base of

business in a health care field where there is a shortage of skilled providers. At the same time, MTD will significantly complement MedSource and give it the ability to provide a wider range of home care services."

MedSource Home Health Care Inc., a medicare certified agency which provides nursing services in the home and supplemental hospital staffing, was purchased by HBI on Oct. 30, 1989. Morris went on to say that the company continues to look for other acquisition opportunities to enhance its health care services business.

#90045p0422 02/14/1990 ~PR Newswire

WAKEFIELD, MA (FEB. 14) PR NEWSWIRE - DAKA International Inc. (NASDAQ: DKAI) reported net income of $715,000 or 2 cents per share on revenues of $43.9 million for the second fiscal quarter ended Dec. 30, 1989 and net income of $1,538,000 or 4 cents per share on revenues of $84.3 million for the six months then ended. These results compare to restated amounts for net loss of $4,781,000 or $(.13) on revenues of $41 million for the second fiscal quarter ended Dec. 31, 1988 and restated amounts for net loss of $4,570,000 or $(.13) on revenues of $80.3 million for the six months then ended.

The company, now in its second year since the daka Inc. and Fuddruckers Inc. merger in November 1988, has reported positive earnings for two consecutive quarters. The results for the six months ended Dec. 30, 1989 include a net benefit of $300,000 resulting from a change in the accounting for certain inventory items. The net loss for the second fiscal quarter and six months ended Dec. 31, 1988 includes charges of $5,225,000 for business combination and other non recurring items, and includes an income tax benefit of $1,303,000.

The company, through its daka Inc. subsidiary operates and manages approximately 500 contract foodservice facilities and owns, operates and manages seven hotels. The company, through its Fuddruckers Inc. subsidiary owns and operates, franchises and manages Fuddruckers restaurants throughout the United States, Canada, Mexico and South America. There are currently 115 Fuddruckers restaurants in operation.

#90045p0435 02/14/1990 ~PR Newswire

LAWRENCEVILLE, NJ (FEB. 14) PR NEWSWIRE - IMO Industries Inc. (NYSE: IMD) today reported net income of $33.9 million ($1.88 per share) for the year ended Dec. 31, 1989.

This was 20 percent ahead of 1988 net income of $28.3 million ($1.78 per share). Sales in 1989 were $851.4 million, compared with $687.2 million reported for 1988.

For the fourth quarter of 1989, net income increased 26 percent to $11.3 million ($.62 per share), from $9.0 million ($.51 per share) in the fourth quarter of 1988. Included in the fourth quarter of both 1989 and 1988 is $.06 per share from nonrecurring income. Sales for the recent period were $283.7 million, compared with $198.7 million reported for the fourth quarter of 1988.

In the fourth quarter of 1989, the company recognized $1.7 million of nonrecurring income. The company realized a gain of $5.1 million (or $.18 per share after tax), which was nonrecurring in nature, and which principally resulted from the settlement of litigation involving one of the company's subsidiaries. This gain was offset by $3.4 million ($.12 per share after tax) of costs associated with the environmental cleanup of a property, the proposed acquisition of a company which was prevented by the Federal Trade Commission and increased expenses to complete the closing of two product lines.

Full year comparisons benefited from the operations of Warren Pumps Inc. and Roltra Group, acquired in 1989, and from a full year's results of Varo Inc., which was acquired at the end of the third quarter of 1988.

Orders received during 1989 increased 14 percent from those recorded for 1988. On a pro forma basis orders were down 4 percent in 1989, but they were up 8 percent when adjusted for some defense bookings that are not comparable due to multi-year procurements. Backlog at year-end 1989 was $544.2 million, an increase of 9 percent from that reported at the end of 1988.

IMO supplies analytical and optical instruments, electronic and mechanical controls, engineered power products and their support services to industrial and defense customers worldwide.

#90045p0440 02/14/1990 ~PR Newswire

HOUSTON (FEB. 14) PR NEWSWIRE - Seagull Energy Corp. (NYSE: SGO) reported today that 1989 earnings were the second best in the company's history, exceeded only in 1983 when Seagull recorded a large one-time profit on a construction project.

The company's 1989 earnings applicable to common stock totaled $9.4 million, or $1.40 per share, vs. $1.1 million or 15 cents per share, for 1988. Results for 1988 were adversely affected by a $9.9 million pre-tax, non-cash valuation allowance. Without the valuation allowance, Seagull's 1988 earnings applicable to common stock would have totaled $7.7 million, or $1.03 per share.

Revenues and operating profit both increased in 1989, revenues to $178.4 million from $161.5 million in 1988 and operating profit to $33.7 million from $19.2 million (or $29.1 million without the valuation allowance) in the previous year.

For 1989's fourth quarter, the company's earnings applicable to common

stock were $3.4 million, or 51 cents per common share, vs. $4.0 million, or 54 cents per share, in the last quarter of 1988. Assuming full dilution for the company's convertible exchangeable preferred stock, earnings for the fourth quarter totaled 47 cents per share.

In exploration and production, the company had the benefit of gas and oil sales from the producing properties of Houston Oil & Minerals (HO&M) for all of 1989, vs. only one month in 1988. Seagull acquired HO&M from Tenneco Inc. in late 1988.

Houston-based Seagull is engaged in the transportation, distribution and marketing of natural gas, liquids products and petrochemicals; oil and gas exploration and production, and natural gas processing.

#90045p0443 02/14/1990 ~PR Newswire

NEW MILFORD, NJ (FEB. 14) PR NEWSWIRE - Polifly Financial Corp. (NASDAQ: PFLY), the holding company for Polifly Savings and Loan Association, reported today an after-tax loss of $15,843,000, or $7.25 per share for the three months ended Dec. 31, 1989. The loss, which is the result of a specific reduction of $14.1 million in the book value of certain real estate assets and a $5.2 million addition to the provision for possible loan losses, is primarily due to the depressed New Jersey real estate market.

Polifly's loss for the quarter takes into account the available tax benefits of $3.8 miilion resulting from the losses and pre-tax operating income of $800,000 earned in the period. Polifly recorded $1,136,000 of income, or $.52 per share, in the comparable period last year. For the six months ended Dec. 31, 1989, Polifly lost $15,042,000, or $6.88 per share compared to earnings of $2,429,000 or $1.11 per share for the same period last year.

Polifly recently completed an accelerated quarterly review of its real estate and loan portfolio in light of conditions in the local real estate market. The rapid deterioration in the New Jersey real estate market, which has reached levels far beyond marketplace expectations, substantially increased Polifly's non-performing assets at Dec. 31, 1989, which consisted of primarily residential housing projects located in New Jersey. Polifly's non-performing assets as of Dec. 31, 1989, were $40,696,000, including $20,582,000 in real estate owned and $20,114,000 of non-accrual loans, compared to $27.1 million at Sept. 30, 1989, and $29 million at June 30, 1988.

Polifly's loan loss reserves at Dec. 31, 1989, were $6.9 million in

comparison with $1.1 million at June 30, 1989. While Polifly believes that its present reserve for loan losses is adequate, if the local real estate market continues to decline Polifly may be required to make additional provisions for loan losses.

Net interest income before provision for possible loan losses was $3,204,000, and $6,385,000 for the three and six months ended Dec. 31, 1989, respectively, compared with $3,270,000 and $6,618,000 in the corresponding periods last year. Polifly's interest rate margin was 2.55 percent for the current quarter, a decrease from 3.41 percent for the three months ended Dec. 31, 1988. The reduction in the interest rate margin is primarily attributable to the competitive local market for deposits and the increase in non-performing.

Total other income, net of the loss from real estate operations, was increased to 860,000 and $1,686,000 for the three and six months ended Dec. 31, 1989, compared with $205,000 amd $336,000 in the prior period last year. Other income included gains on the sale of investment securities, principally 11th District COFI adjustable rate mortgage-backed securities of $453,000 in the 1989 quarter, an increase from $191,000 last year. The loss from real estate operations of $2,032,000 in the quarter ended Dec. 31, 1989, compared to a loss of $119,000 in the same period last year, includes the specific writedown on one of Polifly's joint venture projects. The balance of the loss is largely the result of depreciation costs associated with two residential apartment buildings in which Polifly is a joint venture partner.

#90045p0444 02/14/1990 ~PR Newswire

DALLAS (FEB. 14) PR NEWSWIRE - Rexene Corp. (NYSE: RXN) today announced the completion of the sale of its Bayport, Texas, manufacturing facility to Lyondell Petrochemical Co. Together with related sales of Bayport inventory and spare parts, the realization of working capital and the anticipated sale of excess real estate, the pre-tax net proceeds from the transaction are expected to aggregate approximately $105 million.

Pursuant to the Indenture relating to Rexene's Senior Increasing Rate Notes due 1992, the company is required to utilize "after-tax net proceeds" from the Bayport sale (approximately $63 million) to retire an equivalent principal amount of Senior Notes. Rexene expects to satisfy this obligation by repurchasing Notes in the open market at prevailing prices. In this connection, the company has already repurchased $36 million principal amount of Senior Notes in the open market and may purchase additional Senior Notes to the extent available at favorable market prices. These debt reductions will reduce interest expense and

should enhance Rexene's overall financial position.

Rexene Corp., through its principal operating subsidiary, Rexene Products Co., manufactures thermoplastic resins and petrochemical products including polyethylene and polypropylene resins, styrene and plastic film. Rexene is headquartered in Dallas with manufacturing facilities in Texas, California, Wisconsin and Delaware.

#90045p0450 02/14/1990 ~PR Newswire

DALLAS (FEB. 14) PR NEWSWIRE - ENSERCH Corp. (NYSE: ENS) reports 1989 income from continuing operations was $70 million vs. $11 million for 1988. All business segments showed improved operating results for the fourth quarter and full-year 1989. Results for 1988 included a $29 million after-tax charge related to the corporation's engineering and construction segment, recorded in the third quarter 1988.

Net income for 1989 was $73 million. In 1988, there was a net loss of $166 million, which included a $225 million after-tax provision for loss from the discontinuance of ENSERCH's oil field services operations and a $50 million credit from the cumulative effect on prior years of the change in method of accounting for income taxes. After provision for preferred stock dividends, earnings applicable to common stock in 1989 were $59 million, or 99 cents per share. In 1988, the loss applicable to common stock was $181 million, or $3.14 per share. Operating income for 1989 was $201 million vs. $106 million for 1988. Revenues in 1989 were $2.7 billion about the same amount as the year earlier.

For the fourth quarter 1989, income from continuing operations was $23 million vs. $6.9 million for the fourth quarter 1988. Net income was $26 million, compared with $6.9 million for the 1988 period. Earnings applicable to common stock were $23 million, or 36 cents per share, compared with $3.2 million, or 5 cents per share, for the year-earlier quarter. Operating income was $55 million vs. $40 million for the fourth quarter 1988. Fourth-quarter revenues were $770 million, compared with $712 million for the 1988 period. Average common and common equivalent shares outstanding for the fourth quarter were 63.7 million, up 10 percent from the year-earlier quarter, reflecting the issuance of shares following the completion in mid-October of an exchange offer of ENSERCH common stock for Enserch Exploration Partners Ltd. (EP) (NYSE: EP) units, which brought ENSERCH's total ownership of EP to 99.2 percent.

#90045u0182 02/14/1990 ~United Press International
PORTLAND, Ore. (FEB. 14) UPI - Fred Meyer Inc., a major Northwest retail chain, has decided to switch its supplier of house-brand tuna from countries that support the use of driftnet fishing, a lawmaker said Tuesday.

Fred Meyer officials said the key was to find other packers that could deliver quality tuna at a cost that will keep prices low.

''The first batch from our new supplier will reach our shelves by the end of this month for 12.5-ounce cans, with the transition continuing into summer for other sizes of water-packed tuna,'' said Rob Boley, director of public relations.

Rep. Les AuCoin, D-Ore., applauded Fred Meyer's move, saying the company ''has given consumers the opportunity to vote with their pocketbooks on this critical issue.''

AuCoin called Fred Meyer's action another step in a growing economic movement toward a worldwide ban on the use of high-seas driftnets.

''Economic pressure is a key component in U.S. efforts to end this ecologically unsound fishing practice,'' said AuCoin, who has sought increased federal enforcement against driftnetting.

Fred Meyer officials, legislative aides and other groups gathered for a meeting last November called by the United Community Action Network. At that time, some of Fred Meyer's house-brand tuna was being bought from Taiwan, which along with Japan and Korea have the largest driftnet operations in the Pacific.

AuCoin pledged to continue his efforts in the coming session of Congress to ban the use of high-seas driftnets.

#90045u0234 02/14/1990 ~United Press International
SINGAPORE (FEB. 14) UPI - Boeing Commercial Airplanes President Dean Thornton predicted Wednesday the giant American manufacturer will clinch a deal with China to build 150 aircraft by the end of the year.

Coinciding with the kickoff of Asian Aerospace 90, the premier air show for the Asia-Pacific region, Thornton said, ''We are in serious talks with China as is McDonnell Douglas. The Chinese want support from an established aircraft manufacturer.''

Thornton would not say precisely what factors would clinch the deal in favor of Boeing over competitor McDonnell Douglas. China has already built 13 MD-82s in cooperation with McDonnell Douglas in a program to construct a total of 25 aircraft.

China is considered likely to insist on participating in the entire project to design and build either Boeing 737-300s or McDonnell Douglas' MD-90s with the terms including the U.S. party purchasing Chinese components and aircraft.

Citing the Asia-Pacific area as one of the most promising markets, Thornton said, ''While overall growth in air travel should average 5.9 percent per year in the coming decade, travel in the Asia-Pacific market should increase by 8.9 percent annually.''

The trend in air cargo is equally encouraging, increasing at 8.9 percent annually until the year 2000, he said, while growth in the rest of the world averages under 6 percent a year over the same period.

Thornton said Asia-Pacific carriers will increase their proportion of the world market from 17.8 percent in 1987 to 23.4 percent 13 years later, approaching Europes share. At the same time, he said, the United States will lose some of its market share.

With Asian Aerospace considered the world's third most important air show following Farnborough and Paris, Dassault is also offering a wide range of incentives including technology transfer for the license production of the Mirage 2000 to countertrade and developing tourism in customer countries.

Hugues de L'Estoile, senior executive vice president, disclosed that Greece bought the Mirage 2000 and Mirage F1 fighters and in return, Dassault was beefing up the tourism sector. Similarly, he said, Australia purchased five Falcon 900 business jets under a countertrade arrangement.

In spite of American domination of the regional market for fighter aircraft, L's Estoile said his company was anxious to compete.

''Our presence here is our way of responding to the rapidlly rowing economies of the region, not only as a seller but as a partner,'' he said.

HONG KONG (FEB. 14) UPI - Cathay Pacific Airways has placed orders for four Boeing 747-400 jetliners worth about $550 million, the Hong Kong-based airline announced Wednesday.

The airline said it had converted previously announced options for the jetliners into firm orders. The planes are due for delivery in 1992. The latest orders brought to 14 the number of 747-400s ordered by Cathay Pacific. The first three were delivered between June 1989 and February 1990.

#90045u1351 02/14/1990 ~United Press International
WASHINGTON (FEB. 14) UPI - The Bush administration announced a $1 million volunteer Wednesday in its program to plant 1 billion trees a year - an

oil company plan to plant saplings in Houston, Denver and New Orleans.

President Bush announced the tree-planting campaign as part of his fiscal 1991 budget. Part of an ''America the Beautiful'' program, the tree effort is intended to encourage reforestration and show U.S. leadership in combatting pollution.

Goals of the program include the planting of 30 million trees annually in cities.

At a news conference, officials from Texaco Inc., the American Forestry Association and the Agriculture Department announced Texaco would provide $1 million to plant saplings this spring in Houston, Denver and New Orleans, three cities where Texaco has large numbers of employees.

Texaco President James Kinnear said the project ''actually has been in the works for six months.'' In it, Texaco will work with other groups and volunteers to get the trees planted.

''We had zeroed in on trees ... and then it fit very nicely with what the president said in his State of the Union message. So, it just happened to come together and we're fortunate to have been working on it,'' Kinnear said.

Most of the $1 million will be spent to purchase trees, he said, estimating 50,000 saplings would be planted - ''trees that are big enough to make a difference this decade.''

Fossil fuels, including petroleum, have been implicated as causes of pollutants that might lead to global warming. While Kinnear declined to comment on the global warming, he pointed out that trees, which produce oxygen, ''have to help solve whatever problem there may be.''

#90045u1570 02/14/1990 ~United Press International

DETROIT (FEB. 14) UPI - Chrysler Corp. said Wednesday it will postpone by

two weeks indefinite layoffs of more than 2,200 hourly workers at three U.S. assembly plants while it fine-tunes its production to market conditions.

Company spokesman Doug Nicoll said 724 workers at its Jeep plant in Toledo Ohio, as well 750 workers each at its car assembly plants in Newark, Del. and Belvidere, Ill., will be idled indefinitely the week of April 9 instead of March 26.

All three plants will be closed the week of April 2 for inventory adjustment, instead of the week of March 19 as originally scheduled, Nicoll said. "The (layoffs) have been pushed back by two weeks," Nicoll said, adding that the decision was made because of market conditions. "We are just fine-tuning our assembly plant schedules to the market."

When asked if the layoffs couyld be further delayed or possibly rescinded, Nicoll said, "Anything's possible. Obviously we'd like to push it off even further, depending upon the market."

Chrysler announced last month the layoffs, which will result in a reduction in output of its Jeep models, mid-sized sedans and full-sized cars built at those plants. Most of those vehicles are now covered by lucrative cash rebates or discount financing offers to spur their sales.

Industry analysts and executives are expecting overall U.S. vehicle sales to improve during the second half of 1990 after remaining generally soft since last October, the start of the 1990-model year.

Chrysler Chairman Lee Iacocca said at a press conference Tuesday he believed the domestic car business, which has "been sustained on life support by rebates," will once again be profitable, probably by mid-1990.

Iacocca also said that while Chrysler's guaranteed rebate program set sales records last month, it was not good for the company's profitability. "There's no real money today in the business," he said, adding that the nation's top automakers will have to "get back to the the central core of the car and truck business." "We've had a real rough six-month bottom," he said of the industry in general. "But (the industry) is on the way up."

#90045u1763 02/14/1990 ~United Press International
PORTLAND, CT (FEB. 14) UPI - Georgia-Pacific Corp. moved to block Great Northern Nekoosa Corp. from seeking other buyers Wednesday, asking a federal judge to prevent delays in a meeting that could clinch a $4.5 billion hostile takeover.

Georgia-Pacific claimed in U.S. District Court it would suffer "substantial and irreparable harm" unless a temporary restraining order was issued to force Great Northern to go ahead with a special shareholders' meeting March 2.

Great Northern, which is headquartered in Norwalk, Conn., announced Tuesday it would consider third-party offers higher than Georgia-Pacific's $63 a share cash tender offer and postpone the special meeting until March 20.

In its injunction request, Georgia-Pacific said Great Northern's plan was "an act of unfettered arrogance." The rival papermakers have been battling in federal courts in Maine and Connecticut as Great Northern tries to fend off the unsolicited offer.

The shareholders' meeting had been called to consider various proposals brought by Georgia-Pacific, including removal of the board and replacement

with Georgia-Pacific nominees who would approve a merger.

On Feb. 8, a federal judge struck a major blow against Great Northern's plans for the meeting, ruling two-thirds of the outstanding shares, not three-quarters, would be required to remove Great Northern board members.

Great Northern's decision to delay the session was "a unilateral action by the very board scheduled to be replaced March 2," Georgia-Pacific, an Atlanta company, told the court in Portland.

Georgia-Pacific said Great Northern could not legally delay the meeting past March 2 because it had been scheduled at the request of 50 percent of Great Northern's stockholders.

Georgia-Pacific asked the court to void several changes made Tuesday to Great Northern's bylaws, and to require Great Northern to give Georgia-Pacific equal standing with other bidders in any auction for Great Northern's assets.

The two paper giants have waged a bitter fight since Georgia-Pacific announced its takeover plans last fall. The $4.5 billion proposal is the first hostile takeover effort in the U.S. paper industry.

Great Northern has asked the U.S. District Court in Bridgeport, Conn. to void the takeover on antitrust grounds. A federal judge in Portland also is considering Great Northern's claim that the rival papermaker's effort has violated federal securities law.

#90045u1855 02/14/1990 ~United Press International

DETROIT (FEB. 14) UPI - Sales of domestically made vehicles during early February, partly bolstered by fleet deliveries delayed by widespread plant closings last month, rose 8.2 percent from year-ago levels, automakers said Wednesday.

Sales of domestically built cars alone during the Feb. 1-10 period rose 10.1 percent from a year-ago levels when measured by sales per day. Light-duty truck sales rose 4.8 percent.

The annual sales rate for domestically built cars, the most common measure of industry performance, was 7.4 million cars during the period, compared with 6.9 million last year.

"Sales were stronger than expected, partly because of fleet deliveries by Ford," said industry analyst Michael M. Luckey, of the Luckey Consulting Group in Tappan, N.J.

"But we still expect the underlying rate of demand to be in the 6.5 to 7.0 million range during all of February and into March, assuming buyer incentives remain about the same," he said, estimating those rebates now are between $1,000 and $1,100 a vehicle.

"The pattern of sales will be largely dictated by the timing of buyer incentives in coming months," Luckey said, adding that the expected upturn during the second half of 1990 may not materialize.

"Sales rates will bounce around an essentially flat level," he said, noting that any shortages of more popular models will be the direct result of production cuts, not strong sales.

The eight companies - General Motors Corp., Ford Motor Co., Chrysler Corp. American Honda Motor Co., Nissan Motor Manufacturing U.S.A., Toyota Motor Sales U.S.A., Mazda Motor Manufacturing (USA) Corp. and Mitsubishi Motor Sales of America Inc. - reported combined sales of 173,845 cars and 96,903 trucks in the United States during the latest period.

This compared with 157,849 cars and 92,440 trucks sold in the year-ago period, automakers said. There were nine selling days both in the latest and the year-ago period. So far this year, the companies have sold 720,003 cars, up 4.6 percent from the 668,416 units sold in the comparable 1989 period.

Sales of light trucks rose 7.5 percent to 449,055 units, compared with 395,473 trucks sold in the same period a year ago. During the period, sales of GM's domestically made cars rose 6.7 percent, while its light truck sales rose 10.1 percent from year-ago levels. Ford posted a 14.3 percent gain in car sales and a 10.9 percent rise in truck sales.

Chrysler's car sales declined 8.4 percent, while its light truck sales including minivans, no longer covered by a $1,000 rebate, fell 16.5 percent from a a year ago.

"We had a record January, but with the demise of the minivan rebates it has certainly slowed down a bit and the whole market is soft right now," said Jack Harral, of Rochester Hills Chrysler-Plymouth in Rochester, Mich.

Among the smaller companies reporting sales of U.S.-built cars, Honda posted a 3.9 percent decline from year-ago levels. Toyota's U.S. car sales soared 270 percent from low year-ago levels.

Nissan reported a 9.7 percent rise in sales of its U.S.-built cars, while its domestically made compact truck sales rose 38.8 percent from low year-ago levels.

Mazda sold 952 of its new MX6 coupes produced at its Flat Rock, Mich.,

assembly plant, as against 656 a year ago. Mitsubishi reported sales of 621 Eclipse cars built at its joint venture plant with Chrysler in Illinois, compared with 368 units in the year-ago period.

CHICAGO (FEB. 14) UPI - UAL Chairman Stephen Wolf has joined the panel of UAL directors assigned to review buyout bids, reducing the likelihood he will take part in an expected proposal by United Airlines employees, union and company sources said Wednesday.

All three United unions - the Airline Pilots Association, the Association of Flight Attendants and the International Association of Machinists - have indicated they would rather not have Wolf at the helm of an employee-owned UAL.

UAL's announcement Tuesday that Wolf had joined the committee that will review the employee proposal and any other bids foreclosed, at least for now, any buyout role for Wolf, who spearheaded a failed $6.75 billion employee-led buyout attempt last fall. Union officials and associates of Wolf said it was unlikely he would remain with UAL following an employee buyout unless he had some ownership role.

Analysts, however, suggested that employees might find it difficult to get financing for their bid without Wolf. And Fred Dubinsky, chairman of the United chapter of the pilots' union, said ALPA, the flight attendants union and even the machinists, who most vehemently opposed Wolf, all were willing to give him a stake in the deal if necessary to get it financed.

UAL directors were expected to get a status report on efforts to draft the employee bid during the board's next regularly scheduled meeting Feb. 22. No bid price has been mentioned, and an investment banking source suggested potential lenders were taking a pessimistic view of the airline and the industry in assessing what they would regard as fair market value for the company.

That could make it difficult for employees to come up with bank financing for a deal, even at $180 a share. The Drexel Burnham Lambert bankruptcy could also reduce chances of raising some of the financing in the bond market, said Don Warner, a New York consultant specializing in LBO transactions.

Analysts said other alternatives could include bringing in an equity partner and reducing the employee stake from 75 percent, as the proposal currently envisions, to around 60 percent.

Condor Partners, a New York investment group and UAL's biggest stockholder

demanded UAL directors act to bolster stock value following the collapse of the $6.75 billion, $300 a share deal. Condor threatened to mount a bid to seize control of the UAL board unless directors found a buyer or began pursuing restructuring plans by Jan. 8.

UAL directors had instructed the company's financial advisers to draft a recapitalization plan, but put off consideration of the plan at their January meeting after all three employee unions and a non-union, non-management employee group agreed for the first time to work together on an employee-led buyout.

Condor, which holds 11.8 percent, has supported the employee efforts, saying an employee-led buyout should be the company's first priority.

#90045u2048 02/14/1990 ~United Press International

NEW YORK (FEB. 14) UPI - Capital Cities/ABC Video Enterprises Inc. said Wednesday it has agreed to purchase a minority interest in Hamster Productions, one of the largest independent production companies in France.

Terms of the agreement were not disclosed.

Capital Cities/ABC said the transaction would allow the company to better compete in the expanding international television market.

Hamster is known for prime-time dramas that have been broadcast throughout Europe.

''As we position ourselves to compete internationally in the 1990s and beyond, we are extremely pleased to be teamed with a company with a

reputation for producing high-quality programming,'' said John T. Healy, president of the Capital Cities/ABC video unit.

The division has already purchased minority interests in a satellite-delivered sports channel based in Great Britain and has equity positions in West German and Spanish production companies.

-30- 1142

#90045u2218 02/14/1990 ~United Press International

DETROIT (FEB. 14) UPI - General Motors Corp. said Wednesday its defense/aerospace and electronics units posted record profits in the fourth quarter of 1989, while earnings at its finance subsidiary declined due to higher borrowing costs.

GM was expected Thursday to report fourth-quarter earnings of about $540 million, for all of its operations, including its vehicle business, but excluding profits from the sale of some stock in Isuzu Motors Ltd.

GM Hughes Electronics posted record fourth-quarter earnings of $183 million, or 46 cents, up from $165.9 million, or 43 cents, in the year-ago quarter, despite a slowdown in the defense and auto industries.

Total sales, however, slipped to $2.9 billion from $3.1 billion.

Electronic Data Systems Corp., GM's electronics subsidiary, also posted record fourth-quarter earnings, up to $119.5 million, or 50 cents a share, from $103.4 million, or 42 cents a share, in the fourth quarter of 1988.

Total sales rose to $1.43 billion from $1.3 billion in the same period of last year.

But General Motors Acceptance Corp., GM's financing, insurance and mortgage unit, saw its fourth-quarter income slip to $251.2 million, from $257.4 million earned in the year-ago period because of higher costs of borrowing money.

GM Hughes full-year earnings, excluding purchase accounting adjustments, slipped to $781.2 million, or $1.94 a share for 1989, from $802.1 million or $2.01 a share in 1988.

The company took a one-time charge of $30.8 million during the year to trim total employment at Hughes Aircraft Co. by 12 percent, from 75,000 workers to 66,000.

GM Hughes, formed after GM bought Hughes for $5.2 billion in 1985, saw its total revenues during the year rise to $11.4 billion, from $11.2 billion in 1988.

The company is now bracing for cuts in government defense spending by realigning its sales more toward commercial interests, like satellite communications and aviation training simulators.

''Within five years' time we expect 60 percent of our total revenue to come from the commercial market, up from 20 percent now,'' company spokesman Bruce McCristal said.

GM Hughes' defense business, which now accounts for 80 percent of total sales, will be recuced to 60 percent, he said.

EDS crossed another milestone last year as its revenues passed the $5 billion mark to $5.47 billion for the first time in its 28-year history.

For all of 1989, profits of $435.3 million equaled $1.81 a share, up sharply from $384.1 million, or $1.57 a share, in 1988. Last year's revenues totaled $4.84 billion.

Since its acquisition by GM in 1984, EDS has sought to raise revenues from non-GM sources and bring them in level with its GM revenues. It is part of its strategy to gain independently a bigger share of the global information technology market.

GMAC's earnings for 1989 totaled $1.1 billion, down from nearly $1.19 billion in 1988, with the narrower interest rates partially offset by a 17 percent volume gain in the number of new cars and trucks financed during the latest year, and a $50.7 million gain from the sale of its interest in Isuzu Motors Finance Co.

PITTSBURGH (FEB. 15) PR NEWSWIRE - The board of directors of PNC Financial Corp (NYSE: PNC) has declared a quarterly cash dividend of 53 cents per share on the common stock.

The dividend is payable April 1, 1990, to shareholders of record at the close of business on March 2, 1990.

The board also declared a quarterly cash dividend of 40 cents per share on preferred stock, Series C; 45 cents per share on preferred stock, Series D; and 65 cents per share on preferred stock, Series E, all payable April 1, 1990, to shareholders of record at the close of business on March 2, 1990.

A quarterly cash dividend of 45 cents per share on PNC's Series A and B preferred stocks, payable June 10, 1990, to shareholders of record at the close of business on May 18, 1990, was also declared by the board.

The board set the date for PNC's annual shareholders meeting as April 24, 1990.

PNC Financial Corp, headquartered in Pittsburgh, is the nation's 14th largest bank holding company with assets of $45.7 billion. PNC was formed in 1983 with the consolidation of Pittsburgh National Corp., Pittsburgh, and Provident National Corp., Philadelphia. Its principal banking affiliates include: Bank of Delaware Corp., Wilmington, Del.; The Central Bancorporation Inc., Cincinnati (includes banks in Ohio and Kentucky); Citizens Fidelity Corp., Louisville, Ky. (includes banks in Kentucky and Indiana); The First Bank and Trust Co., Mechanicsburg, Pa.; The Hershey Bank, Hershey, Pa.; Marine Bank, Erie, Pa.; Northeastern Bank of Pennsylvania, Scranton, Pa.; Pittsburgh National Bank, Pittsburgh; Provident National Bank, Philadelphia; and PNC National Bank of New Jersey Cherry Hill, N.J. PNC currently operates 529 community banking offices in Pennsylvania, Kentucky, Indiana, Ohio, Delaware and New Jersey. It also conducts business through offices in 19 states and seven foreign countries.

#90046p0450 02/15/1990 ~PR Newswire

ST. LOUIS (FEB. 15) PR NEWSWIRE - A. P. Green Industries Inc., (NASDAQ: APGI) headquartered in Mexico, Mo. announced here today that for the year ended Dec. 31, 1989, it had net earnings of $7,930,000 or $2.94 per share on net sales of $190,178,000.

Net sales were down less than 1 percent from the $191,425,000 posted in 1988. Net earnings decreased 8 percent from 1988 earnings of $8,614,000 and net earnings per share declined 11 percent from $3.29 per share in 1988.

For the fourth quarter ended Dec. 31, 1989, the company announced earnings of $1,349,000 or 48 cents per share on net sales of $49,700,000. These results represent an earnings decline of 41 percent from fourth quarter 1988 earnings of $2,300,000 and a net earnings per share decline of 45 percent from 87 cents per share. Sales increased approximately 1 percent from $49,228,000.

The company also announced that its Board of Directors increased its regular quarterly dividend from 10 cents to 15 cents. The dividend will be paid on March 16, 1990 to stockholders of record on March 2, 1990. Stover said, "we are pleased with the action of our Board in increasing our dividend. It reflects the Board's confidence in the ability of the company to achieve its goals of increasing market share and profitability and is an indication of the progress we have made since becoming an

independent publicly-held company."

"The net sales decline is primarily attributable to the closing of the company's remaining refractory construction offices in the fall of 1989, offset by higher refractory and lime sales. The closing of the refractory construction offices is expected to provide the Company with the ability to market its products to refractory construction contractors throughout the United States, many of whom were formerly competitors.

A. P. Green Industries Inc., headquartered in Mexico, Mo. where the company was founded in 1910, is a leading manufacturer and distributor of refractory products in the United States and selected international markets. The company also produces industrial lime products, used in the production of steel, aluminum and paper, and for road stabilization and water purification. The company operates 15 plants in the United States, Canada and the United Kindgom.

#90046u2079 02/15/1990 ~United Press International

LOS ANGELES (FEB. 16) UPI - Shareholders of Pacific Enterprises, parent of Southern California Gas Co. and Thrifty Corp., banned cumulative voting for its board members Thursday, cutting down the possibility of a long-shot candidate being elected to the board.

About 89 percent of those voting - or 49.2 million shares of the 55.5 million voted - were in favor of the ban, which the company sought to prevent a repetition of a proxy fight last year that almost got a union official elected to the board.

''This is an extraordinary vote of confidence in the company,'' said James Ukropina, chairman and chief executive officer, after announcing the results at a special shareholders meeting in downtown Los Angeles.

About 78 percent of the 70.4 million shares eligible to vote participated in the election.

Under cumulative voting, Pacific Enterprises shareholders were able to

cast all their votes for a single candidate for one of the 15 board of director positions. At the annual meeting in May, enough shareholders used cumulative voting to nearly elect union official Sam Karl Weinstein to the board.

Weinstein, the Western regional director of the Utility Workers of America ran last year on a platform of opposing the company's diversification in recent years, citing a decline in the company's stock price from above $60 a share prior to the 1987 crash to the current level in the mid-40s.

The stock closed Thursday unchanged at $47.75 on the New York Stock Exchange.

Weinstein also said last year he would seek a board seat this year. But after the meeting Thursday, Weinstein said that he was uncertain whether he would run for the board.

Pacific Enterprises spent about $200,000 last year to oppose Weinstein's candidacy and argued that the cumulative voting would allow a small minority to elect a representative to the board, who would serve the interests of that group.

The company spent another $180,000 on the effort to institute the ban, which became possible last month due to a change in California law.

''We want everyone to be on the same level playing field,'' Ukropina said at the meeting. ''We're afraid that if a representative of a particular group is elected, they may not be able to represent all the shareholders, as the law requires.''

Ukropina said the company wants to avoid proxy fights over board membership and also argued that the ban makes the company less vulnerable to takeover.

But Weinstein said the action makes a takeover more likely because it dilutes the power of the Pacific Enterprises employees, who own about 24 percent of the company's stock.

The Utility Workers Union, which represents about 6,000 employees of Southern California Gas, has a stake of 7 percent to 10 percent.

Ukropina's remarks brought strong reactions from several Weinstein supporters at the meeting. Gerardo Acosta, president of Local 132 of the union, said the move shows management is afraid of Weinstein.

''The action clearly established that present management is falling all over itself to prevent Sam Karl Weinstein from being on the board,'' Acosta said.

But Ukropina denied the accusation, saying, ''This is not about a specific party but a principle.''

Richard D. Foley, chairman of American Employees Stock Ownership Association Inc., told Ukropina that the process leading up to the vote on the ban had been unfair because Weinstein was denied access to the magnetic tapes of the shareholder lists.

''You don't have a level playing field,'' Foley said.

Ukropina said the company did not provide magnetic tapes to Weinstein because it has to respect the privacy of its 80,000 shareholders.

Weinstein said he had filed a lawsuit against the company Wednesday in Los Angeles Superior Court seeking access to the magnetic tapes.

''The company has made it as expensive and cumbersome as possible for us to contact the shareholders,'' he said.

Ukropina said the move puts the company in line with practices at other companies and said 10 other corporations dropped cumulative voting last year.

#90046u2159 02/15/1990 ~United Press International

ST. LOUIS (FEB. 16) UPI - Trans World Airlines Chairman Carl Icahn said in an interview published Thursday he would buy airplanes for TWA if union pilots agreed to $80 million in concessions, but warned he would continue liquidating the airline if they do not.

In a copyright interview in the St. Louis Sun, Icahn also said he would give up $330 million in preferred stock if pilots agreed to the concessions ''under the right circumstances.'' His preferred stock holdings have been a point of contention for the Air Line Pilots Association.

''I think we'll be able to make this airline really grow, but only if we get these concessions,'' Icahn said. ''The airline itself with the debt related to the airline will lose over $200 million. We obviously cannot afford to continue to go on at that type of level.''

Icahn has asked the pilots, whose contract is effective until 1992, to make concessions so the airline can compete effectively.

TWA pilots have taken several pay cuts since Icahn took over the airline five years ago. They say their salaries are the industry's lowest.

St. Louis has a stake in the health of TWA, which has a hub at Lambert-St. Louis International Airport. TWA employs 8,250 area residents and has a local payroll of $307 million a year.

Icahn said in the interview he was seeking wage, benefit, and work rules concessions from the pilots.

The concessions are necessary if Icahn is to reach similar deals with other employee groups. Icahn said he probably could get total concessions of $120 million to $150 million.

Concessions of $150 million would allow Icahn to run the company at a loss of $40 million to $50 million a year.

''Yes, but I think that I will be able to make that up with the capital. You know, we will soon have $1.6 billion in cash, and while I will be paying some interest against that, I think I can make that $50 million up by utilizing the capital judiciously.''

Icahn said he expects to have cash reserves of $1.6 billion ''at the end of the next three months.''

TWA employees have complained that Icahn has not invested enough in airplanes and other equipment to give the airline a competitive edge.

''I do not want to have my hands tied,'' Icahn said. ''But if we get the concessions within a period of time, we would then enter into an agreement to buy certain narrow bodies (aircraft) - or the concessions could snap back. I mean they (pilots) would not give the concessions. So then we'd say, 'All right, if we do not do it within a period of time, then we would give back the concessions.' We would certainly agree not to shrink the airline any more.''

Asked about plans to liquidate some or all of TWA if operating losses are not reduced, Icahn said, ''If we can't get the concessions, we'll have to continue with the (liquidation) program.''

He said the airline would announce shortly the sale of some 747s and the sale-leaseback of another seven or eight planes.

Despite the recent liquidations, Ichan said he would like to see TWA grow.

''The alternative has to be shrinkage, and I would say that in the next three or four months there will be more shrinkage and possibly the taking down of unprofitable routes.''

#90046u2730 02/15/1990 ~United Press International

LOS ANGELES (FEB. 16) UPI - In an unusual move, a federal judge prohibited Northrop Corp. Thursday from running certain image-enhancing television commercials during a trial in which the defense industry giant is charged with fraud.

In issuing her ruling, U.S. District Judge Pamela Rymer said restricting the commercials featuring retired ace pilot Charles Yeager does not affect Northrop's constitutional right to free speech.

Rymer prohibited broadcasts of the commercials, called the ''Hard Work'' spots, only in the Los Angeles area, where Northrop and several of the company's employees are scheduled to stand trial Tuesday on defense fraud allegations in connection with the Navy's Harrier jet.

''I am absolutely persuaded the 'Hard Work' series is calculated to have a very serious effect on the administration of justice,'' Rymer said.

Rymer said the ads - which have been aired during popular television shows sports and news broadcasts - could influence potential jurors, thwarting the selection of an unbiased panel.

In the ruling, the judge said the ads have ''calculated but subliminal influence on prospective or impaneled jurors' perception of the character, reputation and state of mind of Northrop and its employees.''

Rymer said Northrop may continue running the ads outside Los Angeles and may resume them in the area once the trial is over.

Northrop attorneys argued against the ban, pushed by government prosecutors, who had also sought to impose a gag order in the case but were denied.

There was no immediate word on whether Northrop would attempt to appeal Rymer's decision.

Legal experts said the judge's ruling was unusual. ''It's really, as far as I know, an unprecedented ruling,'' said Gerald Uelmen, dean of the law school of Santa Clara University in Northern California.

''That is not to say that (the ruling) may not be well-considered and necessary,'' Uelmen added.

Irwin Chemerinsky, a law professor at the University of Southern California, disagreed with the Rymer's ruling. ''My immediate reaction is that she's wrong on the law,'' he said.

Chemerinsky said the U.S. Supreme Court has consistently ruled that it is ''substantially hard to justify'' restrictions on free speech as a potential influence on jurors, and that ''commercial speech'' is protected under the First Amendment.

Rymer acknowledged that ''no commercial speech case thus far has addressed fair trial issues,'' but said she ''has approved what are in effect ... restraints (on what she) perceives as less valuable commercial speech, applying a lower level of constitutioal scrutiny.''

The judge found that the commercials ''go directly to the reputation and credibility of a party to the case - Northrop, and to the state of mind of its employees, who are also defendants.''

In a 167-count indictment alleging fraud and conspiracy, Northrop is accused of submitting untested components for the Harrier and allegedly falsifying tests on the equipment.

A questionaire was distributed Thursday to potential jurors.

Rymer noted that the commercials air only in the Los Angeles region and began about Jan. 20, a week before jury selection was originally scheduled to begin in the case.

At a point in one of the commercials, a Northrop employee says ''we produce the best.'' The employee goes on to say, ''it's very important to do it right and not miss something.''

The commercial ends with Yeager saying: ''Now that's the way Northrop people think ... that's why Northrop products work.''

#90047b0012 02/16/1990 ~Business Wire

PICKERINGTON, OH (FEB. 16) BUSINESS WIRE - R.G. Barry Corp. (AMEX:RGB) Friday reported 1989 earnings of $3,744,000, or $1.01 per share, compared to $23,000, or 1 cent per share, in 1988.

Sales for the year totaled $122,825,000 vs. $106,203,000 in 1988.

''Fall 1989 was good for the slipper classification generally and for R.G. Barry specifically,'' said Gordon Zacks, chairman and chief executive officer.

''The company's business is highly seasonal and heavily influenced by Christmas gift buying. We are the major supplier of boxed giftable slippers and traditionally experience our greatest sales and profitability in the second six months.

''As we announced earlier this week, the company anticipates that sales and operating results for the first quarter and the first half of 1990 will be significantly below those in the comparable periods of 1989.

''The major factor influencing first half results is a softening in stretch slipper sales which began in fall 1989. The market for this product peaked and there is a glut of stretch slippers in stores. Although we are the leader in the boxed giftable slipper category, R.G. Barry is a secondary supplier of stretch slipper product.

''Because of the heavy stretch slipper inventory, retailers are not buying as much stretch product for spring 1990 as they did in spring 1989. This inventory carryover also severely limits some retailers' ability to buy other slipper products until the stretch slipper inventory is sold.

''Other factors influencing our first half include: a decline in spring sales to stores affiliated with the Campeau organization; and, a loss of high volume, low margin slipper sales in mass merchandise channels as Barry has chosen to place greater emphasis on higher margin, lower volume giftable footwear products.

''With the decline of the stretch slipper, we expect the already successful boxed giftable slipper classification to increase significantly for fall 1990. We foresee a very strong second half 1990 as stores convert space and inventory from stretch slippers to boxed giftables,'' Zacks said.

R.G. Barry Corp. is the world's largest manufacturer and marketer of soft washable slippers and footwear for at and around the home. Its brand lines include Dearfoams, Madye's, Snug Treds and slipper products under the licensed Capezio and Cannon names.

SPANISH FORK, UT (FEB. 16) BUSINESS WIRE - Nature's Sunshine Products Inc. (NASDAQ:NATR), a diversified health and nutritional products company, Friday announced record revenues and net income for the year ended Dec. 31 1989.

Total revenues for the year reached $52.1 million compared to $44.5 million in 1988, an increase of 17 percent. Net income was $4 million, or 78 cents per share, compared to net income of $3.3 million, or 64 cents per share last year. This represents an increase in net income of 19 percent and net income per share of 22 percent.

Revenues for the fourth quarter increased 20 percent to reach a record $14.2 million compared to $11.8 million for the same quarter in 1988. Total assets rose from $18 million in 1988 to $20 million in 1989. The company currently has virtually no long-term debt and has no immediate plans or needs for long-term financing.

Net income in the fourth quarter was slightly below expectations due to various short-term expenses. Due to an overwhelming response from sales leaders, Nature's Sunshine increased its investment in the incentive program for the company's 1990 national convention in August.

In addition, the company incurred one-time promotional sales expenses in its overseas operations, as well as an additional investment in its start-up operation in England.

Other expenses were for professional fees related to improving manufacturing and distribution, and the recent acquisition of Earth Science Products Inc. ''We anticipate these investments will greatly enhance the future growth of the company, both in the short run as well as long term,'' added Kennedy.

Nature's Sunshine Products Inc. is the nation's largest manufacturer of encapsulated, herbal products which it markets worldwide. In addition, the company produces a high-quality, natural vitamin line and is involved in the rapidly growing water purification market with its proprietary water treatment products and components.

PHOENIX (FEB. 16) BUSINESS WIRE - MeraBank said Friday it has sold its Sacramento-based subsidiary F.I.A. Associates Inc. for an undisclosed price to a new company which is a joint venture of Alex.Brown Inc. and Kleinwort Benson Group PLC.

F.I.A. is a real estate investment advisor and real property asset manager for tax-exempt pension funds.

Thomas Ruth, MeraBank's managing agent from the Resolution Trust Corp. (RTC), said the sale is part of the RTC's plan to divest certain subsidiaries from thrifts.

''Negotiations for the sale of F.I.A. have been in process for approximately six months,'' he said.

Alex.Brown is a registered broker/dealer which provides investment services to individual and institutional investors and investment banking services to corporate and municipal clients from 20 offices in 13 states, including California.

Headquartered in London, England, Kleinwort Benson is a merchant and investment bank which operates worldwide.

Phoenix-based MeraBank is Arizona's oldest and largest savings institution

with nearly $8 billion in assets and 76 branch offices in 33 cities throughout Arizona and Texas.

MOUNTAIN VIEW, CA. (FEB. 16) BUSINESS WIRE - Daisy Systems Corp. (OTC:DAZX) Friday announced results for the first fiscal quarter ended Dec. 31, 1989.

The company reported net revenue of $31,991,000 on a consolidated basis as compared to $32 million a year ago not including the results from operations of Cadnetix Corp. which was acquired by Daisy in May 1989. For the three months ended Dec. 31, 1989, the company reported a consolidated net loss of $18,292,000, or 97 cents per share.

For the like period a year ago, the company reported a net loss of $66,034,000, or $3.79 per share, which included a special charge of $66,827,000 primarily related to the Cadnetix acquisition.

A company spokesman said that as previously disclosed liquidity remained a serious problem and current collections have not been sufficient to cover normal operating disbursements before consideration of interest payments. Events of default have occurred and are continuing under the terms of both series of convertible debentures and the company's bridge loan.

These lenders which hold debt having a face value of approximately $118 million have not exercised remedies available to them. If such remedies were exercised, the company would not be able to continue to operate.

The quarter's revenue and operating performance were adversely affected by customer uncertainty concerning the company's financial position and the believed deferral of customer purchases in anticipation of the release of a new CAE product on the Sun Sparcstations platform expected next month.

The deficit in Shareholder's Equity arising in the current quarter results from operating losses combined with interest expense and scheduled amortization of merger related intangibles and goodwill. Cash balances at quarter end were bolstered by an $8 million product advance payment from the company's product purchaser. Strengthening cash flow remains a top priority.

Daisy/Cadnetix Inc., the operating company subsidiary of Daisy Systems Corp., designs, manufactures, markets and supports computer-aided engineering, design and manufacturing (CAE/CAD/CAM) systems used to

automate the electronic design engineering process.

The company's products are used to design, simulate, and layout application-specific integrated circuits, very large scale integrated circuits, and printed circuit boards. The company has a worldwide customer base covering a wide range of industries including military/aerospace, computers, semiconductors, telecommunications, and consumer electronics.

#90047b0074 02/16/1990 ~Business Wire

LONGVIEW, WA. (FEB. 16) BUSINESS WIRE - Longview Fibre Co. (NYSE:LFB) Friday reported results for the three months ended Jan. 31, 1990.

Consolidated Statement of Income

Net income in the first quarter 1990 decreased 33 percent compared with the first quarter 1989 and decreased 5 percent compared with the fourth quarter 1989. Higher costs and lower operating profits have again been incurred in the manufacturing segments of the business.

Logs

Log sales and profits continue at very good levels. Prices are up, sales value is up 14 percent and operating profit is up 16 percent with a 2 percent reduction in footage sold. Similar or improved activity is presently being experienced.

Paper and Paperboard

Operating profit is 40 percent below year-ago levels, but approximates the level of the fourth fiscal quarter of 1989. Sharply higher wood costs and mechanical problems in the primary mill are the principal causes of the lower profits. Lower prices for wood chips and improved operating rates after the first quarter should have a favorable impact on profits.

In both domestic and export markets, paper pricing and volume continues at a favorable level while containerboard pricing and volume has deteriorated.

Converted Products

Sales are down 2 percent with 8 percent fewer tons sold and a 5 percent average price increase. Higher costs of containerboard used to manufacture boxes are the principal cause of a 60 percent decrease in

operating profit.

Other

Greater interest expensed is due to the higher level of total borrowing and proportionately less interest attributed to uncompleted capital projects.

Income Taxes

Taxes on income are approximately 35 percent of pretax income in both years.

Liquidity and Capital Resources

Capital expenditures are above available funds from cash flow, and therefore increase the company's total borrowing. This is expected to continue for several years. Adequate financing is available at competitive rates.

The previously announced timber purchase from Burlington Resources of approximately 26,000 acres for $37 million is in the process of closing.

Longview Fibre repurchases shares from time to time in open market and negotiated transactions. Although no limits have been established, Longview Fibre expects to purchase approximately 150,000 (750,000 post 5-for-1 split) shares in market transactions during 1990. Purchases of 31,000 shares were made during the first quarter under this program.

A tentative record date of March 2 has been set for the previously announced 5-for-1 stock split; delay remains a possibility.

MENLO PARK, CA. (FEB. 16) BUSINESS WIRE - Cisco Systems Inc. (NASDAQ:CSCO) announced the initial public offering Friday of 2,800,000 shares of common stock at a price of $18 per share.

Of the total, 2,430,000 shares were offered by the company, and 370,000 shares were offered by selling shareholders. Morgan Stanley & Co. Inc. and Smith Barney, Harris Upham & Co. Inc. co-managed the underwriting group.

The net proceeds from the offering will be used for working capital

purposes, primarily to finance accounts receivable and inventory and to acquire capital equipment.

Cisco Systems Inc. develops, manufactures, markets and supports high-performance, multi-protocol internetworking systems that enable its customers to build large-scale integrated networks of computer networks.

The company's products connect and manage communications among local- and wide-area networks that employ a variety of network protocols, media interfaces, network topologies and cabling systems.

Cisco's principal products, a family of multi-protocol routers, support more protocols than any competing vendor, simultaneously offer routing and bridging functions at rapid speeds, and offer a high level of network intelligence through cisco's proprietary dynamic routing software technology.

NEWPORT BEACH, CA (FEB. 16) BUSINESS WIRE - The board of directors of Mortgage Investments Plus Inc. (ASE:MIP) Thursday declared a regular quarterly cash dividend of 20 cents per share payable on April 2 to shareholders of record on March 2.

The company's directors also decided to recommend that stockholders change the name of the company at the annual meeting to ''MIP Properties Inc.''

According to Carl C. Gregory III, chairman and chief executive officer: ''The name MIP Properties is a flexible corporate name which will allow broader, more accurate identification of the company as an investor in existing income producing properties with growth potential. These investments are made with the expectation that both the cash flow and value of the properties will grow steadily over time.''

Gregory also announced a change in the advisory agreement with Koll Realty Advisors resulting in a reduction in the advisory fee effective Jan. 1, 1990. ''When we changed advisors in August of last year, we anticipated several potential benefits,'' Gregory said.

''This fee reduction is one of the tangible results of that change and results from, among other things, the efficiencies of incorporatng the sophisticated management systems of The Koll Co. into MIP's business.''

CONCORD, CA (FEB. 16) BUSINESS WIRE - SBE Inc. (NASDAQ:SBEI), a designer and manufacturer of computer and communications products, Friday announced financial results for its first quarter ended Jan. 31.

Sales for the quarter were $4,199,000, a slight decrease from first quarter sales last year of $4,241,000. Operating income was $140,000, compared to $111,000 last year, an increase of 26 percent. This increase reflects higher gross profits due to a favorable mix of products sold and generally decreasing manufacturing costs. Our improved gross profits were offset somewhat by increased marketing costs as we expand SBE's presence in the marketplace.

In the first quarter 1990 the company recognized $466,000 relating to a life insurance policy on its Chairman and Chief Executive Officer Thomas C. Andersen, who passed away in January.

As a result, net income was $586,000, or 3 cents per share, compared to $76,000 or $0.0004 per share for the prior year. Following Andersen's death, William R. Gage, a founder of Adaptive Science Corp., which merged with SBE in 1982 and president from 1986 to 1989, was elected chairman and chief executive officer.

SBE Inc. designs and manufactures high-performance computer products for original equipment manufacturers and systems integrators. The company produces and supports standard and custom versions of Multibus I, VMEbus, and stand-alone processing and communications equipment. Products include computer boards, communications controllers, microcomputer systems and support software.

AGOURA HILLS, CA (FEB. 16) BUSINESS WIRE - Fortune Petroleum Corp. (NASDAQ:FPEX) announced Friday that it has commenced a previously announced rights offering to stockholders of 825,000 units (2,475,000 shares) and the purchase of assets for 500,000 shares.

Each unit is priced at $1.95 consisting of three shares of common stock and a redeemable common stock purchase warrant initially exercisable at 90 cents. The maximum offering of units would raise $1,608,750 for the company.

Each shareholder of record on Jan. 15, 1990, will have the right to subscribe to the offering. Any unsold units would be offered to the public.

The 500,000 share asset purchase is related to the concurrent acquisition of all the producing oil and gas properties of Western Energy Resources and the assumption of a related production loan. Western Energy is a California-based independent oil and gas company.

The proceeds would be used to reduce or eliminate corporate indebtedness with the balance used for enhancing production of existing wells, property acquisitions and increase working capital.

Dan E. Pasquini, president of Fortune Petroleum, noted that ''the successful completion of this offering will posture Fortune as a growth-oriented, debt-free, independent oil and gas company. With oil and gas imports surging to a record 54 percent in January, we believe that expanding the company's domestic reserve base will provide maximum value to our stockholders.

Fortune Petroleum is an independent oil and gas exploration and development company with its principal producing properties located in California.

DALLAS (FEB. 16) BUSINESS WIRE - Cronus Industries Inc. (NASDAQ:CRNS) announced preliminary 1989 results of $72.8 million in revenues and $2.9 million in net income, or 60 cents per share, for its fiscal year ending Dec. 31.

These results compare to revenues of $99.3 million and a loss of $22.7 million, or $4.31 per share during the 1988 fiscal year. These financial results will not become final until the company's external audit is completed in March.

P.E. Esping, president and chief executive officer of the company, stated that despite signs of improved earnings, much remains to be accomplished if the company is to achieve stable growth. Esping said he believed the company's improved concern for customer service and cost-effectiveness will help to increase the stability of future earnings.

The Dallas-based company provides information systems and services to governmental entities and title companies.

EAST HANOVER, NJ (FEB. 16) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT) Friday announced its special committee of independent directors has reported to the company's board of directors its recommendations on a broad range of financial alternatives for the company following a bid made last November for the purchase of the company's shares.

According to the announcement made by chairman Michael J. O'Donnell, after giving full consideration to the various alternatives, the board has determined not to sell the company. The board also has instructed management to continue to reshape Ultimate to take advantage of the computer marketplace of the 1990s.

O'Donnell said, following the acceptance of the recommendations of the special committee at a regularly scheduled meeting of Ultimate's board Friday, the special committee was retired.

In commenting, O'Donnell said: ''We have discontinued any consideration of the sale of the company as of today. It is obvious that the sale of the company under current market conditions is not in the best interests of the shareholders. We will instead continue to maximize shareholder value through the growth of revenues, additional lines of business and bottom-line profits.

''We believe that Ultimate has a strong financial and market position, and that the opportunities available to us over the next three years will stand our shareholders in good stead. I'd like to add that management is very pleased with the outcome of these lengthy deliberations, and is anxious to get on with our business; after all is said and done, we have weathered this storm and remain the unquestioned leader in our chosen markets.''

Norman Elowitz, a private investor, had offered in November, 1989 to acquire the company for $10 per share, subject to the arrangement of financing and other conditions. Following recepit of the conditional Elowitz offer, a special committee of independent directors was formed to evaluate that offer and other alternatives available to the company.

In December and January, the committee, with its financial advisor Alex. Brown & Sons, solicited additional expressions of interest for the acquisition of the company. The committee reported that, although discussions were held with a number of prospective acquirors, none of such discussions resulted in definitive transaction.

Elowitz declined to conduct due diligence on the company and failed to demonstrate to the satisfaction of the committee the ability to finance his offer. In addition, the company reported, Elowitz requested that the company pay his expenses incurred in connection with development of his offer. In view of the substantial uncertainty as to Elowitz's ability to consummate an acquisition of the company, the committee did not reach a determination as to the financial adequacy of the offer and recommended that the company not agree to reimburse Elowitz's expenses.

O'Donnell added, ''Management's plan is based on the belief that Ultimate must concentrate its efforts on reshaping the company to take better advantage of the growing market for fully integrated total business solutions. That plan provides for an increased emphasis on industry specific software applications and the broad range of service options that will make us a full-service supplier.

''These include the enhancement of our already substantial field service and support capabilities, as well as the significant expansion of our education, training, consulting and systems integration functions; these will continue to be supported by a broad choice of hardware platforms from premier suppliers.

''We have recently enhanced our education and training function by the addition of Marlboro, MA-based Hands-On Learning Corp. and Alexandria, VA-based Advanced Marketing Management. We intend to continue our search for suitable acquisitions in these and other areas specific to our business plan goals. One important outcome of the last two months has been that management has a high level of confidence that financing for

such acquisitions will be available to us.''

The Ultimate Corp. provides business solutions to companies of all sizes, by integrating system-level software and applications software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia. Ultimate also provides education, training, consulting and field maintenance to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France and Australia.

#90047b0154 02/16/1990 ~Business Wire

SALT LAKE CITY (FEB. 17) BUSINESS WIRE - Plexus Resources reports that on Jan. 29, the board of supervisors of Yuba County, Calif., approved a planning commission resolution denying Western World Mining a conditional use permit to mine its copper deposit in Yuba County.

Western World is a joint venture, 50 percent owned and operated by Plexus.

On Feb. 8, after reviewing the resolution and the draft minutes of the hearing, Western World filed a writ of mandate with the Superior Court of California seeking the court's determination that Yuba County must grant a mining permit.

Additionally, by suit for declaratory relief, Western World seeks to have the county recognize the rights of the company to mine the ore body on its land, and to have the county pay damages for the delays caused by the county's actions. The company further asks the court to reaffirm the validity of the environmental impact report, which was certified as legally adequate by the Yuba County Planning Commission.

The company believes that the decision of the county to deny the permit was incorrect and constitutes abuse of discretion in that it was not based upon the substantial evidence presented in the appeal hearing, nor was it responsive to the Yuba County statutes that allow surface mining.

On Feb. 12, futher petitions were filed with the State Mining and Geology Board. These appeal the county's failure to approve Western World's reclamation plan, which meets all of the criteria required by the State Mining and Reclamation Act (SMARA).

The company is also asking the board to review Yuba County statutes and determine if they adequately protect and provide for the conservation and mining of natural resources as required by SMARA.

Plexus Resources Corp. has extensive natural resource interests in the United States which include gold-silver property in Nevada being brought into production, other base metal and precious metal mining properties in advanced stages of evaluation and oil and gas production. The company's shares are traded through the Toronto Stock Exchange (PXS) and NASDAQ (PLUSF).

#90047b0158 02/16/1990 ~Business Wire

MOUNTAIN VIEW, CA (FEB. 16) BUSINESS WIRE - Software Publishing Corp. (NASDAQ:SPCO) Friday announced PFS:First Publisher 3.0, an enhanced version of its entry-level desktop publishing software package that offers business users higher quality output and provides an innovative and easier way to lay out professional-looking publications.

PFS:First Publisher 3.0 offers improved high-resolution output of up to 300-dots-per-inch with Bitstream scalable typefaces and high-resolution graphics. The enhanced version, which now displays in color, also makes document design quicker and easier with the Layout Gallery, a broad selection of pre-designed thumbnail sketches of customizable layouts.

''PFS:First Publisher 3.0 successfully provides business users with increased functionality while reducing their learning curve,'' said Steve Cullen, director of the PFS business unit. ''Business professionals require different desktop publishing features than graphic artists because they don't have the artistic background or expertise.

''PFS:First Publisher 3.0 is specifically designed to address business users' needs for professional-looking output that they can create themselves.'' Higher Quality Output

Presenting polished, high-quality, documents is essential for business professionals. PFS:First Publisher 3.0 offers the highest quality output available on today's business printers of up to 300-dots-per-inch.

PFS:First Publisher 3.0 uses Bitstream Speedo font scaling technology, which allows users to build scalable fonts up to five times faster than with competing technologies. PFS:First Publisher 3.0 ships with two fully scalable Bitstream typefaces in Swiss and Dutch in four styles -- Roman, Italic, Bold and Bold Italic -- which can be scaled in sizes from 9 to 70

points.

The new version also includes five Bitstream headline and text typefaces -- Cloister Black, Broadway, Amerigo (Roman,Bold), Goudy (Roman, Italic) and Zurich (Roman, Black) in 22 fixed-point sizes. In addition, PFS:First Publisher 3.0 also offers 35 standard resolution fonts to meet a broad range of design requirements.

Installing fonts is even easier with the incorporation of the font set-up utility into PFS:First Publisher 3.0, allowing users to add fonts without exiting to DOS.

In addition to the over 150 professionally drawn art images that ship with the program, PFS:First Publisher 3.0 includes 21 high-resolution art images from Metro ImageBase, which can be resized, cropped, inverted, flipped and rotated.

PFS:First Publisher 3.0 reads scanned images and graphics from other programs at up to 300-dots-per-inch resolution. In addition to supporting graphics from PC Paintbrush, PC Paint Plus and Microsoft Windows Paint programs, the new version imports high-resolution TIF, PCX, PIC and MSP graphics files.

Document Layout Without Layout Expertise

Layout expertise is no longer a prerequisite for producing professional-looking documents. PFS:First Publisher 3.0 offers the Layout Gallery, a collection of 21 predesigned, customizable layouts ranging from the basic to the sophisticated. Layouts can be customized by adjusting the column length and width to meet the specific document design requirements.

After layouts are selected, users can bring in text from the most popular word processing programs. In addition to directly reading files from ASCII, DCA, Microsoft Word, MultiMate, PFS:Write, Professional Write, Wang PC, WordPerfect and WordStar, the new version supports Microsoft Word 5.0, WordStar 5.0 and the latest versions of Software Publishing Corp.'s PFS:First Choice and OfficeWriter.

PFS:First Publisher 3.0 offers users design flexibility to meet specific document requirements with such features as 90-degree word and graphic rotation and automatic text-flow around graphics. Users also can preview the entire page to verify document layout. In addition to portrait printing, PFS:First Publisher 3.0 now supports landscape printing, offering users more versatility.

Portrait and landscape pages can be incorporated in a single publication and printed out using a pause-between-pages feature that allows users to

switch paper. International Enhancements

PFS:First Publisher 3.0 satisfies the requirements of the international marketplace with enhancements including support of Canon Laser and Olivetti PG208M2 printers, A4 paper size and centimeter measurements for ruler, grid and margin settings.

KANSAS CITY, MO. (FEB. 17) BUSINESS WIRE - The Missouri Public Service division of UtiliCorp United (NYSE:UCU) Friday filed a request with the Missouri Public Service Commission to increase gas rates by $4.7 million, or 12.3 percent, annually.

Missouri Public Service President Fred K. Little said the increase in annual gas revenues is needed primarily to pay for extensive gas line replacements and improvements and for increases in operating costs. The average monthly bill of a residential customer using 10,000 cubic feet of gas would increase from $56.05 to $64.49.

''Since the spring of 1988, Missouri Public Service has invested approximately $7 million for safety improvements and system upgrading,'' Little said. ''These expenditures are projected to continue for several years.''

It is anticipated that a commission decision in the case will be rendered near the end of the year. The commission is required by law to issue a decision within 11 months of the filing date.

Missouri Public Service provides natural gas to about 40,500 customers in 26 communities located in north-central and west-central Missouri.

UtiliCorp, based in Kansas City, provides gas and electric service in eight states through its divisions, Missouri Public Service, Peoples Natural Gas, Michigan Gas Utilities, Northern Minnesota Utilities, West Virginia Power and Kansas Public Service. West Kootenay Power in British Columbia is a Canadian subsidiary.

UtilCo Group and PSI are non-regulated subsidiaries specializing in energy and utility related enterprises.

GOLDEN, CO. (FEB. 16) BUSINESS WIRE - Horizon Gold Shares Inc. (NASDAQ:HRIZ) Friday announced sales of precious metals of $3,477,257 and a net loss of $585,502, or 3 cents per share, for the quarter ended Dec.

31, 1989.

The current quarter's net loss included an unrealized foreign exchange loss of $223,728, related to Horizon's subordinated convertible debentures payable in Swiss francs. Net loss excluding the foreign exchange loss amounted to $361,774.

John E. Watson, chairman of the board of the Golden-based precious metals producing company, indicated that Horizon's operations were impacted in the current quarter by the lower price of gold and the seasonal winter weather at the Tuscarora Gold Mines. Despite the reported operating loss, the company had positive cash flow from operating activities (as defined by FASB Statement 95) of $630,599 during the quarter.

Watson also stated that during the current quarter Horizon produced and sold 9,452 ounces of gold as compared to the production level of 5,774 ounces for the quarter ended Dec. 31, 1988.

Watson indicated that during the quarter Horizon realized an average selling price of $368 per ounce compared to $441 per ounce for the same quarter in 1988, and the Horizon's cash production cost per ounce sold was $261. Depreciation and depletion charges amounted to an additional $99 per ounce sold.

During the current quarter, Horizon expanded its reserve position through the acquisition of the Dixie-Comstock Deposit located in Churchill County, Nev., from Santa Fe Pacific Mining of Albuquerque, N.M.

Watson also noted the completion in November of a private placement to Alpha Securities AG of 4 million units (each unit consisting of one share of common stock and one warrant to purchase one share of common stock at a purchase price of 90 cents per share until Nov. 22, 1992) at $1 per unit for a total offering of $4 million.

Horizon is also pleased to announce that during the current quarter Charles E. Stott Jr. was elected as presidenet and chief executive officer of the Golden-based precious metals company. Stott was formerly president and chief executive officer of Amax Gold Inc. (NYSE:AU).

#90047b0196 02/16/1990 ~Business Wire

STAMFORD, CT. (FEB. 16) BUSINESS WIRE - Citizens Utilities' board of directors Friday declared a 1.33 percent first-quarter stock dividend on the company's outstanding series A and series B common stock, payable on

March 23 to shareholders of record on Feb. 28.

Ishier Jacobson, president and chief executive officer, said that since 1956 the company has paid quarterly cash dividends on its series B common stock, which currently constitutes only 16 percent of the company's total outstanding shares. The company's certificate of incorporation requires that when the board declares a stock dividend on the series B shares it must declare the same stock dividend on series A shares.

Heretofore, the company has declared series A dividends semiannually. Dividends on series A shares, which constitute 84 percent of the company's outstanding shares, have been paid only in stock since 1956. Under existing tax legislation, which continues through 1990, the dividends on Citizens' series A shares are received tax free, and the company has initiated action to extend this tax legislation beyond 1990.

If the Congress has not adopted such legislation by year-end, Jacobson said, the company remains committed to preserving the tax-free status of series A stock dividends since this has been the choice of holders of 84 percent of the company's outstanding stock. This can be done by paying stock dividends on all of the company's outstanding stock, both series A and series B.

To avoid uncertainties under the tax law affecting this objective, the board concluded that prudence called for commencing payment of stock dividends on all outstanding shares in 1990, with the intention that, on obtaining appropriate legislation and such rulings as may be necessary, the company will continue stock dividend payments on its series A shares and will resume cash dividends on its series B shares.

Jacobson said that the decision by the board of directors reflects no change in the ability of the company to satisfy readily all of its ongoing cash requirements, but is intended to preserve the tax-free status of series A stock dividends beyond 1990 should there be no change in existing tax legislation.

Jacobson also said that the board intends to continue to declare dividends quarterly during 1990 and that, except for the board's decision to take steps to assure continuity of the tax-free status of the company's series A stock dividend, the cash dividend of the company considered by the board was $1.76 per series B share, compared with the $1.54 paid during 1989.

Jacobson also said that series B shareholders would be advised, as have series A shareholders since 1956, that should series B shares received as stock dividends be sold, any proceeds in excess of adjusted basis should be treated as proceeds from a capital transaction rather than as ordinary taxable income.

Jacobson also said that the company's board of directors has approved a record $126.1 million construction budget for 1990. Of this, some 37 percent of the budgeted amount is for Citizens' telecommunications properties, including cellular communications and paging facilities, 32 percent for electric, 26 percent for water and the balance for wastewater and gas.

By state, 31 percent will be expended in California, 26 percent in Arizona 20 percent in Hawaii and the balance in Colorado, Idaho, Illinois, Indiana, Nevada, Ohio, Pennsylvania, Utah and Vermont.

Citizens Utilities, one of the nation's leading growth companies, is a diversified operating public utility providing telecommunications, including cellular and paging, electric, gas, water and wastewater services to more than 475,000 consumer connections in over 500 communities in 12 states: Arizona, California, Colorado, Hawaii, Idaho, Illinois, Indiana, Nevada, Ohio, Pennsylvania, Utah and Vermont.

For 45 years, the company's administrative offices have been located in Fairfield County, Conn.

#90047b0199 02/16/1990 ~Business Wire
MONROVIA, CA. (FEB. 19) BUSINESS WIRE - Vision Sciences Inc. (NASDAQ:LENZ) Friday announced the closing of an additional venture capital financing.

The venture capital investment group includes funds of The Sprout Group, an affiliate of Donaldson, Lufkin & Jenrette, Alan Patricof Associates Inc. and Investech L.P. The company has been funded with the first $900,000 of financing with the investors having a 90-day option to invest an additional $600,000.

Gerry Keahl, Vision Sciences' recently appointed president, said the company received at the closing $900,000 in gross proceeds from the sale of 15 percent senior secured convertible debentures. The balance of the funding of $600,000 in gross proceeds will be in the form of debentures and $500,000 of Series C convertible preferred stock.

No assurance can be given that the additional funding will be consummated. The debentures will be convertible into common stock at 75 cents per share and the preferred stock at 50 cents per share, each subject to adjustment under certain circumstances and both subject to earlier redemption. Interest on the 10-year debentures will accrue and be added

to principal for the first three years.

The debentures will be secured by all of the assets of the company and the preferred stock shall have the equivalent rights, preferences, covenants and terms of the currently outstanding Series A and Series B preferred stock.

As a consequence of the issuance of the debentures, the exercise price of the currently outstanding Class B warrants was reduced to effectively $1.88 per share and entitles the holder thereof to purchase 2.66 shares of common stock for the $5.00 exercise price of the warrant. No such adjustment was required with respect to the Class A warrants.

Vision Sciences Inc. is the leading supplier of office-based lens casting equipment, the latest technology available in the production of quality yet inexpensive prescription spectacle lenses.

SANTA CLARA, CA. (FEB. 16) BUSINESS WIRE - Solitec (NASDAQ:SOLI) reports revenues for the first fiscal quarter ended Dec. 31, 1989 were $3,231,000, compared with $5,606,000 for the first fiscal quarter of the prior year.

The company had a net loss of $339,000, or 5 cents per share, in the first fiscal quarter of 1990, compared with a net income of $111,000, or 2 cents per share, in the comparable period of the prior year.

According to Joseph McDowell, president, the 1990 first fiscal quarter included $225,000 received by a subsidiary of the company for the exercise of an option to certain technology and $86,000 of debt conversion expense.

The first fiscal quarter of 1989 included $83,000 foreign currency

translation loss. McDowell also said that while the company's new products continue to be attractive to customers, the company's sale of existing products slowed during the quarter due to customers delaying purchases because their business has slowed.

Solitec is a publicly held manufacturer of production equipment for the semiconductor industry.

SAN FRANCISCO (FEB. 16) BUSINESS WIRE - The San Francisco Bay Area has been selected as one of four McDonald's test markets in the United States for its new McChicken Club and Quarter Pounder Club sandwiches, which will be available for a limited time beginning Friday, Feb. 16.

The McChicken Club is made up of a lightly marinated whole chicken breast in a crispy-seasoned coating, with lettuce, tomato, bacon and mayonnaise on a toasted sesame-seed bun.

Customers will have the opportunity to enjoy the Quarter Pounder Club which contains a 100 percent U.S. beef patty with lettuce, tomato, mayonnaise and bacon on a sesame-seed bun.

''We think these newcomers to the McDonald's menu will have a broad consumer appeal and we're excited about offering these new items to our customers in the Bay Area,'' said Susan Steele, regional operations manager for McDonald's Corp. ''It's a good change of taste within McDonald's.''

As with all McDonald's new products, the new Club sandwiches undergo extensive testing at McDonald's Product and Equipment Evaluation Center in Oak Brook, Illinois, including: consumer blind taste-testing; in-store equipment engineering tests; operational alternatives for cooking, dressing and serving the sandwich; plus tests of various sauces.

Other markets that will be testing the club sandwiches are: Albuquerque, New Mexico; Greenville, North Carolina; and the Tri-City area.

McDonald's is the world's leading quick-service restaurant organization, serving 22 million people each day in 11,000 restaurants in 50 countries. Seventy-five percent of McDonald's restaurants are locally owned and operated by independent entrepreneurs.

VERNON HILLS, IL (FEB. 16) BUSINESS WIRE - Scotsman Industries Inc. (NYSE:SCT) Friday announced full-year 1989 earnings on a pro forma basis of $6.1 million, or 86 cents per share, after a one-time 6 cents per share tax charge related to the repatriation of $16 million from the company's Italian operations.

The repatriation of the funds was completed in the fourth quarter of 1989. On a pro forma basis, 1988 earnings were $7.2 million, or $1.02 per share.

Sales for 1989 were $174.4 million, compared with $174.3 million in 1988. Scotsman Industries was spun off from Household International Inc. in April of 1989. Results for the period between Jan. 1, 1989, and April 14, 1989, are reported on a pro forma basis.

For the fourth quarter of 1989, Scotsman posted a loss of $323,000, or 5 cents per share, after the 6 cents per share one-time charge, which compares with pro forma earnings of $137,000, or 2 cents per share, for the 1988 period. Sales in the fourth quarter of 1989 were $37.1 million, up 8 percent from sales of $34.4 million in the comparable period of 1988.

Scotsman's year-end repatriation of cash from Europe allowed the company to reduce its domestic long-term debt by $8.0 million and provided cash for seasonal working capital needs in the United States, according to the company.

Scotsman Industries Inc. is a market leader in the manufacture of commercial refrigeration products, with a primary market focus on the food service industry. The global manufacturing and marketing of ice machines is the largest component of Scotsman Industries' business.

LOS ANGELES (FEB. 16) BUSINESS WIRE - L.A. Gear Inc. (NYSE:LA) Friday announced that the plaintiffs in a federal court class action suit previously filed against the company, its directors and certain of its officers and a related shareholder derivative action filed against the same directors and officers, each alleging violations of federal and state laws, had requested that the defendants consent to a voluntary dismissal of the cases.

Dismissal will not entail any payment whatsoever to plaintiffs in either case and is contingent upon approval of the court.

Robert Y. Greenberg, the chief executive officer of the company, stated: ''We are delighted to report the pending dismissal of these cases. We believed that the material charges in the respective complaints were without merit, and we are pleased that we do not have to go through a drawn-out legal procedure to prove the correctness of our contention.''

L.A. Gear is a leading designer and marketer of a complete line of high-quality and fashionable athletic footwear, related apparel products and accessories.

AGOURA HILLS, CA (FEB. 16) BUSINESS WIRE - TRADITIONAL INDUSTRIES INC. (NASDAQ/NMS Symbol: TRAD) Friday announced results for the first quarter ended Sept. 30, 1989.

For the three months ended Sept. 30, 1989, revenues increased 48 percent to $19,986,000 as compared to $13,475,000 for the same quarter last year. The Company reported earnings of $961,000, or 24 cents per share, primary (22 cents per share, fully diluted), as compared to earnings, before the cumulative effect of a change in accounting principle, of $1,399,000, or 41 cents per share, primary, (33 cents per share, fully diluted), for the first quarter ended Sept. 30, 1988. The Company's Sept. 30, 1988 financial statements have been restated to reflect the cumulative effect of FASB96.

TRADITIONAL INDUSTRIES INC. is the nation's leading specialty marketer of photographic and video products and services.

NEW YORK (FEB. 16) BUSINESS WIRE - Mizlou Communications Company, Inc. (NASDAQ:MZLU, MZLUL) and TeleCable Corporation announced Friday that an agreement has been reached for TeleCable to distribute Mizlou's Sports News Network (SNN). TeleCable, which owns cable systems serving 630,000 subscribers in 15 states, is the nation's 20th largest multiple system owner (MSO). With Cablevision Systems, Adelphia and now TeleCable, SNN has corporate agreements in-place with three top 20 MSO's. Sports News Network launched nationally on February 1. The service provides around-the-clock, comprehensive daily coverage of all major news and events in sports.

L. Patrick Mellon, Vice-President, Programming for the Norfolk, Virginia based TeleCable, said he is optimistic that a full-time sports news

channel will evolve into a successful new format for cable programming. ''In its first two weeks, SNN has already demonstrated high production values and sophisticated news-gathering capabilities. These qualitites will add to the enjoyment of cable television for our many sports-minded subscribers,'' said Mellon.

Jon Steinlauf, SNN's Executive Vice President said the affiliation agreement with TeleCable is a strong endorsement for the network's performance thus far. ''We are elated that another industry leader has committed to launching SNN,'' he said.

Mizlou Communications Company Inc., parent company of SNN, has, for the past 28 years, produced more hours of nationally televised sports than any organization outside the sports divisions of the major networks.

SAN FRANCISCO (FEB. 16) BUSINESS WIRE - AIFS Inc. (ASE/PSE:AIF), a San Francisco-based international educational services company, Friday announced an agreement under which a management group led by Roger O. Walther, president and chief executive officer, would acquire all of the publicly held shares of the company for $6.50 per share cash.

Based on the approximately 3,289,858 presently outstanding shares, of which approximately 50 percent are publicly held, the transaction has an indicated value to the public stockholders of some $10.5 million.

The transaction was recommended by a special committee of the company's outside directors following negotiations between the management group and the special committee.

The special committee's independent financial advisor, Smith Barney, Harris Upham & Co. Inc., has advised the special committee that the $6.50-per-share purchase price is fair, from a financial point of view, to the company's public stockholders.

A representative of the company reported that the agreement contemplates a merger of Marina Holdings Corp., a corporation formed by the management group for purposes of the acquisition with and into the company.

The agreement is subject to numerous conditions, including approval of the

merger by a majority of the company's public stockholders at a meeting to be held in August, certain waivers and approvals by the holders of the company's senior subordinated debentures, receipt of necessary regulatory approvals and receipt of necessary financing from outside lending sources.

In a separate development, the company reported a net loss for its first quarter ended Dec. 31, 1989 of $2,203,000, or 67 cents per share, compared with $310,000, or 9 cents per share, in the like period last year.

Revenues for the quarter were $13,956,000, up from $13,358,000 in the first quarter last year.

AIFS Inc. designs, markets and operates educational and cultural programs worldwide. The company, through its operating subsidiaries, provides opportunities for American college and high school students to study and travel abroad and brings foreign youths to the United States on a variety of cultural exchanges. The company also operates 20 language centers throughout the United States and 20 abroad for intensive English language training for foreign students.

#90047b0646 02/16/1990 ~Business Wire

PALO ALTO, CA (FEB. 16) BUSINESS WIRE - Hewlett-Packard Co. (NYSE:HWP) Friday reported a 17 percent increase in net revenue and a 9 percent growth in orders in the 1990 fiscal year's first quarter, which ended Jan. 31.

Earnings from operations declined 2 percent from the previous year's first quarter, and net earnings were down 10 percent.

Net revenue totaled $3.1 billion, compared with $2.7 billion for the corresponding quarter of fiscal 1989. Net revenue from equipment sales and service in the United States was $1.4 billion, up 17 percent when compared with the year-ago quarter. Net revenue from outside the United States amounted to $1.7 billion, an increase of 16 percent.

Net earnings totaled $173 million, equal to 72 cents per share on approximately 239 million shares of common stock outstanding. This compares with net earnings of $193 million, or 83 cents per share on approximately 233 million shares during the first quarter of fiscal 1989.

The 2 percent decline in earnings from operations was due primarily to an increase in HP's cost of sales. Expressed as a percentage of net revenue

cost of sales rose from 49.9 percent to 52.4 percent, largely because of continuing changes in HP's product and sales channel mix. Partially offsetting this increase was a slowing of expense growth in the first quarter.

Expenses grew 14 percent compared to the 17 percent increase in net revenue.

Sequentially, first quarter fiscal 1990 operating expense levels were 3 percent below those of the fourth quarter of 1989.

Net earnings continue to be negatively affected by the amortization of goodwill related to the Apollo acquisition and by the higher interest expense associated with borrowings used to fund the Apollo acquisition.

Orders for the quarter were $3.3 billion, compared with $3.0 billion in the first quarter last year. United States orders totaled $1.5 billion, up 9 percent from the year- ago quarter. Orders from outside the U.S. also grew 9 percent to $1.8 billion. HP's backlog of orders rose by $200 million from the fourth quarter of last year.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

MOUNTAIN VIEW, CA (FEB. 16) BUSINESS WIRE - SynOptics Communications Inc. (NASDAQ:SNPX), a manufacturer of integrated local area networking (LAN) systems, Friday reported revenue of $77,289,000 and net income of $9,444,000, or $1.22 per share, for the year ended Dec. 31, 1989.

Fourth quarter revenue was $25,546,000 with net income of $3,281,000, or 39 cents per share. Backlog at the year end was approximately $22 million.

This compares with revenue of $40,102,000, net income of $5,881,000, or 92 cents per share, for 1988 and revenue of $14,642,000, net income of $1,910,000, or 26 cents per share, for the fourth quarter of 1988.

''Our performance in the fourth quarter resulted from continuing strong customer acceptance of our System 3000 product line,'' according to Andrew K. Ludwick, SynOptics' president and chief executive officer. ''The fourth quarter also marked the first full quarter of shipments of LattisNet Network Management Release 2.0, an important element in our System 3000 product line.''

''Other significant events since the beginning of the fourth quarter include our $31 million stock offering, substantive progress by the IEEE toward adoption of 10BASE-T as a standard for Ethernet over unshielded twisted pair wire, and out announcement of products based on the 10BASE-T draft,'' Ludwick noted.

SynOptics Communications Inc. designs, manufactures and markets local area networking systems based on its Network Utility Architecture, a value-added product strategy which incorporates network connectivity, internetworking and network management solutions into an integrated networking system.

The company is headquartered at 501 E. Middlefield Road, Mountain View, Calif., 94043-4015. Telephone: 415/960-1100.

WOODLAND HILLS, CA (FEB. 16) BUSINESS WIRE - Hotel Investors Trust, a real estate investment trust, and Hotel Investors Corp., a hotel management company, whose shares are paired and trade together on the New York Stock Exchange (NYSE:HOT), Friday announced the signing of a definitive agreement for the sale of their interests in 31 hotel properties for a price of $185.8 million to Park Plaza Inc., an affiliate of EIE International Corp., a Japanese company.

One property valued in the transaction at $3.2 million, which is subject to an eminent domain proceeding, has been removed from the transaction.

Consummation of the sale is subject to, among other conditions, the completion of inspections of the properties; market studies; analysis of financial information; Hotel Investors' receipt of an opinion from its financial adviser, Salomon Brothers Inc., that the sale is fair from a financial point of view to Hotel Investors; approval of the sale by the shareholders of Hotel Investors; and the receipt of certain governmental clearances.

Hotel Investors previously announced the execution of agreements in principle with respect to the Park Plaza transaction and the sale of three additional hotel properties to another buyer. Negotiation of the definitive agreement for the sale of the three hotels is in process.

The trust and corporation are continuing to explore options with respect to the disposition of their gaming assets, including the possible sale of those assets.

NEW YORK (FEB.16) BUSINESS WIRE - The Dun & Bradstreet Corp. (D&B) Friday announced that McCormack & Dodge (M&D) president and principal executive officer Frank H. Dodge has informed the company that he has chosen to resign to pursue other business opportunities.

M&D, acquired by D&B in 1983, supplies financial and human resource application software systems, tools and services. M&D and Management Science America, Inc. (MSA) of Atlanta, a supplier of financial, human resource, materials management, higher education and manufacturing software and services that D&B acquired earlier this year for $333 million will be merged next month to form a new division, Dun & Bradstreet Software.

In addition to being president and principal executive officer of M&D, Dodge also was scheduled to be vice chairman and a director of the new Dun & Bradstreet Software unit. John P. Imlay Jr., chairman and chief executive officer of MSA, will be the chairman and principal executive officer of the new D&B unit.

The Dun & Bradstreet Corp. is the world's largest marketer of business information and related services, with worldwide revenue of $4.3 billion in 1989.

#90047b0657 02/16/1990 ~Business Wire
GARDEN CITY, NY (FEB. 16) BUSINESS WIRE - Esselte Business Systems Inc.

(NYSE:ESB) Friday reported sales and earnings for the year ended Dec. 31, 1989.

Sales for the year were $1,434 million, up 2 percent from the $1,401 million recorded in 1988. Net earnings were $54.5 million, or $2.64 per share, vs. $58.9 million, or $2.87 per share, in 1988.

The effect of a one-time accounting change made during the first quarter contributed $0.9 million to net earnings, or 4 cents per share.

Sales for the fourth quarter of 1989 increased 6 percent to $399 million, vs. $378 million for the same period last year, while earnings declined 19 percent to 73 cents per share from 90 cents per share for the quarter.

Foreign exchange movements during the year reduced sales by approximatley 3.5 percent in comparison with the prior year. The corresponding effect in the fourth quarter was about 3 percent.

Hans Fristedt, president and chief executive officer, said that full-year, and fourth-quarter earnings results in particular, were adversely affected by a number of factors. He said combined losses and write-down costs for the discontinuance of Esselte Letraset Division's non-glare glass venture amounted to almost $7 million.

Production difficulties and a change in the competitive situation were cited as the reasons for abandoning the project. Operational losses and provisions for closing two smaller Letraset Division projects resulted in additional non-recurring expenses of close to $3 million. The negative effect of these three projects on 1988 earnings was slightly more than $1 million.

Also affecting 1989 earnings was approximately $1 million in expenses related to the proposed merger of Esselte Business Systems with a subsidiary of its Swedish parent, Esselte AB.

Fristedt noted that some of these costs were offset by a one-time gain of almost $3 million from real estate transactions involving the company's closed facilities at Brooklyn, N.Y., and Elizabeth, N.J.

Esselte Business Systems Inc. is a leading international manufacturer and marketer of office supplies, graphic arts supplies, and retail supplies and equipment.

The company's brand names are among the best known in their fields, including: Pendaflex(R), Oxford(R), Dymo(R), Esselte(R), Dataline (R), and Boorum & Pease(R) in office supplies; Letraset(R), Nielson(R), Bainbridge(R), and ITC in graphic arts supplies; and Meto(R) in retail supplies and equipment.

The company's shares are listed on the New York Stock Exchange (Symbol:ESB) and the Stockholm Stock Exchange.

#90047b0660 02/16/1990 ~Business Wire

WINTER PARK, FL (FEB. 16) BUSINESS WIRE - Southern Starr Broadcasting Group Inc. (NASDAQ:SSBG) announced the results of operations for the three- and nine-month periods ended Dec. 31, 1989, which include the effects of the Dec. 6, 1989 sale of the Leesburg/Orlando station for $12 million.

Broadcasting revenues for the first nine months of fiscal year 1990 (''FY90'') reached a record level of $7,021,236, a slight increase over the first nine months of fiscal year 1989 (''FY89'').

The operations of the Leesburg/Orlando station also negatively impacted revenues for the quarter, resulting in a 6.2 percent decrease compared to the quarter ended Dec. 31, 1988.

The company reported net income for the FY90 three- and nine-months periods of $4,703,650 and $4,705,550, respectively, or $3.42 per share, compared to net losses for the like periods in FY89 of $325,646 and $263,163, respectively, or 24 cents and 19 cents per share.

A $7,959,590 gain on the sale of the radio station was reported, as well as a $1,166,475 extraordinary item resulting from the tax benefit from utilization of loss carryforward.

$7,450,000 of the approximate $11.5 million net proceeds from the sale was used to repay all of the company's bank debt, leaving an unused $5 million revolving credit line.

As a result, the company has eliminated most of its interest burden which, in addition to the growth being achieved in revenues and income from operations at the company's remaining stations, should substantially improve net income in the near future.

#90047b0671 02/16/1990 ~Business Wire

NEW YORK (FEB. 16) BUSINESS WIRE - ANGLO SWISS MINING CORP. (NASDAQ Symbol: ASMCF; COATS Symbol: ASMC) Friday announced that it has planned a $1 million exploration program at its Ladner Creek Gold Mine in British Columbia, Canada.

At the completion of this program, the company will commission a production feasibility study by Wright Engineers Limited, a division of Fluor Daniel Corp.

Michael Berns, chairman and chief executive officer of ANGLO SWISS MINING CORP., stated ''The company is committed to aggressively developing, expanding and resuming production at our Ladner Creek Mine. We are confident the planned exploration program of 600 feet of drifting north from the Idaho Zone towards the McMaster Zone and 8,000 feet of diamond drilling will prove the enormous potential of the property.''

Joseph T. Shearer, M.Sc., F.G.A.C., an independent consultant, stated that in addition to the approximate 990,000 tons of known gold mineralization at the Idaho Zone, ''a reasonable and conservative geological potential of this area is around five to six million tons of mineralized rock. I would expect the average grade to be similar in character to the known Idaho Zone by comparison to the preliminary results at McMaster.''

The averagegrade of the gold mineralization at the Idaho Zone is .125 ounces of gold per ton. The Idaho/McMaster areas comprise 5 percent of the company's 13.5 miles of holdings along the geologically favorable Coquihalla Gold Belt. Berns continued, ''Our estimate of production costs of $220 per ounce indicates an excellent profit picture. However, with a substantial increase in reserves, we will consider resuming production at an increased level of output. This, together with the open-pit potential at our McMaster Zone area should result in lower production costs.'' The company is presently in discussions with various parties regarding securing financing for the planned exploration and other purposes.

ANGLO SWISS MINING CORP. is engaged in the business of gold mining and exploration. The company's principal asset is an underground gold mine and 1,500 ton per day production facility located near Hope, British Columbia developed at a cost of Canadian $60 million during the 1970's and early 1980's. The company's mineral holdings extend over 13 miles, covering 14,000 acres.

AUSTIN, TX (FEB. 16) BUSINESS WIRE - Communications Transmission Inc. (NASDAQ: CTIA)(''CTI'') announced that it has been notified by Western Union Corp. (''WUC'') that it is terminating for its convenience, effective immediately, the Radio Baseband Spectrum Lease Agreement dated June 29, 1983 (the ''Agreement'') for analog service.

WUC is a significant customer of CTI who had been paying $474,000 per month to CTI.

It is the position of CTI that the Agreement provides for the payment of significant termination charges in the event of a termination for convenience.

WUC has disputed the validity of that position and CTI has filed suit in Superior Court in Los Angeles, California to preserve and protect its rights and has claimed damages in the amount $21.3 million.

CTI which is headquartered in Austin, is publicly traded on NASDAQ National Market System (Symbol: CTIA).

#90047b0677 02/16/1990 ~Business Wire
FORT COLLINS, CO (FEB. 16) BUSINESS WIRE - First Interstate Bank of Fort Collins, N.A. will be purchased from its holding company by the bank's local management team and will become a locally controlled franchisee under its current name, president and chief executive officer, Tom Gleason announced Friday.

''First Interstate Bank of Fort Collins will now be independently controlled by its management team, which is highly committed to this community and Northern Colorado,'' he commented. ''The bank is now in an even stronger position to support the needs of this region, to make decisions on a local basis and to be even more responsive to customers.''

With assets of $255 million, First Interstate Bank of Fort Collins will become the largest independent bank in the state. It is located at 205 West Oak St.

A definitive agreement for the purchase of the bank has been signed by a newly formed bank holding company, on behalf of the bank's local management team and First Interstate Bancorp of Los Angeles. Financing for the transaction is being led by The Centennial Funds of Denver.

With almost $200 million of assets under management, The Centennial Funds are the largest venture capital group headquartered in the Rocky Mountain region. Assuming all regulatory and board of director approvals are obtained, the First Interstate Bank investment will be The Centennial Fund's third investment in commercial banking institutions.

Additional investors will include a limited number of institutional investors.

Investors will purchase shares in the new bank holding company. The current management team and board of directors will stay in place and bank management will have voting control of the holding company.

It is anticipated that The Centennial Funds will complete the financial offering by May. The purchase has been under negotiation for several months. Knowing that there has been speculation on the sale of the bank, management elected to take a cautious and conservative posture on the announcement as the transaction is subject to the completion of financing and corporate and regulatory approvals.

''First Interstate Bank of Fort Collins has been owned by First Interstate Bancorporation since 1956. However, the board of directors and management believe that this is the time for the bank to regain its independence,'' Gleason commented.

Without this move, it is possible that the bank would have become a branch of First Interstate Bank of Denver when branch banking legislation is approved in Colorado, according to Gleason. Gleason said that as a franchisee, the bank will have all of the advantages of local ownership, yet will be able to call upon the marketing skills and products of a multi-bank holding company.

''Our commitment to quality customer services and to the financial needs of our business and corporate customers is greater than ever,'' said Gleason. (Employees will be offered the opportunity to acquire stock in the bank holding company).

First Interstate Bank of Fort Collins was chartered as First National Bank of Fort Collins on May 12, 1934. It was acquired by Transamerica Corp. in May 1956 and changed its name to First Interstate Bank of Fort Collins, N.A., in 1981. The bank is located at 205 West Oak St. The phone number is 303/482-4861.

#90047b0684 02/16/1990 ~Business Wire
MELBOURNE, AUSTRALIA (FEB. 16) BUSINESS WIRE - Amcor Ltd. (OTC), Australia's leading pulp and paper manufacturer, Friday announced they completed the purchase of Sunclipse Inc. in Los Angeles, by acquiring the 52 percent of issued shares it does not already own. Amcor's original 48 percent holding in Sunclipse was acquired in March, 1989.

Sunclipse is a fast-growing manufacturer and distributor of paper packaging in California, U.S. Now fully owned, Sunclipse will make a positive contribution to the Amcor group's results, after financing costs, for the year to June, 1990.

The cost of the 52 percent of Sunclipse shares acquired today was A$139 million (US$105 million). The initial 48 percent stake cost A$112 million (US$90 million). Funds for the shares acquired today will be provided from bank loans in the U.S. and from Amcor's internal resources.

Annual sales of Sunclipse are around A$400 million (US$300 million). The company has 1500 employees.

Sunclipse operates three corrugated box manufacturing plants, five plants converting corrugated board into boxes and 11 centers distributing manufactured boxes, packaging materials and office products.

The Sunclipse plants predominantly service the Los Angeles, San Diego and San Francisco areas of California, which has the fastest growing economy of any State in the U.S.

The managing director of Amcor, Mr. Stan Wallis, said today, ''We are very pleased to complete the purchase of Sunclipse, and look forward to the company's continued growth under the leadership of its chief executive, Mr. Gene Shelton.''

#90047b0685 02/16/1990 ~Business Wire
MALVERN, PA (FEB. 16) BUSINESS WIRE - Rabbit Software Corp. Friday announced its financial results for 1989.

Revenues for the year were approximately $5.5 million versus 1988 revenues of $10.3 million. A net loss of about $12.8 million was realized in 1989

versus a loss of $5 million for 1988.

Nineteen eighty-nine was a year of significant change for Rabbit. The company's business was refocused in several important ways. Rabbit reduced the range of its products to emphasize the faster growth markets it serves. Distribution channels were changed to emphasize direct sales to large end users, and stronger relationships with a small number of value added resellers.

Significant investments in product development enabled Rabbit to ''relaunch'' its product line in the fall of 1989. The products have proven to be competitive and well received, as evidenced by the company having placed a significant number of evaluation units with large end users. Conversions of evaluation units into sales should start late in the first quarter of 1990.

The efforts to redirect the company's focus caused the revenues for 1989 to be significantly lower than for 1988. In addition to reduced revenues, significant one-time charges were incurred to discontinue certain product lines ($1.4 million), European operations ($.6 million) and manufacturing operations and facilities ($.2 million).

Alfred R. Berkeley, Rabbit's chairman stated that, ''The company is entering 1990 well positioned to improve its performance. With Rabbit essentially out of the business of selling source code, sales efforts will be focused on standard products sold under the Rabbit name.

''This, coupled with the organizational restructuring in 1989, should allow the company to achieve profitable operations in the second half of the year.''

#90047b0687 02/16/1990 ~Business Wire

NATICK, MA (FEB. 16) BUSINESS WIRE - Waban Inc. (NYSE:WBN), a major operator of warehouse clubs, announced Friday it expects record sales and earnings for its recently completed fiscal year.

''Although our audit for the 52 week period ended Jan. 27, 1990 is not yet complete and final results won't be released until Feb. 28th, or thereabouts, we now know that not only did our sales grow 24.5 percent during this past year to slightly over $2 billion, but our net earnings will approximate $28.5 million, or about $1 per share, up from $17.2 million in the prior year,'' commented John F. Levy, Waban's president and chief executive officer.

It should be noted that at this time last year Waban Inc. was operating as a division of Zayre Corp. and did not become an independent public company until it was spun off in June 1989. Thus the prior year's results included intercompany interest expense that is no longer applicable.

Accordingly, on a pro forma basis, adjusted to exclude the intercompany interest expense and to include certain expenses associated witb Waban as if it were a stand-alone public company, the prior year's earnings were $22.4 million, or 79 cents per share.

Levy went on to say, ''Although we are delighted with these record results we are seeking to build strong businesses for the long term in an increasingly competitive environment for both divisions. This strengthening process calls for a substantial investment that will significantly diminish Waban's earnings for the current fiscal year.

Over the past five years, our HomeClub division has garnered a major share of the market for building materials and home improvement products in the Greater Los Angeles area. This was accomplished by opening additional units which, when combined with units opened by competitors, has caused some loss of volume in existing units.

In response to this large and increasingly competitive marketplace, the company has committed significant resources to a series of programs aimed at upgrading customer service levels at HomeClub.

BJ's Wholesale Club achieved an excellent increase in sales volume and earnings in 1989, but due to delays in the real estate approval process we opened only one new club. This year we will have a ''bumper'' corp of up to nine to open.

Although these additional units hold great promise for the future, they negatively affect earnings in the short term by virtue of heavy pre-opening expenses and relatively low initial sales volume.

During the fall of 1989 we successfully moved to paid membership at most BJ's clubs. The program's conversion rates met our expectations and the results to date are encouraging. However, the elimination of the 5 percent surcharge formerly paid by members not paying an annual fee will cause a shortfall in BJ's earnings over the first three quarters of fiscal year 1991. This should be offset when memberships are renewed and as the new paid members increase their expenditures with us.

Waban Inc. is a major participant in the rapidly growing warehouse club industry through its HomeClub and BJ's Wholesale Club businesses. HomeClub is one of the nation's leading merchandisers of home improvement products at everyday low prices, operating 58 warehouses in ten western states.

BJ's Wholesale Club, which currently operates 23 clubs in the eastern U.S. is a low-cost, low-margin, high-volume, membership-oriented distributor of food and general merchandise.

GARDEN CITY, NY (FEB. 16) BUSINESS WIRE - Cable Applications, Inc. (NASDAQ: CBLE) stated Friday that it has requested an extension for filing its 1989 third quarter Form 10-Q in order to further review the company's third quarter results.

Cable Applications currently estimated that it will show a loss of approximately $425,000, or $.10 per share, for its third quarter ended December 31, 1989, as compared to net income of $316,697, or $.13 per share, in comparable prior year period.

This loss was primarily attributable to the company's telecommunications segment which incurred losses on two contracts completed in the third quarter and one contract in process of completion.

In addition, the company incurred costs to train new employees and current employees in new areas in order to expand and enhance the skills of its telecommunications workforce. The company also expended substantial dollars to submit bid proposals for new contracts, the awards for which will be determined in the future.

Cable Applications Inc. is engaged in the design, installation and maintenance of cable, microwave, fibre optic devices and telecommunication systems. The company also supplies temporary, technical and clerical personnel to industry.

BUFFALO, NY (FEB. 16) BUSINESS WIRE - Barrister Information Systems Corp. (AMEX: BIS), announced Friday that it has successfully converted and installed its Barrister/Eagle Time & Billing software on an IBM AS/400, running in "native mode".

This accomplishment makes Barrister the only active IBM Business Partner

in the United States to offer a legal accounting software package running in "Native Mode" on the AS/400.

In native mode, programs employ the best possible AS/400 instructions and built-in relational data base access methods. Also, the AS/400 native mode utilizes compiled Command Language programs rather than the interpreted Command Language programs used by System/36 and ealier IBM mid-range computers.

As a result of utilizing all of these techniques, Barrister's native mode Time & Billing software demonstrates dramatically improved system performance, response times, and throughput.

Native mode also benefits the user by allowing access to Time & Billing system data using the AS/400 built-in relational database through state-of-the-art IBM applications such as Query, SQL and PC support.

This will permit users to construct their own special reports and searches to meet particular requirements of various law firms. Additionally, AS/400 native mode Command Programs can directly initiate MS-DOS commands on an attached PC, thereby allowing an AS/400 application program to off-load specific processing to a personal computer.

Barrister has integrated Time & Billing with other modules of the Barrister/Eagle software package which include, General Ledger, Accounts Payable, Conflict, File Management and Cost Recovery.

Barrister's president, Henry P. Semmelhack, stated, "This is another example of our continuing investments in products to improve performance and maximize features and flexibility for our clients."

Barrister/Eagle is a trademark of Barrister Information Systems Corp. IBM is a registered trademark and AS/400 is a trademark of International Business Machines Corp. MS-DOS is a registered trademark of Microsoft Corp.

#90047b0708 02/16/1990 ~Business Wire

LONDON (FEB. 16) BUSINESS WIRE - British Gas (NYSE:BRG) Friday announced arrangements for making information about the Company's transmission system available to potential independent suppliers of gas.

British Gas offers a gas transportation service through its transmission system to independent suppliers which will enable them to market their gas without the need to construct their own pipelines.

Companies that have a genuine interest in marketing gas independently will be able to obtain the information they require in a number of stages. For a general assessment of marketing opportunities, schematic diagrams will be made available for each region of the national transmission system and, if required, for the regional transmission systems.

For potential independent transporters pursuing negotiations with British Gas in more detail on particular supply locations, information on regional gas distribution systems will also be provided on request.

These arrangements have been agreed with the Office of Gas Supply (Ofgas). Any company whose status or genuine interest may be in doubt can refer the matter to Ofgas.

British Gas Managing Director, James McHugh, said, ''We are keen to make relevant information about our system available to bona fide companies who are seriously considering the possibilities of third party carriage. These arrangements should make the data available quickly and conveniently and is in line with the views recently expressed by the House of Commons Energy Committee.''

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer services to domestic gas customers. British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten Ordinary Shares.

HUNTINGDON VALLEY, PA (FEB. 16) BUSINESS WIRE - FPA Corp. (ASE: FPO), a residential builder with operations in Southeastern Pennsylvania, Southern New Jersey and Florida, reported income from continuing operations of $2,469,000, or 62 cents per share, on revenues of $31,561,000 during its second fiscal quarter ended Dec. 31, 1989, compared to a loss for

continuing operations of $611,000, or 15 cents per share, on revenues of $23,326,000 during the prior year's second quarter.

The current year's income for the quarter from continuing operations includes a gain of approximately $4.7 million on the sales of recreation area leases totaling $10 million.

Continuing operations during the six months ended Dec. 31, 1989, resulted in income of $1,411,000, or 35 cents per share, on revenues of $66,237,000 compared to a loss of $2,178,000, or 54 cents per share, on revenues of $39,506,000 for the comparable period of the prior year.

Income from continuing operations for the six months ended Dec. 31, 1989, includes income of approximately $5.4 million from the recreation area lease sales discussed above and land sales in Florida. These transactions resulted in revenues of approximately $27 million during the six months ended Dec. 31, 1989.

Net income for the three months ended Dec. 31, 1989, was $2,469,000, or 62 cents per share, compared to a net loss of $981,000, or 24 cents per share for the comparable period in the prior year. Net income for the six months ended Dec. 31, 1989, was $1,411,000, or 35 cents per share, compared to a net loss of $2,624,000, or 65 cents per share, for the six months ended Dec. 31, 1988.

The company is the general partner of a partnership that owns and operates the Loehmanns Plaza Shopping Center in Pompano Beach, Fla. The partnership has received a notice from the holder of the second mortgage on the center that the partnership is in default of making payment on the indebtedness at its maturity date.

The principal balance of the indebtedness is $3,575,000 plus accrued interest. The notice states that the holder is entitled to institute foreclosure and other legal proceedings. The company is currently discussing this situation with the holder.

The company is currently engaged in active negotiations with the beneficial owners of a majority of its Senior Notes and Subordinated Debentures to reach an agreement as to the method of funding the portion of semiannual interest scheduled for payment to such owners on Feb. 15 and March 1.

It is possible that mutually satisfactory terms will not be reached, or that definitive agreements mutually acceptable to the parties will not be achieved.

In the event that such an agreement is not reached, and alternative funding sources to meet the interest payments cannot be located prior to

the expiration of the applicable 30-day grace periods for interest payments on the Senior Notes and Debentures, a default may be declared on the Senior Notes and Debentures, which could have a materially adverse effect upon the company's ability to continue its operations as presently conducted.

WALTHAM, MA (FEB. 16) BUSINESS WIRE - The Reece Corporation (NYSE: RCE) Friday announced a loss of $1,698,000, or 67 cents per share, in 1989, compared with net income of $2,018,000, or 79 cents per share, in 1988.

The results included a previously announced fourth quarter 1989 charge of $1.2 million for settlement of a labor dispute over the 1981 closing of a plant in Waltham. Revenues in 1989 were $57,192,000, down from $59,570,000 in 1988.

For the fourth quarter 1989, the company had a loss of $1,297,000, or 51 cents per share, compared with net income of $892,000, or 35 cents per share, in 1988's final three months. Revenues in the 1989 quarter were $15,440,000, down from $15,922,000 in the prior-year period.

"Without the one-time charge for settlement of the labor dispute, the year would have been profitable on a pre-tax basis," said Peter J. Abate, president and chief executive officer.

"After-tax results were further impacted by the recording of taxes on the company's profitable foreign operations, which could not be offset by a tax credit on the company's domestic-unit operating loss."

Abate said that 1989 results were further affected by continued weaker demand in the North American market and by the effect of the stronger U.S. dollar on overseas results.

Abate also said unit orders for Reece-brand machines were six percent below 1988 levels. A number of steps were being taken to reduce U.S. costs amid the slower market conditions.

"While we expect a slow start in 1990, we should gain momentum as the year progresses, barring any further downturn in key markets," said Abate. "Our international business generally remains favorable, and the U.S. market will benefit from cost reductions and various new initiatives in subsequent quarters."

The Reece Corporation manufactures and distributes specialized machinery for the worldwide apparel industry.

#90047b0712 02/16/1990 ~Business Wire

GREENWOOD, SC (FEB. 16) BUSINESS WIRE - United Financial Corp. of South Carolina Inc. (NASDAQ:UNSA) Friday announced financial results for its third quarter and nine months ended Dec. 31, 1989.

For the three months ended Dec. 31, 1989, net income was $468,000, or 24 cents per share, compared with $859,000, or 43 cents per share, for the three months ended Dec. 31, 1988. For the nine months ended Dec. 31, 1989, net income was $1,746,000, or 90 cents per share, compared with net income of $2,538,000, or $1.26 per share, for the nine-month period last year.

At Dec. 31, 1989, stockholders' equity was $38,427,000, or approximately 14.5 percent of total assets of $264,705,000. Net loans totaled $220,522,000 at Dec. 31, 1989, and deposits were $218,123,000, compared with $216,311,000 and $202,481,000, respectively, at March 31, 1989.

Commenting on the results, Lynn W. Hodge, president and chief executive officer, said, ''Loan originations, particularly in our Greenville office, continued to reflect sound demand. Loan production for the first nine months of fiscal 1990 continued the strong pace of fiscal 1989 at $58,533,000, with the Greenville office contributing approximately 50 percent of the total production.

The lower net income was primarily due to the addition in the third quarter of $361,000 to the provision for loan losses. The largest portion of this amount is attributable to a borrower who filed for bankruptcy in December 1989.''

Hodge added that a definitive agreement for the merger/conversion of Home Federal Savings Bank, located in Rock Hill, S.C., was signed in December. Final regulatory approval and completion of the transaction is expected by May of this year.

''The outlook is more favorable than current numbers might indicate,'' Hodge said, ''Our capital position remains among the strongest in the state. Our net interest margins have improved in recent quarters due to the lower interest rate environment. A recent announcement of a new manufacturing plant in Greenwood County, which will employ 600, should provide added stimulus to the local economy.

''Our new office in the Augusta Road section of Greenville has exceeded our deposit growth expectations. Also, we anticipate that the merger with Rock Hill will add measurably to our earnings in fiscal 1991,'' Hodge concluded.

United Financial Corp. of South Carolina Inc. is a unitary savings and loan holding company the sole subsidiary of which is United Savings Bank Inc. of Greenwood. United Savings Bank Inc. serves Greenville, Greenwood and the surrounding area through five full-service and two limited-service offices.

JACKSON, MI. (FEB. 16) BUSINESS WIRE - LDDS Communications Inc. (NASDAQ/NMS:LDDSA) Friday announced that it has finalized a new $125 million credit facility with a group of banks.

The company used the credit facility to refinance a major portion of its long-term debt on more favorable terms. Bernard J. Ebbers, president of LDDS, noted, ''In addition to lowering interest payments which will have a positive impact on our earnings over the next few years, the new facility enhances LDDS's flexibility in pursuing potential acquisition opportunities.

LDDS also announced the purchase in January of the long distance business of Telnet Corp. Telnet generated revenues of approximately $1.6 million in 1989 from the reselling of long distance services in Anniston, Ala. and the surrounding area. The acquisition of Telnet's business added to LDDS's coverage of the Alabama market.

LDDS Communications Inc. is a provider of long distance telephone services in Mississippi, Tennessee, Arkansas, Missouri, Indiana, Kansas, Kentucky, Texas and Alabama.

MONTGOMERY, AL (FEB. 16) BUSINESS WIRE - Alfa Corp. (NASDAQ/NMS:ALFA) Friday reported estimates of damages the company incurred as a result of the recent storm system that moved through Alabama which spawned several

tornadoes.

Claims are currently estimated to total approximately $5 million. After reinsurance recoveries and taxes the company's net loss is estimated to be approximately $2.1 million, or 10 cents per share. The final figures will be reported in the company's first quarter results when they are released in April.

Commenting on the results, Goodwin L. Myrick, president, said: ''This storm system resulted in widespread damages all across the state, with major damage in Clay, Randolph, Russell, Shelby, Talladega and Tuscaloosa counties. The unusually warm temperatures in our region for this time of year have caused such potentially serious weather conditions to develop.''

Alfa Corp. is engaged in insurance and financial activities through its subsidiaries.

#90047b0732 02/16/1990 ~Business Wire

COLUMBIA, SC (FEB. 16) BUSINESS WIRE - The Seibels Bruce Group Inc. (NASDAQ:SBIG) Friday announced results for the fourth quarter and year ended Dec. 31, 1989.

In making the announcement, Sterling E. Beale, chairman and chief executive officer, noted that the fourth quarter and full year figures include the addition of approximately $39 million to the company's loss reserves.

The majority of this amount relates to R K & S, the company's former West Coast affiliate. He added that the full-year numbers also include a $9.8 million pre-tax loss in the third quarter resulting from Hurricane Hugo.

For the year ended Dec. 31, 1989, Seibels Bruce reported a net loss of $38.1 million, or $5.18 per share, compared with 1988 net income of $11.3 million, or $1.55 per share. For the fourth quarter of 1989, the net loss was $35.2 million, or $4.79 per share, compared with fourth quarter 1988 net income of $411,000, or 6 cents per share.

''Although we have not written any business through R K & S since 1985, the loss development continued to be worse than expected for the last four years,'' Beale said.

''We decided during the fourth quarter to deal with this issue aggressively and conclusively by adding substantially to our loss reserves. Consequently, we do not expect any further effect on operating results from the R K & S account.''

Beale noted that the number and severity of natural disasters was unprecedented during 1989. ''It is hard to believe that during a 100-day period, we endured Hurricane Hugo, the San Francisco earthquake, the Alabama tornadoes and the December freezes.

''Notwithstanding these events, the 1989 R K & S adverse development, and the $39 million reserve addition, Seibels Bruce emerged from 1989 with statutory surplus at a level which comfortably supports current premium volume,'' Beale concluded.

APPLETON, WI. (FEB. 16) BUSINESS WIRE - The parent company of Air Wisconsin and the stockholders of Aspen Airlines have reached a preliminary agreement for the purchase by Air Wis Services of all of the stock of Aspen, according to a statement issued jointly Friday by Preston H. Wilbourne, president and chairman of Air Wisconsin and its parent, and Donald W. Ringsby, president and chairman of Aspen Airways.

The transaction, which is subject to completion of a number of steps including modification of certain of Aspen's contracts with others, is for a combination of cash and Air Wis Services convertible debentures, and is expected to be concluded in late April.

Both Air Wisconsin and Aspen Airways provide ''United Express'' service under marketing arrangements with United Air Lines, in the case of Air Wisconsin to hubs at Chicago's O'Hare and Washington's Dulles Airports.

Upon becoming a subsidiary of Air Wis Services, Aspen is expected to continue ''United Express'' service between Aspen, Colo., and Denver, Chicago's Midway Airport, Los Angeles and Dallas. On Feb. 15, Aspen Airways sold certain of its assets to Mesa Airlines, which is undertaking the operation of Aspen's routes between Denver and other points in Colorado, New Mexico, South Dakota, and Wyoming.

GREENBELT, MD (FEB. 16) BUSINESS WIRE - COMNET Corp. (NASDAQ/NMS Symbol: CNET) Friday announced results for the third quarter and nine months ended December 31, 1989.

Revenues for the third quarter were $4,806,000 compared with $5,644,000 for the comparable period last year. Net earnings were $231,000, or $0.09 per share, compared with $51,000, or $0.02 per share, for the same period the prior year. Net earnings from continuing operations for the third quarter of fiscal 1988 were $263,000, or $0.10 per share.

For the nine months ended December 31, 1989, revenues increased to $15,718,000 compared with $14,730,000 in the same period last year. Net earnings were $744,000, or $0.28 per share, compared with $431,000, or $0.16 per share reported last year. Net earnings from continuing operations for the first nine months of fiscal 1988 were $678,000, or $0.25 per share.

In a subsequent event, COMNET CORPORATION announced the sale of its

Salisbury, MD facility to Tishcon Corp. of Westbury, N.Y. The sale price was $2,450,000 and the terms included cash plus subordinated notes. The facility had been leased to and utilized for certain production operations by a company owned by COMNET that ceased operations in May 1989.

LOUISVILLE, KY (FEB. 16) BUSINESS WIRE - Carl F. Pollard, senior executive vice president of Humana Inc., has been named to the boards of directors of First Kentucky National Corp. and First National Bank of Louisville.

Pollard, 51, was born in Lancaster, Ky. and graduated from the University of Kentucky in 1960 with a degree in accounting.

He was a partner in the CPA firm of Yeager, Ford & Warren (now a part of Coopers & Lybrand) before joining Humana Inc. as chief financial officer in 1968. In 1977 he was named executive vice president and president of the Hospital Division. He was named senior executive vice president in 1984, the position he holds today.

''Carl's leadership has been instrumental in Humana's steady growth over the past two decades,'' said Morton Boyd, chairman, First Kentucky National Corp. ''His business acumen will be a welcomed and valued addition to First Kentucky.''

Pollard is on the boards of directors of Churchill Downs Inc., the Business Partnership Foundation of the University of Kentucky's College of Business and Economics, and Vestar Inc., a pharmaceutical company. He is also on the board of trustees of Centre College and serves as the president of the Kentucky Derby Museum Board.

Corporate Profile

LOUISVILLE, KY (FEB. 16) BUSINESS WIRE - Ann Benjamin Levine, founder and chief executive officer, of Fashion Shops of Kentucky, has been named to the boards of directors of First Kentucky National Corp. and First National Bank of Louisville.

Levine, 53, is a native of New Albany, Ind. In 1964, she returned to the Louisville area after a 10-year absence, and founded Fashion Shops of Kentucky with a partner.

In 1980, Levine assumed full control of the corporation. She expanded the retail chain to Lexington and Elizabethtown. Since that time, sales volume has tripled to over $30 million. Headquartered in Louisville, there are seven stores and 330 employees.

Levine's four children hold positions in the company.

''Ann's business insight and entrepreneurial skill will now benefit First Kentucky,'' said Morton Boyd, chairman, First Kentucky National Corp. ''I am confident she will make valuable contributions to our direction in the years to come.''

Levine serves on the board of directors of Jewish Hospital and is a past board member of Temple Adath Israel.

HOUSTON (FEB. 16) BUSINESS WIRE - In a landmark decision on Thursday evening (February 15), a jury in a federal district court in Tulsa, Okla. found that a pipeline's take-or-pay contracts are commercially impracticable under existing federal regulations.

The jury's verdict represents a significant victory for ANR Pipeline Company, a subsidiary of The Coastal Corp., in a $200 million take-or-pay case brought by Dyco Petroleum Corp., a unit of Diversified Energies Inc. of Minneapolis.

The jury determined both that Coastal's ANR Pipeline subsidiary is in a condition of force majeure and that performance on the take-or-pay gas purchase contracts has become commercially impracticable. It is the first time that a pipeline company has prevailed on a defense of commercial impracticability in a take-or-pay case.

The verdict clearly acknowledges that a pipeline is not obligated to honor take-or-pay contracts when changes in federal regulations have rendered performance commercially impracticable.

The verdict also reinforces earlier court rulings that the failure of ANR's customers to take gas from the pipeline as a result of changes in

federal regulations is an event of force majeure. ANR Pipeline's contracts provide that the company is excused from purchasing gas under such conditions.

The pipeline's successful defense in this and other cases principally involves Orders 380 and 436 issued by the Federal Energy Regulatory Commission. Under these orders, local distribution companies (natural gas utilities) were relieved of their obligations to purchase natural gas from interstate pipelines. The order did not, however, relieve pipelines of their obligations under take-or-pay contracts with natural gas producers and suppliers.

Beatty, along with Rebecca H. Noecker, general counsel for ANR Pipeline, tried the case for Coastal.

Take-or-pay contracts include a clause, subject to other provisions, that provides for a pipeline purchaser to pay for a minimum quantity of gas whether or not it was taken. These contract clauses became common when natural gas shortages developed in the 1970s and pipelines and their customers wanted a guaranteed supply of gas.

The Coastal Corp. is a Houston-based diversified energy corporation. Together with its subsidiaries, it has assets of $8 billion and operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, trucking and independent power production.

RUTLAND, VT (FEB. 16) BUSINESS WIRE - Central Vermont Public Service Corp.

(NYSE:CV) reported annual earnings for 1989 of $2.59 per common share compared to $2.58 for 1988.

The annual dividend rate was increased in 1989 to $2.04 per share from $1.98. This earnings level represents a 13 percent return on common equity. Revenues for the year were $227.4 million, up 3.9 percent over 1988's revenues of $218.8 million. Aggressive marketing of short-term capacity to other utiliies helped to boost total revenues.

Fourth quarter operating revenues were $58 million. Net income for the quarter was $3.6 million and earnings per share were 51 cents compared to 2 cents in the 1988 quarter. The significant improvement was due to the unusually cold weather during December and the accelerated timing of certain expenses in the 1988 period.

Overall annual retail sales, reflecting a slowing in growth of the economy were up 2.4 percent while customer growth was 2.1 percent.

CHICAGO (FEB. 16) BUSINESS WIRE - FMC Corp.'s (NYSE:FMC) board of directors Friday elected Robert N. Burt president of FMC, effective March 1.

As previously announced, Burt succeeds Raymond C. Tower, who is retiring as president and chief operating officer.

The board also elected Peter L. Scott a director of the company. Scott, 62 is retired chairman of Black and Decker Corp. and former chairman, president and chief executive officer of Emhart Corporation. He also served in several executive positions at United Technologies Corp. from 1975 to 1983.

Scott's election brings FMC's board, effective March 1, to 12 members, with three inside and nine outside directors.

Adolph M. Quilici also was named general manager of FMC's Defense Systems Group, headquartered in San Jose, Calif., and elected a vice president of the corporation.

Quilici, 59, most recently was division manager of FMC's Ground Systems Division.

Quilici joined FMC in 1953 and held various engineering and program management positions. He was named manager of ordnance engineering in 1972, manager of the ordnance plant in San Jose in 1976, and in 1979 was named manager of the Ordnance Division, which was renamed Ground Systems Division in 1988.

FMC Corp., headquartered in Chicago, is one of the world's leading producers of machinery and chemicals for industry, government and agriculture. The company operates 89 manufacturing and mine facilities in 24 states and 14 foreign countries. The company divides its businesses into five major segments: Industrial Chemicals, Performance Chemicals, Precious Metals, Defense Systems, and Machinery and Equipment.

HAUPPAUGE, NY (FEB. 16) FEB. 16) BUSINESS WIRE - JACO ELECTRONICS, INC. (NASDAQ/NMS Symbol: JACO) Friday announced its net sales and earnings for the second quarter and six months ended December 31, 1989.

For the second quarter, net sales increased 31 percent to $20,129,140 compared to $15,405,533 reported in the same quarter last year. Net earnings were $75,666, or $0.05 per share, as compared to $254,345, or $0.18 per share, for the second quarter ended December 31, 1988.

For the six months ended December 31, 1989, net sales increased 18 percent to $38,157,837 from $32,388,836 in the same period last year. Earnings before extraordinary item for the first six months of fiscal 1990 were $224,814, or $0.15 per share, as compared to $776,516, or $0.53 per share. Net earnings for the six months ended December 31, 1988 include an extraordinary tax credit of $127,129, or $0.09 per share.

Commenting on the results for the second quarter and six months ended December 31, 1989, Joel H. Girsky, Chairman and Chief Executive Officer of JACO ELECTRONICS, INC., said, ''The Company's sales increase for the second quarter was primarily attributable to the continued penetration of our sales force in existing markets.''

Girsky added, ''The recent acquisition of Quality Components (QC) contributed additional sales to JACO's second quarter growth, strengthened our distribution network with new suppliers and locations, and enabled us to enter the growing market segment of electronic subsystems.

''The acquisition of QC negatively influenced the Company's earnings for the quarter. Management is confident that this strategic move will

position JACO to achieve its long term corporate goals of increased market share and maximized shareholder value.''

Girsky continued, ''Persistent competitive pressures resulted in a decrease in gross margins, contributing to a decline in earnings during the quarter. In addition, we expanded our sales force in order to sustain sales growth in our existing markets, which incurred increased costs and expenses.''

Girsky concluded, ''We will continue to monitor cost cutting measures in response to the softness in the market. In our continuing efforts to service our customers more effectively, we have installed a new state-of-the-art computer system which will enable our customers to instantaneously place orders from their facilities. While current market conditions remain soft, JACO has entered the 1990's poised to maintain profitability while taking advantage of new growth opportunities in our industry.''

JACO ELECTRONICS, INC., founded in 1961, distributes electronic components and electromechanical devices, such as capacitors, semiconductors, relays, fractional horsepower electric motors, resistors and electronic sub-systems, for use in commercial, industrial, aerospace and defense applications. JACO represents over 115 electronics manufacturers, selling nationally through its own sales force and independent representatives to over 10,000 customers.

#90047b0777 02/16/1990 ~Business Wire

MILWAUKEE, WI (FEB. 16) BUSINESS WIRE - Republic Capital Group Inc. (NASDAQ:RSLA) Friday reported earnings for the second quarter of fiscal 1990 of $546,000 or 36 cents per share, a decrease of 49.4 percent from the comparable quarter of FY 1989.

Net income for the first six months ended Dec. 31, 1989, was $1,108,000 compared to $1,908,000 for the previous FY period.

Robert L. Desmond, president, stated, ''Provisions for losses on loans and real estate in the amount of $821,000 for the quarter, was the largest factor in the decrease in net income. In addition to provisions based on a conservative evaluation of certain loans and real estate properties, we continued to augment our general allowance for loan losses bringing our total up to $1,985,000.''

As of Dec. 31, 1989, Republic Capital Group Inc. (''RCG'') reported total

assets of $995,000,000 and stockoholders' equity of $50,570,000 or 5.08 percent of assets. This net worth/asset ratio declined after the addition of Home Savings Bank of Appleton and Peerless Federal Savings Bank of Chicago to the company. This was caused by the dilutive effect of accounting for the Peerless acquisition as a purchase which exceeded the effect of the additional equity obtained in the acquisition of Home which was accounted for as a pooling of interests.

For the quarter ended Dec. 31, 1989, Republic Capital Group stock traded in the range of $15.25 to $19.50 per share with 1,715,840 shares outstanding. At the close of business Dec. 31, 1989, the price was $15.50 per share. The book value of the corporation at the close of the second quarter was $29.47 per share. The 14th consecutive dividend of 30 cents per share was declared Dec. 29, 1989, providing shareholders with a return in excess of 7.7 percent.

Republic Capital Group Inc., a multi-financial institution holding company has 30 offices in metropolitan Milwaukee and Chicago, Appleton, Madison, Kenosha, Racine, Menasha, Walworth, Little Chute and Whitewater.

MEMPHIS, TN (FEB. 16) BUSINESS WIRE - An Operations Commitee to direct the recently formed Schering-Plough HealthCare Products has been appointed by David E. Collins, president.

All members of the Operations Committee will maintain dual offices in Memphis, site of the operational headquarters, and also in Bernards Township, near Bernardsville, N.J., where the adminstrative headquarters will be operational in July, 1990.

Schering-Plough HealthCare Products stands fifth among the top 10 OTC and sun care companies in the United States by sales volume. Brands include the 'Coppertone,' 'Shade,' 'Tropical Blend' and 'Solarcaine' sun care lines; 'Dr. Scholl's' foot care line; and such leading OTC products as 'Afrin' and 'Duration' nasal sprays; 'Coricidin' and 'Drixoral' cold and decongestant tablets; 'Correctol' laxative; 'Chlor-Trimeton' antihistamine; 'Lotrimin AF' and 'Tinactin' antifungals; and 'Paas' holiday products.

The executives named to the Operations Committee are Richard Carlsen, senior vice president of Finance and Management Information Services; Dr. John Clayton, senior vice president of Scientific and Regulatory Affairs;

Frederick J. Fritz, senior vice president of Over-the-Counter (OTC) and Seasonal Marketing; Ed McManic, senior vice president of Operations; Raymond L. Modjeski, senior vice president of Sales; Gerry Nobrega, senior vice president of Marketing and Advertising; and Robert R. Raub, senior vice president of Human Resources.

Carlsen is responsible for finance and planning, management information systems and customer service. He was formerly vice president of Finance and Planning for a predecessor unit, Consumer Operations. Carlsen joined the company in 1981 as Director of Planning and Administration. He holds a bachelor of business administration degree from Memphis State University in accounting, and he is also a Certified Public Accountant.

Clayton is responsible for research and development, regulatory affairs and quality assurance. He joined the company in 1974 as Clinical Research Associate. Clayton holds a bachelor of science degree in science and pharmacy from Tennessee Technological University and a doctorate of philisophy in pharmaceutical sciences from the University of Tennessee.

#90047b0783 02/16/1990 ~Business Wire

TORONTO (FEB. 16) BUSINESS WIRE - National Business Systems Inc. (ISE:NBS) revenues for the three months ended Dec. 31, 1989 were reported at $34.6 million -- an increase of 5.5 percent over the $32.8 million reported for the same period last year.

The company also reported a net loss of $4.1 million compared to a loss of $3.1 million for the same period last year. On a per share basis, these net results show a loss of 26 cents per share, up from last year's first quarter loss of 19 cents per share.

Among other financial highlights for the quarter, NBS received final approval for the settlement agreement reached over a class action suit filed by its U.S. shareholders -- a suit precipated from past NBS management. The settlement provisions included a payment of USDLR $500,000 and the issue of 2.75 million warrants to purchase 2.75 million NBS common shares at 50 cents per share.

Furthermore, terms for NBS's recapitalization plan were finalized. NBS shareholders will shortly receive a management information circular that outlines the terms of the recapitalization plan. Shareholders will be asked to approve the plan at the annual and special shereholders' meeting at 2 p.m., April 12 in the Confederation Room of the Royals York Hotel in Toronto.

Other quarterly highlights include:

-- A major award of the Manitoba Province's Drivers License contract.

-- A contract award from CitiCorp for one of North America's largest credit card embosser orders - five high-speed NBS Model 18000 embossers -- For Bank of Montreal, an introduction of a successful debit card pilot program in Calgary which will lead on to the national INTERAC network's debit pilot project in Ottawa in June, 1990. -- The corporate launch and introduction of a new quality control program, called Excellence In Quality. The launch was made at the international Retail Delivery Systems Conference in December in New Orleans.

Summarizing the results in a letter to shareholders, Timothy W. Casgrain, president of NBS, said, ''NBS management continues to focus its effort on sales growth, while maintaining operating expenses at reasonable levels. Fiscal 1990 continues to be a year of rebuilding sales and operating profits at NBS.''

NBS is a world leader in retail transaction automation, digitized imaging, plastic card technologies and production, and electronic mail systems. Each of the company's divisions excel in their technology design and implementation efforts and, as such, have garnered significant market shares in each of their respective industries.

The company operates three major manufacturing plants in the United States Canada, and the United Kingdom that together produce more than 400 million plastic cards and 100,000 point-of-sale (POS) terminals a year. NBS is also the world's largest manufacturer of credit card flat-bed imprinters.

HOBOKEN, N.J. (FEB. 16) BUSINESS WIRE - Washington Bancorp Inc., Friday reported a consolidated net loss of $3.9 million, or $1.69 per share, as compared with a net loss of $3.9 million, or $1.70 per share, for 1988.

The number of shares of common stock outstanding were 2,300,000 and 2,307,187 and at Dec, 31, 1988 and 1989, respectively.

For the three month period ended Dec. 31, 1989, the company reported a net loss of $4.5 million, or $1.96 per share, as compared with a net loss of $641,000, or 28 cents per share for the same period in 1988.

As previously announced, in December of 1989, the company provided an additional loan loss provision of $4.6 million due to the general decline in real estate values in its market area and charged-off $3.7 million of loans. At December 31, 1989, the remaining allowance for loan losses was $5.1 million.

Washington Bancorp is the parent holding company for Washington Savings Bank, Hoboken. The company had consolidated total assets of $351.3 million and a consolidated primary capital-to-assets ratio of approximately 10 percent at year-end 1989.

#90047b0793 02/16/1990 ~Business Wire

MONROE, LA. (FEB. 16) BUSINESS WIRE - Clarke M. Williams Jr., president and chief executive officer of Century Telephone Enterprises Inc. (NYSE:CTL), Friday announced revenues, net income and earnings per share for 1989 and the fourth quarter.

Annual revenues from telephone, cellular and paging operations increased 15.9 percent to a record $213,231,000 from $184,041,000 in 1988. Net income was $22,164,000, 5.1 percent below 1988 net income of $23,364,000.

Earnings per share were 74 cents compared with 85 cents a year ago, down 12.9 percent mainly due to a decline in revenue adjustments resulting from the finalization of prior period revenue settlement agreements and an increase in the number of average fully diluted shares outstanding as a result of the May 1989 issuance of 2,956,000 shares of common stock, proceeds from which were used primarily to finance the acquisition of Universal Telephone Co. Inc.

Also the 1988 amount included a gain on the sale of certain assets of $2,550,000 (6 cents per share).

''As expected, we experienced an interruption in our trend of earnings growth during 1989 primarily due to a reduction in the amount of prior period toll and access charge adjustments resulting from updated settlement agreements and the gain on the sale of certain assets during 1988. Positive prior period toll and access charge revenue adjustments declined by $5,233,000 in 1989 compared with 1988.

''Earnings per share were also affected by the increase in the number of shares outstanding from our public offering in May,'' Williams said.

The fourth quarter of 1988 included the gain on the sale of the Pine Bluff Ark., cellular property of $2,068,000 and revenue adjustments relating to prior periods of $4,428,000 in excess of those recorded in the fourth quarter of 1989. Without these two items, net income and earnings per share in the fourth quarter of 1988 would have been $3,951,000 and 14 cents, respectively.

Net income was $6,046,000 (19 cents per share) in the fourth quarter of 1989 compared with $7,932,000 (29 cents per share) in the like quarter of 1988.

''Under current accounting rules we must account for the acquisition of Universal as a purchase transaction, which requires us to amortize goodwill against earnings,'' Williams said. ''Cash flow is not affected by the accounting treatment, but earnings suffer significant negative impact compared with pooling of interests accounting treatment.''

Universal subsidiaries serve 48,000 telephone access lines, have 130,000 owned Metropolitan Statistical Area (MSA) ''POPs,'' or Century's pro rata share of the population of the licensed area, and agreements for ownership of approximately 285,000 Rural Service Area (RSA) ''POPs.'' The acquisition increased Century's total number of telephone access lines by

20 percent and cellular ''POPs'' by 10 percent.

Century now serves 296,000 telephone access lines in 14 states and owns over 4.8 million MSA and RSA ''POPs.''

''Operating results for Century's local exchange telephone operations remained very strong with telephone operating income for the year increasing 6 percent to $62,301,000 from $58,772,000 in 1988.

''Revenues from Century's telephone business increased 9.8 percent in 1989 primarily due to the Universal acquisition, the phase-in of the Federal Communications Commission mandated high cost fund, increased minutes of use and improved settlement factors,'' Williams said.

Cellular revenues increased 101 percent in 1989 compared with 1988 primarily due to a significant increase in the number of customers served. During the fourth quarter Century added a record 4,424 cellular subscribers, as this business segment continues to grow at a rapid pace. Century served 23,199 cellular subscribers and had 10,900 pagers in service at year end.

''We remain convinced that the current operating losses of our cellular and paging businesses and the earnings per share dilution resulting from the recent acquisition of telephone properties are more than offset by the potential future value of these businesses,'' Williams said.

Century Telephone Enterprises Inc., headquartered in Monroe, is a diversified telecommunications company with operations in 16 states.

DAYTON, OH (FEB. 16) BUSINESS WIRE - In response to inquiries, Philips Industries Inc. (NYSE:PHL) and MLPI Holding Inc. (a corporation formed at the direction of Merrill Lynch Capital Partners Inc.) jointly announced Friday that at this time the agreement and plan of reorganization that they had previously executed as of Sept. 24, 1989, and amended as of Nov. 28, 1989, has not been terminated.

Holdings also stated that, as previously announced, Holdings' proposed financing sources had indicated that they would be unable to participate in the financing of the transaction as currently structured. However, Holdings stated that it continues to remain interested in completing an acquisition of Philips and is evaluating whether an alternative structure can be arranged which would be acceptable to all parties. Philips and

Holdings stated that Holdings has not made any further proposals to Philips and they are unable to predict at this time whether any acquisition will be consummated or whether any alternative transaction will be proposed.

Philips Industries is a leading manufacturer of components for the building and transportation industries and provides quality material handling systems to manufacturers. The company is listed on the New York Stock Exchange under the ticker symbol PHL.

#90047b0798 02/16/1990 ~Business Wire

HARTFORD, CT (FEB. 16) BUSINESS WIRE - A recent newspaper story on a research report by a Wall Street securities firm contains misleading information on the level of high-yield ''junk'' bonds held by Aetna Life & Casualty, the insurer said Friday.

''It is completely irresponsible to characterize our investment portfolio as heavily weighted in 'junk' bonds, when even a casual look indicates just the opposite,'' said Philip R. Roberts, Aetna senior vice president of investments.

The report by Oppenheimer & Co. estimated Aetna's junk bond holdings at more than $1 billion and was the basis of a Wall Street Journal article on Feb. 12. Aetna said it holds $300 million of high-yield or ''junk'' bonds which make up less than 1 percent of its $35 billion bond portfolio. The company added that its bond portfolio has an overall rating of A-plus.

Oppenheimer arrived at its figures by combining Aetna's high-yield portfolio with its traditional bond investments, including more than $800 million of private and public debt, much of it secured or with covenants. The firm subsequently has published a report that acknowledges the distinction between high-yield bonds, or ''junk'' bonds, and other below-investment grade bonds.

Like any other institutional investor, Aetna holds some bonds in downgraded companies, according to Roberts. He noted, however, that these non-investment-grade bonds are not traditionally characterized as ''junk.''

''The essential issue, however, is the risk of loss in our bond portfolio '' Roberts said. ''The implication in the Wall Street Journal story is that all of these bonds are in jeopardy, when, in fact, if our investments were valued at market at year-end, Aetna's net worth would go up.''

Aetna said that its bond write-offs have averaged $27 million per year over the past five years -- about one-tenth of 1 percent of Aetna's shareholder equity.

#90047b0802 02/16/1990 ~Business Wire

HOPKINTON, MA (FEB. 16) BUSINESS WIRE - EMC Corp. (NYSE:EMC) Friday announced that as a result of previously announced write-downs, it will report a loss of $18,557,000 on revenues of $132,297,000 for the year ended Dec. 31, 1989.

For the year ended Dec. 31, 1988, the company reported a loss of $7,815,000 on revenues of $123,278,000.

For the fourth quarter of 1989 revenues amounted to $40,251,000 with a loss of $7,516,000 as compared to revenues of $27,665,000 and a loss of $5,665,000 for the fourth quarter of 1988. The loss from operations of $14,098,000 in the fourth quarter of 1989, due principally to the inventory write down, was partially offset by a $6,000,000 tax recapture in the period.

Richard J. Egan, EMC's chairman and chief executive officer, stated that, ''The fourth quarter adjustments should represent the final actions necessary to account for inventory adjustments made to provide for the discontinuance of our Prime compatible business and other obsolete inventories. We exited the year with a very strong balance sheet, no bank debt and over $20,000,000 in cash.

''We enter 1990 cautiously, but nonetheless optimistically, about returning EMC to its position of growth and prosperity.''

EMC Corp. is the leading independent manufacturer of systems enhancement products for midrange and mainframe computers. System enhancement products are designed to improve the capacity, performance and reliability and thus extend the useful life, of currently installed computers.

#90047b0805 02/16/1990 ~Business Wire

NEW YORK (FEB. 16) BUSINESS WIRE - Avalon Corp. (NYSE:AVL) announced

Friday that for the year ended Dec. 31, 1989, the company reported a net loss of $9,898,000, or 67 cents per share, compared with a net loss of $374,000, or 3 cents per share, for 1988.

John M. Donovan, president and chief executive officer, said ''1989 was a year of dramatic change for the company. We now have a large and supportive major stockholder in Corona Corporation, one of the largest gold producers in North America and one of the world's lowest cost producers.

''Avalon has successfully converted its Canadian oil and gas interests into a significant investment in a well known Canadian publicly-traded company, thus achieving a strategic objective. To expand its natural resources presence, Avalon has reached an agreement in principle with Corona to acquire two industrial minerals operations which will complement its oil and gas investments in the U.S. and Canada,'' added Donovan.

As a result of an agreement with its former major stockholder to seek a buyer for the company, $6.9 million of non-recurring transactional expenses were incurred during 1989. Corona Corp. became Avalon's major stockholder following a tender offer which expired in June 1989.

Effective July 1, 1989, Avalon sold its Canadian oil and gas properties to Poco Petroleums Ltd., a publicly-traded oil and gas company headquartered in Calgary, in return for a 32 percent common equity interest in Poco.

As a consequence of this transaction, Avalon recorded a $12.2 million pre-tax gain in the third quarter of 1989. Avalon has an agreement in principle to acquire an additional 17 percent interest in Poco from Corona.

Avalon's common equity share of Poco's net loss for 1989 was $14.1 million. Primarily as a result of proposed legislation which will reduce future royalty tax credits in the Province of Alberta, generally accepted accounting principles for U.S. finanical reporting purposes required a significant reduction of the carrying amount of Poco's oil and gas assets.

As a result for the quarter ended Dec. 31, 1989, Avalon recorded a net loss of $12,247,000, or 81 cents per share, vs. net income of $4,268,000, or 30 cents per share, for 1988. The 1988 period included a $4,550,000 gain on the sale of investments.

-30- 631
#90047c0043 02/16/1990 ~Comtex
STAMFORD, CT (FEB. 16) COMTEX - The Office of Thrift Supervision has rejected a proposed capital plan submitted by Financial Corporation of Santa Barbara, the parent of Santa Barbara Savings and Loan Association.

The plan ''does not sufficiently demonstrate that the association will come into compliance with all the applicable capital standards in a timely manner and is unacceptable because of the risk it poses to the [federal] insurance fund,'' the OTS said in a Feb. 9 letter to the company.

The OTS imposed new restrictions on the company, in addition to restrictions imposed in December. The new ones prohibit the company from: -- selling, transferring, modifying or exchanging any loan, participation, security or other assets in excess of $1 million, or entering a series of related transactions whose total value exceeds $1 million; -- buying, selling or leasing real estate in excess of $500,000; -- making any capital expenditures of more than $50,000; -- investing more than $10,000 in its subsidiaries; -- increasing the compensation of any officer, director, employee or agent earning more than $50,000 a year.

Based on talks with the OTS and the Federal Deposit Insurance Corporation, management of Santa Barbara believes the thrift's low capital level and core losses, in the absence of an approved capital plan, expose it to a high risk of conservatorship or receivership if the thrift cannot be sold or recapitalized soon.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 15, 1990

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

TEXAS CHILDRENS HOSPITAL FOUNDATION OF HOUSTON, TEXAS OWNS 210,123 SHARES (3.40%) OF COOPER INDUSTRIES INC (TICKER: CBE) OF HOUSTON, TX.

ANNOUNCEMENT: The Foundation is a charitable trust for the benefit of Texas Children's Hospital and has the sole power to direct the shares pursuant to a voting agreement dated as of Dec. 21, 1988. The agreement

will remain in effect until Dec. 31, 1993, or the date upon which all of the shares have been sold or otherwise transferred, or the date on which the trustees shall agree to terminate the agreement.

LATEST TRANSACTION: Between Jan. 2, 1990 and Jan. 4, 1990 the filer sold 114,100 shares at $127.00 to $130.00 per share.

PURPOSE: Sale of shares

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 004

GROUP LED BY RIEDMAN CORP OWNS 247,900 SHARES (13.80%) OF NIAGARA EXCHANGE CORP (TICKER: NIEX) OF BUFFALO, NEW YORK.

ANNOUNCEMENT: The reporting persons intend to solicit proxies from the issuer's shareholders to remove between two and all seven of the current members of the issuer's board and elect their own nominees to the board. If successful, the filer hopes the new board would divest the issuer's interest in Charleston Insurance Co., replace the chief executive officer and chief financial officer of the issuer, remove the provisions in the

issuer's charter which require a classified board of directors, improve the issuer's operating performance, and improve the issuer's stock performance.

LATEST TRANSACTION: On Feb. 8, 1990 the reporting persons purchased 40,000 common shares at $4.10 per share.

PURPOSE: For investment

#90047d1570 02/16/1990 ~French/German News Agency
TOKYO (FEB. 16) - Japan's Big Four securities houses will likely see pretax operating profits reach record levels for the 12 months ending in March, the Nihon Keizai Shimbun (Nikkei) reported Friday.

The leading Tokyo financial daily estimated that Nomura Securities Co. will see pretax earnings rise by seven per cent to 530 billion yen (3.6 billion dollars), Daiwa Securities Co. by 12 percent to 350 billion yen (2.4 billion dollars), Nikko Securities Co. by 13 percent to 290 billion yen (2.0 billion dollars), and Yamaichi Securities Co. by 15 percent to 250 billion yen (1.7 billion dollars).

The daily said these estimates could be changed, depending on the performance of the stock market after Sunday's general election.

But Nomura is likely to become the first firm in Japan's banking and securities industries to see its profits exceed 500 billion yen (3.47 billion dllars), Nikkei said.

It said the generally poor performances of the equity market in the current business year sharply decreased daily trading volume from the preceding year, resulting in about a 10 percent decline in revenues from stock trading commissions on the whole.

But steeply expanding profits from their own account dealings in equity-warrant bonds, coupled with increased surpluses in their financial balances, are contributing to their strong business results.

#90047p0024 02/16/1990 ~PR Newswire

DEL MAR, CA (FEB. 16) PR NEWSWIRE - OMNI USA Inc. (OTC "Pink Sheets"), a manufacturer and distributor of agricultural machinery gearbox components, heavy duty truck and trailer equipment parts, and light trailer products, today announced operating results for the second quarter of its fiscal year ending June 30, 1990.

For the quarter, the company reported sales of $3,099,236 compared to sales of $2,949,879 for the same period last year, an increase of 5.1 percent. For the six months ended Dec. 31, 1989, the company reported sales of $6,594,078 compared to sales of $5,774,319 for the comparable period last year, an increase of 14.2 percent. The increase in sales for these periods was attributable to the company's gearbox product line, primarily because of a strong agricultural market and the company's continued growth in this market.

For the quarter, the company reported net income of $6,793 compared to net income of $70,365 in the comparable period last year. The decrease in net income was due to $250,000 of non-recurring consulting fee revenue earned in fiscal 1989 which was only partially offset by the company's $182,000 increase in gross margin contribution in the current year.

For the six months ended Dec. 31, 1989, the company reported net income of $26,602 compared to net income of $100,995 for the first six months of the previous year. The decrease in net income was attributable to non-recurring consulting fee revenue of $475,000 earned in the first six months of the prior year only partially offset by the company's increased gross margin contribution of $372,000 in the first six months of fiscal 1990.

"We are quite pleased with the first six months of operations," stated Edward L. Daniel, president. "Sales and profits during the first two quarters are always down in relation to the rest of the year due to the industry in which we operate. Once again, we were able to significantly offset the loss of consulting fee revenue with higher sales and improved margins." Daniel concluded, "We are excited about our future, especially in light of the City Machinery and Simplex Cycle acquisitions, which will

expand our available product lines and distribution network."

SANTA MONICA, CA (FEB. 16) PR NEWSWIRE - Fremont General Corporation (NASDAQ: FRMT) has completed its previously announced acquisition of privately held Tomar Financial Corp., James A. McIntyre, chairman and chief executive officer of Fremont General, announced today.

Under the terms of the definitive agreement, which was signed late in July of 1989, Fremont has acquired Tomar and its subsidiaries, including Investors Thrift and Liberty Thrift and Loan, both of Orange, Calif. The acquisition was a cash transaction, along with certain other consideration.

The two thrifts have combined assets of approximately $180 million with 14 branches widespread throughout California, mostly in rural areas. Their deposits are insured through the Federal Deposit Insurance Corporation (FDIC).

The transaction closed today following the final FDIC approval. McIntyre commented: "We are pleased to completed this acquisition, which will help Fremont General expand its financial services operations in California."

Fremont General Corp. is a holding company engaged through subsidiaries in insurance and financial services.

JACKSON, MI (FEB. 16) PR NEWSWIRE - Shirley L. Filip has been appointed to the newly created position of director of corporate performance and quality improvement for Consumers Power Company. The announcement was made by Frederick W. Buckman, president and chief operating officer.

Filip, 38, will be responsible for implementing and managing a company-wide performance improvement process with a focus on continuous performance improvement.

A native of Jackson, Filip joined the utility in 1972 as a summer intern in its purchasing department. She held a succession of increasingly responsible positions in the company's laboratory services, system planning and energy supply departments before joining the quality improvement and management training area of energy supply in 1982. In

1986, Filip became director of performance improvement and in 1988 took on expanded duties as director of performance improvement, planning and training with responsibilities for power plant maintenance employee training.

Filip lives with her son and daughter in Jackson.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

DETROIT (FEB. 16) PR NEWSWIRE - Electricity sales to commercial and residential customers set a record for January, but declining sales to the auto and steel industry contributed to a 1-percent overall reduction in Detroit Edison sales for the month compared with year-earlier figures.

A total of 3.6 billion kilowatt hours (kWh) were sold in January. Record commercial sales of 773 million kWh were 1.2 percent higher than January 1989 and the third consecutive year-to-year increase for sales in this class. Since January 1989, 3,300 more commercial customers have been added to Detroit Edison's Southeastern Michigan service area.

Sales to residential customers were nearly 1.2 billion kWh or 1.9 percent above January 1989 for the third consecutive year-to-year residential sales increase. Some 20,000 residential customers were added to the utility's service area in the past year.

Declining auto and steel production brought January industrial sales down to 1.48 billion kWh or 4.6 percent below January 1989.

CONTACT: Martin L. Bufalini II, 313-237-8808, or Mary Kay Bean, 313-237-8809, both of Detroit Edison.

MONTCLAIR, N.J. (FEB. 16) PR NEWSWIRE - Montclair Bancorp, Inc. (NASDAQ-NMS: MSBI), which owns Montclair Savings Bank, today reported net income for the three months ended Jan. 31, 1990, of $816,000, or $0.33 a share, compared with $1,194,000, or $0.48 a share, for the comparable 1989 period.

Net interest income was $4,041,000 for the quarter ended Jan. 31, 1990, compared with $3,956,000 for the comparable 1989 quarter. Total interest income was $13,252,000 for the quarter compared with $11,498,000 a year ago while total interest expense was $9,211,000, up from $7,542,000. The provision for loan losses was $300,000 for the quarter compared with $53,000 for the prior year's quarter.

At Jan. 31, 1990, the allowance for loan losses was $1,433,000 compared with $1,132,000 at Oct. 31, 1989. Loans 90 days or more delinquent and non-accrual loans were $10,382,000 at Jan. 31, 1990, compared with $8,052,000 at Oct. 31, 1989. Total assets and total deposits at Jan. 31, 1990, were $563,242,000 and $493,079,000, respectively, compared with $556,490,000 and $481,669,000 at Oct. 31, 1989. Book value per share increased to $26.15 at Jan. 31, 1990, from $25.88 at Oct. 31, 1989. Capital-to-asset ratio was 11.7 percent at Jan. 31, 1990, unchanged from Oct. 31, 1989.

On Feb. 13, 1990, the board of directors declared a regular dividend of $0.15 a share for the first quarter of the 1990 fiscal year. It also declared an extra dividend of $0.30 a share from fiscal year 1989 earnings in addition to the $0.55 a share previously paid from that year's earnings. Both the regular and extra dividend are payable April 1, 1990, to stockholders of record March 1, 1990.

TAMPA, Fla. (FEB. 16) PR NEWSWIRE - Nutmeg Industries, Inc. (NASDAQ: NUTM), and The Shirt Shed, Inc., today jointly announced execution of definitive agreements to form their previously announced joint venture. The joint venture will sell licensed sportswear to mass merchants and chain stores under the "Saturday's Hero" brand name.

Richard E. Jacobson, Nutmeg chairman and chief executive officer, and William B. Hensley, chairman and chief executive officer of The Shirt Shed anticipate first product deliveries this spring season.

Nutmeg, which will serve as the joint-venture manager, will apply its licenses from colleges and major professional sports organizations and for the use of cartoon characters, as well as its creative design and marketing strengths, to the joint venture. The Shirt Shed will manufacture the products and distribute them primarily to its existing customer base.

Mr. Jacobson and Mr. Hensley stated that initial market reaction to the products of the venture has been very encouraging.

SANTA ANA, CA (FEB. 16) PR NEWSWIRE - Fireplace Manufacturers Inc. (NASDAQ: FPMI) announced today its earnings for the third quarter ended Dec. 31, 1989. Net income for the nine months was $641,664 or $.18 per share compared to $261,962 or $.08 per share for the same period in 1988.

Sales for the nine months ended Dec. 31, 1989, was $19,875,830 compared to $14,778,022 for the same period in 1988. Cost of sales as compared to the prior year was down 2.3 percent. This decrease is due primarily to increased selling prices to offset any increases in direct materials and labor costs. Selling, general and administrative costs have increased from $1,838,799 at Dec. 31, 1988, to $2,484,351 at Dec. 31, 1989. This increase is due to the company's increased marketing efforts.

Fireplace Manufacturers Inc. designs, manufactures and sells factory-built energy efficient metal fireplace systems. The company currently produces 16 models of wood burning metal fireplaces with refractory lined fireboxes and related chimney flues. Optional features of the fireplaces include the ability to accept natural gas, glass doors, outside air intakes and electrical blowers.

The fireplaces are used in single family homes, condominiums, apartments, mobile homes and can be used as part of all, in a corner or as a room divider. Fireplaces are sold mainly to customers in the residential construction industry. In the current quarter expansion into fabricated products other than fireplaces accounted for less than 1 percent of sales.

NEW YORK (FEB. 16) PR NEWSWIRE - Unity Healthcare Holding Company, Inc. (NASDAQ: UNTY) announced today that it has completed the previously announced purchase of American Health Care Services of Florida, Inc., a Medicare-certified home health agency. The owners of American Health Care received $240,000 in cash and 49,656 shares of Unity Healthcare Holding Company's common stock.

The acquisition of American Health Care, together with the receipt of approximately $5 million from the recent first closing of Unity's private placement offering, will allow Unity to enter the Medicare home health market in south Florida, significantly expanding Unity's presence in Dade and Broward Counties. Unity has been providing supplemental staffing of nurses and therapists for hospitals and home care through its branch office in Hollywood, Fla., since October 1988.

Unity primarily engages in providing temporary and permanent healthcare personnel to health care institutions in the United States through its offices in New York, New Jersey, Florida and California. Unity also provides home care patients with temporary health care personnel and medical supplies and equipment.

ATLANTA (FEB. 16) PR NEWSWIRE - The Board of Directors of The Coca-Cola Company (NYSE: KO) has nominated Cathleen P. Black to stand for election as a director of the Company.

Her nomination to the Board will be voted on by shareholders at the Company's 1990 annual meeting in April.

Ms. Black is publisher of USA TODAY, executive vice president/marketing of the newspaper's parent company, Gannett Co., Inc., and a member of the Gannett Board of Directors.

Before joining Gannett in 1983, Ms. Black had been publisher of New York magazine since 1979. She joined the magazine as associate publisher in 1977. Prior to that, she was associate publisher of Ms. magazine, and worked on the advertising sales staffs of several publications.

A graduate of Trinity College in Washington, D.C., Ms. Black now serves on its Board of Trustees. In 1989, Trinity College awarded her an Honorary Doctor of Laws Degree. She also holds honorary degrees from Ithaca College in New York and Capital College in Maryland.

Ms. Black received the 1989 Frontrunner Award in the area of business from the Sara Lee Corporation and Manhattan College's 1989 De La Salle Medal for business executives. She also was included in Business Month magazine's 1989 list of "100 Women to Watch in Corporate America."

Richard J. Flamson, chairman of the Board of Security Pacific Corporation, and until January, 1990, chief executive officer of Security Pacific, has chosen not to stand for re-election to the board/

#90047p0050 02/16/1990 ~PR Newswire

TAYLOR, MI (FEB. 16) PR NEWSWIRE - The year 1989 was a year of contrast for Masco Corporation (NYSE: MAS). Net sales increased to record levels, while earnings declined after 32 consecutive years of increases.

Net sales in 1989 were $3,150 million, an increase of 8 percent from 1988. Increased sales of kitchen, bathroom and home furnishings products contributed to this record result.

Net income in 1989 was $221 million, a decline of 30 percent from 1988. Earnings per share also declined 30 percent to $1.42 from $2.03 in 1988. In the fourth quarter of 1989, net sales increased 6 percent, while net income and earnings per share declined to $6.3 million and $.04, respectively.

The year 1989 and fourth-quarter earnings declines were primarily the result of the continued economic softening in a number of Masco's markets, fourth-quarter reserves and charges related to planned sales and restructuring of certain operations, a reduction in equity earnings, as

well as costs incurred related to the over $1 billion investment Masco has made during the last two years in acquisitions, plant expansions, new product development and long-term profit-improvement programs.

In January 1990, the company sold its recreational accessories and insulation products businesses, with annual sales of approximately $90 million, to TriMas Corporation for $77 million plus future contingent payments.

While the markets for new construction, home improvement and home furnishings products continue to be relatively soft, Masco believes that the recent investments that the company has made in expansion and profit-improvement programs, enhance the company's prospects for record sales and earnings in 1990 and will contribute to significant long-term growth in future years.

Masco Corporation manufactures building, home-improvement and home-furnishings products for the home and family.

PHILADELPHIA, PA (FEB. 16) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) today announced it has established a leveraged Employee Stock Ownership Plan (ESOP) that will be used to fund an improved employee Savings Plan.

The ESOP will be formed with 6.3 million shares of company stock purchased from the William Penn Foundation. It will be financed with approximately $185 million in long-term debt guaranteed by the parent company.

As part of the ESOP program, the company approved an increase from 50 cents to 60 cents in Rohm and Haas's matching contribution for every $1 employees invest in the Savings Plan. Employees of Rohm and Haas currently hold, through the Savings Plan, nearly 4 percent of total shares outstanding. According to Fred W. Shaffer, vice president and chief financial officer, "The ESOP provides a cost-effective method for

employees to increase their participation as owners of the company."

Prior to the transaction, 52 percent of all outstanding Rohm and Haas stock was held by the William Penn Foundation, the company Savings Plan, and the Haas family trusts. The remaining 48 percent is held by other shareholders. This transaction will not change that ratio.

BIRMINGHAM, AL (FEB. 16) PR NEWSWIRE - HealthSouth Rehabilitation Corp. (NYSE: HRC) announced today that it had generated net income of $8,147,000 on revenues of $149,211,000 for the year ended Dec. 31, 1989.

The company's primary earnings per share for 1989 were 76 cents. As compared to its 1988 results, HealthSouth realized a 68 percent increase in revenues, a 42 percent increase in net income, and a 38 percent increase in primary earnings per share.

For the quarter ended Dec. 31, 1989, HealthSouth had revenues of $44,323,000 with net income of $2,521,000 and primary earnings per share of 23 cents. This represents a 70 percent increase in revenues over the prior year's fourth quarter, with a 25 percent increase in net income as compared to the same period. Primary earnings per share for this quarter were 21 percent higher than for the 1988 quarter.

"HealthSouth's operating units had a good 1989," said Richard M. Scrushy, chairman of the board, president and CEO. "During the year, nine new outpatient rehabilitation centers become operational, we opened two new rehabilitation hospitals and acquired the 219-bed HealthSouth Medical Center in Birmingham, Ala."

HealthSouth has 43 locations in 19 states, with more than 3,000 employees. The company's primary focus on comprehensive medical rehabilitation services has enabled it to become a recognized leader in this segment of the healthcare industry. HealthSouth became a publicly traded company in September 1986 (NASDAQ-NMS: HSRC) and listed on the New York Stock Exchange in September 1989.

DANVERS, Mass. (FEB. 16) PR NEWSWIRE - Wheelabrator Technologies, Inc. (NASDAQ: WTI) has announced that Ross M. Patten has joined the company as a managing director for project development. Patten previously served as divisional vice president, corporate projects, at Browning Ferris Industries. At BFI and its joint-venture subsidiary, American Ref-Fuel, Patten had responsibilities for trash-to-energy market development.

At Wheelabrator, Patten will oversee the development of Wheelabrator's awarded, designated and prospective new business opportunities in municipal waste recycling, trash-to-energy conversion and other biomass projects.

Wheelabrator is one of the nation's leading suppliers of integrated recycling/trash-to-energy systems. It serves worldwide markets in the engineering, environmental and manufacturing fields.

JENKINTOWN, Pa. (FEB. 16) PR NEWSWIRE - First American Savings, a wholly owned subsidiary of Flagship Financial Corp. (NASDAQ: FLGF), announced today that it will close three "convenience" offices located inside area Kmart stores, in an effort to maximize the efficiency of its branch office system.

The March 31st scheduled closing will affect offices located in Langhorne, Pa., Berlin and Clementon, N.J., stores. The deposits of each will be consolidated into other First American offices.

John M. Mason, president and chief operating officer, stated, "A recently completed profitability analysis of all nine convenience offices prompted our decision to close these three locations. First American is the only

savings institution in our markets to use convenience branches, a concept that has enabled us to cost effectively test new sites for potential full-service branches. The remaining six locations have demonstrated the ability to support the time and costs needed for further review."

First American Savings, an FDIC-insured savings institution with approximately $700 million in assets, is headquartered in Jenkintown, and currently operates 12 full-service branches and nine convenience outlets in the Philadelphia/South Jersey metropolitan markets.

ROANOKE, VA. (FEB. 16) PR NEWSWIRE - Roanoke Electric Steel Corporation (NASDAQ-NMS: RESC) today announced net earnings for the first quarter ended Janaury 31, 1990, of $1,593,203, or 30 cents per share of common stock, compared to $3,248,889, or 61 cents per share, reported for the first quarter last year. Sales for the first quarter of 1990 were $37,422,015, down from the $39,606,551 reported for the 1989 first quarter.

Donald G. Smith, Chairman and Chief Executive Officer, stated: "The lower sales and earnings reported for the first quarter of 1990 were due primarily to lower selling prices and reduced profit margins for our bar products. The lower selling prices during the quarter were a result of increased competition within the industry due to a softening demand for steel bar products."

Roanoke Electric Steel Corporation is a producer of merchant steel products, consisting of angles, plain rounds, flats, channels and reinforcing bars, which are sold to steel fabricators and steel service centers across the eastern United States. Four subsidiaries are involved in various steel-related activities, consisting of steel scrap production, steel bar joist fabrication and reinforcing bar fabrication.

NYON, Switzerland (FEB. 16) PR NEWSWIRE - Executive TeleCard, Ltd. (PHLX: XTL NASDAQ: EXTL) recorded a profit of $232,168 or $.08 per share for the quarter ended Dec. 31, 1989 as compared to a loss of $545,052 or $.54 per share for the quarter ended Dec. 31, 1988.

At Dec. 31, 1989, cash on hand amounted to $2,573,376 and net worth was $4,632,298.

Robert Roach, chairman and chief executive officer of Executive TeleCard, said that "management is pleased with the results of our sales efforts, the production and installation of our CAVIAR system, as well as, the computer billing support for our credit card customers."

Executive TeleCard, Ltd. has introduced the first truly international telephone credit card called "Executive TeleCard International," and is presently offering its service from approximately 50 countries into the U.S.A., as well as within the U.S.A., and out of the U.S.A. to over 150 countries.

Under the ETL Phase III marketing plan, ETL will be offering its services, in addition to the countries currently being served, within and out of over 15 countries by March 31, 1990 and eventually to over 62 countries currently being served by its affiliate International 800 Telecom Corp. (PHLX: TLL).

Roach said that "the company concluded negotiations with several major credit card companies in the Far East, Canada and Europe, including JCB International Co. Ltd., Air Travel Card, First Card AB Sweden, CartaSi and selected Visa and Mastercard issuers. In addition, the company entered into an agreement with Fintelcom, the long distance international carrier of Finland, to provide CAVIAR equipment for the use of Fintelcom and provide international calling capabilities to their credit card called "Fintelcard."

The existing signed agreements provides access to a customer base of over 17 million card holders. Negotiations are continuing with a number of other major credit card issuers and telephone carriers."

MORRIS TOWNSHIP, N.J. (FEB. 16) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) today asked the U.S. Trade Representative to take action to open the Japanese market to advanced, high technology materials, charging that the Japanese have "targeted" such products for their own dominance.

Allied-Signal said Japanese government and industry have targeted advanced materials, including the company's patented amorphous metal alloys, for exclusive development by Japan. The intent of this activity is to exclude U.S. high-tech companies from participation in multi- billion dollar world markets, the company said.

The company's statements were made in response to the Trade Representative's call for comment on major foreign trade barriers under the Super 301 provision of the U.S. Trade Act of 1974. The act empowers the Trade Representative to take action to open foreign markets.

"The Japanese actions to preclude American companies from these advanced materials markets are a textbook example of Japanese industrial targeting of cutting-edge technology," said Edward L. Hennessy, Jr., Allied-Signal chairman and CEO.

"If they are successful in keeping us out of Japan and continue to

discourage our sales in third countries until our patents expire, they will then drive us out of the business. What has happened to so many other American products will happen to us. We do not intend to let that happen," Hennessy said.

Allied-Signal said Japanese government agencies and businesses working in concert have successfully taken steps to keep the company out of the Japanese market for amorphous metal alloys, a material invented by Allied-Signal and for which it holds hundreds of U.S., European and Japanese patents. Specifically, the company said the Japanese took the following actions:

-- Organized and funded a 34-company "Amorphous Metals Group" under the Japan Research and Development Corporation to speed development of a Japanese product to compete with Allied-Signal.
-- Manipulated the Japanese patent system so that it took 11 years for Allied-Signal's basic patent to issue. During this time, Japanese companies worked to duplicate Allied-Signal's technology. The Allied-Signal patent has just three years of effective life remaining.
-- Pressured Japanese utilities not to buy transformers containing Allied-Signal's product, despite their clear superiority in conserving energy, a national priority in Japan.
-- Discouraged the purchase of Allied-Signal's amorphous alloys in Japan until Japanese companies could develop their own products.
-- Pressured Allied-Signal to license its proprietary technology to Japanese companies on unreasonable terms, backed by the threat of government aid to help evade the company's patents.

Allied-Signal has built the world's first commercial plant to manufacture amorphous metal alloys and has been successful in selling the material in the United States and other countries. It has been stymied in Japan, however, despite more than a decade of marketing efforts through a joint venture with the Mitsui group. The potential world market for amorphous alloys in transformers is $1 billion a year and more than $2.5 billion per year for other applications. In addition, the technology upon which the material is based, also patented by Allied-Signal, is expected to have broad application in the development of additional new materials including those for aerospace and superconductor applications.

WEST ORANGE, N.J. (FEB. 16) PR NEWSWIRE - Micro Healthsystems, Inc. (NASDAQ: MCHS), a manufacturer of bedside terminals which enhance nurses productivity and provide documentation for medical malpractice coverage, announced record revenues and profits for the third quarter and nine months ended Dec. 31, 1989. "Revenues were up approximately 30 percent for the current nine months as compared to the same period last year, and profits were up almost 70 percent. For the quarter, profits more than doubled. Our product continues to prove its value in the marketplace, resulting in increased sales and profits. We expect this trend to continue for the remainder of this fiscal year, ad into the foreseeable future." S. M. Caravetta, chairman and chief executive officer, said.

Revenues for the third quarter rose to $1,830,655 from $1,464,466 in the comparable period the year before. Net income after taxes increased to $203,209, equal to 11 cents per common share on a weighted average of 1,894,203 shares outstanding. This compares with net after tax income of $82,875 or 4 cents per common share on a weighted average of 1,860,494 shares outstanding in the similar period.

For the nine months ended Dec. 31, 1989, revenues increased to $5,137,464 from $4,095,275. Net income rose to $622,217 or 35 cents per common share on a weighted average of 1,788,247 shares outstanding, against $373,263 or 20 cents per share earned on a weighted average 1,860,494 shares outstanding for the nine months a year ago.

LANSING, MI (FEB. 16) PR NEWSWIRE - Maxco, Inc. (NASDAQ: MAXC) announced increased sales and operating income for the third quarter and nine months ended Dec. 31, 1989.

Net sales for the quarter rose 14 percent to $17,835,000 vs. $15,639,000. Operating earnings more than doubled to $429,000, compared to $186,000. Net income for the quarter was $66,000, or 1 cent a share, compared to a loss of $219,000 or 5 cents a share.

For the nine months, sales were up 6 percent to $61,272,000 from $57,819,000 in the year-earlier period. Operating earnings were up 15 percent to $2,568,000, compared to $2,237,000 in the year-earlier period.

Net income was $1,387,000 or 26 cents a share, compared to a loss of $751,000, or 17 cents a share. This year's net was increased by $650,000 for the cumulative effect of an accounting change for income taxes, in line with FASB 96. The prior year's nine months included a $900,000 one-time loss from the sale of a business. There were about 4.9 million common shares outstanding for these reporting periods.

"Our two largest businesses, construction supplies and auto paint distribution, both showed gains," said Max A. Coon, chairman and president. "Construction supplies sales were up 14 percent in the quarter and we are also improving margins in this area with a planned change in sales mix. We expect the fourth quarter to be slow, as it always is in

this seasonal business.

"Since we increased Pak Sak's capacity with the purchase of facilities in Jackson, Miss., we are now emphasizing sales efforts to compensate for the higher overhead. Revenues are up over last year at this time, but we need higher volume to bring Pak Sak back to its typically solid profitability," said Coon.

"Finishmaster, our auto paint distributor, is also showing solid volume growth, at 20 percent and 15 percent for the quarter and nine months.

"Maxco's core financial results are improving as we maintain our focus on the company's strategic plan," said Coon.

Maxco distribution businesses include Finishmaster, Inc., which supplies auto paint and accessories. The construction supplies group markets commercial and highway construction materials throughout Michigan, Wisconsin and Indiana. Wright Plastics, Pak Sak Industries and Akemi Plastic represent smaller portions of Maxco revenues.

RICHMOND, VA (FEB. 16) PR NEWSWIRE - Owens & Minor, Inc. (NYSE-OMI) announced today its fourth quarter and twelve-month results. For the fourth quarter ended December 31, 1989, sales were a record $277.1 million up 45.9 percent from $189.9 million during the fourth quarter of 1988. Earnings for the three-month period were $.3 million as compared to $2.1 million for 1988, a decrease of 88.3 percent. Primary and fully diluted earnings per share for the fourth quarter were $.03 as compared to $.26 for the same period in 1988, a decrease of 88.5 percent.

Sales for the twelve months ended December 31, 1989 were a record $952.9 million, an increase of 30.3 percent from the $731.6 million level for the same period in 1988. Earnings for the twelve-month period were $2.5 million as compared to $8.4 million for the same period in 1988, a decrease of 70.3 percent. Primary and fully diluted earnings per share for the twelve-month period were $.30 as compared to $1.00 for the same twelve months in 1988, a decrease of 70.0 percent. The twelve-month results include a $2.5 million pretax, or a $.17 per share, loss from the

devaluation of foreign gloves which was recorded in the first half of the year.

Owens & Minor, Inc. is a wholesale distributor of medical and surgical supplies, pharmaceuticals and other related products. Through its Vangard Labs and Harbor Medical subsidiaries, the company also packages generic and brand name pharmaceuticals and assembles sterile procedure trays, respectively. Owens & Minor, Inc. is traded on the New York Stock Exchange under the symbol OMI.

#90047p0088 02/16/1990 ~PR Newswire

ATLANTA (FEB. 16) PR NEWSWIRE - National Healthcare Inc. reported net income of $5,000 for the second fiscal quarter ended Dec. 31, 1989, compared to a net loss of $34.9 million or $3.37 per share in the second quarter of the prior fiscal year.

The net loss for the prior fiscal quarter included a charge of approximately $30.2 million for write-down of assets and expenses pursuant to the plan of restructuring under the company's Bank Credit Agreement.

The company noted that operating earnings before corporate interest expense, taxes and, in the prior year quarter, $30.2 million provision for write-down of assets and related expenses were $4.1 million in the second quarter of fiscal 1990, compared to $1.7 million in the corresponding quarter of fiscal 1989.

Operating revenues were $61.1 million in the quarter ended Dec. 31, 1989, compared to $59.5 million in the same quarter a year earlier. The quarter ended Dec. 31, 1988, included revenues of $6.2 million attributable to five facilities held for disposal and one facility disposed of in October 1989. Results of operations of the facilities held for disposal were not included in the company's operating results for the quarter ended Dec. 31, 1989, but were recorded as an adjustment to the company's provision for estimated loss on disposal of facilities.

Interest expense decreased 37.7 percent in the second quarter to $4.4 million from $7.0 million in the corresponding quarter of fiscal 1989 as a result of the lower interest rate and non-interest bearing portion of

notes under its Bank Credit Agreement dated as of Jan. 1, 1989. The quarters ended Dec. 31, 1989, and 1988 included accrued but unpaid interest of $1,387,000 and $1,308,000, respectively, relating to debentures which the company is seeking to restructure. As previously reported, the company has purchased $10.4 million principal amount of its debentures.

Operating expenses, excluding interest and provision for write-down of assets, declined 7.7 percent in the second quarter of fiscal 1990 compared to the same quarter in the prior fiscal year reflecting the disposal or planned disposal of six facilities. Excluding operating expenses of the facilities disposed and facilities held for disposal, the company's operating expenses increased $2.1 million in the quarter, a lower increase than revenues in facilities the company plans to retain.

The company's provision for income taxes, which consists primarily of state income taxes, increased in the fiscal 1990 quarter primarily as a result of hospital operating earnings in states where the company has no tax losses available to offset income.

For the first six months of fiscal 1990, the company reported a net loss of $519,000 or $.05 per share. Operating revenues for the six months ended Dec. 31, 1989 were $119.7 million. For the comparable six months of the previous fiscal year, the company had a net loss of $39.5 million or $3.82 per share, on operating revenues of $119.1 million. The net loss for the six months ended Dec. 31, 1988, included a charge of $30.2 million for write-down of assets and expenses pursuant to the plan of restructuring under the company's Bank Credit Agreement.

National Healthcare Inc. is an Atlanta-based corporation which provides healthcare services to communities through ownership or management of general acute care hospitals and related healthcare services.

ROCHESTER, NY (FEB. 16) PR NEWSWIRE - Xerox Corporation (NYSE: XRX) and IBM Corporation (NYSE: IBM) today announced an agreement to offer Xerox PRO SCAN software, an automated mapping and facilities management (AM/FM) system for utility companies, on IBM's new RISC System/6000 computer workstations.

IBM yesterday announced the RISC System/6000 family, a series of nine high-performance workstations and servers. The workstations are designed to work in heterogeneous, open-system networks with other workstations from IBM and from other manufacturers. They are supported by a variety of

third-party software, including Xerox PRO SCAN.

The Xerox PRO SCAN System is offered with specialized application-software packages for gas, electric and telephone companies. PRO SCAN is designed to simplify a utility company's transition from manual map drafting and record keeping to computerized mapping and asset management, or AM/FM.

PRO SCAN features an integrated raster/vector editing system, offering utility companies a migration path for complete AM/FM implementation. With PRO SCAN, utility companies have the option of incremental, selective or total conversion of map and facilities data.

IBM's RISC System/6000 family contains many features that will optimize the performance of PRO SCAN software, including the industry's most advanced floating point processor and new global superscaler processors.

"We believe RISC System/6000 represents a major breakthrough in meeting IBM utility customer requirements for an integrated AM/FM system platform " said W.I. "Bill" Pittman, president of the Xerox engineering systems division. "And PRO SCAN will enable utility companies to realize immediate payback in their AM/FM implementation.

PRO SCAN will run on IBM workstations utilizing the AIX Version 3 operating system, which was also announced yesterday as IBM's latest version of the UNIX operating system. This new UNIX implementation for RISC System/6000 offers many improved features, such as physical disk space management, advance file system, program management facilities, extended real-time support and enhanced virtual memory.

PRO SCAN was developed in consultation with gas, electric and telephone utilities. Unlike other AM/FM systems, PRO SCAN integrates scanning technology with traditional vector graphic technology. This combination provides an immediate increase in productivity and a practical, cost-effective way to build an intelligent data base of facilities information.

In 45 seconds, an E-size map is entered into the system in raster form by a document scanner, eliminating the time-consuming and costly process of having to redraw every map. Additions and deletions to maps are then entered into the system as vector data, which can be indexed and manipulated electronically.

With PRO SCAN, routine modifications of utility company maps automatically become part of a steadily growing, intelligent data base. This provides a computerized system for document tracking and asset management.

PRO SCAN is designed for easy human interaction, and no previous computer

training is required. A mouse enables users to select commands from pop-up or icon menus, draw lines and edit information on the screen. Familiar drafting tools and industry-specific map symbols are easily selected from system icon menus.

PRO SCAN can also be customized to meet the specific needs of individual companies.

HOUGHTON, Mich. (FEB. 16) PR NEWSWIRE - Upper Peninsula Energy Corporation (OTC: UPEN) reported consolidated net income of $3,753,000 or $2.54 per average common share for the year 1989.

1988 earnings were $3,893,000 or $2.67 per share, of which an extraordinary loss (net of tax) of $290,000 or $.19 per share was attributable to the premium paid for reacquired 16-1/2 percent first mortgage bonds.

For the fourth quarter ended Dec. 31, 1989, earnings were $989,000 or $.67 per share compared to $1,013,000 or $.69 per share for the same period in 1988. Elio Argentati, chairman of the board and president, said that earnings applicable to common stock declined in 1989 due to a full-year effect of reduced electric energy revenue brought about by a base rate reduction effective in September 1988 and a general increase in utility operating expenses.

UPPER PENINSULA ENERGY CORPORATION

	12 Months Ended Dec. 31		Three Months Ended Dec. 31	
	1989	1988	1989	1988
Revenues	$56,080,000	$56,151,000	$14,510,000	$13,611,000
Net income	$3,753,000	$3,893,000	$989,000	$1,013,000
Average shares outstanding	1,478,892	1,460,490	1,483,802	1,468,552
Earnings per share	$2.54	$2.67(a)	$.67	$.69

(a) - Includes extraordinary loss of $290,000 or $.19 per share for the premium paid for the reacquired 16-1/2 percent first mortgage bonds.

WASHINGTON (FEB. 16) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced two new contracts worth approximately $40 million with the Department of Defense and E.I. du Pont de Nemours & Company, Inc. (NYSE: DD).

A contract was awarded to the team of MCI and Contel Federal Systems by the United States Army for the Defense Medical Supply System Communications Network (DMSSC-NET). Under the second new agreement, MCI will provide a range of long-distance services to Du Pont.

MCI and Contel Federal Systems have been awarded a contract to provide a worldwide communications network to the Department of Defense (DoD) Medical Systems Support Center. The five-year contract represents approximately $25 million in new revenue to MCI.

The Defense Medical Systems Support Center (DMSSC) manages information systems for DoD military medical facilities throughout the world. Contel will provide to DMSSC the data communications network to connect more than 400 military facilities in Europe, the Pacific Rim, Alaska, the Caribbean and the continental United States with the DMSSC host computers in Herndon Va. MCI will provide the domestic and international circuits to Contel for DMSSC-NET. The network will allow military hospitals anywhere in the world easy access to the medical records of military personnel.

Under the new Du Pont agreement, MCI will provide a full range of voice and data services estimated at $15 million over the next three years. MCI services included in the contract to Du Pont are: 800 service, MCI Calling Cards and Vnet, MCI's private network service which enables customers to access multiple locations through the use of software-defined customized dialing plans.

Du Pont is a chemicals, specialty products and energy company with more than $30 billion in annual sales worldwide.

MCI is the world's second largest long-distance provider, supplying a full range of voice and data telecommunications services to business and residential customers, as well as a growing number of government agencies. MCI long-distance service enables customers to call throughout the United States and dial direct to 164 nations representing 99 percent of overseas calling from the United States.

MCI Mid-Atlantic serves customers in Pennsylvania, New Jersey, Delaware, Virginia, West Virginia, Maryland and the District of Columbia.

#90047p0100 02/16/1990 ~PR Newswire
MONROE, Conn. (FEB. 16) PR NEWSWIRE - Taunton Technologies Inc. (NASDAQ: TTEK) announced today that it received FDA permission to begin testing an additional group of sighted patients in its clinical study program and has sold a laser corneal sculpting system to the Humana Hospital-Suburban in Louisville, Ky.

Taunton will be treating an additional 25 patients under their Investigational Device Exemption for therapeutic use of the laser. "Patients with such conditions as corneal scars and abrasions, band keratopathy, pterygium and Salzman's dystrophy are candidates for this portion of the study," said John W. Warner, president and CEO of Taunton Technologies.

"Taunton has been conducting clinical studies on sighted myopic patients which use the laser to reshape the cornea and eliminate or reduce their refractive error," he said. "Further, more broadly based studies will be sought to provide definitive data to support a Pre-Market Approval Application."

These studies will be enhanced by an additional testing site at the Humana Hospital-Suburban in Louisville. Warner said, "Taunton recently shipped an excimer laser system for therapeutic and refractive studies under the supervision of Dr. Richard Eiferman, M.D." Warner stated, "We are delighted to have another outstanding corneal surgeon such as Dr. Eiferman join us in the clinical study." Eiferman, who is a member of the company's board of scientific advisors, is professor of ophthalmology at the University of Louisville.

Taunton Technologies was founded in 1986 to develop laser systems for corneal sculpting to be performed on a widespread commercial basis.

DALLAS (FEB. 16) PR NEWSWIRE - Publishers Equipment Corporation today announced that it signed an agreement in principal to merge its large double-width newspaper press business with Motter Printing Press Co.

These combined businesses will operate as a new PEC subsidiary named Motter Corporation.

As part of the transaction, Koenig & Bauer AG of Wuerzburg, Germany, a

major shareholder of PEC, will invest approximately $4.4 million into this newly formed PEC subsidiary.

Evans Kostas, chairman of PEC, stated, "We are very excited at the prospect of combining these two operations and serving our industry with the broadest range of capabilities and products. Motter Corporation will be able to provide a full line of flexo, offset, gravure and letterpress equipment as well as the modernization of existing equipment to the latest methods of production."

Frank Motter indicated that the recapitalization of Motter Corporation will have a positive effect on the existing York operations.

"The strength of our organization has always been its ability to engineer and manufacture quality products. This combination with PEC and K&B allows us to continue this tradition and fully utilize our facilities. We are excited about the future potential and strength that is brought to the marketplace by the new Motter Corporation."

Motter Corporation will be a Dallas-based company with operations in both York, Pa., and Rockford, Ill., employing approximately 500. The combined annualized sales of these two companies is approximately $65 million. PEC will maintain a controlling interest in this corporation.

Publishers Equipment Corporation, a Dallas based public company and its subsidiaries; King Press Corporation, Joplin, Mo.; Solna Web AB, Stockholm Sweden; and Solna Web Inc., Kansas City, Mo., specialize in the design and manufacture of new presses and reengineering of presses to the most modern methods of newspaper production.

#90047p0105 02/16/1990 ~PR Newswire

LOUISVILLE, KY (FEB. 16) PR NEWSWIRE - Capital Holding Corporation (NYSE: CPH) today reported results for 1989's fourth quarter and record earnings for the year. For the fourth quarter the company reported net income of $81.1 million, or $1.70 per commmon share, an increase from the $1.36 per common share for the same period a year ago. Net income for the twelve months was $219.7 million, or $4.62 per common share, an increase of 15.5 percent from 1988.

Earnings excluding realized investment gains and losses and related deferred acquisition cost amortization, were $62.6 million for the quarter. This represented an increase of 21.7 percent from the 51.5 million posted for the fourth quarter of 1988. Comparable results for the twelve months were $212.2 million, up 16.7 percent from the

year-earlier period.

Normalized net income, which averages realized capital gains and losses over 10 years, was $4.62 per common share for the twelve months, an increase of 15.5 percent from one year ago. Normalized return on equity was 17.7 percent for the year.

Revenues for the twelve months were $2.5 billion, up 22.2 percent from the previous year. Full year premium income of $1.0 billion grew 4.5 percent and net investment income climbed 26.9 percent on an increasing asset base. (Complete earnings figures are included on the following table)

Each of the corporation's operating units reported higher earnings. Agency Group's pretax earnings for 1989 were $145.9 million, a gain of 9.6 percent. (Pretax earnings, as reported here, exclude realized investment gains and losses and related deferred acquisition cost amortization.) Life and health premiums and premium equivalents, including Public Savings Insurance and Security Trust Life Insurance which were acquired in the third quarter, increased 7.6 percent. Life and health policy lapse rates continued to improve, and stood at 16.4 percent at twelve months, a further decrease from the 17.8 percent for the year-earlier period.

The corporation offers broad range of financial services and products through agents, direct-marketing media, investment professionals and retail locations. Its comon stock is listed on the New York and Pacific Stock Exchanges under the ticker symbol CPH; its preferred stock is listed on the New York Stock Exchange under the symbol CPHF.

#90047p0106 02/16/1990 ~PR Newswire

PROVIDENCE, RI (FEB. 16) PR NEWSWIRE - George Graboys, president and chief executive officer of Citizens Financial Group, Inc., (NASDAQ: CITN) Providence, R.I., and Harold Cabot, president and chief executive officer of BankWorcester Corporation (NASDAQ: BNKW), Worcester, Mass., today announced the signing of a definitive agreement for Citizens Financial Group to acquire BankWorcester.

The agreement is subject to satisfaction of a number of significant conditions, including approval by state and federal regulatory agencies and by shareholders of BankWorcester, as well as conditions based on the level of BankWorcester's nonperforming assets and certain other specified amounts.

Under the agreement, Citizens Financial Group would acquire all of the

outstanding common stock of BankWorcester at a price of $22.50 per share, representing a total purchase price of approximately $149 million. BankWorcester has also granted to Citizens Financial Group an option exercisable under certain circumstances to purchase up to 19.99 percent of BankWorcester's common stock at $15.75 per share.

Under the agreement, BankWorcester will pay the previously declared 25 cents quarterly dividend on April 6, 1990, to stockholders of record on Feb. 23, 1990, but will not pay further dividends.

Citizens Financial Group, a wholly owned subsidiary of The Royal Bank of Scotland Group plc, is a $3.1 billion regional bank holding company based in Rhode Island. Citizens' current banking subsidiaries, Citizens Savings Bank and Citizens Trust Company in Rhode Island, and Fairhaven Savings Bank in Fairhaven, Mass., operate through 35 branches and have approximately 1,300 employees. Citizens Financial Group also owns Gulf States Mortgage Co., Inc., headquartered in Atlanta, Ga., and, through its banking subsidiaries, has loan production offices in Massachusetts and Maine.

BankWorcester operates principally through its subsidiary, Worcester County Institution for Savings, which has total assets of $1.2 billion with 17 branches and approximately 470 employees.

Graboys described the proposed acquisition as "a significant step in the continuing, controlled growth of our banking business in New England."

Noting that Worcester is New England's second largest city, Graboys added, "Worcester County Institution for Savings is a quality bank that can trace its origin back to 1828, the same year that Citizens was founded. Most importantly, WCiS is a leader in its market area. After the acquisition, we expect that WCiS will be able to take advantage of the greatly expanded resources available to it through Citizens Financial Group."

"We are also particularly pleased that Harold Cabot has agreed to continue following the acquisition, as chief executive officer of Worcester County Institution for Savings and to serve on the board of directors of Citizens Financial Group," Graboys said.

Cabot termed the proposed merger, "an excellent opportunity for BankWorcester's shareholders, customers and employees."

"Citizens Financial Group is a premier regional financial services company. They have an exceptionally strong balance sheet and can offer us expertise in expanding our product line consistent with our shared philosophy of managed, sensible growth," Cabot added.

CONTACT: George Graboys, 401-456-7477 or Kenneth E. Hogberg, 401-456-7570,

both of Citizens Financial Group; or Harold Cabot or Dennis Byrne, 508-831-4000, both of BankWorcester Corporation.

#90047p0117 02/16/1990 ~PR Newswire

TORONTO (FEB. 16) PR NEWSWIRE - The unaudited financial results of Seabright Explorations Incorporated for the six months ended Dec. 31, 1989 are as follows:

Net loss was $1,114,765 compared with a loss in the same period in the previous fiscal year of $7,089,074. Net loss per share amounted to 10 cents compared with net loss of 69 cents for the same period last year.

Net sales revenue was $18,629 and other income totalled $284,517. The same figures for the previous corresponding period were $23,189 and $131,027.

The company has acquired three claim blocks in the Cape Breton Highlands of Nova Scotia. On one of these, Indian Brook, a grab sample from a mineralized shear zone taken during initial reconnaissance, returned an assay of 0.827 oz/ton Au. Follow-up chip sampling in the same area returned low Au values. These results indicate an area of new gold mineralization which the company will pursue during the next field season. The company has also optioned a block of ground from Tri- Explorations Limited in the Cape Breton Highlands and has staked claims in both the Antigonish Highlands and Cobequid Highlands. All of this ground is prospective for gold, and are areas in which the company will continue with field work.

The final analysis of the geological resource of the Touquoy deposit at Moose River shows 1.9 million tons at an average grade of 2.09 gms/ton, using a cut-off of 1.0 gms/ton. A preliminary analysis of the open-pittable potential of the deposit suggests that it can be mined with a stripping ratio of 1.5 to 1.0 but that the deposit is presently too small to be economic. The potential presence of additional near- surface ore in the general Moose River area is considered excellent. A program of diamond drilling, blast-hole drilling, stripping and trenching has been proposed to test this potential and a joint venture partner is being sought to finance this work.

At least three good geophysical targets with lead, zinc, silver massive sulphide potential have been developed in the Armstrong Brook area in the Bathurst camp of New Brunswick. This exploration is a 50/50 joint venture with Acadia Mineral Ventures Limited. Diamond drilling will be proposed to test these targets.

The company continued to finance its activities from internal funds. Total funds at Dec. 31 amounted to $1,856,078, equivalent to 16 cents per share.

#90047p0119 02/16/1990 ~PR Newswire

INDIANA, PA (FEB. 16) PR NEWSWIRE - National Mine Service Co. (NMS) (NYSE: NMS) and Anderson Mavor Investments Limited, a wholly owned subsidiary of Anderson Group PLC, which has held approximately 51.2 percent of NMS's shares since 1983, have announced today that Anderson has made a proposal to the board of directors of NMS whereby Anderson would acquire all of the remaining NMS shares not owned by Anderson at a cash price of $8.50 per share.

Anderson's proposal is subject, among other things, to the approval of the transaction by a special committee of the board of NMS and its favorable recommendation to the stockholders. The board has formed a special committee to evaluate the terms of Anderson's proposal composed of directors who are not employed by the company or affiliated with Anderson. The special committee has retained Parker/Hunter Inc. as its financial advisor. There are no assurances as to whether, when, or on what terms Anderson's proposal will be consummated.

#90047p0121 02/16/1990 ~PR Newswire

DULUTH, GA. (FEB. 16) PR NEWSWIRE - Wegener Corporation (NASDAQ: WGNR) today announced that a loss is expected for the second quarter of fiscal 1990, which ends March 2.

The earnings of the company have been adversely impacted by a production slowdwon experienced by Wegener Communications Inc. (WCI) during the first two months of the quarter. The Company believes that the problems that caused this slowdown are being solved as production efficiencies improve. The sales and earnings of the Company are also being significantly impacted by a seasonal slowdown in the service business of its Denver-based subsidiary Telecrafter Services Corp. (TSC).

According to Wegener President Bob Placek: "This is a tough year for the corporation. The implementation cost of the 'Total Quality Control' (TQC) and 'Just In Time' (JIT) is high and will impact earnings throughout the year. However, we believe the improvements in quality, margins, inventory levels, and manufacturing cycle times that will accrue to us

over the long term justify this investment. The volume of future orders and the successful implementation of the (TQC) and (JIT) programs are major factors in determining the future growth and profitability of the Company."

Placek also stated that, "As a result of the adoption of the TQC and JIT manufacturing concepts used by world class international and progressive domestic manufacturing companies, product quality has been dramatically improved and production output is increasing."

Wegener's international presence continues to be expanded this quarter as new orders are received from Peru, Brazil, Germany, Italy, Canada, and Japan. Wegener has also begun to receive royalties from over-seas manufacturers licensed to incorporate Wegener audio technology in consumer satellite receivers. These receivers are initially being used on the ASTRA direct broadcast satellite (DBS) programming network available to households throughout Europe. Manufacturers include well known consumer electronics companies such as Sanyo and NEC. The ASTRA system, which is broadcast in stereo and multiple languages, is the first DBS programming service to officially adopt Wegener noise reduction techniques to transmit the audio portion of its signal.

Wegener Corp., through its wholly owned subsidiaries, designs and manufactures equipment for the business broadcast, data communications, and broadcast radio and television industries. It is also a major supplier of both products and services to the cable television industry.

WARMINSTER, PA (FEB. 16) PR NEWSWIRE - Fischer & Porter Co. (AMEX: FP) today announced earnings per share of 62 cents for the year 1989 compared to a loss of 84 cents per share for 1988.

The 1989 net income was $3,507,000 compared to a net loss of $3,895,000 in the prior year. Sales of $225,324,000 in 1989 were 8.3 percent higher than the $207,998,000 reported for 1988. The increase in sales occurred both in the United States and International. The reported increase in sales would have been approximately $5 million more if exchange rates were comparable in both years. The increased sales along with higher profit margins worldwide were the principal factors contributing to the improved results. Income before taxes increased $9,798,000 over the pretax loss reported in 1988. Excluding the special charge of $3.3 million in 1988, by comparison, pretax income increased nearly $6.5 million.

For the fourth quarter of 1989, earnings per share were 38 cents and net income was $2,017,000 on sales of $60,664,000. The comparable period in 1988 resulted in a loss of 69 cents per share or a $3,416,000 net loss on sales of $56,578,000. The 1988 fourth quarter included the special charge mentioned previously. The increase in sales was equally split between the United States and International. Higher profit margins, particularly in the United States, were the major contributors to the improvement in the results. Also, certain units which had incurred losses during the year were profitable in the fourth quarter of 1989 which produced a more reasonable effective tax rate of 41.3 percent for the quarter.

Orders received during the fourth quarter of 1989 were $56 million, an increase of 9.8 percent compared to $51 million during the same quarter in 1988. Orders for the entire year 1989 were $226 million compared to $204.5 million reported in 1988. The bulk of the increase in orders for the year and the quarter occurred in the United States. The backlog of unfilled orders was $61.5 million at Dec. 31, 1989, and $61 million at Dec. 31, 1988.

The company also announced today that the board of directors has declared a 5 percent stock dividend on the outstanding common and Class B capital stock of the company, payable April 17, 1990, to shareholders of record March 13. The reported earnings per-share amounts include the effect of

this stock dividend.

Fischer & Porter Co. designs, engineers, manufactures and sells instruments, systems, maintenance services and replacement parts for the measurement, recording and control of various processes. The company's products are sold to such diverse markets as chemical, pulp and paper, food, pharmaceutical, metal, mining and to municipal and industrial water, wastewater and sewage treatment plants.

HOUSTON (FEB. 16) PR NEWSWIRE - Enron Oil & Gas Company (NYSE: EOG) today reported total proved reserves at year-end 1989 of 1.561 trillion cubic feet (Tcf) of gas equivalent compared to 1.463 Tcfe at year-end 1988.

"The past year was very successful for Enron Oil & Gas," said Forrest E. Hoglund, chairman and chief executive officer. "We replaced 179 percent of our annual natural gas equivalent production through drilling and development activities primarily in our core areas of Matagorda, Big Piney and South Texas. And we were able to replace this production at finding costs of less than 65 cents per thousand cubic feet, a figure significantly below the industry average. Including acquisitions, reserve additions amounted to roughly 200 percent of production."

As in 1988, EOG retained the independent engineering firm of DeGolyer and MacNaughton to evaluate the oil and gas fields comprising the top 75 percent of EOG's reserves. For the second consecutive year, DeGolyer and MacNaughton's estimate of the reserves for the properties reviewed is within 5 percent of EOG's internal estimate when compared on a natural gas equivalent basis.

About 91 percent of EOG's reserves are natural gas and 91 percent are

located in the United States with the balance in Canada.

"In 1990 we will continue to supplement strong production growth from our core properties with strategically aggressive exploitation and exploration efforts," Hoglund said.

EOG's capital and exploration expense budget, which was about $233.6 million in 1989, will be approximately $256.5 million in 1990. Domestically, about $216 million will be spent in exploration, development and related activities both offshore and onshore. Approximately $40 million will be spent in Canada and other international areas. Capital expenditures in 1990 are expected to be essentially funded by internally-generated cash flow.

Enron Oil & Gas Company is one of the largest independent (non-integrated) oil and gas companies in the United States in terms of domestic proved reserves. The company's reserve base is 91 percent domestic and 91 percent natural gas.

LOS ANGELES (FEB. 16) PR NEWSWIRE - National Mercantile Bancorp (NASDAQ: MBLA), the holding company for Mercantile National Bank, said today that it has completed the sale at $11 per share of 287,615 shares of its common stock to a California limited partnership associated with Creative Artists Agency Inc., and 261,330 shares to clients and affiliates of the business management firm of Breslauer, Jacobson, Rutman & Sherman Inc. These sales represent part of the company's earlier announced plans to sell 654,500 shares at $11 per share to investors in the entertainment and related industries. National Mercantile Bancorp also said that it anticipates completing the sale of the remaining 105,555 shares to the additional investors prior to the end of the first quarter of 1990.

Anticipated proceeds received from these sales of approximately $7.2 million will be used to finance growth in Mercantile National Bank's three principal markets. These include the entertainment industry, small to mid-sized commercial and industrial companies, and the real estate sector, including escrow and title companies.

When all the sales are completed, National Mercantile Bancorp will have approximately 3 million shares outstanding.

Mercantile National Bank, member FDIC, is an independent commercial bank with offices in Century City and Irvine, Calif., and more than $300 million in total assets. The bank offers a wide range of financial services to business, including special services geared to middle market companies, the entertainment industry, the real estate community, professionals, high net worth individuals and the escrow and title insurance industries.

WASHINGTON (FEB. 16) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced that it has been selected to serve as Chrysler Corporation's (NYSE: C) major provider of communications services.

Under a three-year agreement, MCI will provide Chrysler with a comprehensive array of voice and data communications services linking the company's over 500 offices, manufacturing, assembly, and distribution facilities across the continental United States, Hawaii, Puerto Rico and Canada.

Voice services to be provided by MCI include MCI Vnet, a virtual private

network, MCI 800 service and customized MCI Vnet Calling Cards; data services include TDS 1.5 (terrestrial data service), DDS 56 (digital data service), analog point-to-point data, and analog multi-point data.

In addition, MCI will be responsible for the overall management of Chrysler's communications network and will provide the company with one of the country's most sophisticated customized billing systems.

"Fifteen years ago, Chrysler became MCI's first major customer in Detroit. We are especially pleased to have been able to expand upon Chrysler's confidence in MCI's products and services over time, resulting in today's major announcement," said Bert C. Roberts Jr., president and chief operating officer of MCI.

Chrysler Corporation, headquartered in Highland Park, Mich., is a diversified multi-billion dollar company involved in automotive and aircraft manufacturing, electronics and financial services.

MCI, headquartered in Washington, provides a full range of global telecommunications services to businesses, residences and governmental agencies. The company owns and operates the world's second-largest communications network, employing advanced fiber optics, digital microwave satellite and digital switching technologies.

LOS ANGELES (FEB. 16) PR NEWSWIRE - Frederick's of Hollywood Inc. (AMEX: FHO) today announced that John B. Hatfield has been promoted to executive vice president.

Hatfield, 46, previously was senior vice president of Frederick's. He retains his responsibilities as chief financial officer and administrative officer, reporting directly to George W. Townson, chairman and chief executive officer.

Prior to joining Frederick's in May 1986, Hatfield was vice president of finance and operations for deJong's, a division of Hart Schaffner and Marx based in Evansville, Ind. He previously held financial executive positions with the Sunset House division of Carter Hawley Hale, The Popular, and May Department Stores. Hatfield holds a bachelor of science degree in accounting from the University of Evansville and is a Certified Public Accountant.

"John Hatfield's understanding of the retail and mail order business has

allowed us to develop important systems that have had a favorable impact on the company," said Townson. "His insight and analytical ability will continue to be important assets to Frederick's in the future."

Frederick's operates 160 specialty apparel stores in 35 states and a mail order division that serves customers in all 50 states.

CANOGA PARK, CA (FEB. 16) PR NEWSWIRE - New Image Industries Inc. (NASDAQ: NIIS) announced today that it had filed a registration statement with the Securities and Exchange Commission covering an aggregate of 1,100,000 shares of its common stock.

Of the shares offered, 1,000,000 are being offered by the company and 100,000 are being offered by certain selling shareholders. The net proceeds of the shares offered by the company will be used to open regional headquarters in the United Kingdom, France, West Germany and the Netherlands; to promote New Image Industries Inc.'s plastic surgery and cosmetic dentistry systems; to develop and promote the company's Intra-Oral Video Camera; for research and product development; and for general corporate purposes, including working capital and including the financing of possible future acquisitions.

The proposed offering is expected to become effective in late March 1990. H.J. Myers & Co., Inc. will be the managing underwriter of the offering.

New Image Industries Inc. designs, assembles and markets a family of computer imaging products that enable users to visually communicate to prospective clients the results of their proposed services prior to the time their services are performed. New Image Industries Inc. believes that it is the largest supplier of integrated computer imaging systems designed to facilitate the marketing of services and products to those industries to which the company is currently marketing its products.

This does not constitute an offer to sell or a solicitation to buy securities of New Image Industries Inc. Any such offer will be made only by a prospectus filed as part of a registration statement declared effective under the Securities Act of 1933, as amended.

BASKING RIDGE (N.J. FEB. 16) PR NEWSWIRE - As part of a continuing consolidation and cost control program, AT&T announced today a plan to phase out five of 12 data processing offices around the country.

The company said the cutback is part of a plan to concentrate its internal data processing for accounting, marketing and engineering organizations in a half-dozen states. When completed, the plan will save AT&T more than $70 million a year.

By 1992, data operations, run by the company's information management services (IMS) organization, will close in Cincinnati, Ohio; Greensboro, N.C.; Hamilton Township, N.J.; Oakton, Va., and Fairhaven, Mass. Whenever possible, employees in the approximately 1,000 jobs in these locations will be offered a variety of options, ranging from reassignment and relocation to retirement. Layoffs will be a last resort, the company said.

The remaining data offices will be in Denver; Alpharetta, Ga.; Kansas City Mo.; Mesa, Ariz.; Orlando, Fla.; Bridgewater and Knightsbridge, N.J.

Since 1987, similar operations at 10 other AT&T sites have closed. Today, there are 7,400 IMS employees, down from 7,700 three years ago.

AT&T has 283,000 employees worldwide, including 16,000 abroad.

#90047p0171 02/16/1990 ~PR Newswire
CALGARY, ALBERTA (FEB. 16) PR NEWSWIRE - Bow Valley Industries Ltd. (AMEX: BVI) announced today that funds generated from operations for the year 1989 rose to $182.3 million from $148.8 million, an increase of 22 percent over the previous year.

The increase was primarily a result of improved contributions from oil and gas operations and lower Indonesian cash taxes. Net income for the year was $25.7 million compared with $10.3 million in 1988 with the increase attributable largely to the improved operations and a decline in depreciation and depletion rates.

In 1989, Bow Valley's oil production averaged 34,484 barrels per day compared with 38,375 barrels per day in 1988, because of production declines from the Technical Assistance Contract in Indonesia and from the South Brae field in the United Kingdom sector of the North Sea as well as an extended maintenance shutdown on the Brae/Forties pipeline system

during the second quarter of 1989.

The decline was partially offset by the start of production from Central Brae in September 1989, the third Brae field to be developed. Total oil production in 1990 is expected to increase primarily as a result of higher production at Brae as Central Brae reaches peak rates and produces for a full year.

Gas production increased by 27 percent in 1989 to 179.2 MMcf per day from 141.2 MMcf per day in 1988. The increase reflects the impact of a full year of production from the Hatton property of southwestern Saskatchewan which was acquired April 1, 1988 and the adjacent Bigstick property which was acquired effective Jan. 1, 1989. In 1989, approximately 56 percent of Bow Valley's gas production was from these southwestern Saskatchewan fields.

#90047p0173 02/16/1990 ~PR Newswire

IRVINE, CA (FEB. 16) PR NEWSWIRE - Michael W. Hogarty, president of International Food and Beverage Inc., announced today that the company has completed a second round financing package with BT Capital Corp., a wholly owned subsidiary of Bankers Trust of New York Corp. The transactions include the sale for $600,000 of subordinated notes and warrants and the granting of an option to BT for the purchase of an additional $1,400,000 of subordinated notes and warrants under the same terms. The option expires Sept. 30, 1990. In addition to these transactions the company continues to seek additional financing to fund operations and construction debt obligations.

Interest on the notes is 13 percent annually with interest payment deferred until May 1991 and a single payment of principal due in May 1997. The warrant associated with the $600,000 note entitles BT to acquire for 50 cents per share 5.14 percent of the company's common stock on a fully diluted basis. If BT exercises its option to purchase up to $1,400,000 of additional notes and warrants, BT would be entitled to acquire for 50 cents per share up to 12 percent more of the company's common stock on a fully diluted basis.

In May 1989, the company granted to BT a warrant to purchase common stock which adjusts depending on the company's financial performance in fiscal 1991 and 1992. As part of the current transaction, the company agreed that, to the extent the original warrant is adjusted to include the contingent shares provided therein, then the exercise price of those contingent shares only will be adjusted, pro rata, from 50 cents to 10

cents per share. The target quantity of shares BT is entitled to purchase under the original warrant remains exercisable at 50 cents per share.

The company (a Delaware corporation with common stock traded over-the-counter) manufactures and markets fully prepared, quick- serve frozen pizza products especially formulated for foodservice and institutional customers. The company's products are sold nationally under the Mama Mia HomeStyle(tm) Pizza label to foodservice operators, caterers and restaurants through a network of independent distributors.

NEW YORK (FEB. 15) PR NEWSWIRE - Sir Gordon White, chairman of Hanson Industries, the U.S. arm of Hanson PLC (NYSE: HAN), announced today that an affiliate of Hanson has signed a contract with the Boeing Company, Bechtel Investments Inc., and Eastern Enterprises, to buy their 45.03 percent shareholding in Peabody Holding Company, Inc. The purchase price is approximately $504 million in cash.

The transaction is subject to customary regulatory approvals and to consent by Peabody's lenders and Newmont Mining Corporation.

Peabody Holding Company, Inc., is the nation's largest coal producer, producing approximately 87 million tons in 1989, or 9 percent of all the coal mined in the United States. The company operates in all major American coal fields, with surface and underground mines located in Arizona, Colorado, Illinois, Indiana, Kentucky, Montana, Ohio, Oklahoma, West Virginia and Wyoming. Its total coal reserves are approximately 8.7 billion tons.

Sir Gordon stated, "Peabody's coal business represents an attractive investment. In the United States today, over half the electricity produced comes from coal, and it is far more abundant than petroleum. With the new and more efficient technologies being perfected for both mining and burning coal, this is a source of energy upon which America can rely well into the future."

Newmont Mining Corporation is the other major shareholder of Peabody Holding Company, with a 54.97 percent shareholding. Hanson owns a 49 percent interest in Newmont Mining, which Hanson acquired as part of its August 1989 acquisition of Consolidated Gold Fields PLC.

For the fiscal year ended Dec. 31, 1989, Peabody Holding Company recorded unaudited pre-tax profits of $136.5 million on sales of $1.74 billion. Net asset value is $621.9 million.

Hanson PLC is a British-American industrial management corporation. In the United States, Hanson Industries' operations include SCM Chemicals, Ames Tools, Universal Gym, Grove Cranes, Endicott Johnson and Frye Footwear, Carisbrook Industries, Hanson Lighting Group, Kaiser Cement, MW Windows, Jacuzzi Whirlpool Bath and Spa Products, Farberware Cookware, and Gold Fields Mining, among others.

In the United Kingdom, Hanson's holdings include Imperial Tobacco, Consolidated Gold Fields, Every Ready Batteries, London Brick and Butterley Brick, and Smith Meters.

RICHMOND, VA. (FEB. 16) PR NEWSWIRE - The board of directors of Dominion Resources, Inc. (NYSE: D) today declared a quarterly dividend on its common stock of 83 cents per share payable March 20 to holders of record at the close of business March 1.

This is the 248th consecutive dividend that Dominion Resources or its major subsidiary, Virginia Power, has paid holders of common stock. Dominion Resources' last quarterly dividend was declared October 28, 1989.

Virginia Power's board of directors also declared regular quarterly dividends on its 18 series of preferred stock. Dividends are payable March 20 to holders of record at the close of business March 1.

The Dominion Resources board also declared March 1 as the record date for shareholders eligible to vote at the annual meeting April 20. The company intends to mail proxy materials to shareholders on or about March 16.

#90047p0186 02/16/1990 ~PR Newswire

MELBOURNE (FEB. 16) PR NEWSWIRE - The board of directors of Western Mining Corporation Holdings Limited (NYSE: WMC) today announced an equity profit after tax of A$210.8 million (US$167.2 million(A)) for the six months ended Dec. 31, 1989, an increase over the corresponding six months last year of 3.4 percent.

Equity earnings per share was 24.3 Australian cents (19.3 US cents) compared with 24.0 Australian cents previously.

The increased profit was derived from sales of A$661 million (US$524 million) which were 28 percent higher than in the previous corresponding period.

The principle reason for the increase in equity profit was the continued excellent performance of Alcoa of Australia which contributed A$160.5 million (US$127.3 million) in the six months compared with A$81.9 million in the previously period, more than offsetting lower results from nickel and gold.

Ton of nickel sold were 18.5 percent higher but the price in U.S. dollars were 11.1 percent lower and costs were 8.1 percent higher, the latter due partly to start-up costs and Leinster.

Equity gold production from managed gold mines increased by nearly 8 percent over the corresponding period to 404,230 ounces but the average spot gold price fell by 5.4 percent. Gold hedging activities and a reduction of 6 percent in operating costs reduced the full impact of the lower spot gold prices.

The group's balance sheet remains very strong. Capital expenditure for the six months was just on A$200 million (US$158 million) equally divided between capital development at various mining and petroleum operations and new plant and equipment at those operations. Exploration expenditure was nearly A$50 million (US$39 million) for the six months.

Directors have declared an interim dividend of 13 Australian cents (US$0.10) for those shareholders who have elected to receive an unfranked dividend and 11.05 Australian cents (8.7 U.S. cents) for those shareholders who have elected to receive a fully franked dividend.

ANNANDALE, VA. (FEB. 16) PR NEWSWIRE - Ameribanc Investors Group (NASDAQ-NMS: AINVS) announced that its board of trustees had unanimously determined to cease, at this time, its active efforts to sell the company in view of the current market conditions for financial institutions.

These active efforts are to be resumed once these market conditions have improved and the company has completed the restructuring operations begun in 1989. The executive committee will continue to consider any acquisition proposal received by the company.

The board of trustees also unanimously approved an amendment to the standstill provisions of its memorandum of understanding with its major shareholder, Ameribanc Investors Group Voting Trust, to permit the voting trust to increase its ownership of shares of beneficial interest of the company by up to 300,000 shares, or approximately 5 percent of the total outstanding shares of the company. The voting trust currently owns beneficially approximately 37 percent of the total outstanding shares of the company.

A 3 percent stock dividend was declared for stockholders of record as of March 9, 1990, to be paid on April 10, 1990. Arthur Weid, chairman and president of Ameribanc Investors Group, remarked, "In view of the increased capital requirements of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), Ameribanc has determined that it would be prudent, at this time, to discontinue the payment of cash dividends." Weid added: "Ameribanc currently meets all three of the capital requirements mandated by FIRREA and anticipates that it will be able to meet the increases called for in the legislation in the time limits stipulated in the law. This interruption of cash dividends will be reviewed on an annual basis."

Ameribanc's restructuring efforts are geared toward increasing core deposits while simultaneously keeping total assets constant by reducing the amount of borrowed funds utilized in banking operations. Ameribanc will concentrate on originating residential mortgage loans and increasing the lending services available to the area's consumers. Ameribanc's goal is to become a family consumer bank.

Ameribanc Investors Group is the holding company for Ameribanc Savings Bank, a $1.3 billion asset bank headquarted in Annandale and operating 37 branch offices in Northern Virginia, Hampton Roads and Charlottesville, Va. Ameribanc's earnings for 1989 totaled $7.2 million, or $1.13 per share, on a fully diluted basis.

#90047p0188 02/16/1990 ~PR Newswire

DEARBORN, MI (FEB. 16) PR NEWSWIRE - Ford Motor Company Chairman Donald E. Petersen announced today that the average amount of 1989 profit sharing each of Ford's eligible U.S. employees will receive March 8 should be about $1,025.

Speaking to employees at plants and offices across the country via videotape on closed-circuit television, Petersen said, "Each and every one

of you is to be congratulated for a job well done during difficult times."

Petersen, who retires from Ford March 1, said despite Ford achieving in 1989 its highest U.S. car market share (22.3 percent) in 11 years and leadership in U.S. truck sales for the fourth consecutive year, other factors contributed to profit sharing being lower this year than last year. "Higher marketing costs, lower vehicle production and increased costs for new products were the principal reasons for the profit decline," he said.

Under terms of the Ford-UAW labor agreement, profit sharing is tied to U.S. automotive profits, excluding the profits of certain U.S. subsidiaries.

Ford reported Thursday that its U.S. automotive profits in 1989 were $1.1 billion, down $1.4 billion from 1988.

Ford Vice Chairman Harold A. Poling, who will succeed Petersen when he retires, also appeared on the videotaped announcement, thanked employees for their contribution and Petersen for his leadership, and underscored the challenges ahead.

"Our goal is to make Ford the most competitive auto company in the world," Poling told employees. "This goal can be achieved only if we continue to build upon our commitment to teamwork."

This year's profit-sharing payout will total $166 million. It will mark the seventh consecutive year in which profit sharing has been paid at Ford with a cumulative distribution of nearly $2.3 billion.

Employees have received $13,200 in average profit-sharing payments since the plan was implemented in 1983. Average profit-sharing payments have been $400 in 1983, $2,000 in 1984, $1,200 in 1985, $2,100 in 1986, $3,700 in 1987, and $2,800 in 1988.

Profit sharing was first negotiated between the company and the UAW for hourly employees, effective for 1983, as part of the 1982 national labor agreement. It also was provided to eligible salaried employees below bonus level at the same time.

Ford's profit-sharing plan generates payments when pre-tax U.S. profits exceed a specified percentage of sales in the company's U.S. operations, as defined in the plan. Eligible hourly and salaried employees below bonus level and with at least one year of service before Dec. 1, 1989, will receive payments. This includes certain employees who were on layoff part of the year or who retired during the year.

BENIHANA NATIONAL CORP.
(Unaudited)

Quarter ended	12/31/89	1/1/89
Net restaurant sales	$8,466,071	$7,980,758
Other income	61,330	62,457
Net revenues	8,527,401	8,043,215
Restaurant costs & expenses	7,511,794	7,307,602
Income before income taxes	251,808	494,833
Income tax (provision) benefit	(16,619)	65,254
Net income	235,189	560,087(A)
Net income per common share:	$.04	$0.09(A)
Average shares outstanding	5,729,111	5,729,111
Three quarters ended	12/31/89	1/1/89
Net restaurant sales	$28,891,384	$25,877,005
Other income	281,344	192,901
Net revenues	29,172,728	26,069,906
Restaurant costs & expenses	25,841,898	23,164,757
Income before income taxes	1,085,600	1,284,885
Income tax (provision) benefit	(66,984)	169,424
Net income	1,018,616	1,454,309(A)
Net income per common share:	$.18	$ .25(A)
Average shares outstanding	5,729,111	5,729,111

(A) Includes non-recurring gain of $378,052 from disposition of Big Splash restaurant.

"Results for the current year's third quarter and three quarters are better than those for the same periods of the prior year, if the one- time gain resulting from the disposition of the Big Splash restaurant and the income from the tax benefit are eliminated from last year's results," Joel Schwartz, president, said. "Such elimination would have reduced last year's per-share income to 2 cents per share for the quarter and 16 cents per share for the three quarters.

"Restaurant sales continue to rise, as they have for seven consecutive years, and we are pleased with the gains achieved in operating income. We are confident that fiscal 1990 will be a record year for restaurant sales " he said.

WASHINGTON (FEB. 16) PR NEWSWIRE - The Resolution Trust Corporation (RTC) today was appointed conservator for Franklin Savings Association, Ottawa, Kan., by the Office of Thrift Supervision (OTS).

Franklin Savings will maintain normal business hours and operations under an RTC-appointed managing agent while the RTC negotiates a permanent resolution for the troubled thrift.

As of year-end 1989, Franklin Savings had approximately $11.4 billion in assets and $11 billion in liabilities, including $4.7 billion in 154,423 deposit accounts. Deposits continue to be federally insured.

As part of today's action, John Carr was appointed RTC managing agent of Franklin Savings Association. Carr formerly served as chief executive officer of Gibraltar Savings, Beverly Hills, Calif., and as president of several troubled thrifts in California, Maryland and Oklahoma. He has a total of 28 years of experience in the banking industry.

The RTC today also retained Hyperion Capital Management, Inc. and Ranieri Wilson & Co. Inc. These firms will provide certain advisory services related to the management and condition of Franklin's securities portfolio including futures and related financial assets and liabilities.

At RTC conservatorships, managing agents are responsible for minimizing operating losses, limiting growth, and ensuring that operations are conducted in a safe and sound manner. They work to conserve assets and preserve banking services to deposit and loan customers at the thrifts.

The RTC was established under the Financial Institutions Reform, Recovery and Enforcement Act of 1989.

#90047p0197 02/16/1990 ~PR Newswire

NEW YORK (FEB. 16) PR NEWSWIRE - BFS Bankorp, Inc. (NASDAQ: BFSI) today announced that the preliminary results of the election contest involving the First Capital Group show that the group's nominee, James B. Rosenwald, III, is leading in votes for one of the two open seats on the company's board of directors. These preliminary results are subject to further review by the parties to the contest, as well as being subject to the outcome of litigation previously instituted by the company alleging violations by the First Capital Group of the federal securities and banking laws, including the federal proxy solicitation rules.

James A. Randall, president and chief executive officer of BFS Bankorp, stated that "the company believes that the results may be tainted by First Capital Group's actions and that the company intends to vigorously pursue the litigation." Randall pointed to the company's continuing strong performance under its current board of directors.

BFS Bankorp, Inc. is the parent holding company of Bankers Federal Savings FSB, a SAIF-insured savings bank headquartered in New York City.

#90047p0201 02/16/1990 ~PR Newswire

HOUSTON (FEB. 16) PR NEWSWIRE - U.S. Videotel, the Houston-based provider of videotex services, announced today that it would expand its Houston market area into surrounding counties and calling areas with the expiration in March of Southwestern Bell's trial period for its Sourceline videotex network in Houston.

Mark Swank, president of U.S. Videotel, said the company would begin immediately to offer its own information services package to current

Sourceline customers on a monthly subscription basis. The USV subscriber package includes additional interactive services that were not available to Sourceline customers.

U.S. Videotel, with other videotex suppliers, had been under contract to provide information services to Sourceline for the one-year trial period, which will expire March 21 per Southwestern Bell's agreement with the Federal Communications Commission. U.S. Videotel currently has more than 23,000 users in Houston and the Dallas/Fort Worth metroplex.

"We consider the Southwestern Bell trial a successful project and credit it with introducing videotex electronic information services to thousands of Houstonians," said Swank, "But this means that our videotex services will now be available to many more consumers in Southeast Texas regardless of their phone service area." The USV contract with Southwestern Bell provided for the marketing of services only to Southwestern Bell customers in the Houston metro area, explained Swank.

Both Sourceline and U.S. Videotel services are accessed by telephone with the option of a U.S. Videotel compact terminal or software package for customers with personal computers and modems.

"Southwestern Bell indicated to us that they were also pleased with the customer response to the trial and will evaluate the results to determine possible videotex ventures for the future," said Swank. "But their agreement with the FCC was for a one-year trial."

In addition to its Houston and Dallas/Fort Worth operations, U.S. Videotel is a service provider to Bell Canada in Montreal and will enter the Toronto market in April.

#90047p0205 02/16/1990 ~PR Newswire

PHILADELPHIA (FEB. 16) PR NEWSWIRE - Tasty Baking Co. (AMEX: TBC) reported today that consolidated net income for the fourth quarter of 1989 was $2,216,000 or $.35 per share, compared to net income of $2,564,000 or $.41 per share earned in 1988.

These results represented an approximate 14 percent decline relative to net income and per-share earnings. Consolidated net sales for the 13-week period ended Dec. 30, 1989, were $65,973,000 compared to $69,412,000 for the 14-week period ended Dec. 31, 1988.

Net income for fiscal year 1989 was $9,576,000 compared to net income of

$9,456,000 for the previous year. Net income per share remained stable for 1989 and 1988 at $1.51 per share for each year. Consolidated net sales for the 52 weeks ended Dec. 30, 1989, were $269,536,000 compared to $263,972,000 for the 53-week period ending Dec. 31, 1988.

In a letter to shareholders, Nelson G. Harris, president and chief executive officer, said, "The fourth quarter of 1989 was below expectations relative to the comparable quarter of 1988. Nevertheless, for the full year the company experienced a nominal profit improvement over 1988. In the fourth quarter, Tastykake Division sales declined approximately 13 percent, without adjustment for the shorter selling period. The reduced sales volume was the result of a softer economy in the food industry, particularly in the snack food category, as well as the anticipated effect of a price increase initiated in the third quarter of 1989."

Harris further stated, "The Tastykake Division also expended substantial time and effort, at significant cost, to refine our products which resulted in substantially lower saturated fats without compromising the unique Tastykake taste and quality."

On Phillips & Jacobs Inc., the company's graphic arts and industrial chemical subsidiary, Harris stated, "They experienced a strong fourth quarter in sales and profits and completed their eighth successive year of improved profits. Dixie Type & Supply Company, Inc., now totally assimilated, made a significant contribution to the improved results. Phillips & Jacobs Inc. continues to expand its technical and service capabilities providing customers with additional benefits and related increased profitability."

Harris continued, "Recognizing the need to enter the nineties with its uncertain economic prospects, the company has initiated an early retirement program which could assist materially in controlling costs as well as the continuation of a clear and defined operating structure. This program will be completed in the second quarter of 1990.

Concluding, Harris said, "1989 represented the eighth consecutive year of increased profits and dividend distributions to our shareholders. For 1990 we believe that our company is positioned financially and strategically, with our strong brand identification, to provide a productive year for our company and its shareholders."

OSLO, NORWAY (FEB. 15) PR NEWSWIRE - Norsk Hydro a.s. (NYSE: NHY), Norway's largest industrial company, today reported a 10 percent increase in operating income for the year ended Dec. 31, 1989, to NOK 6,997 million ($1,065 million), up from NOK 6,336 million ($965 million) in 1988.

Higher financial expenses and increased provisions for taxes resulted in a decrease in net income for the year to NOK 2,694 million ($410.3 million) compared to NOK 3,434 million ($523.1 million) in 1988. Earnings per share in 1989 were NOK 13.10 ($1.99) compared to NOK 17.10 ($2.60) in 1988. The board of directors is recommending a dividend increase to NOK 4.00 ($0.61) compared with the annual dividend of NOK 3.75 ($0.57) in 1988.

Oil and gas activities increased their contribution significantly during the year and during the fourth quarter, while agricultural businesses turned in results on a similar level to 1988. Light metals and petrochemicals results were weaker both for the last quarter and the full year.

Net financial expenses in 1989 amounted to NOK 1,544 million ($235 million) compared with NOK 797 ($121 million) in 1988 mainly due to foreign exchange losses of NOK 377 million ($57 million) in 1989 compared with the gains of NOK 118 million ($18 million) in 1988.

NOTE: Conversions from NOK/$ have been made at the rate of NOK 6.565 : $1.

WASHINGTON (JAN. 16) PR NEWSWIRE - K. Donald Menefee, chairman and chief executive officer of James Madison Limited (AMEX: JML), the Washington,

D.C.-based bank holding company, announced the election of James A. Baker to the position of president and member of the board of directors of the bank holding company.

In this position, Baker continues as chief operating officer responsible for overseeing the activities of the four banking subsidiaries, the mortgage and leasing companies of JML, and corporate development.

Baker joined JML in June 1989 as executive vice president and chief operating officer. He was formerly chairman and chief executive officer of Bank One, Youngstown, NA, a $1.2 billion affiliate of Banc One Corporation located in Columbus, Ohio. Previously, he was president and chief executive officer of Bank One, Mansfield, prior to which he had various managerial responsibilities at City National Bank and Trust Company, the predecessor company of Bank One.

Commenting on Baker's new position, Chairman of the Board and Chief Executive Officer K. Donald Menefee stated: "Baker is an accomplished financial management executive with 23 years of professional banking experience. In keeping with the philosophy and mission of James Madison Limited, Mr. Baker places strong emphasis on profitability and improving financial performance through teamwork. I take pleasure in recognizing Mr. Baker's continuing contribution to our company."

Baker is active in a number of national and community organizations, including the Young President's Organization, and United Way of America.

Baker received a bachelor's of science degree in business administration from Bowling Green State University in 1964, and a master's of business administration from Indiana University in 1966.

The James Madison Limited financial family of banking subsidiaries includes: Madison National Bank located in Washington; Madison Bank of Maryland; Madison National Bank of Virginia; and United National Bank of Washington. Non-banking subsidiaries include: James Madison Mortgage Company; James Madison Financial Corporation; and JML Systems Management, Inc. Its Class A Common Stock is listed on the American Stock Exchange (JML), and its Common Stock is traded on the NASDAQ National Market System (JMLC).

NEW CANAAN, CT (FEB. 16) PR NEWSWIRE - ATI Pharmaceuticals, Inc. (NASDAQ: ATPH) reported today a 23.4 percent increase in sales for the first

quarter of fiscal 1990 over the similar period in 1989. Sales for the three months ended Dec. 31, 1989, were $3,092,593 vs. $2,504,379 last year. Net income for the quarter was $27,577 in fiscal 1990 and $412,932, or 4 cents per share, in fiscal 1989.

H.R. Shepherd, ATI chairman and CEO, commented, "The sales results reflect volume gains during the quarter. The quarter-to-quarter difference in earnings is due primarily to extraordinary income that contributed to net income in fiscal 1989. Other factors include expenses related to the merger with Armstrong Laboratories and start-up costs for the facility in Norwood, Massachusetts. The facility, which includes a state-of-the-art sterile saline manufacturing operation, will be fully operational within the next several months." Shepherd noted that the merger with ATI's Armstrong Laboratories unit is expected to reduce expenses and increase liquidity for Armstrong stockholders.

ATI Pharmaceuticals is a drug delivery company engaged in the development and manufacturing of aerosol pharmaceuticals. Armstrong Laboratories, ATI's manufacturing subsidiary, is based in West Roxbury, Mass.

DETROIT (FEB. 16) PR NEWSWIRE - The board of directors of Manufacturers National Corporation (OTC: MNTL) declared a quarterly dividend and approved a stock purchase plan at the board's regularly scheduled meeting today.

A quarterly dividend of $.54 per share will be paid March 30, 1990, to shareholders of record Feb. 28, 1990.

The stock purchase plan will enable the corporation to acquire up to 400,000 shares of its stock from the open market as management deems economically prudent, including for use in acquisitions, funding employee benefit plans or other corporate purposes.

Manufacturers National Corporation is a bank holding company headquartered in Detroit. It operates four subsidiary banks in Michigan, including its principal bank subsidiary, Manufacturers National Bank of Detroit, and seven banks in the metropolitan Chicago area through Affiliated Banc Group Inc. The corporation also operates other financial subsidiaries in Delaware, Florida and Illinois.

NEW YORK (FEB. 16) PR NEWSWIRE - W.R. Grace & Co. (NYSE: GRA) said today that a subsidiary had won a unanimous jury verdict in an asbestos property damage lawsuit brought by Methodist Hospital of Memphis, Tenn., which had sought $12 million in connection with the removal of asbestos- containing building materials.

Grace contends that the presence of small amounts of asbestos contained within its fireproofing materials does not constitute a health hazard. A Grace spokesman said that the verdict in this case, which follows similar verdicts in two trials last fall, reflects the growing consensus that the inordinate expenses being incurred for the removal of asbestos-containing building materials are unwarranted.

LOS ANGELES (FEB. 16) PR NEWSWIRE - Filmstar Inc. (NASDAQ: FLTR; WARRANTS: FLTRW, FLTRZ), a provider of financing payroll and distribution services to independent producers, headquartered here, today reported a loss of $230,000, or $.05 per share, on revenues of $230,000, or $.05 per share, on revenues of $1,174,000 for the second quarter ended Dec. 31,

1989. This compares with a loss of $292,000, or $.08 per share, on no revenues for the second quarter ended Nov. 30, 1988.

For the six months ended Dec. 30, 1989, the company reported a loss of $497,000, or $.11 per share, on revenues of $2,177,000, as compared to a loss of $497,000, or $.13 per share, on no revenues for the first half ended Nov. 30, 1988.

On Feb. 9, 1990, Filmstar reached an agreement with Ropart Partners L.P. to exchange 1,000 shares of Class A redeemable convertible preferred stock for 1,000 shares of Class C convertible preferred stock. As a result of the transaction, shareholder's equity will increase to $1,106,000 from the $188,000 reported on the company's balance sheet for Dec. 31, 1989.

Filmstar Chairman and Chief Executive Officer, Harlan P. Kleiman, said two films the company is marketing at the upcoming American Film Market, "A Shock to the System" starring Michael Caine and "Bethune" starring Donald Sutherland, are "representative of bigger budgeted films taht Filmstar's distribution division is beginning to attract. Foreign sales and distribution contracts on these two films alone have generated over $6 million in backlog."

In addition, said Kleiman, All Payments, the company's payroll arm, has "increased sales dramatically by expanding into the theatrical features area as it continues to service its solid television specials business."

All Payment is handling the payroll on several upcoming films including "Runestone," starring Alexander Godunov and Peter Riegert; "Five Heartbeats" produced by Robert Townsend ("Hollywood Shuffle"); and "Lambada -- The Forbidden Dance" for 21st Century Releasing.

Kleiman concluded that he anticipated fulfilling Filmstar's fiscal 1990 sales goal of $7 million.

#90047p0242 02/16/1990 ~PR Newswire

HOUSTON (FEB. 16) PR NEWSWIRE - In a landmark decision on Thursday evening (Feb. 15), a jury in a Federal District Court in Tulsa, Okla. found that a pipeline's take-or-pay contracts are commercially impracticable under existing federal regulations.

The jury's verdict represents a significant victory for ANR Pipeline Company, a subsidiary of The Coastal Corporation (NYSE: CGP), in a $200 million take-or-pay case brought by Dyco Petroleum Corporation, a unit of Diversified Energies, Inc. (NYSE: DEI) of Minneapolis.

The jury determined both that Coastal's ANR Pipeline subsidiary is in a condition of force majeure and that performance on the take-or-pay gas purchase contracts has become commercially impracticable. It is the first time that a pipeline company has prevailed on a defense of commercial impracticability in a take-or-pay case.

The verdict clearly acknowledges that a pipeline is not obligated to honor

take-or-pay contracts when changes in federal regulations have rendered performance commercially impracticable.

The verdict also reinforces earlier court rulings that the failure of ANR's customers to take gas from the pipeline as a result of changes in federal regulations is an event of force majeure. ANR Pipeline's contracts provide that the company is excused from purchasing gas under such conditions.

The pipeline's successful defense in this and other cases principally involves Orders 380 and 436 issued by the Federal Energy Regulatory Commission. Under these orders, local distribution companies (natural gas utilities) were relieved of their obligations to purchase natural gas from interstate pipelines. The order did not, however, relieve pipelines of their obligations under take-or-pay contracts with natural gas producers and suppliers.

"This jury verdict represents a major victory for the natural gas industry because federal regulations (Orders 380 and 436) have significantly impaired the ability of pipelines to purchase gas from producers on a long-term basis," said Michael L. Beatty, executive vice president and general counsel of Coastal.

"As a result of the local distribution companies being relieved of their long-term purchase obligations with the pipelines, producers have not been able to receive fair prices at the wellhead and have not been able to adequately finance the development of the additional gas supplies this nation will need for the 1990s."

Beatty, along with Rebecca H. Noecker, general counsel for ANR Pipeline, tried the case for Coastal.

Take-or-pay contracts include a clause, subject to other provisions, that provides for a pipeline purchaser to pay for a minimum quantity of gas whether or not it was taken. These contract clauses became common when natural gas shortages developed in the 1970s and pipelines and their customers wanted a guaranteed supply of gas.

The Coastal Corporation is a Houston-based diversified energy corporation. Together with its subsidiaries, it has assets of $8 billion and operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, trucking and independent power production.

#90047p0246 02/16/1990 ~PR Newswire

NEW BEDFORD, MA (FEB. 16) PR NEWSWIRE - Aerovox Incorporated announced today that the distribution of its common stock to the public is scheduled for Feb. 26, 1990.

The 5,095,086 shares will be distributed to the persons who were record owners of the common stock of Aerovox's former parent company, Cooper Industries, Inc., (NYSE: CBE) as of May 5, 1989, at the rate of one share of Aerovox stock for every 20 shares of Cooper Industries stock.

The shares have been held in trust pending completion of Aerovox's registration with the Securities and Exchange Commission.

Aerovox, founded in 1922, is a leading manufacturer of AC and Power DC capacitors. Aerovox's AC capacitors are used primarily in microwave ovens air conditioners, fluorescent lighting, high intensity discharge (HID) lighting, and other industrial applications.

Sales of AC capacitors represented over 90 percent of Aerovox's total revenues in 1988. Aerovox is one of two leading manufacturers of AC film and paper capacitors in North America, with approximately 33 percent of that market in 1988, according to industry statistics.

Aerovox's Power DC capacitors are used in medical equipment, photocopiers, fusion power and government research and development projects, including the Strategic Defense Initiative. Aerovox also manufacturers electromagnetic interference (EMI) filters, which are used primarily in AC power supplies for electronic equipment.

Aerovox sells its products worldwide to over 200 customer accounts primarily through independent sales representatives. Aerovox employs approximately 925 people and has facilities in New Bedford, Mass., and Amherst, Nova Scotia, Canada.

Aerovox's common stock has been approved for quotation through the NASDAQ National Market System under the trading symbol ARVX. Trading is expected to commence on or shortly after the Feb. 26 distribution of shares.

Earlier this week, Aerovox announced that it has entered into a settlement agreement with the United States and the Commonwealth of Massachusetts resolving claims against the company under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, commonly known as the "Superfund" law.

The claims were originally brought in 1983 and concern the alleged disposal of polychlorinated biphenyls ("PCBs") into the Acushnet River and New Bedford Harbor near Aerovox's New Bedford headquarters and manufacturing facility. Aerovox itself never used PCBs in its manufacturing process.

Under the settlement, Aerovox will pay the governments $3.5 million upon court approval of the settlement following a public comment period and will pay an additional $1 million per year in each of the three following years. In addition, a predecessor company, Belleville Industries, Inc., together with certain insurers of Aerovox and Belleville, will pay the governments a total of $6.1 million. As a result of the settlement, Aerovox expects to incur an after-tax charge of approximately $3.9 million in the fourth quarter of 1989.

EAST AURORA, NY (FEB. 16) PR NEWSWIRE - Moog Inc. (AMEX: MOG.B, MOG.A) shareholders today re-elected Kenneth J. McIlraith and Joe C. Green as Class B directors and Robert T. Brady as a Class A director for terms expiring in 1993.

Robert R. Banta, executive vice president-finance, discussed the company's financial turnaround in fiscal 1989. Banta noted that international sales accounted for approximately 35 percent of consolidated net sales of $282.3 million for fiscal 1989. Higher foreign sales and increasing commercial business were trends cited by Banta. Commercial business, he said, now accounts for 37 percent of Moog's sales, reflecting strong commercial aerospace and industrial markets.

Moog's performance continued to improve in the first quarter of fiscal 1990 ended Dec. 31, 1989. Last week Moog reported net earnings of $1.6 million, or $.20 per share, were achieved for the first fiscal quarter. Consolidated net sales were $73.0 million, 15 percent above sales of $63.6 million in last year's first quarter. Brady, president, said further improvements will be achieved in the current fiscal year.

After a modest sales increase this fiscal year, Brady projected continuing increases, despite proposed cuts in the U.S. defense budget. Growth will be fueled, Brady said, by Moog's activities in commercial airplanes and industrial markets domestically and overseas, as well as through increased activity in space, satellites and launch vehicles.

Moog Inc. designs, manufactures and markets high-performance control components and systems for a wide range of defense, aerospace and industrial applications.

PALO ALTO, CA (FEB. 16) PR NEWSWIRE - Syntex Corp. (NYSE: SYN) said that the United States Food and Drug Administration (FDA) has given Syntex permission to market Synarel(R) (nafarelin acetate) for the management of endometriosis, including relief from pain associated with the disease and reduction in the size and number of endometrial lesions.

The active ingredient in Synarel is manufactured by Syntex Chemicals Inc. in Boulder, Colo.

Synarel is the first drug of its class to be approved for this indication in the U.S. and the first drug approved for the management of endometriosis in this country since 1976.

Women in the United States will be the first to benefit from this promising new prescription drug therapy. Although marketing applications are pending at regulatory agencies in a number of countries, the FDA is the first regulatory agency to approve this new drug for marketing. Five months after Syntex submitted the New Drug Application, and advisory committee to the FDA recommended, by a vote of 9 to 0 with one abstention, that the drug be approved for marketing. The FDA completed its review on the safety and efficacy of the drug in 15 months.

Endometriosis is a painful disorder of the female reproductive tract that strikes women in their childbearing years. It affects an estimated four to six million women in the U.S.

Endometriosis occurs when the tissue that normally lines the uterus (and is shed monthly with menstruation) migrates to areas outside the uterus, where it swells and bleeds during a woman's monthly menstrual cycle. It is most often found in the abdominal/pelvic region, implanted on the ovaries, the intestines, and the fallopian tubes, where it can cause blockage and infertility. The symptoms of endometriosis include severe menstrual cramps or persistent pain, pain during sexual intercourse, painful urination, and painful bowel movements.

Synarel is a gonadotropin-releasing hormone (GnRH) agonist and a synthetic derivative of a natural hormone in the brain.

Synarel works initially by stimulating the pituitary gland to secrete the gonadotropin hormones -- leutinizing hormone and follicle-stimulating hormone. These in turn stimulate the ovaries to produce estrogen. By the fourth week of treatment, however, and for the remainder of the treatment period, the drug suppresses pituitary and ovarian function, reducing estrogen in the body to near-menopausal levels. Estrogen is the hormone responsible for the growth and maintenance of endometrial tissue.

Syntex Chemicals, located in Boulder is involved in chemical process research and development and production of active ingredients for human pharmaceutical compounds. It is a wholly owned subsidiary of Syntex (U.S.A.) Inc.

Syntex is an international health care company which discovers, develops, manufactures and markets human and animal pharmaceutical products and medical diagnostic systems.

RICHMOND, VA (FEB. 16) PR NEWSWIRE - Chesapeake Corporation (NYSE: CSK) announced today the election by the board of directors of Paul A. Dresser Jr. and Frederick V. Ernst as executive vice presidents.

Ernst has served as group vice president-kraft products and president of West Point Operations since 1983. In this new position of excecutive vice president, he will continue as president of West Point Operations and will also oversee Chesapeake's land development and wood treating subsidiaries and corporate human resources.

Before joining Chesapeake in 1983, Ernst was vice president of marketing and international operations for the Great Southern Paper Co., a division of Great Northern Nekoosa Corporation. He received a bachelor's degree in American studies from Yale University and an MBA with an emphasis on marketing finance from Harvard Business School.

Dresser has served as group vice president-finance and administration and chief financial officer since 1984. He will continue as CFO and also add the responsibility of overseeing Chesapeake's tissue and consumer products subsidiaries.

Dresser was treasurer of Badische Corporation in Williamsburg, Va. before joining Chesapeake in 1981. He graduated from Texas A&M University with a bachelor's degree in history and government and holds an MBA from Harvard Business School.

J. Carter Fox, president and chief executive officer, said, "Paul and Fred will work with me to be more responsive to the initiatives and needs of the leaders we have chosen to manage Chesapeake's businesses. This new organizational structure will also permit us to increase our outward focus and identify strategic opportunities which will maximize Chesapeake's future growth."

Chesapeake Corporation is an integrated paper and forest products company that produces and markets kraft, tissue, packaging and treated wood products.

NEW YORK, (FEB. 16) PR NEWSWIRE - Bio-Technology General Corp. (NASDAQ: BTGC) today announced that it has agreed to sell 2.1 million shares of common stock to David Blech at $1.35 per share. The closing is schedule for Tuesday, February 20.

As part of the agreement, Blech will receive warrants to acquire 800,000 shares at $3 per share over the next three years and 400,000 shares at $6 per share over the next four years. The issuance of the warrants is conditioned on approval by shareholders to increase Bio-Technology General Corp.'s authorized number of shares. Blech will have two seats on the Bio-Technology General Corp. board, one of which he himself will fill.

As a result of an associated transaction, Bio-Technology General Corp. will receive an additional $272,000 for the BTG shares held by Neurogenetic Corporation and to be sold to Blech. The 2.45 million shares to be purchased by Blech in these two transactions, from which BTG will receive a total of $3.1 million, will represent approximately 18 percent of BTG's outstanding common stock.

Bio-Technology General Corp., a Delaware corporation, is engaged in the research, development and manufacture of genetically engineered products for human and animal health care.

LINDEN, NJ (FEB. 16) PR NEWSWIRE - General Magnaplate Corporation (NASDAQ: GMCC), the Linden-based pioneer in synergistic metallurgical coatings, today announced results for the fiscal second quarter and six months.

GENERAL MAGNAPLATE AND SUBSIDIARIES
Condensed Statement of Income
(Unaudited)

Three months ended Dec. 31	1989	1988
Gross revenue	$2,275,185	$2,373,669
Income before corporate income taxes	202,069	546,865
Net income	$ 135,023	$ 344,174
Net income per share	$.04	$.11
Average shares outstanding	3,060,670	2,999,176

Six months ended Dec. 31	1989	1988
Gross revenue	$4,738,439	$4,651,001
Income before corporate income taxes	714,190	1,045,434
Net income	$ 451,493	$ 660,076
New income per share	$.15	$.22
Average shares outstanding	3,034,270	2,999,580

In making the announcement, General Magnaplate Chairman and CEO Charles P. Covino noted that the company's results reflected industry's playing "a waiting game, as capital gains tax cuts are anticipated but not yet approved by Congress, and as economists disagree widely on where interest rates are going." He also cited as a critical influence uncertainty over the direction the federal budget process will take.

He noted also that "the entire industrialized world is waiting for the impact of the political changes in the Communist world."

General Magnaplate, Covino said, is "in a strong position to take full advantage of the coming resurgence in industrial activity." He said the company is confident because of the "recent implementation of strategic plans for growth" in markets where Magnaplate charted expansion eight to ten months ago. These markets, he said, "have not only sustained activity but increased it." He cited in particular the food, pharmaceutical, pulp and paper, and chemicals markets.

This recognition of growth potential in select markets also led Magnaplate to make two acquisitions. The company's new subsidiary, General Magnaplate Wisconsin, acquired in January 1990, positions the company to "take advantage of growth potential in three markets in particular,"

Covino reported: "pulp and paper, food production and packaging, and dairy processing." The second acquisition, General Magnaplate Canada, also made in January, takes advantage of market growth in mining, pulp and paper, aerospace manufacturing, food production and packaging, machinery, and steel fabricating, Covino reported.

Covino also detailed several other strategic moves that have positioned the company strongly. "Even though defense spending is expected to decline," he said, "we are seeing a rapid and significant increase in the rehabilitation and refurbishing of weapons systems, mobile military equipment and aircraft," which fiscal 1989 acquisition Magnaplate Service Corporation of Texas is positioned to perform.

"As oil prices continue to rise," Covino said, "we also expect to see mothballed oil drilling rigs placed back in operation. These start- ups will create a need for our coatings and processes in the rebuilding and repair of worn and corroded components such as shafts, drill bits and stems."

Intensified concern with wastewater contamination in the food processing industry also presents an opportunity to General Magnaplate, Covino said, citing a "greater emphasis on the use of General Magnaplate coatings on food contact surfaces and machinery frames to allow sanitarians to use fresh water rinses rather than sanitation chemicals."

MINNEAPOLIS, (FEB. 16) PR NEWSWIRE - The United HealthCare Corp. (NASDAQ: UNIH) board of directors voted at its meeting today to create a non-leveraged employee stock ownership plan (ESOP). Discretionary cash contributions to the ESOP will be funded from company profits, to be invested in UHC common stock purchased on the open market. UHC's initial contribution to the plan will be $500,000. Contributions of shares of the company's common stock also may be made.

Chairman and Chief Executive Officer Kennett L. Simmons said that the board believes the ESOP will be an effective employee incentive. ESOP shares will be distributed to employee accounts on the basis of employees' annual cash pay in proportion to the annual payroll. Because the amount of annual cash pay eligible is capped at $75,000, the plan favors all eligible employees and middle management, Simmons said.

Stock credited to employee accounts will be vested over seven-year periods and distributed only upon termination, retirement, death or disability of the employee.

The ESOP will be administered by an independent outside trustee. United HealthCare Corp. is a national leader in health care cost management, serving both the providers and purchasers of health care since 1974. The company's services include HMOs, PPOs, multiple option and point of service plans, Medicare and managed care programs for the aged, pharmacy cost management, mental health and chemical dependency services, utilization review, specialized provider networks, and administrative services.

DETROIT, (FEB. 16) PR NEWSWIRE - Manufacturers National Corporation (OTC: MNTL) announced it has reached an agreement to acquire State Bank of Lake Zurich in Lake Zurich, Ill., for $24 million, in a combination of cash and Manufacturers stock. The transaction is subject to the approval of the appropriate regulatory agencies.

State Bank of Lake Zurich reported assets of $157 million at Dec. 31, 1989. It operates three branch offices in Lake Zurich and employs 82 individuals. Upon acquisition by Manufacturers, State Bank of Lake Zurich will become a separate subsidiary of Affiliated Banc Group, Inc., the seven-bank holding company Manufacturers owns in Illinois.

"This acquisition complements our existing franchise in Illinois by enhancing our presence in the northern suburbs of metropolitan Chicago," said Gerald V. MacDonald, president and chief executive officer, Manufacturers National Corporation.

"State Bank of Lake Zurich's association with Affiliated Banc Group will enable us to better serve our customers through a broadened offering of consumer and commercial products," said Mark Beaubien Jr., chairman of the board, State Bank of Lake Zurich.

Manufacturers National Corporation is a bank holding company headquartered in Detroit. The corporation, which reported 1989 year-end assets of $10.3 billion, recently acquired the former Skokie Federal Savings and Loan, F.A., in Skokie, Ill.

Manufacturers National Corporation operates four subsidiary banks in Michigan, including its principal bank subsidiary, Manufacturers National Bank of Detroit, and seven banks with 20 locations in the metropolitan Chicago area through Affiliated Banc Group, Inc., a $1.6 billion bank holding company. The corporation also operates financial subsidiaries in

Delaware, Florida and Illinois.

PEORIA, IL (FEB. 16) PR NEWSWIRE - Caterpillar Inc.'s (NYSE: CAT) 1989 annual report, now being released, says the company's major reorganization into profit centers is designed to improve competitiveness and achieve better returns for stockholders.

Chairman George A. Schaefer and President Donald V. Fites said the reorganization will make Caterpillar more focused, responsive, and flexible--with accountability more sharply defined.

Until now, Caterpillar has been oriented principally around functions. Under the new setup, 14 of the company's 18 vice presidents will head profit centers. Four will head central services divisions.

Caterpillar again ranked among the top ten U.S. companies in the Fortune survey of quality reputations. Nevertheless, the report says quality remains the company,s number one priority.

Caterpillar cannot rest on its reputation, Schaefer and Fites said. ''Quality needs constant attention because customers' expectations are continuously rising.''

Annual Quality Improvement teams at all facilities around the world are focusing on greater internal efficiency and increased customer satisfaction. To improve quality from outside suppliers, Caterpillar is increasing emphasis on the certification process.

More than 1,000 suppliers have achieved Quality Assured Certification. They account for 80 percent of the company's purchases of production material.

The report says factory modernization -- called PWAF for Plant With A Future -- is well into the implementation stage. The company expects to realize the cross-over point of PWAF savings exceeding PWAF start-up costs by the fourth quarter of 1990.

On Jan. 18, Caterpillar announced a profit for 1989 of $497 million on sales and revenues of $11.13 billion.

Sales outside the United States were $5.75 billion, 53 percent of total sales.

Exports from the United States increased for the sixth straight year. These sales exceeded $3.2 billion in 1989 and supported about 18,000 Caterpillar jobs in the United States. (Caterpillar's net contribution to the U.S. balance of payments was $1.6 billion in 1989 -- an increase of more than $500 million over 1988.)

Ownership increased $361 million to $4.47 billion. Spending for research and engineering totaled $387 million, including $235 million for new products and major improvements to current products.

Capital expenditures, excluding equipment leased to others, totaled $984 million, a $252 million increase over 1988.

#90047p0273 02/16/1990 ~PR Newswire

LANDOVER, MD. (FEB. 16) PR NEWSWIRE - Safeway Stores, Inc. announced that on Monday, Feb. 19, it will begin offering in the Richmond, Va. area its new Safeway Express service, which will allow shoppers to buy groceries via phone from three area Safeways.

The innovative service offers the customers the option to pick up his or her order at one of the three stores or to have it delivered.

"The cost of either option is a bargain and offers housebound people or people with hectic schedules a service they can truly appreciate," said Don Gates, senior vice president of Safeway's Eastern Division.

"We are constantly looking for ways to better serve our customers," said Gates, "and offering them the option to pick up a ready-to-go grocery order or have it delivered to their homes may be a godsend to some."

Safeway has teamed up with Bethesda, Md.-based Shoppers Express to offer consumers this exciting new service. The three-year-old Bethesda company is a pioneer in the shop-by-phone business and has teamed up with grocery firms operating in Maryland, the District of Columbia, New York, Connecticut, Pennsylvania, New Jersey and Ohio.

Safeway Express delivery service will be available to customers living in 24 zip code areas serving the metropolitan area. The three stores that will be handling the service are the Brandermill Store at 4800 Market Square in Midlothian; the Gayton Crossing store at 1356 Gaskins Road, Richmond, and the Laburnum Square store at 4816 South Laburnum Ave. in Richmond. Safeway's introduction of this service in the Richmond area is an expansion of the testing of the service by the Eastern Division of the

Oakland, Calif.-based company.

Customers place their orders via phone and a specially trained clerk selects their groceries. The orders can then be picked up or delivered. If delivery is desired, the zip code of the customer will determine which Safeway will handle the order. Anyone who passes one of the three Safeways on their way home can have their shopping done for them at a very reasonable price simply by calling 1-800-284-SHOP (7467).

Pick-up service costs $7.95, next day delivery costs $11.95, and same day delivery costs $12.50. For seniors, delivery on a next-day basis costs $9.95.

"We expect our new service to please a lot of customers," said Gates, "and if the service generates the excitement we anticipate we will expand it to more of our stores."

The Eastern Division of Safeway, headquartered in Landover, Md., operates 150 stores from Baltimore County through Williamsburg, Va.

HARTFORD, CT (FEB. 16) PR NEWSWIRE - The board of directors of Northeast Savings, F.A. (NYSE: NSB) today suspended the quarterly cash dividend on both issues of the company's preferred stock. This includes the company's $2.25 cumulative convertible preferred stock, Series A (NYSE: NSB PrA) which is held by stockholders, and the adjustable rate cumulative preferred stock which is held by the FSLIC Resolution Fund administered by the Federal Deposit Insurance Corporation.

Commenting on the board's decision, George P. Rutland, Northeast chairman and chief executive officer, stated, "This was a carefully considered decision by our board. We believe this is a prudent step, given that both our capital plan and our application to form a holding company are pending before the Office of Thrift Supervision. Until the Office of Thrift Supervision has approved our plan and our application, it is appropriate for Northeast to conserve its capital. We believe this is in the best interests of our preferred stockholders, not only because it is the right decision for the company, but also because the preferred stock is cumulative."

On Jan. 8, 1990, Northeast filed a capital plan with the Office of Thrift Supervision, detailing how the company will achieve compliance with the new capital requirements within the time frame specified by the financial

Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). This plan included the continuation of the cumulative preferred dividend. Additionally, on Dec. 1, 1989, Northeast filed an application with the Office of Thrift Supervision for approval of the formation of a savings and loan holding company.

Northeast Savings is one of the largest savings institutions based in New England. Northeast operates retail branches in Connecticut, New York and Massachusetts, and mortgage offices in California, Long Island, New York and southern Connecticut.

CHICAGO (FEB. 16) PR NEWSWIRE - FMC Corporation's (NYSE: FMC) board of directors today elected Robert N. Burt president of FMC, effective March 1. As previously announced, Burt succeeds Raymond C. Tower, who is retiring as president and chief operating officer.

The board also elected Peter L. Scott a director of the company. Scott, 62 is retired chairman of Black and Decker Corp. and former chairman, president and chief executive officer of Emhart Corporation. He also served in several executive positions at United Technologies Corporation from 1975 to 1983. Scott's election brings FMC's board, effective March 1, to 12 members, with three inside and nine outside directors.

Adolph M. Quilici also was named general manager of FMC's Defense Systems group, headquartered in San Jose, Calif., and elected a vice presiden t of the corporation.

Quilici, 59, most recently was division manager of FMC's Ground Systems division. Quilici joined FMC in 1953 and held various engineering and program management positions. He was named manager of ordnance engineering in 1972, manager of the ordnance plant in San Jose in 1976, and in 1979 was named manager of the Ordnance division, which was renamed Ground Systems division in 1988.

FMC Corporation, headquartered in Chicago, is one of the world's leading producers of machinery and chemicals for industry, government and agriculture. The company operates 89 manufacturing and mine facilities in 24 states and 14 foreign countries. The company divides its businesses into five major segments: industrial chemicals, performance chemicals, precious metals, defense systems, and machinery and equipment.

EAST BRUNSWICK, NJ (FEB. 16) PR NEWSWIRE - Specialty Retail Services, Inc. (NASDAQ: SRSI), a marketer of health and beauty aids (HBA) products, today announced consummation of an agreement with Arncliffe Manchester Ventures, Ltd. to become the exclusive worldwide distributor for COMPARABRANDS(TM), with an option to acquire the business. COMPARABRANDS, introduced in 1989, is one of the first "alternative" skin care product brands. Steinfink, Chief Executive Officer, stated that the U.S. skin care market, currently some two billion dollars at retail, is projected to grow more than 15 percent per year becoming one of the fastest growth HBA categories for the 90s.

Steinfink also stated that alternative skin care products, like alternative fragrances successfully marketed in the 80s interpret the best selling, most advertised and advanced products, are available at convenient locations, and are at prices more than 50 percent below that of comparable content products sold by department stores. Currently COMPARABRANDS includes 5 moisturizers whose ingredients have been designed

to be comparable to: Elizabeth Arden's "Millenium" and "Visible Difference"; Estee Lauder's "Night Repair"; Clinique's "Dramatically Different"; and Lancome's "Niosome."

Specialty Retail Services, Inc. is a marketer of a broad range of professional beauty products, including hair care, nail care, cosmetics, skin care and other beauty accessories to independent and chain store drug stores, supermarkets, mass merchandisers, warehouse clubs and other retail establishments and retail distributors. The company believes it is one of the largest independent distributors. The professional beauty products in the thirteen mid-atlantic and northeastern states.

#90047p0284 02/16/1990 ~PR Newswire

SAN DIEGO (FEB. 16) PR NEWSWIRE - Mail Boxes Etc. (NASDAQ: MAIL) announced today that it has reached an out of court settlement of the litigation involving the company's 1983 purchase of shares owned by Nancy Tash, the daughter of one of the company's founders. The settlement included dismissal of all claims by Tash, including those still pending in a separate lawsuit arising out of the same transaction against Janie D'Addio, a former director of the company.

Details of the terms of the settlement were not disclosed, but the company indicated the total payment to the plaintiff group was approximately $2.8 million. That amount was approximately $400,000 less than the total amount of $3.2 million that the company previously announced as its liability in this case. The company estimated the total after tax cost of settlement will be approximately $1.7 million to be reported in the third quarter ending Jan. 31, 1990. This is $300,000 less than $2 million after tax reserve which the company previously announced that it had booked for satisfaction of the liability associated with this litigation.

The company believes that it has up to $1 million of additional coverage under a director and officer insurance policy issued by the American Casualty Insurance Co., which would further reduce the company's settlement costs. The insurance company is currently evaluating the company's claim but has not yet acknowledged or denied coverage. The company intends to pursue legal action against the insurance company as necessary to resolve the matter. Any recovery of insurance proceeds would be recorded as income to the company in the quarter that it is received.

In a related matter, the company also reported that the U.S. District Court Judge William Enright, who presided over the trial of the Tash matter, has ruled that Anthony DeSio, the president and chief executive

officer of the company, acted in good faith and in a matter believed by him to be in the best interests of the company and that indemnification of DeSio by the company was proper under California law.

The company also announced that it has entered into an agreement with the Bank of America to obtain a $5 million line of credit which it intends to use to finance the continued expansion of its network of private postal and business service centers.

#90047p0285 02/16/1990 ~PR Newswire

BALTIMORE (FEB. 16) PR NEWSWIRE - Baltimore Gas and Electric Co. (NYSE: BGE) reported common stock earnings of $25,081,000 for the month ended Jan. 31, 1990, equivalent to $.31 per common share.

This compares with earnings of $24,205,000, equivalent to $.30 per share, for the month ended Jan. 31, 1989. For the 12 months ended Jan. 31, 1990, earnings on common stock were $244,786,000, equivalent to $3.06 per share. This compares with $269,217,000, or $3.40 per share, for the 12 months ended Jan. 31, 1989. Earnings per share for the company's utility business and for its diversified business activities were as follows:

Periods ended	One month		12 Months	
Jan. 31	1990	1989	1990	1989
Utility operations	$.31	$.29	$2.83	$3.16
Diversified activities	--	.01	.23	.24
Total	.31	.30	3.06	3.40

The increase in utility earnings for the month ended Jan. 31, 1990, was primarily attributable to increased electric and gas sales, partially offset by higher operations and maintenance expenses. The decrease in utility earnings for the 12 months ended Jan. 31, 1990, vs. the comparable period last year reflects the impact of higher operations and maintenance expenses, increased financing costs and lower annual rates of growth for electricity and natural gas sales.

Earnings from diversified business activities primarily represent the results of operations of Constellation Holdings Inc. and its subsidiaries. Constellation's earnings for the one month and 12 months ended Jan. 31, 1990, did not change materially from the comparable periods last year.

#90047p0288 02/16/1990 ~PR Newswire

DALLAS (FEB. 16) PR NEWSWIRE - Recognition Equipment Inc. (NYSE: REC) announced today that its stockholders had ratified the purchase agreement between the company and The Prospect Group Inc. and elected new directors.

Pursuant to the agreement between Recognition and Prospect, Prospect has purchased for cash Recognition's $15 million Convertible Senior Subordinated Note due 1997. The note will bear interest at a rate of 10 percent per annum, which will be paid by issuance of additional notes until the company's outstanding bank debt has been repaid and the loan agreement terminated. The note is convertible into Recognition common stock at $9 per share.

In ratifying the agreement, stockholders also approved a self-tender offer for $15 million to $20 million of the company's common stock at a price of $9 per share. The tender offer is scheduled to commence within 120 days.

Newly elected board members are Thomas Hurley, James F. Gero and William H. Waltrip to serve until 1993; A.A. Meitz to serve until 1991; and Thomas A. Loose and Gilbert H. Lamphere to serve until 1992. The board also elected Lamphere chairman.

Hurley is co-chief executive officer of Recognition. Gero is a private investor and formerly chairman, president and CEO of Varo Inc. in Dallas. Waltrip is a private management consultant and former president and chief operations officer of IU International Inc. in Philadelphia and former president and CEO of Purolator Inc. of Basking Ridge, N.J. Meitz is a senior vice president of Booz Allen & Hamilton Inc. in Dallas. Loose is senior vice president and general counsel of Recognition, and Lamphere is chief executive officer of Prospect.

Robert Vanourek, co-chief executive officer of Recognition, and William C. Hittinger, retired executive vice president of RCA Corp., continue on the board.

Recognition sells and services data capture, document scanning and image processing systems to customers around the world. These systems include terminal-based keyboard products and fully integrated systems which utilize networks, high-speed paper-handling, optical character reading and image manipulation hardware and software.

ALAMEDA, CA (FEB. 16) PR NEWSWIRE - Aquanautics Corporation (NASDAQ: AQNT) today announced that Dr. Bruce D. Zenner has been promoted to director of new product development.

In his new position, Zenner will be responsible for developing new packaging and food preservation applications for Aquanautics' oxygen-absorbing Longlife(TM) compounds.

"Our first Longlife product, the Smartcap(TM) bottle closure, is moving rapidly toward commercialization," said N. Ross Buckenham, Aquanautics' president and chief executive officer. "Dr. Zenner has overseen the Smartcap project -- a joint development effort with ZapatA Industries, Inc. -- since its inception. The Smartcap closure has successfully passed its initial taste tests and we are now forming a marketing- and production-oriented team for it. Dr. Zenner will be expanding his development team in order to develop additional uses for Aquanautics' oxygen-absorbing Longlife materials."

Buckenham said that Zenner was creating two new teams to pursue the development of Smartcan(TM) oxygen-absorbing can lids for beer and the development of Smartpak(TM) polymers for plastic packaging of solid foods. Zenner has recruited, as the principle can expert on the Smartcan team, a former manager of container development for American Can Company who holds 30 patents in can closure techniques.

Working closely with Zenner will be Dr. Eric Shulenberger, who recently joined Aquanautics as director of scientific and legal affairs. Shulenberger will oversee the company's patent preparation and administration and be responsible for gaining foreign and domestic regulatory approval for Aquanautics' products.

Aquanautics Corporation is a development stage separations and specialty chemical company producing new oxygen control technologies. Aquanautics' proprietary synthetic oxygen-binding molecules can be structured into a variety of systems for extracting, concentrating and/or eliminating oxygen. The company is currently developing applications for food, medical, industrial and defense markets.

DETROIT, (FEB. 16) PR NEWSWIRE - Quest BioTechnology, Inc. (NASDAQ: QBIO) ("Quest") today announced results of its fourth quarter and fiscal year ended Oct. 31, 1989.

During the quarter, Quest's subsidiary, Quest Blood Substitute, Inc. ("QBS") received payment by Hemosol, Inc. of Toronto, Ontario, for an option to non-exclusively license certain QBS patents covering modified cross-linked hemoglobin technology for therapeutic use as a blood

substitute for human health care. Also during the quarter, Quest's wholly owned subsidiary, PolyCell, Inc. granted a non-exclusive license for its QUADROMA(tm) technology to Cetus Corporation (NASDAQ: CTUS) of Emeryville, Calif., for use in the area of non-radioisotope cancer therapy.

"The fiscal year ended Oct. 31, 1989, was a year of progress for Quest," said Eugene I. Schuster, chairman, president and chief executive officer of Quest. "We reported substantially increased revenues through licensing sublicensing, research and development agreements and reduced losses. Licensees of our technologies are proceeding with pre-clinical and clinical trials for therapeutic applications. The progress Quest has made during fiscal 1989 is founded on the basis of solid technology, qualified and motivated employees and a sound business strategy."

#90047p0297 02/16/1990 ~PR Newswire

MIAMI LAKES, FL (FEB. 16) PR NEWSWIRE - Windmere Corporation (NYSE: WND) reported 1989 earnings of $7.7 million or 49 cents per share, a 76.4 percent decrease from the $32.6 million or $2.26 per share reported for 1988.

Sales in 1989 were 178.7 million, a decrease of 7.1 percent from the $193.3 million recorded last year.

Income in 1988 included $3.2 million or 22 cents per share of non-recurring gains primarily relating to the company's sale of its Save-Way Beauty Supply stores.

The company reported fourth quarter losses of $1.4 million or 9 cents per share, as compared with earnings of $11.2 million or 77 cents per share recorded in the fourth quarter of 1988. Last year's fourth quarter net income includes non-recurring gains of $2.1 million or 14 cents per share primarily related to the sale of the Save-Way Beauty Supply stores. Fourth quarter sales were $49.5 million, an increase of 4.9 percent over the $47.2 million recorded for the same period last year.

The company attributes its losses in the fourth quarter to lower than expected sales by the company during the period from the Thanksgiving holiday weekend through year end, lower than planned third party shipments by its manufacturing operations and lower than projected gross profit margins.

This lower level of gross profit margins was primarily caused by the company's manufacturing operations having under- absorbed labor and overhead costs due to operating at lower than planned capacity levels and greater than expected materials costs, as well as lower than anticipated sales of the company's higher margin new products.

In addition, in the fourth quarter the company had increased air freight expenses and carrying costs associated with higher inventory levels. The company emphasized the fact that its fourth quarter results include a $500,000 inventory reserve although it did not sustain any inventory write downs for 1988.

In part, this reserve reflects the company's continued recognition that it has certain slow moving inventory, but the company continues to sell such merchandise and such merchandise does not generally become obsolete. The company also noted that it had no accounts receivable exposure to the Federated/Allied bankruptcy filings.

#90047p0304 02/16/1990 ~PR Newswire

CAMBRIDGE, MA. (FEB. 16) PR NEWSWIRE - Spinnaker Software Corporation (NASDAQ: SPKR), a leading provider of software for home offices and small business, today reported a net loss of $147,719, or $.02 per share, for the second quarter of fiscal 1990 ended Dec. 31, 1989, and a net loss of $92,047, or $.01 per share, for the six months ended Dec. 31, 1989. This compares to a net profit of $106,045, or $.02 per share, for the three months ended Jan. 31, 1989, and a profit of $103,640, or $.02 per share, for six months ended Jan. 31, 1989. Net sales for the second quarter totaled $4,279,815 compared to $3,701,241 and for the six months were $7,559,753 against $7,041,622 for the comparable period a year ago.

C. David Seuss, chairman and CEO of Spinnaker, noted that the quarter's results were negatively affected primarily by lower-than- expected industry sales of computer hardware to new home office and small business users. A large portion of Spinnaker's revenue is software purchased by consumers at the same time they are buying a computer, so a slowdown in hardware sales lowers the demand for software. In response to continued weakness in consumer demand, Spinnaker has taken several cost containment actions. The reduction in overhead, as a result of these actions, is estimated to be approximately $750,000 annually.

Another short-run earnings factor was the expense the company is incurring to complete its newest product, Spinnaker PLUS. PLUS is a hyperprogramming solution for custom information management applications. PLUS will be targeted at corporate in-house software developers and PC OEMs. PLUS creates the first direct connection between Macintosh and PC platforms at the applications level.

Spinnaker also announced that it is negotiating a $3 million, five- year subordinated debt credit facility with Phemus Corporation, an affiliate of Harvard Management Company, one of the company's principal stockholders. In connection with the establishment of the facility, Spinnaker has agreed to grant Phemus Corporation five-year warrants to purchase up to 2,222,222 shares of common stock at a price of $1.35 per share.

#90047p0305 02/16/1990 ~PR Newswire

DES MOINES, IA (FEB. 16) PR NEWSWIRE - Allied Group, Inc. (NASDAQ: ALGR) Board Chairman and President John E. Evans today announced a 23 percent increase in earnings for 1989, up to $1.87 from $1.52 for 1988. Book value increased to $16.58 from $15.19 at the previous year-end.

Revenues for continuing operations were up 20 percent to $212.5 million. Operating income was $14.0 million, up 36 percent from 1988's $10.3 million. Net income, including profit from discontinued operations, was $12.7 million.

Evans credited the company's higher earnings primarily to improvements in property-casualty performance: "We went through some tough adjustments in 1988 to turn our private passenger auto business around. Our 1989 results show that our strategies are beginning to work."

Earned premiums for the property-casualty segment increased by 6 percent compared to 15 percent in 1988, but the growth was more profitable. The statutory combined ratio (after policyholder dividends) improved to 102.7 from 103.8. The 1989 estimated industry ratio was 110.4.

Earnings were enhanced by contributions from the company's excess and surplus lines segment. Direct written premiums rose by 34 percent, generating operating income of $3.3 million compared with $1.5 million the year before.

Operating profit for the data processing segment was down $2.4 million because of increased systems development and hardware costs and a one-time computer lease termination fee.

Underpinning the fiscal strength of insurance operations, invested assets for continuing operations increased to $207.2 million. Investment income from those assets totaled $14.5 million, up from $11.5 million at year-end 1988. The 25 percent increase came without sacrificing quality in pursuit of high yields, Evans said.

Income taxes for continuing operations rose to $4.0 million from $2.8 million for 1988. The effective tax rate was 28.6 percent, up slightly from 27.3 percent for the previous year.

The company will complete a proposed restructuring announced in October as soon as final regulatory approval is received. In preparation for its transfer to Allied Mutual, the life company is listed as a discontinued operation in the 1989 financial statements and numbers for the preceding years have been restated accordingly. Growth resulting from the proposed infusion of capital to Allied Group, Inc.'s property- casualty operations is expected to more than offset the life segment's income.

TROY, MI. (FEB. 16) PR NEWSWIRE - MLX Corp. (NASDAQ: MLXX) announced today that its Refrigeration & Air Conditioning Group is continuing to negotiate with the group's senior lenders for an extension until Sept. 30, 1990, of the current installment due under the group's senior term loan.

The company announced that MLX is also in discussions with the group's senior lenders to negotiate a permanent restructuring or refinancing of the group's senior loans on a basis which is acceptable to MLX, the group, and the group's senior lenders. In order to provide the additional time necessary to continue these discussions, the current term loan installment due Feb. 15, 1990, has been rescheduled to March 1, 1990.

MLX is the largest independent nationwide distributor of commercial refrigeration and air conditioning equipment, parts and supplies, and a leading manufacturer of high-energy friction products and components used in aircraft brakes and in clutches, brakes and transmissions for heavy-duty trucks and off-highway equipment.

WASHINGTON (FEB. 16) PR NEWSWIRE - GEICO Corporation (NYSE: GEC) today reported its results for the three months and year ended Dec. 31, 1989.

The corporation's 1989 annual report to shareholders will be mailed on or about March 16, 1990.

Commenting on the corporation's results for the year, Chairman Bill Snyder said: "Net income for 1989 totaled $213.1 million compared to $189 million in 1988 and, on a per share basis, net income was $13.74, up 15.3 percent from $11.92 per share in 1988. The 'fresh start' tax benefit for 1989 was 35 cents per share compared to a 46 cent per share benefit a year ago. The 1989 net income included aftertax realized gains of $73.8 million ($4.76 per share) from the sale of securities compared to a gain in 1988 of $54.6 million ($3.44 per share).

"Insurance operations financial results were satisfactory and compare favorably with 1988 results even though we experienced numerous weather-related catastrophes in 1989. The consolidated property and casualty underwriting ratio for the year was 97.4 percent, after policyholder dividends, while in 1988 the reported ratio was 100.7 percent (but adjusted for the effect of converting to six-month premiums, this ratio for 1988 was 97.8 percent).

"Consolidated premiums earned increased 4.7 percent to $1,621.4 million in 1989, compared to $1,549 million a year ago. Pretax net investment income increased 6.2 percent to $152.4 million from $143.5 million in 1988 and aftertax net investment income was $134.9 million, up 7.5 percent from $125.4 million in the prior year.

"In GEICO, our principal subsidiary, earned premiums were up a disappointing 6.2 percent over the 1988 level. Both auto and homeowners new policy sales were less than planned for 1989 but better than 1988. GEICO's underwriting ratio, was 97 percent, after policyholder dividends, compared to an adjusted (for conversion to six-month premiums) ratio of 95.6 percent in 1988," Snyder said.

Following is a comparison of 1989 and 1988 fourth quarter and full year results.

TROY, MI. (FEB. 16) PR NEWSWIRE - Ovonic Imaging Systems, Inc. ("OIS") (OTC: OVONC) today reported its unaudited operating results for the three months and six months ended Dec. 31, 1989, as follows:

	Three Months Ended Dec. 31		Six Months Ended Dec. 31	
	1989	1988	1989	1988
	(in thousands)		(in thousands)	
Revenues				
Product sales	$186	$265	$274	$466
Revenues from business agreements	1,289	1,250	1,975	1,739
Other (substantially all interest)	113	52	295	97
Total revenues	$1,588	$1,567	$2,544	$2,302
Total expenses	$2,561	$2,363	$5,040	$3,916
Net (loss)	($973)	($796)	($2,496)	($1,614)
Net (loss) per share (in dollars)	($.07)	($.06)	($.18)	($.12)

Total revenues for the six months ended Dec. 31, 1989, increased to $2.54 million from the $2.30 million recorded for the same period a year ago. Total expenses for the six-month period ended Dec. 31, 1989, increased to $5.04 million from $3.92 million in the six-month period ended Dec. 31, 1988. Net loss for the six-month period ended Dec. 31, 1989, increased to

$2.5 million from $1.6 million recorded in the corresponding prior year period. Net loss per share for the six-month period ended Dec. 31, 1989, increased to $0.18 from $0.12 recorded in the corresponding prior year period.

Total revenues in the second quarter of fiscal 1990 (ended Dec. 31, 1989) increased to $1.59 million from the $1.57 million recorded in the same quarter a year ago. Total expenses in the second quarter increased to $2.56 million from $2.36 million recorded in the same quarter a year ago. Net loss for the quarter was $973,000, up from $796,000 in the prior year's corresponding quarter.

OIS's President, Dr. Zvi Yaniv, stated that the revenues for the six month period resulted primarily from prototypes developed and manufactured for agreements with customers during the six months ended Dec. 31, 1989. In the same period a year ago, revenues were largely generated by a one-time, fully paid-up license fee from a major international company.

Total expenses and net loss increased from $3.92 million and $1.61 million to $5.04 million and $2.50 million, respectively, for the six months ended Dec. 31, 1989, as compared to the six months ended Dec. 31, 1988, primarily due to an increase in resources devoted to prototype development and manufacturing, increase in interest expenses related to the debts to William Manning and Energy Conversion Devices, Inc. ("ECD"), increase in legal expenses, expenses relating to the site selection and planning of a new manufacturing facility, and increased marketing and sales efforts.

OIS develops electronic displays and scanning systems. Currently, OIS is focusing its proprietary display technology on avionic and military applications in order to become a leading U.S.-based manufacturer of flat panel displays.

DALLAS (FEB. 16) PR NEWSWIRE - Cronus Industries Inc. (NASDAQ: CRNS) announced preliminary 1989 results of $72.8 million in revenues and $2.9 million in net income, or 60 cents per share, for its fiscal year ending Dec. 31. These results compare to revenues of $99.3 million and a loss of $22.7 million, or $4.31 per share during the 1988 fiscal year. These financial results will not become final until the company's external audit is completed in March.

P.E. Esping, president and chief executive officer of the company, stated that despite signs of improved earnings, much remains to be accomplished if the company is to achieve stable growth. Esping said he believed the company's improved concern for customer service and cost-effectiveness will help to increase the stability of future earnings.

The Dallas-based company provides information systems and services to governmental entities and title companies.

NEW YORK (FEB. 16) PR NEWSWIRE - The board of directors of The High Yield Plus Fund, Inc. (NYSE: HYP) today declared the fund's monthly dividend of 8.5 cents per share which represents a 1 cent reduction from the previous monthly amount of 9.5 cents per share. The dividend is payable on March 9, 1990, to shareholders of record on Feb. 28. The ex- dividend date is Feb. 22.

Commentary of Wellington Management Company Investment Adviser:

Over the past two months , we acted to mitigate downward pressure on the fund's net asset value by shifting within the high yield sector a portion of the fund's assets into relatively higher quality securities. As a result, the bonds that we purchased have lower yields than those sold. In addition, during the past two months the fund reduced its outstanding borrowings by $2 million, leaving total borrowings at $8 million or 10 percent of total assets. While we believe these actions were prudent, they reduced the income earned by the fund and necessitated a reduction of the fund's dividend.

The fund, like other portfolios invested in high yield bonds, reflected the overall deterioration of the high yield market in recent months. However, the actions described above were taken to better position the fund in anticipation of these market difficulties. In this volatile and uncertain high yield market, we view the protection of shareholders' net asset value as a particularly important factor in our investment decisions.

The High Yield Plus Fund, Inc., a diversified closed-end investment company which began investment operations on April 22, 1988, has a primary investment objective of providing a high level of current income. Its secondary objective is capital appreciation.

Under typical conditions the fund will invest at least 65 percent of its assets in high yield debt securities rated in the medium to lower categories by recognized rating services or in non-rated securities deemed by the fund's investment adviser to be of comparable quality. The fund may also invest in hybrid securities having both debt and equity characteristics. Up to 25 percent of the fund's total assets may be invested in restricted securities, including privately offered mezzanine debt financings and bridge loans. The fund has the flexibility to increase its investment capacity by borrowing an amount up to one-third of its total assets.

The fund's investment manager is Wellington Management Company, an independent investment management firm. Additional information on the fund is contained in the quarterly report for the period ended Dec. 31, 1989.

TULSA, OK (FEB. 16) PR NEWSWIRE - Kinark Corporation (AMEX: KIN) today announced preliminary earnings from continuing operations rose 39 percent to $2,002,000, or 56 cents a share, for 1989 compared to $1,441,000, or 41 cents a share, in 1988. Sales for the year were $31,855,000, a 13 percent increase over sales of $28,227,000 in 1988.

Earnings from continuing operations for the fourth quarter of 1989 were $597,000, or 16 cents a share, compared to $483,000, or 14 cents a share, in the prior year. Fourth-quarter sales increased 12.6 percent to $8,247,000 from $7,321,000 a year earlier.

The company does not expect to report final results for 1989 until bids are received for the sale of its Camelot Hotels. The bid deadline has been set for March 23. Should the market value, determined by the bid process or appraisal, prove to be lower than the carrying value of the hotels, the loss will be charged to the company's earnings for 1989. If no sale takes place the company will also establish a reserve for holding costs.

Kinark first sold the hotels in 1982 for $25 million in a seller- financed transaction, realizing more than $8 million cash. After two years, the buyer defaulted on the note and Kinark repossessed the hotels. Since

1984, hotel operating expenses, including depreciation and interest, have been charged to discontinued operations while the company continued its efforts to resell the hotels.

Kinark has engaged the Lange Financial Corporation in Newport Beach, Calif., as its exclusive agent to sell the hotels. The company will use the net proceeds of any sale to pay down long-term debt and expand the company's operations.

Kinark Corporation, with corporate headquarters in Tulsa, operates chemical facilities in Chicago and Montgomery, Ala., and supports industrial/commercial construction and metals corrosion protection with galvanizing plants in Denver, Louisville, Ky., Nashville, Tenn., St. Louis Houston and Hurst, Texas.

BURBANK, CA (FEB. 16) PR NEWSWIRE - Richard Fox, president of Warner Bros.' International Theatrical Division, announced today that for the fifth consecutive year, Warner Bros. has topped all previous annual records in overseas billings and broken its own record with at tremendous $184.1 million in foreign film rentals during fiscal 1989. This represents a solid 16.7 percent increase over the previous year, which generated $157.7 million in fiscal 1988.

Warner Bros. International's tremendous success in fiscal 1989 came from a wide variety of major releases, many of them still playing, with more openings yet to come: "Batman," the worldwide sensation starring Michael Keaton, Jack Nicholson and Kim Basinger, has brought in a giant $93,600,000 foreign gross to date (with a total in excess of $150 million anticipated); "Lethal Weapon 2," the popular action thriller starring Mel Gibson and Danny Glover, directed by Richard Donner, reaped $61,500,000 in grosses (with $75 million plus projected); the critically acclaimed "Dangerous Liaisons" brought in a big $36,500,000; "Gorillas in the Mist," starring Sigourney Weaver, grossed a potent $33,600,000; "Police Academy 6: City Under Siege," the newest edition of Paul Maslansky's perennially popular comedy series, grossed a terrific $21,300,000; "Moonwalker," the musical film starring Michael Jackson, pulled in $21,000,000; "The Dead Pool," the latest film starring Clint Eastwood as Dirty Harry, grossed $15,000,000; "Tequila Sunrise," the drama starring Mel Gibson, Kurt Russell and Michelle Pfeiffer, with $14,300,000; and "The Accidental Tourist," starring William Hurt, Kathleen Turner and Geena Davis, added $10,000,000 to Warner International's overseas box-office receipts for the past year.

Among the key territories contributing to the record-breaking year for Warner International was Australia, with an amazing 107 percent increase in billings over 1988. In Europe, remarkable gains were generated by the United Kingdom (plus 89 percent), Sweden (plus 76 percent), Italy (plus 31 percent), France (plus 22 percent), and Spain (plus 19 percent). In Latin America, fabulous increases over 1988 were accomplished in Brazil (plus 86 percent) and Mexico (plus 75 percent).

Stated Fox of Warner Bros. International's latest record-breaking year, "What was accomplished internationally in the past year proves that, with maximum distribution and careful territory-by-territory marketing, Warner Bros.' films have the potential to play successfully all over the world. "We're proud that the international division has registered strong and successful years throughout the '80s; I fully anticipate a continuation of our success in the coming fiscal year as well as throughout the '90s."

#90047p0338 02/16/1990 ~PR Newswire

TAMPA, FL (FEB. 16) PR NEWSWIRE - The American Ship Building Company (NYSE: ABG) today reissued its reported results of operations for the fiscal year ended Sept. 30, 1989. Chairman and Chief Executive Officer George M. Steinbrenner stated that costs associated with a ship construction contract entered into in September 1987, before his return as chief executive officer in November 1988, would be addressed in their entirety in fiscal 1989, thereby affecting the operating loss, net loss and loss per common share for fiscal 1989. As reissued the operating loss was $15.5 million and the net loss was $12 million, or $1.89 per share.

The company will seek reimbursement of all costs which were incurred on the contract. Management and its outside consulting firm, C.L. Willis and Associates, Newport News, Va., are confident that the outcome of the negotiation and settlement process will be favorable. However, the company has decided to write-off the balance of all contract costs in 1989 in order to reflect the most conservative approach to financial reporting. The amount ultimately collected will be reflected as income in the company's results of operations when final settlement is reached.

This action by the company will in no way affect the results of the first quarter of 1990 which ended Dec. 31, 1989, and was the first profitable quarter by the company since 1986. In this first quarter the company earned $302,000, or $0.05 per share profit, compared to a net loss of $2.4 million, or $0.40 per share loss, in the same quarter of 1989.

Predictions by the company for a profitable year in fiscal 1990, the first

such profitable year since 1986, also remain on target and will not be affected by this action.

The American Ship Building Company is a major independent ship construction, conversion and repair firm. It has the largest ship repair and construction facilities in Florida and is one of the major barge builders on the inland waterways.

NEW YORK (FEB. 16) PR NEWSWIRE - Reuters (NASDAQ: RTRSY) today announced it had served notice to terminate its news pictures agreement with United Press International.

Under the 10-year agreement which took effect in January 1985, UPI supplied Reuters with U.S. news pictures and Reuters supplied UPI with news pictures from outside the United States.

Andrew M. Nibley, editor, Reuters America, said Reuters had decided to serve notice on the agreement with deep regret and only after trying hard for a long period to make it work.

"Reuters will now cover the United States from its own resources," Nibley said. "Reuters already has 14 bureaus in the United States from which photographers can work. We will investigate expansion of both permanent photographic staff and our network of part-time stringers."

"For some time, Reuters has been forced to incur considerable additional costs to supplement the UPI service," Nibley said, adding that Reuters had filed suit to recover these costs. "We had no choice but to take this decision."

Reuters supplies a wide range of services to both business subscribers and to the news media. It obtains its information from around 159 exchanges and over-the-counter markets, from data contributed directly by more than 3,715 subscribers in 82 countries and from a network of 1,268 journalists, photographers and cameramen. Reuters distributes information via some 199,706 video terminals and teleprinters, and directly into clients' computers.

#90047p0354 02/16/1990 ~PR Newswire

NEW YORK (FEB. 16) PR NEWSWIRE - The board of directors of The Global Yield Fund, Inc. (NYSE: PGY), declared a quarterly dividend of 22 cents per share. The dividend is payable March 30, 1990 to shareholders of record as of March 16, 1990. The board of directors has reduced the amount of the fund's quarterly dividend from the previous level of 27 cents per share to reflect conditions in the global bond markets as well as the fund's current portfolio structure that favors European securities.

The fund's portfolio return in generally comprised of interest income on securities and any gains or losses from currency or capital price movements. The action of the board of directors today is designed to make quarterly dividends more closely correspond to the investment returns on the fund's portfolio. It is a reflection of the lower income stream on portfolio securities due to a repositioning of the fund's portfolio (see adviser's outlook).

In addition, the board of directors announced the adoption of a share repurchase program. In recognition of the fact that the fund's shares have been recently trading at a discount, the fund's board determined that it would be in the best interest of shareholders for the fund to take advantage of existing discount levels to increase the net asset value of the shares that remain outstanding. Specifically, the board has authorized the repurchase of such number of its shares from time to time on the New York Stock Exchange as its officers shall determine up to a maximum of 10 percent of the fund's 69,550,723 currently outstanding shares of common stock, commencing on or about March 1, 1990.

On Feb. 9, 1990, the fund's closing price on the New York Stock Exchange was $8.625 and its net asset value per share was $8.70.

For the six- and three-month periods ended Dec. 31, 1989, the company decreased its loss from operations by $1.8 million and $2.9 million, respectively, on a revenue increase of $3.0 million for each period. On Jan. 22, 1990, the company and a former chairman of the board of the company reached a settlement of the claims and disputes between them. In connection therewith, the company recorded a charge of $22.4 million during the quarter ended Dec. 31, 1989, relating to the settlement, and an additional charge of $.7 million in connection with other litigation.

Graphic Scanning Corp. is a leading provider of a wide variety of telecommunications services in the United States and a growing provider of telecommunications services in the United Kingdom. Graphic operates one of the nation's largest radio paging businesses, controls 50 percent of two cellular radio telephone partnerships, and serves the corporate syndicate communications needs of the country's investment banking community. In addition, the company participates through joint ventures in wireless cable and FM broadcast operations.

LOS ANGELES (FEB. 16) PR NEWSWIRE - First Interstate Bancorp (NYSE: I) today announced the signing of a definitive agreement to sell First Interstate Bank of Fort Collins N.A. for $25 million to a group of investors that includes the Colorado's bank's management team.

Under terms of the agreement, the bank will maintain its current name and will license services from the Los Angeles-based bank holding company under a franchise contract.

First Interstate said the bank has had an excellent record of earnings during periods when many others have been less successful. However, with the holding company's increased emphasis on the Denver market, the Fort Collins operation no longer fits into the corporation's marketing strategy.

In announcing the agreement, Ed Carson, president of First Interstate Bancorp, said that the Fort Collins bank has an excellent management team and a first-rate staff that will continue to serve local customers as they have in the past.

The proposed sale, which was initiated by the Fort Collins bank's management and has been under consideration for a year, is subject to completion of pending financing arrangements and final corporate and regulatory approvals. The sale is expected to close during the third quarter of 1990.

#90047p0362 02/16/1990 ~PR Newswire

COLUMBUS, OH (FEB. 16) PR NEWSWIRE - Columbia Gas (NYSE: CG) of Ohio will implement higher rates Feb. 17 as it had indicated it would do in documents filed with the Public Utilities Commission of Ohio on Feb. 6.

C. Ronald Tilley, Columbia Gas of Ohio chairman and CEO, said the action was necessary in order to assure that Columbia of Ohio is afforded an opportunity to earn its allowed rate of return in 1990.

"We had presented an innovative plan to the commission which would have more than offset higher base rates necessitated by increases in operating costs with gas cost decreases," Tilley said. "This plan was designed to minimize the impact of these actions on customers. The commission did not elect to approve this plan."

Tilley said that Columbia of Ohio has been attempting to resolve the issues in these cases prior to the expiration of the prescribed time frame for a decision by the commission. "Unfortunately, we were not successful in these efforts and, therefore, Columbia of Ohio has no option but to implement rates as provided for by law."

He noted that the law states if a final decision is not issued within 275 days after the commission accepts a rate filing, the utility is entitled to collect the filed rates subject to refund until the case is decided.

"This action in no way circumvents the regulatory process since the rates are being collected subject to refund pending a final order from the commission," said Tilley.

"This is an important business decision since we would be precluded from collecting necessary increased revenues during the time between Feb. 17 and a final order," said Tilley.

He said it is crucial to recognize the importance of this time frame in Columbia's annual earnings picture. "Some 30 percent of our earnings each year fall between Feb. 17 and April 1. To voluntarily forgo the opportunity to earn in this time frame would be financially irresponsible " he said.

"In addition," Tilley noted, "there have been suggestions of impropriety by the Ohio Consumers' Counsel with regards to our plan to place rates into effect prior to a commission order. I find this to be a very troubling concept given the fact that Columbia of Ohio has explicitly followed all prescribed rules and regulations in its filings."

Tilley said that during the past 10 days and throughout the period since filing its rate cases Columbia vigorously pursued alternatives with parties to the cases. These efforts have not been successful, he said.

"Certainly, we are disappointed that we will not be able to offset these necessary increases on Feb. 17 as planned. However, customers' rates will go down beginning March 1 when we implement gas cost decreases," Tilley said.

"It is our intention to continue to pursue discussion of the many issues in this case with all involved parties."

#90047p0366 02/16/1990 ~PR Newswire

VALLEY FORGE, PA (FEB. 16) PR NEWSWIRE - Worlco Data Systems Inc. (NASDAQ: WDSI) today reported revenues of $3.4 million for the third quarter ended Dec. 31, 1989, compared to $4 million for the same quarter last year.

The company reported a net income loss of $55,532 or 2 cents a share, vs. a net income of $202,156 or 6 cents a share for the same period in the prior year.

For the nine-month period, revenues were $9.4 million compared to $10.2 million for the same period in the prior year. The company reported a net loss of $267,313 or 9 cents a share for the nine-month period. This compares to a net income of $441,138 or 13 cents for the same period in the prior year.

Turnkey systems revenues decreased by $1,327,000 for the quarter ending Dec. 31, 1989, while computer services revenues increased by $777,000 for

the same period, reflecting the company's de-emphasis of turnkey systems sales and greater focus on computer services revenues.

The company has incurred substantial one-time expenses in integrating the Donald Grenier Corp. These expenses should terminate by April 1, 1990, at which time the acquisition should be fully integrated.

The company's lawsuit against Maxwell Communication Corp. ended on Feb. 9, 1990, with a jury verdict in favor of the defendants. The company has not incurred any liability as a result of this verdict, and its legal expenses will be reduced sharply beginning March 1, 1990.

Worlco Data Systems provides data processing services for the direct marketing and publishing industries and is a leading developer of standardized computer application packages for the retail/wholesale distribution industry.

#90047p0373 02/16/1990 ~PR Newswire

HAUPPAUGE, NY (FEB. 16) PR NEWSWIRE - Beauty Labs, Inc. (NASDAQ: LABB) today reported that net sales for the third quarter ended Dec. 31, 1989, were $3,092,219, compared with $4,908,018 for the third quarter of the prior year. The net loss for the third quarter of 1989 was $897,316, or 37 cents per share loss, compared with a net income of $237,696, or 10 cents per share, for the same period last year.

Hal Markowitz, chief executive officer of Beauty Labs, Inc., attributed the net loss for the quarter ended Dec. 31, 1989, to several factors: 1) a decrease in net sales for the third quarter resulting from the company's continuing efforts to replace low gross margin products with higher gross margin products, 2) sales returns of approximately $572,000, consisting principally of the company's nail treatment product, Overnight Nail Miracle, and 3) approximately $215,000 of charges to increase inventory and bad debt reserves.

The company has resubmitted revised labeling to the FDA relating to the Overnight Nail Miracle product and has advised the FDA of its commitment to comply with all requirements of law and to resolving this matter amicably with the FDA. Management is optimistic that its most recent response to the FDA will resolve this issue.

Markowitz said, "We had hoped the reduction in sales of lower gross margin products would have been offset by sales of the Overnight Nail Miracle. However, due to the inquiry by the FDA, several of our major customers have been reluctant to actively advertise the item. We feel future sales

of the Overnight Nail Miracle will remain slow until the matter is resolved. We believe the adverse effect will be short term, and intend to offset this impact through the introduction of new higher gross margin products. However, the company, at this time, cannot predict with accuracy the effect of the inquiry on total sales." He further added, "Management has undertaken and is continuing cost reduction measures to decrease operating overhead, which should expedite the company's return to profitability."

Beauty Labs, Inc. manufactures, markets and distributes beauty products, hair care and hair related accessory products primarily to mass volume retail outlets.

#90047p0387 02/16/1990 ~PR Newswire

SPOKANE, WA (FEB. 16) PR NEWSWIRE - The Washington Water Power Company (NYSE: WWP) today announced that its board of directors has unanimously adopted a Shareholder Rights Plan to protect shareholders from any takeover attempt that would deny them a full and fair price for their stock.

Paul A. Redmond, chairman of the board and chief executive officer, said the company is not aware of any takeover threat, and the plan is simply a long-range protective measure similar to those adopted by hundreds of other companies throughout the United States.

"The Shareholder Rights Plan is not intended to and will not prevent an acquisition of WWP at a full and fair price," Redmond said.

"However, it should be a deterrent to anyone who attempts to acquire the company without the approval of the board of directors, and it places the board in a much better position to protect the interests of the company and its shareholders, employees, customers, and the communities it serves " he said.

Shareholders will be issued one "Right" for each share of WWP common stock they own as of March 2, 1990. Under normal conditions, the Rights cannot be exercised and will automatically trade with the common stock when it is bought and sold.

The provisions of the plan would take effect only if a person or group acquired 10 percent or more of the company's common stock, or 10 days (or such later date as the board may decide) after any person or group initiated a tender offer that would result in their owning 10 percent or more of the common stock. The 10 percent limit was selected to be consistent with the current Washington state anti-takeover law.

At that point, separate Rights certificates would be distributed and the Rights would become tradeable. Each Right would entitle its holder to purchase additional shares of WWP's common stock, subject to regulatory approval and other specified conditions, at an exercise price of $80 for $160 worth of stock. The Rights of the individual or group attempting to gain control of the company would be void.

The Rights can be redeemed by the board or the plan amended by the board prior to the acquisition of 10 percent of the common stock. Afterward, the plan could be amended by the board as long as it did not have any material adverse impact on holders of the Rights.

The Rights plan does not in any way diminish the company's financial strength or interfere with its business plans. The issuance of Rights has no dilutive effect, will not affect reported earnings per share, is not taxable to the company or its shareholders, and will not change the way the company's shares are traded.

MALVERN, PA (FEB. 16) PR NEWSWIRE - Centocor Inc. (NASDAQ: CNTO) today reported that 1989 product sales increased 25 percent over 1988 levels to $27.6 million.

Net income for the year ended Dec. 31, 1989, was $115,000. Commenting on the company's performance for 1989, Hubert J.P. Schoemaker, chairman and chief executive officer, said, "1989 was a year in which the foundation for the rapid growth of our pharmaceutical business was firmly established.

"The European market launch of our first pharmaceutical, Myoscint(TM) and the filing of the Product License Application for our first therapeutic product, Centoxin(TM), clearly demonstrate that Centocor is emerging as a significant new presence in the global pharmaceutical industry." The company's 1990 operating results will depend in large part on the timing of any regulatory approval of Centoxin.

Centocor Inc., based in Malvern, develops, manufactures and markets diagnostic and pharmaceutical products for human health care. The company's products are based on monoclonal antibody technology and are primarily intended for use in the management of patients with cardiovascular, infectious and autoimmune diseases, and cancer.

RALEIGH, N.C. (FEB. 16) PR NEWSWIRE - RS Financial Corp. (NASDAQ-NMS: RFBK) announced today that earnings for the year ended December 31, 1989, were $3,523,000 or $1.02 per share compared to $4,423,000 or $1.28 per share as of December 31, 1988.

For the quarter ended December 31, 1989, net income was $633,000 or $0.18 per share compared to $845,000 or $0.24 per share for the same period in 1988.

F. Guy Walker, President and Chief Executive Officer of RS Financial Corp. and Raleigh Federal, stated "The decrease in earnings is principally due to management's decision to increase the valuation allowances for potential losses on assets. Raleigh Federal continues to exceed its regulatory capital requirements."

Raleigh Federal, the only wholly owned subsidiary of RS Financial Corp., acquired and merged with Builders Federal Savings and Loan Association and First Federal Savings and Loan Association of North Carolina located in

Sanford on December 1, 1989. These acquisitions added $261 million in assets. Financial results for the fourth quarter reflect this one month of consolidated operations.

At December 31, 1989, RS Financial Corp. had total assets of approximately $800 million and total deposits of $666.9 million.

TORONTO (FEB. 16) PR NEWSWIRE - American Barrick Resources Corporation (NYSE: ABX) has been awarded a motion for partial summary judgment in its litigation with Gold Standard Inc. involving the Mercur Mine in Utah.

In his ruling today, Judge Frank G. Noel of the Third District Court for Tooele County, Utah, said, "Gold Standard was properly converted to a net profits interest holder." The Judge upheld Barrick's position that Gold Standard was entitled to a 15 percent net profits interest in the Mercur Mine and dismissed all Gold Standard's claims based on alleged improper conversion from a 25 percent working interest party to a 15 percent net profits interest holder.

The court found that the operating agreement dated Dec. 11, 1973 between Getty and Gold Standard, as amended, was clear and unequivocal with the result that Barrick's Summary Motion limiting Gold Standard to a 15 percent net profits interest was upheld.

FOUNTAIN VALLEY, CA (FEB. 16) PR NEWSWIRE - In a move consistent with its

continued internal strategy to streamline administrative and corporate operations, National Lumber has announced the appointment of Frank E. Stephan Jr. as chief financial officer.

Stephan's appointment comes at a time when National Lumber is "realigning its approach to its marketplace and business," said Melvin Jaffee, president and chief executive officer of National Lumber. "Mr. Stephan's experience spans more than 20 years in accounting and financial managment " adds Jaffee. "His charge will be to improve our cash flow pictue by streamlining payables and receivable systems, budgeting, forecasting, and reorganizing internal financial operations."

"As CFO, I will be involved in all aspects of operations pertaining to strengthening National Lumber's fiscal position so that we can compete profitably."

Prior to joining Fountain Valley-headquartered National Lumber, Stephan served as a partner and chief financial officer for Surface Techniques and Scheer Custom Woodworking located in Stamford, Conn. The firms service the New York-Boston corridor specializing in custom building home interiors.

Stephan holds a bachelor of arts degree from Yale and master of business administration from the University of Chicago. He served as assistant corporate controler for General Signal Corp., a Fortune 200 company manufacturing instrumentation and control systems. Prior to this, he served as chief financial officer in an oil services company and as corporate controller for Ward Foods, a Fortune 500 food manufacturer.

National+Lumber currently operates 21 retail home-improvement retail centers throughout Southern California.

LOVELAND, CO. (FEB. 16) PR NEWSWIRE - Hach CO. (OTC) today announced its financial results for the third quarter and nine months ended Jan. 27, 1990.

Net sales for the third quarter were $15,492,000, a 12 percent increase over net sales of $13,878,000 for the third quarter of the prior fiscal year. Net income of $1,260,000 for the third quarter ended Jan. 27, 1990 was 9 percent greater than net income of $1,158,000 for the comparable period in 1989. Net income per share was 26 cents for the third quarter ended Jan. 27, 1990 versus 24 cents for the third quarter of the prior fiscal year.

Net sales for the nine months ended Jan. 27, 1990 were $45,251,000, 13 percent greater than net sales of $40,189,000 for the nine months of the prior fiscal year. Net income of $3,660,000 for the first nine months was 14 percent higher than the prior year's nine month net income of $3,198,000. On a per share basis, net income was 76 cents for the current fiscal year versus 66 cents for the prior fiscal year.

Per share earnings reflect the five for four stock split effective Jan. 10 1990. As previously announced, the company has retained the same quarterly dividend rate per share which results in a 25 percent increase in shares and dividends.

SUNNYVALE, CA. (FEB. 17) PR NEWSWIRE - Nanometrics Inc. (NASDAQ: NANO) today reported revenues and operating results for the fourth quarter and year ended Dec. 31, 1989.

Revenues for the fourth quarter were $4.8 million, a decrease of 11 percent compared with $5.4 million for the like quarter of 1988. The company incurred an operating loss of $572,000 and a net loss of $208,000 or 3 cents per share. This compares with an operating income of $126,000 and a net income of $159,000 or 2 cents per share in the fourth quarter a year ago.

Revenues for the year ended Dec. 31, 1989, were $21.1 million representing a 2 percent increase from $20.7 million for the comparable prior year period. An operating loss of $517,000 and net income of $412,000 or 5 cents per share for the current year compared with operating income of $198,000 and net income of $540,000 or 7 cents per share for the like period a year ago. As of Dec. 31, 1989, the company had $6.6 million in cash and $14.6 million in working capital; its current ratio at the end of the fourth quarter was 4.5 to 1. Primarily as a result of a lower order rate, the company expects to report a net loss at least through the first

quarter of 1990. As of Dec. 31, 1989, the company's backlog was approximately $4.1 million compared with approximately $5.4 million one year earlier.

Nanometrics' principal products are optical and scanning electron microscope-based measurement and inspection stations utilized in the manufacture of semiconductors.

#90047p0421 02/16/1990 ~PR Newswire

SPOKANE, WA. (FEB. 17) PR NEWSWIRE - The Washington Water Power Company (NYSE: WWP) today announced that its board of directors has unanimously adopted a Shareholder Rights Plan to protect shareholders from any takeover attempt that would deny them a full and fair price for their stock.

Paul A. Redmond, chairman of the board and chief executive officer, said the company is not aware of any takeover threat, and the plan is simply a long-range protective measure similar to those adopted by hundreds of other companies throughout the United States.

"The Shareholder Rights Plan is not intended to and will not prevent an acquisition of WWP at a full and fair price," Redmond said.

"However, it should be a deterrent to anyone who attempts to acquire the company without the approval of the board of directors, and it places the board in a much better position to protect the interests of the company and its shareholders, employees, customers, and the communities it serves " he said.

Shareholders will be issued one "Right" for each share of WWP common stock they own as of March 2, 1990. Under normal conditions, the Rights cannot be exercised and will automatically trade with the common stock when it is bought and sold.

The provisions of the plan would take effect only if a person or group acquired 10 percent or more of the company's common stock, or 10 days (or such later date as the board may decide) after any person or group initiated a tender offer that would result in their owning 10 percent or more of the common stock. The 10 percent limit was selected to be consistent with the current Washington state anti-takeover law.

At that point, separate Rights certificates would be distributed and the Rights would become tradeable. Each Right would entitle its holder to

purchase additional shares of WWP's common stock, subject to regulatory approval and other specified conditions, at an exercise price of $80 for $160 worth of stock. The Rights of the individual or group attempting to gain control of the company would be void.

The Rights can be redeemed by the board or the plan amended by the board prior to the acquisition of 10 percent of the common stock. Afterward, the plan could be amended by the board as long as it did not have any material adverse impact on holders of the Rights.

The Rights plan does not in any way diminish the company's financial strength or interfere with its business plans. The issuance of Rights has no dilutive effect, will not affect reported earnings per share, is not taxable to the company or its shareholders, and will not change the way the company's shares are traded.

#90047p0427 02/16/1990 ~PR Newswire

WASHINGTON, (FEB. 16) PR NEWSWIRE - United Press International said Friday evening that an earlier Reuters announcement terminating a six-year-old contractual agreement for exchange of news photography between the two news services was unjustified and without regard for the interest of both companies' subscribing newspaper.

In a statement from UPI Chairman Earl W. Brian, M.D., UPI said: United Press International is outraged at the sneak termination of the Reuters international picture service, for which there was no basis whatever. UPI believes this is a willful and capricious action to create a smokescreen intended to hide Reuters' violations of the photo exchange agreement to further its calculated efforts through its 14 U.S. bureaus to undermine UPI's photo service to U.S. newspapers.

UPI is taking steps immediately to acquire international photos by other means. UPI has 180 bureaus worldwide and is represented in 90 nations.

This incident shows Reuters' total disregard for the well-being of U.S. newspapers. In the interest of newspapers outside the U.S. that rely on UPI photos delivered under the contract with Reuters, UPI has chosen to continue sending photos to Reuters for distribution to clients abroad, in keeping with the agreement.

UPI said it was in the sixth year of a 10-year agreement with Reuters under which UPI supplies photos from the U.S. to Reuters, and Reuters supplies photos from outside the U.S. to UPI for UPI domestic clients. The contract contains a provision for orderly arbitration of damages

inflicted on UPI by Reuters in Reuters' continuing efforts to divert business from UPI's U.S. customers to Reuters.

UPI, founded in 1907, is owned by Infotechnology Inc. (NASDAQ: ITCH), an information and communication company.

#90047p0428 02/16/1990 ~PR Newswire

GOLDEN, CO. (FEB. 17) PR NEWSWIRE - Adolph Coors Co. (NASDAQ: ACCOB) today announced record net sales but lower net income for 1989.

Net sales for the 53-week fiscal year ending Dec. 31, 1989, were a record $1,763,870,000, a 15.9 percent increase, compared with $1,521,697,000 for the 52-week fiscal year 1988.

Net income for 1989 was $13,132,000, or $.36 per share, after recognizing asset write-downs of $26,232,000, or $.71 per share. In 1988, the company reported net income of $46,875,000, or $1.28 per share.

The company also reported record net sales and a net loss for the final quarter of 1989. Net sales in the 13-week fourth quarter were $431,021,000, up 21.9 percent from net sales of $353,485,000 in the 12-week fourth quarter of 1988. The net loss in the fourth quarter of 1989, including the asset write-downs of $26,232,000, or $.71 per share, was $19,925,000, or $.54 per share, compared with net income of $2,233,000, or $.06 per share, in the same quarter of 1988.

In the fourth quarter of 1989, the company recorded a pretax charge of $41,670,000 for asset write-downs related to the abandonment and disposition of properties in several businesses. The company has decided to discontinue mining at its Keenesburg coal mine because of the availability of attractive long-term coal supply contracts for the beer business.

In an unrelated decision, Coors Energy Company has decided to offer for sale certain of its gas properties to take advantage of opportunities in the market place.

The charge to expense reflects the excess of net book value over estimated recoverable value for the coal mining assets no longer in service, gas properties held for sale, and certain other asset write- downs. The net impact of these charges on 1989 fiscal year and fourth quarter earnings was $26,232,000, or $.71 per share.

Chairman William K. Coors said, "The asset write-downs are part of the

company's continuing strategy to eliminate unprofitable operations, focus the company's efforts and improve long-term returns. This sale of gas properties does not reflect a change in the company's commitment to the energy business or to our philosophy of energy independence."

Coors added, "Each of our business units, Coors Brewing Co., Coors Technology Companies and Coors Ceramics Co., achieved record sales last year. These sales increases resulted from new product introductions and expansion of our existing businesses.

"In spite of this strong growth in sales," Coors said, "our net income declined last year primarily because of asset write-downs and reduced earnings in our beer business as a result of increased costs, intense industry price competition and aggressive marketing. Exclusive of asset write-downs, Coors Technology Companies experienced a significant improvement in operating results, led by record sales and operating profits for Golden Aluminum Co. In addition, Coors Ceramics Co. posted operating profits comparable to its record 1988 year."

Coors Brewing Co. reported last month that it had shipped 17,698,000 barrels of beer during the 53-week fiscal year 1989, up 7 percent from the 16,534,000 barrels shipped during the 52-week fiscal year 1988. Beer shipments for the 13-week fourth quarter of 1989 also set a record, rising 32 percent, to 4,394,000 barrels, from 3,326,000 barrels during the 12-week quarter a year earlier. These increases resulted from the continued strong growth of Coors Light and the introduction of two popular-priced brands, Keystone and Keystone Light.

The Adolph Coors Co. board of directors has declared a quarterly dividend of 12-1/2 cents per share of common stock payable March 15, 1990, to shareholders of record Feb. 28, 1990.

#90047u0783 02/16/1990 ~United Press International

BOSTON (FEB. 16) UPI - The Bank of New England Corp., pressed by continued despositor defections, has borrowed about $200 million more from the Federal Reserve in the past week, increasing its Fed loans to about $900 million.

Also, a company spokesman acknowledged Thursday the bank expected continued "deposit outflows," but predicted planned sales of some assets would allow it to reduce its borrowing from the Fed window by April.

The spokesman, Arthur Meehan, executive vice president in charge of the

company's treasury function, said the troubled institution accounted for "most" of the $931 million that all banks in the Boston region had taken in so-called overnight borrowings from the Fed as of Wednesday. On Wednesday of last week the figure was $723 million.

The Fed discloses the numbers in a weekly report it issues on total borrowing by banks in the region without detailing how much each bank borrows or even which ones had to resort to the Fed window. Meehan said his company's loans were "not all, but it's most" of the borrowing.

Meanwhile, the company said it agreed to sell the $1 billion loan portfolio of its communications lending group to the Canadian Imperial Bank of Commerce, but did not disclose its gain on the sale.

Bank of New England is still reeling from a projection it made last month that it will have more than $1 billion in real estate losses when it reports last year's results, expected in the next few days. The bank recently announced plans to sell off $6 billion in assets to shore up its deteriorating capital position.

In recent weeks, a number of nervous depositors, including municipalities whose accounts, like those of individuals, are not insured above $100,000, have transferred funds from the company's subsidiary banks.

Meehan declined to give precise figures for borrowings or lost deposits. "We have a range (of borrowings) that we've projected through the end of March and I can tell you that we're running within the range or below the low estimate. So we feel we're on schedule and on plan." "We feel we'll see reduced borrowings toward the end of the first quarter, early second quarter," in March or April, he said.

Meehan declined to disclose the bank's estimates of what it would lose in deposits. "This number has become a great fascination for people and I don't want it to be like the Massachusetts Megabucks number," Meehan siad. "The next thing you know, there'll be a lottery on the number."

#90047u0873 02/16/1990 ~United Press International

TORONTO (FEB. 16) UPI - The Bank of Canada has raised its key bank rate by more than half a point to 13.32 percent, bolstering the country's currency which has plummeted in recent weeks.

The bank rate now is at its highest level since August 1982 and the increase Thursday marked the fourth consecutive rise in the rate after a moderate easing in mid-January. Last week the bank rate was set at 12.79 percent.

Within hours of the rate change Thursday several major banks, including the Bank of Nova Scotia and the Toronto Dominion Bank, raised their prime rates to 14.25 percent from 13.50 percent.

Donna Chudnow, currency trader at Richardson Greenshields of Canada Ltd., said the rate increase was not unexpected. "The bank rate had to move," Chudnow said. "It was mandatory in trying to stabilize the Canadian dollar."

Money market investors reacted by pushing up the value of the Canadian dollar, which closed in Toronto at 83.09 cents from 82.75 cents Wednesday. A month ago the dollar was trading above the 86-cent level.

Analysts said the bank's decision to ease rates Jan. 12 triggered a selloff of Canadian dollar holdings in recent weeks in both Europe and Japan that drove down the value of the currency.

The Canadian dollar rose to nine-year highs in the second half of 1989 as the spread between Canadian and U.S. interest rates grew. The Bank of Canada had kept interest rates high in an effort to keep inflation under control.

Canada's Finance Minister Michael Wilson, who is to unveil a federal budget Tuesday, was criticized by opposition members in Parliament Thursday for the bank rate increase.

Wilson responded by saying, "If people want to see lower interest rates, then we have to see lower inflation and until we get lower inflation, we are not going to see lower interest rates."

#90047u1037 02/16/1990 ~United Press International

WESTLAKE, OH (FEB. 16) UPI - A group representing half of the 558-store Mister Donut North American chain is trying to block the sale of Mister Donut to Dunkin Donuts Inc.

Mister Donut National Dealers Association, a franchise group headquartered in the Cleveland suburb of Westlake, was in federal court in Easton, Pa., Thursday, claiming Dunkin Donuts plans to close 20 percent of the Mister Donut stores. The hearing was to continue Friday. The group also said the purchase by Dunkin Donut would create a near monopoly in the donut franchise business.

Dunkin Donuts declined comment Thursday because of the pending litigation. Linda Berg, spokeswoman for Mister Donut's parent International Multifoods Corp. in Minneapolis, said the company was hopeful the deal would go through.

Dunkin Donuts is the nation's largest donut chain with 1,650 stores in the United States and Canada. Mister Donut ranks third in terms of sales and second in terms of number of stores. The association recently won a preliminary restraining order on the sale, which was to be completed this month.

"We would have no problem with the purchase if, in fact, Dunkin Donuts planned to retain Mister Donut as a viable chain," said Douglas Trowbridge, president of the association. "But they obviously want to eliminate the No. 2 competitor."

Trowbridge said the Cleveland area, for example, has 10 Mister Donut stores and eight Dunkin Donuts outlets. He said he expects to lose four of his five Mister Donut stores if the deal goes through because two are near Dunkin Donuts and two do not have the right building design.

The purchase price was reported to be in the $33 million range, but Trowbridge believes Mister Donut is worth no more than $20 million. "They grossly overpaid," Trowbridge said. "Dunkin Donuts obviously wants to do away with the competition and create a monopoly."

AKRON, OH (FEB. 16) UPI - The Goodyear Tire & Rubber Co. said Friday it will introduce two lines of bargain tires next month, trying to fill a void in its line.

Many Goodyear franchises believed they were losing business because they had no lower-line tires available for the bargain hunter. Until now, the least expensive 12-inch and 13-inch Goodyear tires retailed for $34.95.

The Concorde Metric 12-inch being offered next month will start at $23.95, the Concorde Calibre 13-inch at $29.95 and the All-American Decathlon at $26.95. All three are steel-belted radial tires.

LONDON (FEB. 16) UPI - Stock prices closed higher in moderate trading Friday on the London International stock exchange despite news that Britain's annual inflation rate held steady at 7.7 percent for the third month in a row.

The key Financial Times 100-stock index, which gained 15.5 points Thursday, closed up 11.1 points at 2,324.9. The key index which measures the market capitalization of Britain's top 100 companies, gained 11.3 points for the week.

The narrower top 30 industrial average gained 7.1 points to 1,836.6 and gained 5.9 points for the week. Volume amounted to around 380 million shares, compared with 622 million shares changing hands Thursday.

On the economic front, the British Treasury reported the public sector

borrowing requirement, the most widely used measure of Britain's deficit or surplus, showed a surplus of around $8.37 billion in January compared with a surplus of $721.2 million in December. Economists had forecast a $9.8 billion surplus for January.

Meanwhile, the Central Statistics Office reported Britain's retail price index rose 0.6 percent in January from December and was at 7.7 percent for the year. Market expectations had been for an annual rate of between 7.4 percent and 7.5 percent.

Analysts said predictions by securities house UBS Phillips and Drew that the blue-chip Financial Times Stock Index will reach the 2,500 level by the middle of the year gave the markets some encouragement after a fairly nervous week.

Among the most widely traded stocks, Grand Metropolitan PLC gained eight cents to $9.55 after the company announced the sale of 220 of its 5,000 pubs to Control Securities for $76.9 million.

EuroDisney climbed 27 cents to $17.12 on renewed investment support, while Eurotunnel fell 21 cents to $8.96 following a court wrangle over finances in Paris.

In the pharmaceuticals, brokers recommendations and anticipation of good financial results next month combined to lift Glaxo 19 cents to $11.90. Shell PLC also profited from expected better earnings next week, adding 12 cents to $7.80.

Water stocks ended strong, as investors seemed attracted to their defensive qualities and strong yields. Anglian Water gained three cents to $2.88, North West Water gained nine cents to $2.74 and South West Water gained six cents to $2.67.

LOS ANGELES (FEB. 16) UPI - Lockheed Corp. has been holding discussions with Boeing Co. to supply major parts for the proposed Boeing 777 passenger jet, a larger version of the wide-body 767, a Lockheed spokesman said Friday.

The discussions, which have been going on for more than a year, could give Lockheed work as a producer of major subassemblies for the twin-engine 777, including sections of the fuselage and tail assembly, spokesman James Ragsdale said.

Lockheed has performed some "practice fabrication" of parts for the 777 at its plant in Marietta, Ga., but Ragsdale cautioned that no final decision

has been made by Boeing.

Aerospace analyst Lawrence Harris said Boeing is more likely to use its regular Japanese subcontractors - a consortium of Kawasaki Heavy Industries Ltd., Fuji Heavy Industries Ltd. and Mitsubishi Heavy Industries Ltd. - for work on the 777.

"This is by no means a done deal," Harris said. He noted that Lockheed, which has been trying to shift some of its business into non-defense work, has tried to reach similar supplier agreements with Fokker, McDonnell Douglas, and Airbus Industrie without success.

But if Lockheed can make the deal with Boeing, it would mean about $300 million a year in work for the Georgia plant, Harris said. That facility has been winding down activity since last year as production stopped on the C-5B military transport. Lockheed already supplies Boeing with sheet metal and parts for its commercial jets.

The negotiations with Boeing could be impacted by uncertainty over the status of 18,000 Lockheed workers of the International Association of Machinists, who have been working without a contract since October.

The workers include 6,200 at Marietta, 6,000 at Burbank, Calif., and 5,900 at Sunnyvale, Calif. The workers were scheduled to vote Sunday on a three-year contract offer, but they would not be voting on a strike authorization, Ragsdale said.

#90047u1678 02/16/1990 ~United Press International
DALLAS (FEB. 16) UPI - Texas Utilities Co. Friday reported fourth-quarter earnings soared to $183.5 million, or $1 a share, boosting its profits for 1989 to $779 million, or $4.44 a share.

In the fourth quarter of last year, TU earned $100.18 million, or 60 cents a share. For 1988, the earnings were $642.67 million, or $4 a share.

Revenues in the current quarter were up to $1.03 billion from $954.4 million in the fourth quarter of last year. Revenues also rose for the year to $4.32 billion from $4.15 billion.

The company said the higher earnings resulted primarily from the resumption in September of the accrual of allowance for funds used in the construction of Unit 2 of the Comanche Peak nuclear power plant.

Energy sales in 1989 rose 1.5 percent from the previous year. The fourth quarter reveneus were up 4.8 percent from the year-ago quarter.

The company's directors announced an increase of 1 cent in regular quarterly dividend to 74 cents a share on the outstanding common stock. The dividend is payable April 2 to holders of record on March 5. The company said the dividends have been increased annually for 43 consecutive years.

The company also announced the establishment of a leveraged employee stock ownership plan. It said the plan has purchased about 7.1 million shares of the authorized but unissued common stock for $250 million. The shares will be used for a portion of future employer contributions to an existing employee savings and stock ownership plan.

WASHINGTON (FEB. 16) UPI - The government Friday accused generic drug maker Bolar Pharmaceutical Co., and its former president Robert Shulman of violating anti-fraud laws by making false and misleading statements to stockholders.

Bolar, headquartered in Copiague, N.Y., is among a number of generic drug companies accused of submitting false data to win federal approval for generic drugs, which sell at a discount to name brands.

In a civil action filed Friday in U.S. District Court for the District of Columbia, the Securities and Exchange Commission alleged Bolar and Shulman failed to advise investors of developments in a Food and Drug Administration inquiry into the company's products.

In New York, Jack Kornreich, a Bolar lawyer, declined to comment Friday on the 11-page government complaint, which asks for a permanent injunction to bar Bolar and Shulman from again violating securities laws.

Shulman, a founder of Bolar who served as president and a director of the company since 1960, resigned as president on Feb. 11, 1990, but retained his director's post, the SEC said.

''Among other things, the complaint alleges that Bolar failed to disclose that on February 2, 1990, the company had agreed with the FDA to temporarily suspend shipments of all its products at least until February 6, 1990,'' the SEC said in a statement.

Bolar ''agreed to the temporary suspension of shipments pending an agreement with the FDA to indefinitely withdraw its narrow range therapeutic drugs with the potential for serious harm,'' the SEC statement said.

''Those facts were not disclosed to investors until February 8, 1990, after trading in the securities of Bolar was halted on the American Stock Exchange,'' on Feb. 7, the statement said.

The commission on Jan. 23 ordered a 10-day halt to trading in Bolar stock over a ''lack of current information concerning ... public disclosure by Bolar that certain false documents had been submitted to the FDA,'' the SEC said.

#90047u1981 02/16/1990 ~United Press International

ATLANTA (FEB. 16) UPI - Georgia Gulf Corp. Friday rejected a $45-a-share takeover bid by NL Industries Inc. of Houston, calling the offer ''inadequate, coercive and too conditional.''

The chemical manufacturer's board of directors advised its stockholders not to accept the offer by NL Industries, headed by Dallas investor Harold C. Simmons. NL Industries already has a 9.6 percent stake in Georgia Gulf's stock.

In a letter to stockholders, the board said, ''It is also our belief that NL's offer does not reflect the true value of Georgia Gulf now, or what could be achieved in the future for the benefit of the company's stockholders.''

Georgia Gulf said it was proceeding with its recapitalization plan in an effort to head off the takeover bid by Simmons, who has been pursuing the company since last year.

The board said a stockholders' meeting will be held April 16 to vote on the recapitalization plan.

Georgia Gulf spokesman John Walker said the plan was in the final stages of preparation through the company's financial adviser, Goldman Sachs & Co.

''In our view, NL's offer represents an attempt to take advantage of the current vulnerability of the company resulting from short-term economic and market conditions,'' the board said.

''We believe that the $45 per share price offered by NL does not reflect the kind of premium that ought to be received by the company's stockholders in a transaction, such as that proposed by NL, in which control of the company would be sold.''

John Garcia, an analyst with Wertheim Schroder & Co. in New York, said the recapitalization plan was a crucial element in Georgia Gulf's effort to stave off the takeover.

''It's like a chess match,'' said Garcia. ''All the pieces are in place, and what remains to be seen is which side can make the right moves.''

Last August, Simmons, through NL Industries, tried to force Georgia Gulf into a recapitalization or leveraged buyout.

He first offered to help put together a transaction valued at about $55 a share, or $1.38 billion, but the Georgia Gulf board rejected that offer. Simmons countered with threats to unseat the board, which decided to explore transactions on its own, including a recapitalization.

Georgia Gulf manufactures commodity chemicals and polymers, including aromatics, natural gas, electrochemical products and resins.

#90047u2002 02/16/1990 ~United Press International

TRENTON, NJ (FEB. 16) UPI - New Jersey Gov. Jim Florio and New York Gov. Mario Cuomo announced plans Friday for a joint study of the damage done by the Exxon oil spill in the Arthur Kill, and said Exxon would pay the $660,000 cost of the study.

''Exxon must accept full responsibility for this threat to our waters, wetlands and coastline,'' Florio said.

''It is only fair that they provide immediate funding to fully determine the damage caused by the oil spill,'' he said.

The two governors said the two states, New York City, other local governments as well as the federal Environmental Protection Agency would pool their resources to conduct the study. Exxon will be required to reimburse the government agencies for their costs.

''Environmental pollution does not respect political boundaries,'' Cuomo said.

''Only through cooperation on a regional level can we be effective in solving problems of the environment,'' Cuomo said. ''By joining New York's resources with New Jersey's we present a stronger case for the protection of our waterways.''

New York City Mayor David Dinkins said ''it is only appropriate that the assessment study of the tragic Exxon spill be conducted jointly.''

A 6.7-mile Exxon pipeline that runs beneath the waterway between Staten Island and New Jersey ruptured about 150 feet from the New Jersey shore during the night of Jan. 1-Jan. 2, spilling an estimated 567,000 gallons of heating oil. The spill killed at least 400 birds and environmentalists fear a threat to migratory birds that will return to nearby bird sanctuaries in the spring.

The cause of the pipeline rupture has not been determined.

Authorities said the study would examine the geographic distribution of the spill, the level of oil in various wildlife habitats throughout the area, the concentration and depth of penetration of oil in the soil and in underwater sediment, the extent of oil in wetland areas, the effect of the oil on returning migratory birds and their habitats and the effect of the oil on clams, mussels and other marine life.

#90047u2166 02/16/1990 ~United Press International

ANCHORAGE, AL (FEB. 16) UPI - Capt. Joseph Hazelwood's chief mate testified Friday that the Exxon Valdez skipper, accused of trying to rock his grounded tanker off the rocks in a dangerous maneuver, actually decided to keep the ship on the reef upon learning that it might capsize.

But that victory for the defense in Hazelwood's trial was softened when jurors were confronted for the first time with the results of the blood alcohol test he flunked after the March 24 tanker wreck that caused the nation's worst oil spill.

And the first Coast Guard investigator to arrive on the grounded ship, Mark DeLozier, testified that oil was bubbling from the tanker ''at a very intense rate'' and there was ''a very intense and very obvious'' odor of alcohol coming from Hazelwood.

Defense lawyers tried to shed doubt on the integrity of blood alcohol samples taken from the Exxon Valdez crew when Coast Guard medical corpsman Scott Conner said no one knew what to do with the samples at first so he stored them in a refrigerator ''right alongside the carrots and lettuce.''

Prosecutors maintain Hazelwood was intoxicated and that his alcohol-impaired decisions led to the wreck a few minutes after midnight March 24, causing the worst spill in U.S. history, nearly 11 million gallons of crude oil.

DeLozier said he ''was a little bit amazed'' to smell alcohol on the skipper's breath so he moved closer to make sure he was right.

''It was very intense and very obvious,'' DeLozier said of the odor. He told a commander they needed to test the skipper for alcohol.

In a tape played for the jury Thursday, Hazelwood informed the Coast Guard an hour after the grounding that he intended to maneuver the tanker off Bligh Reef - something prosecutors said was reckless, endangering the crew and causing further damage to the leaking tanker.

Under questioning Friday by defense lawyers, chief mate James Kunkel said he initially informed Hazelwood at about 12:30 a.m. that the damaged ship was still stable. Then Hazelwood told Coast Guard Cmdr. Steve McCall he intended to extricate the tanker from the rocks.

Then Kunkel reanalyzed tanker stability and told Hazelwood the ship might sink if it came off the rocks. That's when Hazelwood told Kunkel they were going to stay put, the chief mate said.

''I guess we're not going anywhere,'' Kunkel quoted Hazelwood as saying.

Kunkel's testimony undercut prosecution claims that Hazelwood was trying to move an unstable, leaking tanker, thus worsening the disastrous spill.

''I felt perhaps we were trying to get the tanker off the reef at the beginning,'' Kunkel said. ''But later on ... I realized he was trying to keep the ship on the rock.''

Kunkel's testimony was a major victory for the defense after prosecutors played the damaging tape on which Hazelwood clearly stated, ''We are working our way off the reef'' and repeated those intentions several times.

Hazelwood reconsidered his course of action based on changing stability reports from his chief mate, according to the testimony.

Hazelwood's blood alcohol test was introduced into evidence as the trial ended its third week.

Conner flew to the ship after the wreck to take blood from key crew, but back in Valdez no one knew what to do with the samples. First, he put them on his hotel window sill, then took them to the Coast Guard marine safety office in Valdez. ''I put the samples in the refrigerator right alongside the carrots and lettuce.''

Dr. Michael Peat, a forensic toxicologist, said the sealed samples arrived intact at his Sacramento, Calif., lab March 28, four days after the spill.

The analysis cleared all crew except Hazelwood, who had a 0.061 percent blood alcohol level. That prompted Exxon to fire Hazelwood and triggered state charges of operating the tanker while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief.

The Coast Guard has a 0.04 blood alcohol limit for mariners. The state of Alaska legal limit for drivers is 0.10.

Although some witnesses have testified that Hazelwood drank some vodka in Valdez before departing the night of March 23 and some witnesses have said they smelled alcohol on Hazelwood's breath, no one has testified the skipper was intoxicated or showed signs of impairment.

A prosecution medical analysis deduced that Hazelwood's actual 0.061 percent blood alcohol level - based on the sample taken 10 hours after the wreck - would have been about 0.22 before the wreck, twice the state legal limit, but that extrapolation has not yet been introduced to the jury.

Hazelwood, 43, of Huntington, N.Y., faces up to seven years, three months

in jail and a $61,000 fine if convicted of the three misdemeanors and one felony.

LOS ANGELES (FEB. 19) UPI - First Interstate Bancorp's common stock offering, designed to give the troubled bank holding company badly needed capital, raised a total of $276 million after fees, a spokesman said Friday.

The offering was launched Wednesday at $33 a share for 7.5 million shares but was oversubscribed, so First Interstate added 1.125 million shares.

Leveraged buyout specialist Kohlberg Kravis & Roberts Co. said Wednesday it had agreed to buy 3.38 million of the shares, along with 112,275 if the offering was oversubscribed. The purchases lifted KKR's stake to 9.98 percentfrom 4.6 percent.

KKR has agreed to not increase its stake for two years.

Separately, First Interstate said it has signed a definitive agreement to sell First Interstate Bank of Fort Collins, Colo., for $25 million to Larimer Bancorporation Inc., a group of investors that includes the bank's management team.

Under the deal, the bank will maintain its current name and license services from First Interstate Bancorp under a franchise contract.

First Interstate said the bank has been successful but not longer fits into the corporation's marketing strategy.

The Fort Collins bank, with assets of $255 million, will become the largest independent bank in Colorado when the deal is completed.

#90047u2609 02/16/1990 ~United Press International

WASHINGTON (FEB. 18) UPI - The Interstate Commerce Commission Friday gave the Delaware & Hudson Railway Co. another week to work out a plan that would keep the bankrupt rail line afloat.

The commission voted late Friday afternoon, following a hearing in Washington, to let the New York, Susquehanna and Western Railroad Co., the Lackawanna Valley Railroad Corp. and the North Shore Railroad Co. to continue operating the D&H's lines.

The rail companies have operated D&H lines since it filed for bankruptcy

in 1988.

ICC spokesman Dennis Watson said the extension gives one of the nation's oldest rail companies until 11:59 p.m. Feb. 23 to come up with a plan.

The commission heard testimony from 15 differant groups involved in the effort to save the line before making its decision.

A plan to sell the line to Canadian Pacific Ltd. fell through earlier this week when the line failed to obtain an agreement with Conrail for track rights between Harrisburg, Pa., and Hagerstown, Md.

The seven-day extension will enable D&H trustee Francis Dicello additional time to work out several new proposals for saving the line.

Clare Austin, a spokeswoman for the Federal Railroad Administration, said that Dicello Friday proposed a new plan that would see several different shippers running the line with help from the states of New York and Pennsylvania.

Austin said both Canadian Pacific and Canadian National Railroad would play a role in the new plan.

The FRA continues to support a plan put forth by the state of New York ''which is to preserve the whole system and create a terminal company that will operate the railroad,'' said Austin.

She said the FRA would be willing to go along with Dicello's latest plan provided it met with all federal safety regulations. She added that the state of New York would guarantee any financial losses.

The new plan would still have to be approved in bankruptcy court.

Another possibility for D&H would apparently involve selling off the 550 miles of track the company owns outright.

Austin said there has been some interest from larger rail companies who may want to buy pieces of the line.

Either way, she said, about 99 percent of the shippers who currently use the line would be served.

Canadian National and NYS&W are also working on a plan to keep the railroad running.

A number of companies, particularly around the area of Cooperstown, N.Y., only have access to the D&H tracks. In addition, if the line were to fold, approximately 700 jobs would be lost in New York, officials said.

#90047u2637 02/16/1990 ~United Press International
LOS ANGELES (FEB. 18) UPI - Stock of Orion Pictures Corp., the focus of takeover speculation for several weeks, rose again Friday despite a statement from the company that it was unaware of developments behind the increase.

Orion closed at $22.50 a share Friday on the New York Stock Exchange, up 75 cents. It jumped $2.875 a share Thursday and has been rising since Feb. 1, when its price stood at $16.375 a share.

The motion picture and television concern issued its statement Thursday at the request of the NYSE which sought comment on the relatively heavy trading of the stock.

Takeover speculation has focused on Los Angeles investor Marvin Davis, who is a former owner of another movie studio, Twentieth Century Fox. Orion is 71 percent owned by billionaire John Kluge, who battled with Sumner Redstone to acquire the controlling interest in Orion in 1988.

Orion suffered through a string box-office disappointments in 1989, including ''She-Devil,'' ''Great Balls of Fire,'' ''Valmont'' and ''Everybody Wins.''

The studio's best 1989 performer was ''Bill & Ted's Excellent Adventure,'' an off-beat teenage comedy that pulled in more than $40 million domestically. But Orion's 17 releases totaled only 4.2 percent of the record $5 billion domestic box-office gross, according to Daily Variety, an industry trade publication.

Entertainment analyst Jeffrey Logsdon of Crowell Weedon & Co. said many observors think a sale of either Kluge's stake or the entire company could be imminent because Orion's lineup for this year looks fairly attractive. It includes ''RoboCop 2,'' ''Cadillac Man'' with Robin Williams and ''Dancing With Wolves.''

''My belief is that discussions have been unfolding for several months and that foreign investors may be involved,'' Logsdon said.

The studio, which has administrative headquarters in New York and production headquarters in Los Angeles, made two moves earlier this week that indicate the company may be moving toward a shake-up.

It announced on Monday that Columbia Pictures had agreed to pay it $175 million for the international distribution rights to Orion's next 50 movies. Alex Ben Block, editor of Show Biz News, said Orion probably made

the deal to because its relatively high debt level has made it difficult to secure additional financing.

On the following day, Orion announced it had replaced distribution chief Joel Resnick with former MGM/UA distribution and marketing president David Forbes.

Block said Orion's market value has been boosted because of Sony's $3.4 billion purchase of Columbia last fall. ''That significantly increased the value of film libraries, even though Orion's is relatively small,'' he said.

Orion earned $8.4 million, or 37 cents a share, for the nine months ended Nov. 30, up from $6.3 million, or 34 cents a share, for the year-ago period.

Nine-month revenues were $348.7 million, up from $307.5 million for the year-ago period.

#90047u3026 02/16/1990 ~United Press International

LOS ANGELES (FEB. 18) UPI - An appeals court issued a temporary order Friday nullifying a federal judge's ban on image-enhancing television commercials by the Northrop Corp. during the firm's trial on fraud charges.

Attorneys for Northrop Corp. were notified of the order by two 9th U.S. Circuit Court of Appeal judges in San Francisco late Friday afternoon, spokesman Tony Cantafio said.

In an unusual move, U.S. District Judge Pamela Rymer banned the commercials Thursday, saying they could impair a fair trial in the criminal fraud case. She said halting the commercials featuring retired Air Force Gen. Charles Yeager did not affect Northrop's constitutional right to free speech.

Northrop attorneys told the judge they would comply with her order, but also said they planned to appeal the ruling.

''We had just pulled the commercials,'' when the ban was reversed, Cantafio said.

The reversal remains in effect until further rulings by the courts.

Rymer prohibited telecasts of the commercials, called the ''Hard Work'' spots, only in the Los Angeles area, where Northrop and several of the company's employees are scheduled to stand trial Tuesday on allegations involving the Navy's Harrier jet.

''I am absolutely persuaded the 'Hard Work' series is calculated to have a very serious effect on the administration of justice,'' Rymer said in her ruling.

Rymer said the ads - aired during popular television shows, sports and news broadcasts - could influence potential jurors and thwart the selection of an unbiased panel.

Legal experts called Rymer's ruling unprecedented.

Irwin Chemerinsky, a law professor at the University of Southern California, disagreed with Rymer's ruling.

''My immediate reaction is that she's wrong on the law,'' he said.

In the ruling, the judge said the ads have ''calculated, but subliminal influence on prospective or impaneled jurors' perception of the character, reputation and state of mind of Northrop and its employees.''

Rymer acknowledged that ''no commercial speech case thus far has addressed fair trial issues,'' but said she ''has approved what are in effect ... restraints (on what she) perceives as less valuable commercial speech, applying a lower level of constitutioal scrutiny.''

The judge found that the commercials ''go directly to the reputation and credibility of a party to the case - Northrop, and to the state of mind of its employees, who are also defendants.''

#90048b0814 02/17/1990 ~Business Wire

GREENVILLE, NC (FEB. 17) BUSINESS WIRE - In response to growing business volume in the Greenville area, CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., has opened a new nine-door terminal facility with increased capacity for serving the freight transportation needs of Greenville and surrounding communities.

The new state-of-the-art facility, located at Route 6 and State Road 1415, opens Saturday and serves as Greenville's link to CF Motor Freight's nationwide freight-flow system, a 667-terminal network covering 99 percent of the businesses in the United States and Canada.

''Our goal is to provide Greenville's businesses and industries with top-quality freight transportation services,'' said James Stott, Greenville terminal manager. ''This new facility will help us achieve that goal and give greater capacity to handle increasing volumes as present customers expand their markets and new customers take advantage of

our service.''

CF Motor Freight has operated a terminal in Greenville since 1975, serving businesses in Pitt and Green counties, including National Spinning Co., Burroughs Wellcome, Empire Brushes and Weyerhauser. Finished paper goods, textiles, pharmaceuticals and various consumer products are among the commodities transported for local companies. CF Motor Freight's new 3,600-square-foot facility employs 10 people -- six drivers and four office workers -- and uses six tractors and 12 trailers to carry freight for its local customers.

Like all CF Motor Freight terminals, Greenville is tied into the company's freight-flow system through a sophisticated nationwide computer freight tracking and data management network. CFMF's system enables Greenville customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing, volume and other freight profile and logistics information that helps customers manage their businesses.

''Comprehensive and accurate shipment information is very important today, particularly for businesses involved in just-in-time retailing and manufacturing,'' said Stott. ''The ability of a carrier to provide consistent, error-free service often can make the difference between a production line operating efficiently, or a retailer having the proper goods in time for a sale.''

The company also provides related computer programs and services utilizing a customer's own computer resources. These include OMNIRATE, a personal computer-based software program that simplifies the pricing of freight shipments; LOGISTICS MANAGER, another PC-based program which streamlines shipping functions by automaticlly preparing bills of lading and shipping labels; and CF DIRECT, a telecommunications link that allows customers to directly access CF's computer network for shipment information and specialized reports.

CF Motor Freight provides intermediate and long-haul transportation of less-than-truckload freight, which are commercial and industrial shipments generally weighing less than 10,000 pounds. It is the largest subsidiary of Consolidated Freightways Inc., which in addition to long-haul trucking, has businesses in regional next-day trucking, domestic and international air freight, intermodal truckload and ocean freight services.

COSTA MESA, CA. (FEB. 17) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), a leading manufacturer of computer data products, Saturday announced that the statutory waiting period for federal antitrust review of its all-cash tender offer for all shares of common stock of Cipher Data Products Inc. had expired at 11:59 p.m. on Friday, Feb. 16.

Accordingly, the requirements of the Hart-Scott-Rodino Antitrust Improvements Act have been satisfied and Archive is now free to complete the tender offer without further antitrust regulatory review.

''We are extremely pleased with this important milestone in completing our offer,'' said D. Howard Lewis, chairman and president of Archive. ''We continue to seek to meet with Cipher's management or board of directors to initiate a negotiated transaction. However, we will continue to explore all of our alternatives and are prepared to go forward with our existing tender offer.''

Lewis also noted Archive had recently announced that approximately 86 percent of Cipher's outstanding shares of common stock had been tendered under the Archive offer.

Founded in 1980, Archive Corp. today is a leading manufacturer and supplier of computer data backup products to original equipment manufacturers and resellers. Archive and Maynard Electronics, an Archive company, offer a complete selection of tape drives and subsystems for economical computer data backup for fixed-disk drives in workstations, multiuser systems and personal computers.

#90048b0820 02/17/1990 ~Business Wire

ORLANDO, FL (FEB. 18) BUSINESS WIRE - Collins Industries Inc. announced Friday that the corporation achieved record revenues and stock earnings for its fiscal year ending Oct. 31, 1989, and is predicting a continued annual growth of 15 percent for the next five years.

The announcement was made by Don L. Collins, chairman and CEO of the decade-old company.

The company posted a net improvement of $3 million, with earnings per share of 53 cents for FY 1989 compared to a loss of 32 cents per share for FY 1988.

FY 1989 revenues were a record $134,477,053, compared with $120,061,446 for FY 1988, an increase of 12 percent. Net income was $1,837,544 compared to a loss of $1,143,121 for FY 1988.

Collins Industries Inc. will hold its annual stockholders meeting at 10 a.m. Friday, Feb. 23 at the Harley Hotel, 151 East Washington Street in downtown Orlando. The agenda includes a review of the corporation's status and is expected to include an announcement of first quarter 1990 revenues which are also anticipated to be record setting.

Collins Industries is a leader in the manufacture of vehicles for special transportation needs, and the world's largest producer of ambulances. The company is also a leader in the production of small school buses, commercial buses for shuttle and transit feeder routes, terminal trucks for spotting trailers in shipping, rail and freight terminals and wheelchair lifts and accessories for transportation of the handicapped.

Subsidiaries include: Wheeled Coach Industries of Orlando; Ambutech, parent company of Collins Ambulance Corp. and Mobile-Tech Corp. in Hutchinson, Kan.; Collins Bus, located in South Hutchinson and Newton, Kan.; and Capacity of Texas in Longview, Texas.

The company is headquartered in Hutchinson, with a special office of the chairman located in Orlando, Fla.

Publicly held since 1983, Collins Industries trades on the American Stock Exchange under ''GO.''

#90048p0009 02/17/1990 ~PR Newswire

SEATTLE (FEB. 18) PR NEWSWIRE - Boeing today successfully completed the first of two test launches of the Sea Lance anti-submarine standoff weapon at the White Sands Missile Range, N.M., the company announced. The test included launch from a ground pad and a long-range trajectory flight with termination at the designated aimpoint.

The test flight was part of the full-scale engineering development contract Boeing Aerospace & Electronics currently holds with the Naval Sea Systems Command, Washington, D.C. A second, mid-range test is scheduled for next month. Separation tests for the Sea Lance Mark-50 torpedo payload will be completed prior to contract termination now scheduled for

mid-September.

Data from the test will permit performance evaluation of Sea Lance flight characteristics, guidance, navigation and flight environments. The data also will be used to evaluate subsystem and system performance and confirm flight simulation models.

Prior to the launch of Flight Test Vehicle 1 (FTV-1), pre-launch assembly and checkout was conducted at the White Sands Missile Assembly Building, a sort of "dress rehearsal." The procedure included transporting FTV-1 to the launch pad and elevating it to the vertical position.

Sea Lance is designed as the common anti-submarine weapon system, capable of being launched from submarines and surface vessels. It would replace the aging SUBROC and ASROC systems now in service.

As a submarine-launched system deployed on attack submarines of the Los Angeles-class (SSN-688), and planned for the Sea Wolf-class (SSN-21) submarine now in development, a capsule containing the system would float to the surface from the torpedo tube. There, the missile would separate from the capsule and, powered by rocket motor, fly a supersonic, ballistic trajectory to the area of the submarine threat. At that point, the rocket motor would separate, and the torpedo payload would descend to the surface under a parachute. The parachute would detach on reaching the surface and the torpedo would seek out the enemy submarine.

The vertical-launch version does not require the capsule protection. Deployment of Sea Lance will provide the Navy a substantially extended delivery range for the new Mark-50 Advanced Lightweight Torpedo (AWLT). This will offset current and projected submarine threats, which have driven anti-submarine warfare to the top of the Navy's priority list.

#90049b0829 02/18/1990 ~Business Wire

SPOKANE, WA (FEB. 18) BUSINESS WIRE - The first American-Japanese joint venture in the Spokane area is a remanufacturing plant which is the result of a partnership between Plum Creek Manufacturing and Sumitomo Forestry Co. Ltd. of Japan.

The new plant officially opened Saturday amid a gala ceremony attended by Washington State Commissioner of Public Lands Brian Boyle, numerous dignitaries, plus officials of Sumitomo Forestry and and Plum Creek Timber Co. L.P.

The plant manufactures glue-laminate posts for the Japanese housing market. Plum Creek Timber President Dave Leland and Sumitomo Forestry Co. President Kazuo Onishi opened the festivities with a ''Kagami Wari Sake Ceremony'' which is the breaking of the sake cask with wooden mallets.

The joint operation will initially specialize in the production and export of value-added product in the form of laminated vertical posts for the Japanese housing market. A veneer of Hinoki wood is laminated to the lodgepole pine post once it is received in Japan. This results in a visually pleasing post which also surpasses structural support requirements.

The 80,000 square foot facility employs 25 with the potential for 100 employees when operating at full capacity. The plant represents an investment of over $3 million in fingerjoint and laminate equipment.

The Sumitomo/Plum Creek facility has adopted a number of innovations. The plant has implemented a participative management system of self-directed work teams that company executives believe will enhance productivity and employee morale. Employee committees are responsible for the daily operations of the facility and oversee human resources, safety, costs, production and quality control.

By adapting its product to the requirements of the Japanese market, Plum Creek took a ''market-driven'' position. To accomplish this, not only did the plant have to be equipped to meet the specifications of the Japanese housing market, but also the rules and regulations of the Japanese Agricultural Standards (JAS) had to be understood and complied with. To this end, four of the plant's employees were sent to Japan where they were schooled in these standards.

EAST HAMPTON TOWNSHIP, NY (FEB. 18) UPI - Craig Claiborne, well-known food critic for The New York Times, faces a charge of driving while intoxicated related to a two-car collision, police said.

Claiborne, 69, was arrested and charged Feb. 9 for driving while intoxicated after an accidental crash involving the car he was driving and another vehicle, said Lt. Van Quick of the East Hampton Township police force.

There were two other people in the other car, Quick said Saturday. There were no injuries, he said.

Claiborne was headed north on North Main Street at Cedar Street when the incident happened at 8:25 p.m., he said.

Judge Edward Horne released Claiborne on his own recognizance. Claiborne will receive a letter by mail indicating when he will have to return to court, Quick said.

Claiborne has written or edited numerous cookbooks, including his first work, The New York Times Cookbook, published in 1961.

MOUNTAIN VIEW, CA (FEB. 19) BUSINESS WIRE - Daisy Systems Corp. (NASDAQ:DAZX) Monday announced that on Feb. 15, its principal secured lender, Heller Financial Inc., agreed to extend to April 18, the termination date of its ''standstill'' agreement which had been set to expire Feb. 15.

In addition to the extension, Heller has agreed to a reduction in the interest payable with respect to its bridge loan.

Gary J. Sbona, chief executive officer of Daisy, stated that the confidence displayed by Daisy's principal secured lender is assuring and indicative of Heller's positive attitude in working with the company as it attempts to resolve its financing and operational problems.

''We have begun to implement a consolidation of our executive, finance,

administrative and support functions to Boulder, Colorado,'' Sbona said, ''as one step towards restructuring the company.''

Daisy/Cadnetix Inc. (DAZIX), the operating company subsidiary of Daisy Systems Corp., designs, manufactures, markets and supports computer-aided engineering, design and manufacturing (CAE/CAD/CAM) systems used to automate the electronic design engineering process.

The company's products are used to design, simulate and layout application-specific integrated circuits (ASICs), very large scale integrated circuits (VLSIs), and printed circuit boards (PCBs). The company has a worldwide customer base covering a wide range of industries including military/aerospace, computers, semiconductors, telecommunications and consumer electronics.

SOLANA BEACH, CA (FEB. 19) BUSINESS WIRE - On Monday, from Kaypro Corp.'s (NASDAQ:KPRO) corporate headquarters, David Kay announced important changes, including the appointment of the first member of the company's new top-level management team.

Kay reported that he would turn over his duties as Kaypro company president to Roy Y. Salisbury, managing director of the FCSGroup.

According to Kay: ''I have spent the past three weeks analyzing Kaypro's current financial and industry position. It is my recommendation that the company assemble a new management team, one with a proven track record in financial and administrative restructuring.

''I have known Roy Salisbury for some time and respect his hard-working, no-nonsense approach to business. He will be a major asset as Kaypro's new president.''

Salisbury's diverse career in management began with the successful establishment of New England's Salisbury Logging Inc. In 1980, he entered the travel industry by starting two companies, Travel Force Inc. and, later, Corporate Travel Systems Inc.

Six years later, Salisbury accepted the position of managing director of FCSGroup, a business consulting and management service firm with offices in New Hampshire, Massachusetts, Tennessee, Michigan and New York.

''Our research people have followed Kaypro's progress for several years,'' said Salisbury. ''The company maintains strong name recognition within the industry and among consumers. Yet, with all of its product popularity Kaypro has taken more than its fair share of hard knocks. My goal is to put an end to this attitude and restore Kaypro's market position. I'll do whatever it takes to achieve that goal.''

Kay will return to his career as an independent marketing consultant to the computer industry. Andrew F. Kay, former president and chief

executive officer, will continue as Kaypro's chairman of the board. As such, Andrew Kay will curtail his involvement in day-to-day operations, taking time for personal travel and to visit selected computer dealers throughout Kaypro's worldwide network.

Kaypro Corp. designs, manufactures and distributes a full line of microcomputers for businesses and individuals.

SUNNYVALE, CA (FEB. 19) BUSINESS WIRE - SuperLaserSpool, the top-selling print spooler for the Macintosh, is now compatible with the popular HP DeskWriter printer from Hewlett-Packard Co.

Version 2.02 of Supermac Technology's best-selling utility is now shipping. The upgrade makes SuperLaserSpool compatible with the three most popular families of printers for the Macintosh: Apple's LaserWriter, Apple's ImageWriter, and the HP DeskWriter printer.

SuperLaserSpool saves time and increases a user's productivity by taking control of the printing process in the background, so the user can continue working in the foreground.

SuperLaserSpool, a regular fixture on software industry ''hot lists,'' is the most popular and versatile spooler for the Macintosh. In addition to its compatibility with all popular Macintosh-compatible printers, SuperLaserSpool lets the user change the order of files in the print queue reroute files to a different printer, and be notified when the document has finished printing.

Users of SuperLaserSpool 2.0 and prior versions can upgrade to SuperLaserSpool 2.02 for $30 including shipping and handling. Users of SuperLaserSpool 2.01 and those who purchased any SuperLaserSpool after Dec. 1, 1989, will receive the new release free of charge. A mailing to registered SuperLaserSpool users will occur in March.

SuperLaserSpool owners upgrading to 2.02 will find the following additional features in 2.02: enhanced LaserWriter driver 6.0 compatibility (for gray-scale images and half tones), fractional font support, print buffer sizes up to 1024K bytes to image complex documents, and enhanced compatibility with Insight Development's MacPrint, BDT SheetFeeder, Microsoft Works and Odesta's Double Helix.

Hewlett-Packard Co. is an international manufacturer of measurement and

computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in 100 countries. HP has 95,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

SuperMac Technology develops and manufactures graphics subsystems, which include color, grayscale and monochrome monitors and graphics cards, as well as software and application support products. SuperMac is a pioneer in the Macintosh enhancement market and continues to offer value-added graphics products to extend the capability of Macintosh computers into new vertical markets and in the traditional business market.

DENVER (FEB. 19) BUSINESS WIRE - Monday, Information Solutions Inc. of Colorado announced its release of transportation management software for use with IBM's new RISC System/6000 running AIX Release 3.

The system helps manage a wide variety of computer solutions for the motor carrier industry. TMC also supports a range of communication environments such as satellite tracking, EDI (electronic data interface), and other electronic devices.

The RISC System/6000 family contains many features that will optimize the performance of this software, including the industry's most advanced RISC processor, which will be available in the second quarter.

''With IBM's AIX and the RS/6000, our products are stepping into the 1990s with leading edge technology,'' said David DeYoung, president and chief executive officer of ISI.

Information Solutions Inc. is an IBM Business Partner-Industry Remarketer.

Information Solutions Inc., NASDAQ:ISOL, develops and markets turnkey computer hardware/software systems for the transportation industry. ISI has provided comprehensive management solutions since 1979.

SAN JOSE, CA (FEB. 19) BUSINESS WIRE - Circadian Inc. (OTC:CKDN), a leading supplier of noninvasive diagnostic medical products for the physician's office market, announced that they are now offering Educational Courses in the use of ScanMate, a Diagnostic Ultrasound Imaging product, for the primary care physician.

This simple to use ScanMate product makes it possible to diagnose right on the spot, thus eliminating the need of patient referral.

On March 1, Circadian will offer (at no charge) an ''Evening with the Professor,'' at the Laguardia Airport Holiday Inn Crown Plaza Hotel to discuss the application and education of ultrasound for the primary care physicians.

The course in New York is only a small part of the major educational program that Circadian has developed for diagnostic ultrasound for the primary care physician.

Circadian's other products include ambulatory heart monitoring, stress testing, vascular screening and other noninvasive diagnostic systems. It's corporate headquarters are in San Jose.

SAN JOSE, CA (FEB. 19) BUSINESS WIRE - CrossCheck Technology Inc. has secured $3 million in financing, which was completed in December 1989.

Two corporate investors, Harris Semiconductor and Raytheon Co., joined current investors Greylock Management and Merrill, Pickard, Anderson, Eyre in this second round of financing for CrossCheck.

The first round of financing for CrossCheck was completed in October 1988 with $1.8 million. Financing to date totals $5.4 million.

CrossCheck Technology is the developer of a breakthrough new approach to dramatically improving the testability -- hence, the quality and reliability -- of application-specific integrated circuit devices.

''We're pleased at the high level of interest from corporate investors,'' commented Tushar Gheewala, CrossCheck founder, chief executive officer and chairman of the board.

''We view this as an endorsement from industry for establishing CrossCheck as a standard in ASIC testability, particularly since Harris and Raytheon are both technology licensees of CrossCheck as well.''

''CrossCheck is a strategic investment for Harris,'' said Jon Cornell, president of Harris Semiconductor. ''We have expanded our ASIC business aggressively over the past year in both the commercial and military segments, and have invested in companies like CrossCheck, Cadence and Synopsys that we think are making significant technical contributions to the ASIC industry.''

''Raytheon's venture program consists of alliances with smaller companies that offer both strong strategic investment opportunities and new technologies that can be further developed in association with one of our various business units,'' said George W. Sarney, Raytheon senior vice president for strategic development.

''CrossCheck offers just those opportunities, and we look forward to a long, dynamic association.''

CrossCheck's solution to ASIC testability is the combination of embedded test electronics in the ASIC device with a suite of design automation software tools. The technology was first unveiled at the Design Automation Conference in June 1989, and has been presented in technical papers and articles since that time. CrossCheck software tools will be announced later this year.

CrossCheck Technology Inc. is a design automation company offering a breakthrough solution to one of the most serious problems plaguing the ASIC marketplace: testability.

CrossCheck's on-chip hardware structures and proprietary electronic design automation software significantly reduce the development effort and time to market of ASIC devices, while providing high test coverage and superior diagnostics.

CLINTON, NJ (FEB. 16) BUSINESS WIRE - Foster Wheeler in the United Kingdom has signed a multi-million dollar engineering design contract with

Amerada Hess Ltd. amd its partners for the Scott oil development in the U.K. North Sea.

The contract covers conceptual design and detailed engineering for production platform topside, module frame support and subsea facilities. Work will be performed by Foster Wheeler Petroleum Development & Associates Ltd., a wholly owned London and Aberdeen-based subsidiary that designs on shore and offshore oil and gas field facilities.

The Scott field is located on the UK Continental Shelf, some 130 miles northeast of Aberdeen. It is comprised of the former ''Waverly,'' and ''Brunel'' fields, and was renamed ''Scott'' in 1989 when Amerada Hess was designated operator of the proposed unit.

With estimated recoverable reserves of at least 400 million barrels of oil the field is one of the largest currently scheduled for development during the 1990s. Significant quantities of natural gas and natural gas liquids will also be produced. First production from the field is planned for the end of 1993, and the field has an estimated approximate life of 18 years.

Foster Wheeler in the UK is a group of integrated engineering, management and construction companies headquartered in Reading with 70 years of experience in energy, processing, power and industrial sectors principally serving the refining, petrochemical, chemical, oil and gas and pharmaceuticals/fine chemicals industries throughout the world.

Foster Wheeler Corp. is a diversified international engineering, construction, manufacturing service and real estate development organization with 24 subsidiaries operating worldwide. The corporations's headquarters are at Clinton, N.J.

BEDMINSTER, NJ (FEB. 19) BUSINESS WIRE - NUI Corp. announced Friday that its board of directors has elected John Kean Jr. to the position of vice president, operations.

Kean will assume his responsiblities on Feb. 19. Kean was most recently with KCS Group Inc. as chief operating officer, having joined KCS when it was spun off from NUI in June 1988.

At KCS, Kean served first as executive vice president and then as C.O.O.

He also served as chairman of KCS's underground pipe replacement division, PIM Corp., and as acting president of the Energy Marketing Exchange, the gas marketing subsidiary of KCS.

Prior to the KCS spin-off, Kean played a key role in the formulation and execution of NUI's restructuring strategy serving as assistant vice president of Strategy Development, a position he assumed in 1986.

Before joining NUI in 1985, Kean served as an officer of Chemical Bank where he began his career following graduation from Lake Forest College in Lake Forest, Ill.

Kean's responsibilities at NUI will include developing a common NUI background for the consolidation of appropriate systems, procedures and other operating activities, while at the same time maintaining the company's policy of distinct and separate utility divisions.

His aim will be achieving efficiencies and economies for NUI shareholders, while continuing to provide its divisions' customers with safe, adequate and proper service.

NUI Corp., headquartered in Bedminster, is an exempt public utility holding company engaged in the distribution of natural gas to approximately 300,000 customers in New Jersey and Florida.

WASHINGTON, DC (FEB. 19) BUSINESS WIRE - A four-member consortium of

leading electronics companies in Europe and the United States will develop an advanced ground-base weapons-locating radar for the armed forces of France, Germany and the United Kingdom.

The three countries recently signed a Memorandum of Understanding among themselves and awarded a development contract worth about $175 million to the Euro-Art consortium. Members of the consortium are Thomson-CSF of France, Siemens of Germany, Thorn EMI of the United Kingdom and General Electric Aerospace of the United States.

The advanced Counter Battery Radar (Cobra) is designed to locate enemy artillery and rocket batteries very rapidly and with great accuracy under conditions of heavy fire and electronic countermeasures. Cobra will use an advanced solid-state, active-array antenna system and innovative signal and data-processing techniques. The system will be mounted in a single vehicle and be operational within minutes of reaching its site.

The Cobra development program will last three years. During that time, the members of the Euro-Art team will design, build and deliver three prototype radar systems. The three countries will then test the prototypes for two years before beginning production. The current projection is that the three countries will require at least 50 radars.

The Euro-Art consortium includes GE Aerospace's Government Electronics Systems Division due to its experience and expertise in advanced phased-array radars and because a large market is foreseen in the United States.

WINDSOR, CT (FEB. 19) BUSINESS WIRE - ADVO-System Inc., announced Monday that Sears Roebuck and Co. has renewed for another year its national advertising agreement with ADVO.

The contract covers all of Sears business groups, and runs through calendar 1990.

Thomas E. Morris, vice president marketing for Sears Merchandise Group, said that this renewal will continue Sears' plan to supplement its print and broadcast media mix to more effectively reach consumers.

Peter A. Corrao, president of ADVO's national accounts marketing division, said, ''We are very happy with this vote of confidence from Sears as to the value of our services. ADVO will continue its efforts to expand its

relationship with the Sears family of businesses.''

ADVO is the nation's largest company specializing in direct mail and direct mail marketing services. The company's brands of shared Mail, Marriage Mail and Mailbox Values are distributed nationally to over 49 million households weekly. ADVO also processes solo mailings and offers limited printing and transportation services. It has 20 production facilities and 69 sales offices nationwide. ADVO's corporate headquarters are located at One Univac Lane, Windsor, Conn. 06095.

CHICAGO (FEB. 19) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) announced Monday the purchase of Bally System 5000 slot machines by the Soviet Union.

The top-of-the-line equipment will initially be installed in the Sheremetyevo Airport in Moscow and will serve as the forerunner for expanded Bally distribution opportunities in the Soviet Union.

In commenting on the purchase, Bally Manufacturing President Roger N. Keesee said, ''We are extremely pleased to participate in the development of the gaming industry in the Soviet Union. The sale of the systems to the Soviet Union is key in that it represents significant growth opportunities for the company.''

Added Keesee, ''Our participation also signals a commitment on Bally's part to continually identify profitable market segments for the company.''

Bally Manufacturing Corp. is a world leader in the leisure industry with four casino hotels, a nationwide network of fitness centers, and a complete line of gaming equipment, fitness products and lottery products and services.

BIRMINGHAM, AL (FEB. 19) BUSINESS WIRE - A cash dividend increase from 77 cents to 80 cents per share per annum was approved by the board of directors of Central Bancshares of the South Inc. (NASDAQ/NMS:CBSS).

The increased quarterly dividend of 20 cents per share is payable on April 1, 1990, to all shareholders of record on March 16, 1990.

Harry B. Brock Jr., chairman of Central Bancshares, said the board's action reflects the record 1989 earnings performance and confidence in the future of the company.

Brock said, ''We are pleased that over the past 10 years our cash dividend has grown at a compound rate of 11.5 percent and that our capital, an important measure of strength and soundness, has increased at a compounded rate of 9.7 percent per year.''

Central Bancshares of the South Inc. is a $4.5 billion bank holding company. Its banking affiliates operate 78 offices in Alabama and eight offices in Texas.

WASHINGTON (FEB. 19) COMTEX - The 8-K report filed at the SEC shows on Feb. 2, 1990, Enviropact Inc. dismissed the services of Ernst & Young as its principal public accountants and in their stead engaged the services of Arthur Anderson & Co.

In the financial statements of Enviropact for the past fiscal year, Ernst & Young expressed opinions concerning questions as to the ability of Enviropact Inc. to continue as a going concern. Enviropact dismissed Ernst & Young under the advisement of its audit committee.

For the previous two years, audits performed by Erst & Young contained no adverse opinion or disclaimer of opinion, nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

Ernst & Young, in its financial statements on Enviropact for the period ended June 30, 1989, advised in a report dated Oct. 11, 1989, that material control weaknesses existed in the internal control structure of Enviropact related to billing and revenue recognition, estimating the allowance for doubtful accounts amd cash and cash disbursments. Enviropact has authorized Ernst & Young to respond to questions on these reports posed by Arthur Anderson.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 001

GROUP LED BY HANSON P L C OWNS 33,224,000 SHARES (49.34%) OF NEWMONT MINING CORPORATION (TICKER: NEM) OF DENVER, CO.

ANNOUNCEMENT: On Feb. 15, HM Holdings, a subsidiary of Hanson, agreed to purchase 91,789 shares of Peabody Holding Co. Inc. and 233,588 shares of Mid-Continent Barge Lines Inc. for an aggregate of $503,478,162. HM will then own approximately 45 percent of each company with the remaining interests owned by a subsidiary of the company. This document also constitutes amendment no. 33 filed by Consolidated Gold Fields Ltd., Gold Fields American Corp., and The Special Purpose Inc.

PURPOSE: For investment.

-30- 828
#90050c0048 02/19/1990 ~Comtex
SCHEDULE 14D9

SEC - AMENDMENT NUMBER: NONE

ANNOUNCEMENT: The company's board has rejected NL Industries' $45 per share tender offer and recommends that shareholders not tender their shares, stating that the offer is inadequate. The company has set April 19 as the date for a stockholder meeting to consider the company's previously-announced recapitalization plan. According to the plan, shareholders would receive $38 per share in cash, one share of a new series of exchangeable preferred stock, and one newly-issued share of common stock. The company intends to finance the plan through senior bank debt of up to $730 million and the sale of approximately $200 million in senior subordinated debentures.

-30- 581

#90050c0058 02/19/1990 ~Comtex
STAMFORD, CT (FEB. 19) COMTEX - Calgene Inc., the Davis, Calif., agricultural genetic engineering company, has acquired Bioseeds International Inc. and Bioseeds' wholly owned subsidiary, NobleBear Inc., in a stock swap.

Bioseeds develops genetically engineered or altered corn, and grows, processes and acts as a wholesale dealer of seed corn, soybeans and small field seeds, according to a Securities and Exchange Commission filing. The company's operations are based in Illinois.

Bioseeds' and NobleBear's principal assets are seed inventories, buildings used in the seed business, machinery and equipment used in seed conditioning and genetic materials. Calgene issued 150,000 of its common shares to Bioseeds' shareholders as payment for the company, and made a cash contribution of about $1.4 million to retire Bioseeds' debts.

The acquisition provides Calgene with an entry into the specialty corn market, which Calgene sees as a growth area with potential applications for food and industrial processors. In particular, Calgene believes that Bioseeds' cell biology advances in specialty corn lines will help in producing genetically engineered starches.

Calgene believes that increasing sales of NobleBear's proprietary seed,

lower interest costs resulting from the debt restructuring and cost savings from combining certain activities of Bioseeds with those of Calgene, may reduce or eliminate Bioseeds' consolidated losses and result in profitability.

This 8-k Filing was submitted to the Securities and Exchange Commission on FEB. 16, 1990

LONDON, (FEB 19) - Grand Metropolian food group revealed Monday that it is negotiating with two potential buyers on sale of its breweries, while the Sunday press had reported it was sure to sign an agreement along those lines with Austrialian brewer Elders IXL.

At a shareholders' meeting, Grand Met Chairman Allen Sheppard also predicted record profits for 1990 and formally denied rumors that the group would put through a capital increae.

The group is the fourth-biggest British beer producer, thanks to its Watney Mann Truman Division. Financial sources say the group wants to keep the nearly 5,000 pubs it now has, but wants to get out of beer-making since profitability is too low.

The accord being discussed with Elders IXL would reportedly give the Australian group the Watney Mann plants, and Grand Met would get the Courage pubs now belonging to Elders.

Grand Met shares lost six pence on Monday to 591, in a generally lower

market.

TOKYO (FEB. 19) - Japan's Toyota Motor Corp. said Monday its vehicle exports rose 1.5 percent from a year earlier to 145,300 in January while rival Nissan Motor Corp. reported a 35.8 percent decline to 68,700 vehicles.

Toyota said its increase, the first in five months, reflected strong shipments of cars and commercial vehicles to Europe. Domestic sales rose 30.2 percent to 133,500, the 10th consecutive increase and a record gain for January, while production fell 4.7 percent to 288,200 units, the company said.

Nissan said its fifth consecutive decline in exports reflected slower shipments to the United States and Europe. Domestic sales jumped 25.9 percent to 79,900 vehicles, also its tenth consecutive gain and its largest increase for January, while domestic output fell 4.5 percent to 174,300, it said.

LISBON (FEB. 19) - Portuguese hotel group Ibersol said Monday it was to open three more Pizza Hut restaurants under franchise from the U.S. restaurant chain, which is owned by Pepsi Cola.

Ibersol opened its first Pizza Hut on a franchise agreement in the Algarve last year. The three new restaurants will be in Lisbon, Porto and Gaia with investment of 300 million escudos (1.9 million dollars).

There are some 6,000 Pizza Hut restaurants worldwide.

PARIS (FEB. 19) - Arcad, a joint venture between Renault of France and U.S. automaker Chrysler, is to produce the European model of its new four-wheel drive vehicle, the "JJ" model, in Spain, Arcad said here Monday.

The vehicle will be produced at what is now a Renault factory in Valladolid in central Spain, which is to cease operations as a Renault plant in mid-1991.

The Valladolid plant currently employs 3,000 people, but the Arcad venture will need a total of only about 700.

Renault said that some 50,000 JJ vehicles would be produced a year. Arcad started a feasibility study on the project a year ago and production is expected to begin in 1992.

The JJ will also be produced in the United States, at an existing Chrysler plant which is expected to be chosen within the next six weeks, informed sources said.

#90050p0025 02/19/1990 ~PR Newswire

PARIS (FEB. 19) PR NEWSWIRE - ARCAD, a Renault and Chrysler joint venture today announced Valladolid, Spain, as the manufacturing location for European production of the all-new, four-wheel-drive mini sport utility vehicle.

The Valladolid facility will be leased by ARCAD from FASA Renault, a Spanish subsidiary of Renault. ARCAD production of the vehicle (code-named "JJ") will start in the second half of 1992.

FASA Renault announced at the end of 1988 that its FASA I plant would cease operations in mid-1991. The decision was made in connection with the overall restructuring of Renault's European manufacturing facilities.

A workforce of approximately 350 would be employed to produce the "JJ" using a unique assembly process in which a major portion of the vehicle is composed of subcontracted modules. The suppliers manufacturing the modules will be located near the assembly plant and also will employ about 350 workers.

In February 1989, Renault and Chrysler (NYSE: C) unveiled plans for the joint venture company to develop technology for use in two manufacturing locations: one in North America for Chrysler's requirements in North America, for which Chrysler has sole responsibility; the other in Europe, for the requirements of both Renault and Chrysler in Europe and the rest of the world.

The location of the North American assembly plant has not yet been decided. As previously announced, it will be an existing Chrysler facility.

#90050p0032 02/19/1990 ~PR Newswire

RICHMOND VA. (FEB. 19) PR NEWSWIRE - Reynolds Metals Company (NYSE: RLM) today reported that it recycled 450 million pounds of consumer-generated aluminum in 1989, and paid recyclers more than $180 million for their efforts. The consumer aluminum recycling pioneer said the record results included the 100-billionth aluminum can recycled by Reynolds since it began buying aluminum from the public in 1968.

The consumer-generated pounds comprised more than half of the 865 million pounds of reclaimed aluminum processed by Reynolds last year.

"Our aluminum recovery from all sources last year accounted for nearly one-third of Reynolds metal production," said Richard N. Bolling, vice president of the company's Recycling and Reclamation Division. "As the public's awareness of solid waste disposal and other environmental problems increases, we are confident that this source of supply will continue to grow."

The 450 million pounds of consumer-generated aluminum came mostly from the company's subsidiary, Reynolds Aluminum Recycling Company (RARCO), which operates a nationwide network of 725 buying locations. The total pounds Reynolds recycled in 1989 included 9.7 billion used all-aluminum beverage cans.

"During the past decade, Reynolds has recycled more than 100 percent of the cans it produced," said Charles W. Rayfield, vice president and general manager of RARCO. "We are proud of our leadership role in helping the industry achieve a recycling rate that now includes the recovery of more than one out of every two aluminum cans produced."

Rayfield noted that the company's record consumer recycling results included more than 100 million pounds of non-can scrap. "As more aluminum is utilized in automobiles, appliances, building products, packaging items and other household goods, these metal sources will increase within our recycling stream and lessen the burden on the solid waste stream," Rayfield said.

Besides aluminum beverage cans, the Reynolds recycling network purchases used aluminum items such as siding, gutters, storm door and window frames and lawn furniture tubing, plus many household products such as aluminum foil, frozen food and dinner trays, and dip, pudding and pie containers. Aluminum castings including automobile parts, pots and pans, lawn mower housings and barbecue grills also are purchased for recycling by Reynolds.

Reynolds buys aluminum through its network of RARCO-operated buying locations and about 2,500 other recycling operations nationwide. For the location of the nearest Reynolds collection point, consumers can call toll-free, 1-800-228-2525.

EAST AURORA, NY (FEB. 19) PR NEWSWIRE - Robert T. Brady, president and CEO of Moog Inc.(AMEX: MOG.B, MOG.A) today announced that Moog's board of directors has elected two new vice presidents of the corporation, Kenneth G. Smith, who is managing director of Moog Germany and Dr. Stephen A. Huckvale, who is managing director of Moog Japan. He noted that in these new corporate positions they will continue to report to Jerald D. Bidlack, vice chairman and president of the International Group.

Bidlack indicated that Smith holds a Bachelor of Science Degree in Aeronautical Engineering from Bristol University in England and has performed post graduate work at Sheffield University. He worked at Blackburn Aircraft in England and Contraves AG in Switzerland prior to joining Moog Germany in 1969 as marketing manager. He has been managing director of Moog's largest overseas subsidiary in Germany since 1975. Bidlack noted that Smith will continue to be responsible for Moog subsidiaries in Germany and Italy plus its manufacturing subsidiary in Ireland. In addition he will coordinate Moog's marketing activities in the East Block countries.

Bidlack indicated that Huckvale obtained his undergraduate degree and Phd in Mechanical Engineering from the University of Bath in England. He worked at Plessey Hydraulics and the Atkins Research and Development Center prior to joining Moog's subsidiary in England in 1980 as engineering manager. He has been managing director of Moog Japan since 1986. Bidlack noted that Huckvale will continue to be responsible for Moog subsidiaries in Japan, Korea and Hong Kong plus assume new responsibilities for the coordination of Moog's Pacific Rim marketing efforts including Moog's subsidiary in Australia.

Brady concluded by saying this action by the board signals Moog's continued interest in further strengthening and expanding its international activities in the decade ahead.

FARMINGTON HILLS, MI (FEB. 19) PR NEWSWIRE - Votrax, Inc. (OTC: VOTX), a leading developer and manufacturer of interactive voice- response systems, today announced its unaudited results for the second quarter ended Dec. 31

1989.

Net sales for the quarter were $1,045,882 vs. $1,908,096 for the same period the previous year. Net income (loss) for the period was equal to ($263,278), or ($.06) per share, compared to ($79,039) or ($.02) per share for the quarter ended Dec. 31, 1988.

"Financial results for the quarter reflect a significant loss of revenue due to the discontinuation of nonprofitable product lines initiated in third quarter of fiscal year 1989," said Larry W. Jernigan, Votrax president and CEO. "The quarter's financial results also reflect research and development expenses incurred for the company's new generation of products, which was initiated during the period," Jernigan added.

As reported at the recently held annual shareholders' meeting, losses incurred by the company since the third quarter of fiscal year 1989 are expected to decrease in upcoming quarters. In each of the quarters since then, Votrax has incurred substantial charges to income, including significant legal expenses, as well as other expenses reflecting the reorganization and restructuring of the company. These are charges which the company does not expect to occur in future quarters.

Due to significant writedown in losses incurred since third quarter of fiscal year 1989, Votrax was recently deleted from the NASDAQ stock exchange listings. Upon improvement in retained earnings and capital surplus performance, the company will reapply, and expects to be reinstated, with NASDAQ. In the interim, daily quotations are available through the company's market makers, or through the National Quotation Bureau subscription service.

Headquartered in Farmington Hills, Votrax is a leader in the industry with more than 2,500 business communication systems installed worldwide. The company specializes in the development, manufacturing, marketing and distribution of interactive voice-response systems.

JACKSON, MI (FEB. 19) PR NEWSWIRE - With the level of export business in Michigan growing by more than 70 percent in the past three years to $17.5 billion annually, Consumers Power Company has established a special economic development task force to promote further expansion of international sales by state firms.

Michigan is the nation's fourth-largest exporting state, behind New York, Texas and California. Exports account for more than 500,000 jobs in the state, primarily in industries producing transportation equipment, nonelectric machinery, fabricated metal products, and chemical products.

"Due to a realization of the global marketplace, Michigan businesses today increasingly are looking to potential markets in countries and continents with established economies, such as Canada, Europe, Asia and other places with developing economies," said Richard R. Surbrook, the utility's director of economic development.

"At Consumers Power, we are exploring ways to encourage Michigan businesses to consider the benefits of the export market," said Surbrook.

A special brochure has been produced by the utility, "Exporting: Opening the Door to New Horizons," which includes practical information on how Michigan businesses can enter the export market.

According to figures from Consumers Power's economic development department, for every $147,000 worth of exports, one additional job is created in Michigan.

"One increasingly attractive international market is Canada. Approximately 12 percent of Canada's U.S. imports come from Michigan businesses," said Surbrook. "Canada's economy is expected to grow between 2-3 percent per year over the next five years, compared to 1 percent for the United States over the same period. This makes sales to Canada particularly important," he added.

"Another market that warrants interest is the European Common Market, which goes into effect in 1992 and allows for the free movement of goods, capital, services and people throughout the 12 participating European countries," said Surbrook.

This open market will be the only economy in the world comparable in magnitude to the United States, thus creating a "prime exporting opportunity for Michigan companies," noted Surbrook. Reverse investment opportunities in the U.S. will continue to be a priority, he said, led by the United Kingdom, West Germany, the Netherlands and recent increased interest expressed by Italy.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

MIDLAND, VA (FEB. 19) PR NEWSWIRE - Henry M. Ross, chairman and chief executive officer of Ross Industries, Inc. (NASDAQ: ROSX), today announced the appointment of two new members to the corporation's board of directors.

Joseph W. Barr, former Secretary of the Treasury of the United States, and Mark Upson III, general manager of the beverage division of Proctor & Gamble Company, Cincinnati, were appointed.

Barr a former congressman from Indiana's 11th District, Secretary of the Treasury, president of American Security Bank, Washington, and chairman of the Federal Home Loan Bank of Atlanta. He is also a member of the board of directors of Minnesota Mining and Manufacturing (3M) and has been a director of Burlington Industries, Control Data, Conrail and other companies. He is currently a consultant.

Upson has served in various capacities for Proctor & Gamble since 1973. He is presently manager of Proctor & Gamble's beverage division, and has direct responsibility for the Folger Coffee Company, as well as responsibility for the company's citrus category, including Citrus Hill, Sunny Delight and Sundor Brand Franchises. The division has total sales in excess of $1.5 billion.

Other Ross directors are Chairman Henry Ross; Werner Quasebarth, chairman of the board of Atlas Machine and Iron Works, Gainesville, Va.; Lois Ross, Northern Virginia civic activist; and Julian Scheer, senior vice president the LTV Corporation, Dallas.

Ross is based here and manufactures a full line of food processing and packaging machinery.

ATLANTA (FEB. 19) PR NEWSWIRE - Tom Smith, vice president and area general manager for IBM US Marketing & Services, welcomed over 200 representatives from 78 IBM-supported job training centers nationally today in a special meeting being held through Wednesday at the Atlanta Hilton Hotel.

Since IBM opened the first job training center in 1968, over 35,000 graduates have been trained for careers in office and computer areas, returning over $300 million to the economy.

Smith said, "We commend the training centers for their success. In Atlanta the Urban League center has placed 90 percent of its graduates into full-time jobs, tripling their incomes and returning over $1.5 million to the economy in 1989."

Ray Nord, director of IBM's external programs added, "The independence, self respect and pride these job training centers develop for the students in the 78 cities where they are located is priceless."

MADISON HEIGHTS, MI (FEB. 19) PR NEWSWIRE - Code-Alarm, Inc. (NASDAQ: CODL) today announced plans to open its first East Coast Distribution Center, located in the Paterson, N.J., area

"Based on the successful performance of our West Coast Distribution Center we will be opening a fully staffed, fully stocked warehouse within 60 to 90 days," stated Rand Mueller, president and CEO of Code- Alarm, Inc.

Rapidly growing consumer awareness of the Code-Alarm brand name on the East Coast has prompted the company to restructure and strengthen its marketing program there. "Our recently introduced stolen vehicle recovery system, Intercept, has been enthusiastically received in the East as well as our new centrally monitored home security System 2001. Because

of the growing demand for these products, as well as our entire line, our East Coast dealers have asked us for a greater presence in the area, Mueller said.

Michael Schroeder will head the center as the area's regional director. Schroeder explained, "We want to be right there where the action is, and we want our full product line to be there, too. We need to be there working side by side with our dealers to make sure we are answering the daily needs of the East Coast consumer, and to demonstrate our total commitment to the marketplace. To begin with, we will be formulating specifically targeted marketing approaches designated at the East Coast consumer. Within the first year, we will offer sales and technical support training from this location."

Car theft is a persistent problem which is growing nationally at a rate approaching 39 percent since 1984, and the number continues to grow. According to the latest FBI Crime Reports, "An estimated total of 1,432,916 thefts of motor vehicles occurred in the United States during 1988. These offenses comprised 12 percent of all property crimes ... An estimated average of 1 of every 128 registered motor vehicles was stolen nationwide during 1988. Regionally, this rate was greatest in the Northeast, where 1 of every 91 motor vehicles registered was stolen."

The company plans to expand its dealer numbers on the East Coast and to enlarge and strengthen its established dealer group as well. Code- Alarm Inc. of Madison Heights, ranks first in Michigan and 15th nationally on Forbes magazine's Nov. 13, 1989 list of the "200 Best Small Companies in America," and is the leader in the vehicle-security industry.

ST. PAUL, MN (FEB. 19) PR NEWSWIRE - ZEOS International Ltd. (NASDAQ: ZEOS) today reported record sales and profits for the year ended Dec. 31, 1989.

Commenting on the company's performance, Greg Herrick, president and chief executive officer said, "Sales and profits for fiscal 1989 have been gratifying. We are particularly pleased to have increased profitability over 600 percent while experiencing revenue growth of over 200 percent.

In addition, these results were achieved in tandem with significant increases in new product development, advertising and promotion expenditures. The majority of these additional expenditures occurred in the fourth quarter.

"In addition, Parts1 our electronic component distribution division and NPC Electronics, our contract manufacturing division, have both experienced strong growth," Herrick added.

During 1989 the company continued to receive favorable reviews of its high performance desktop computer systems based on the Intel 80386 microprocessor.

"Demand for the company's high performance systems increased steadily through 1989 and have continued to increase thus far in 1990. Several additional improvements in the area of customer service were implemented in 1989 as well. In July of 1989, the company extended its toll free sales and technical support hours to 24 hours a day, 365 days a year. We also entered into an on-site service agreement with TRW Corporation and began offering our own ZEOS credit cards through Household Retail Services " Herrick stated.

"In 1989 we have continued to grow on a foundation of conservative management, creative products and innovative advertising. The direct marketing channel continues to offer opportunities for growth. We are in that channel and we are optimistic about the future," Herrick said.

ZEOS International, Ltd., manufactures and markets, direct to end users, ISA and EISA (Enhanced Industry Standard Architecture) desktop computer systems worldwide under the ZEOS name.

In addition, the company manufactures electronic products for others through its contract manufacturing division, NPC Electronics and distributes electronic components through its parts distribution division, Parts1.

NIAGARA FALLS, NY (FEB. 19) PR NEWSWIRE - Sevenson Environmental Services Inc. (NASDAQ-NMS: SEVN) today reported results for the year and fourth quarter ended Dec. 31, 1989.

Revenues for 1989 increased 34 percent to $52,061,000 vs. $38,960,000 in 1988. Net earnings from continuing operations for the year were $6,741,000, or $1.10 a share on weighted average shares outstanding of 6.13 million, compared to $4,382,000 and 88 cents a share on 5 million shares outstanding in 1988.

Revenues for the fourth quarter increased slightly to $14,470,000 vs. $14,072,000 in the fourth quarter of 1988. Net earnings from continuing operations for the quarter were $1,783,000, or 27 cents a share on 6.6 million shares outstanding, compared to $2,059,000, or 42 cents a share on 5 million shares, in the fourth quarter of 1988.

Differences in shares outstanding reflect the company's issuance of 1.6 million shares in its initial public offering in April, which brought the total number of shares outstanding to 6.6 million.

Sevenson provides a comprehensive range of field services for the remediation of sites and facilities contaminated by hazardous materials. The company, which is headquartered in Niagara Falls, N.Y., operates principally in the eastern United States and Canada. Since entering the site remediation business in 1979, the company has performed over 200 projects, including projects at the Love Canal and at other Superfund sites.

#90050p0091 02/19/1990 ~PR Newswire

EAST CHICAGO, IN (FEB. 19) PR NEWSWIRE - The platemaking operations of the Inland Steel Flat Products Co. have been organized as a separate business unit to better serve the company's industrial customers, President Joseph D. Corso announced today.

The new Inland Steel Industrial Products Co. will market products from ISFPC's existing No. 4 Slabbing Mill, 100-inch Plate Mill, and the 76-inch and 44-inch Hot Strip Mills.

The company will have its own customer service, outside sales, operations planning, and technical services representatives, and a workforce of about 900.

Corso said Willam F. Ristau has been named general manager of Inland Steel Industrial Products, and will function as the head of the new business unit. Ristau has been with Inland since 1976 in a number of Sales/Finance department positions. He will report to Morgan J. Burke, vice president, ISFPC.

Ristau, who has bachelor's and master's degrees from DePaul University in Chicago, has a marketing perspective, said Corso, that will be valuable for customers as well as suppliers.

''This reporting structure,'' said Ristau, ''will allow our business unit to offer customers all of the advantages of buying from a profitable, integrated mill, while at the same time having a separate management team that will focus on providing better service to our customers.''

Ristau said the mission of his company is to sustain acceptable levels of profit by taking good care of its present customers and adding new ones.

''We expect to capitalize on our strengths -- the relationships we have built with our customers and a workforce that has shown it will do whatever it takes to outperform the competition,'' said Ristau. ''As we focus on this new customer base, we look forward to offering new grades of material not available in the past from Inland.''

ISFPC's plate business serves the construction, agricultural equipment, rail, shipbuilding, steel service center, and other industries.

ISFPC is a division of Inland Steel Co., a subsidiary of Inland Steel Industries, Inc. (NYSE: IAD).

HARRISBURG, PA (FEB. 19) PR NEWSWIRE - Two global automotive suppliers will combine their complementary technologies and develop advanced electrical interconnection devices for North American automobile wiring systems.

AMP Inc. (NYSE: AMP) and United Technologies Automotive (UTA) announced today they will cooperate on selected new programs for electrical interconnection devices that will address the growing use of sophisticated electronics in automobiles and bring a new level of quality and reliability to the vehicle wiring system.

A five-year agreement was signed by James E. Marley, president of AMP, and Norman R. Bodine, president of UTA's Automotive Products Division.

In a joint statement, Marley and Bodine said, "We're listening to our customers, and we recognize the need in the harsh environment of automobiles for total wiring systems that will exceed current industry standards for quality and durability."

Customers of both companies will benefit from the integration of AMP's broad capabilities in electronic connectors and UTA's expertise in designing wire harness systems for the stringent demands of automobiles.

Under the agreement, the companies will cooperate on technical, design and marketing aspects of future automotive electrical interconnecting devices. AMP's specialized electronic connector expertise will complement UTA's automotive wiring capabilities. Bodine and Marley expect the agreement to result in increased business for both companies.

CONTACT: Mike Ratcliff of AMP, 717-561-6209, or Jim Fisher of UTA, 313-593-9672

SAN DIEGO (FEB. 19) PR NEWSWIRE - McDonald's Corp., the world's largest quick service restaurant chain, today announced a joint project with the National Association of Secondary School Principals (NASSP) to recognize and contribute to the development of middle level and high school assistant principals.

The program, which will begin in 1991, was announced this morning by Gerald A. Purdy, NASSP president, at the association's 74th annual convention in the San Diego Convention Center.

"As one of the world's largest employers of teenagers, we recognize the importance of having high-quality schools in our nation," Stan Stein, senior vice president, personnel, said. "Excellent schools lead to excellent workers, which are essential if we are to compete in the international economy. We will never have excellent schools unless we have the best school leaders."

The educational forum for assistant principals will bring together more than 50 of the nation's best assistant principals to a multiday national conference where they will hear educational leaders and develop strategies for meeting students' needs, according to Stein. Details will be completed between the two organizations and announced in the near future.

"McDonald's Corp. recognizes the critical role of the assistant principal in today's middle level and high schools," said Purdy. "McDonald's has always had a strong commitment to education and educational issues, and we are proud to join with them in this project."

DEERFIELD, IL (FEB. 19) PR NEWSWIRE - Baxter's board of directors today voted to increase the quarterly dividend on the company's common stock (NYSE: BAX) 14 percent to 16 cents per share from 14 cents per share. This is the 35th consecutive year the company has increased the dividend on its common shares. The regular quarterly dividend No. 219 is payable April 2, 1990, to stockholders of record on March 9, 1990. The dividend was last increased in February 1989.

The board of directors declared regular quarterly dividend No. 18 of 81.25 cents per share on the company's adjustable rate preferred stock (NYSE: BAXPRA). The dividend is payable April 2, 1990, to stockholders of record on March 9, 1990.

The board also declared regular quarterly dividend No. 18 of 87.5 cents per share on the company's $3.50 cumulative convertible exchangeable preferred stock (NYSE: BAXPRB). The dividend is payable April 2, 1990, to stockholders of record on March 9, 1990.

Baxter International Inc. is the leading worldwide manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in more than 100 countries. The company had 1989 revenues of $7.4 billion.

#90050p0115 02/19/1990 ~PR Newswire
STAMFORD, CT (FEB. 19) PR NEWSWIRE - Erbamont Inc. said today that the Administrative Law Judge for the International Trade Commission issued a ruling designating the investigation of Erbamont's doxorubicin complaint against Cetus Corporation and Bristol-Myers Company as a "more complicated" investigation under ITC rules. The ruling postpones the deadline for an initial determination from the Administrative Law Judge until May 21, 1990, although it is possible that the decision will be issued before that date.

Erbamont filed the complaint before the ITC on May 12, 1989, stating Cetus Corporation and Bristol-Myers Company were importing doxorubicin from foreign suppliers who were using a process that infringes Erbamont's exclusive U.S. patent rights. Erbamont sells doxorubicin in the United States under the trademark Adriamycin(R) through its Adria Laboratories division. In June the commission accepted jurisdiction of the complaint and the Administrative Law Judge held extensive hearings in November and December, 1989.

"Naturally, we hope that the decision will be issued as soon as possible so that we can put an end to the infringing sales of doxorubicin on the U.S. market," stated Paolo Morrione, president of Erbamont Inc. "We

remain confident that the commission will support our belief that our competitors' actions infringe our patent."

Erbamont Inc. is the U.S. affiliate of Erbamont N.V., which is part of the Ferruzzi/Montedison Group. Erbamont N.V., through its subsidiaries, is a world leader in the discovery, manufacture and sale of anticancer chemotherapeutic drugs. Its ethical drugs, including Adriamycin(R), are sold in over 120 countries. Adriamycin is the principal ethical pharmaceutical manufactured and sold by the Erbamont Group and is the largest selling anticancer drug in the United States and Western Europe. Idarubicin, an analog of Adriamycin, has recently been recommended for approval in the U.S. by the FDA's Oncologic Drugs Advisory Committee.

The major business units of Erbamont N.V. include Farmitalia Carlo Erba S.r.L., a leading pharmaceutical company in Italy; Antibioticos Farma S.A. a leading pharmaceutical company in Spain; and Erbamont Inc. with its Adria Laboratories Division located in Columbus, Ohio.

NAPERVILLE, IL (FEB. 19) PR NEWSWIRE - The board of directors of Nalco Chemical Co. (NYSE: NLC) elected E.J. (Ted) Mooney Jr. president effective March 1.

Nalco's three U.S. division presidents, along with the company's operations staff and U.S. subsidiaries, will report to Mooney in his new position. Since 1987, Mooney has been the company's executive vice president, U.S. operations. In 1988, he was named to Nalco's board of directors.

W.H. Clark will remain chairman and chief executive officer, Nalco Chemical Co. International operations, finance and human resources will continue to report directly to Clark.

A native of Longview, Texas, Mooney graduated from the University of Texas with a B.S. degree in chemical engineering in 1964, and a law degree in 1967. Mooney joined Nalco in 1969 with Howe-Baker Engineers, Inc., a former subsidiary. Mooney is also a graduate of the Massachusetts Institute of Technology's Sloan Senior Executive Program.

#90050p0123 02/19/1990 ~PR Newswire

TORONTO (FEB. 19) PR NEWSWIRE - GW Utilities Limited (AMEX: GWT) today announced earnings for the six months ended Dec. 31, 1989, of $6 million, or $0.15 per common share, compared with a loss before extraordinary items of $6 million, or $0.15 per common share, for the same period in 1988. The improvement in 1989 resulted from higher earnings in The Consumers' Gas Company Ltd. and Interhome Energy Inc.

In the 1988 period, extraordinary items of $3 million, which consisted of net gains on investments, reduced the loss for the six months ended Dec. 31, 1988, to $3 million, or $0.08 per common share.

For the three months ended Dec. 31, 1989, earnings were $18 million, or $0.46 per common share, compared with earnings before extraordinary items of $8 million, or $0.21 per common share, for the same quarter a year ago.

In the 1988 quarter, extraordinary items of $7 million increased earnings to $15 million, or $0.38 per common share.

Revenue for the six months ended Dec. 31, 1989, was $ 735 million, compared with $754 million a year earlier. For the three month period, revenue was $514 million, compared with $516 million.

On Jan. 30, 1990, GW Utilities announced it had received a proposal for a "going private" transaction from Olympia & York Developments Limited whereby the public holders of the remaining equity interest in GW Utilities would receive $36 per common share in cash for a total consideration of $150,822,000. Olympia & York owns 89.33 per cent of the issued and outstanding common shares of GW Utilities.

A management information circular and proxy statement containing complete details of the transaction will be mailed to all shareholders in time for a special meeting of GW Utilities shareholders, expected to be held in the second quarter of 1990, to consider the proposed transaction.

#90050p0126 02/19/1990 ~PR Newswire

TORONTO (FEB. 19) PR NEWSWIRE - Abitibi-Price Inc. (NYSE: ABY) reported that sales dropped very slightly in 1989 to just under $3.3 billion from the record $3.3 billion in 1988, while net earnings dropped from the record $191.1 million or $2.64 per common share in 1988 to $54.2 million, or 70 cents per share.

Included in earnings for the year and the fourth quarter was a write-off of assets withdrawn or about to be withdrawn from production, plus related

employee severance costs. Without this charge of $31.2 million before taxes, net earnings would have been $75.2 million or $1.00 per share.

Fourth quarter sales were $801 million versus $856 million in 1988. However, the company incurred a loss of $14.5 million, or 22 cents per share compared to net earnings of $48.1 million, or 66 cents per share in the previous year. Before the charge of $31.2 million before taxes, net earnings would have been $6.5 million or 8 cents per share.

Earnings for both the year and the quarter reflect a stronger Canadian dollar and market softening in each of the three business units, but particularly in newsprint.

Newsprint sales volume for the year was down 7 percent from last year and transaction prices declined significantly to more than offset positive cost performance. As a result, newsprint operating profit dropped sharply from record 1988 levels.

The mills in the printing papers group operated at a high level of available capacity. However, the market did soften in 1989, particularly in the coated paper area, the Canadian dollar did strengthen and there were some production disruptions, such as the major conversion project in the coated papers mill. Operating profit in this group dropped from 1988 levels.

The diversified group's distribution and converted products divisions achieved record sales in 1989 with a 9 percent increase from 1988 levels. Operating profit dropped slightly as improved performance in Canada was offset by weaker results in the U.S. distribution operations. Operating profit of the building products division increased significantly in 1989.

Bernd K. Koken, chairman and chief executive officer, commented that he expected newsprint earnings to remain below desired levels as additional capacity comes on stream. He also stated that although groundwood papers will experience further weakening, coated papers should rebound from a poor 1989 and the operations of the distribution, converted products and building products divisions are also expected to strengthen in 1990.

Abitibi-Price is a major Canadian forest products company with manufacturing, sales and distribution operations in Canada and the United States plus other investments outside of North America.

CONTACT: J. Gordon Maw, senior vice-president, finance, 416-369-6799, or Robert J. Tait, 416-369-7107, both of Abitibi-Price.

NEW YORK (FEB. 19) UPI - Pepsi-Cola Co. said Monday it has signed an agreement with the National Academy of Recording Arts and Sciences to become an official sponsor of the Grammy Awards.

The Grammys are scheduled to be presented Wednesday night on a national telecast.

At the same time, Pepsi-Cola unveiled its music marketing campaign for 1990, which will feature two Grammy nominees, rap artist Young MC in national radio ads and Puerto Rican singer Chayanne in his second network television commercial. His prior commercial was the first Spanish-language ad to air on network television, during last year's Grammys.

Other artists who will join the campaign are pop star Martika and Motown rhythm and blues group The Boys, the company said.

''The signature sounds of these popular performers offer us unique opportunities to tap into very distinct groups of consumers,'' said Michael Simpson, executive vice president for marketing and national sales.

Past ad campaigns have featured Michael Jackson, British rocker Robert Palmer, and comedian Billy Crystal.

#90050u0784 02/19/1990 ~United Press International

HOUSTON (FEB. 19) UPI - Domestic drilling picked up last week, but activity in the Gulf of Mexico continued to decline, industry sources said.

Baker Hughes Inc. said Sunday a total of 918 rotary rigs were working in the United States last week, compared with 899 the previous week and 766 for the same week a year ago.

Offshore Data Services said there were three fewer rigs working in the Gulf of Mexico last week. This dropped the utilization rate in the area to 67.4 percent with 145 mobile rigs working out of a fleet of 215.

But one more rig went to work in European waters, boosting the utilization rate there to 87.2 percent with 116 rigs working out of a fleet of 133.

Worldwide utilization was 79.7 percent with 534 rigs working out of a total fleet of 670 last week.

There were 336 rotary rigs working in Texas last week compared with 320 the week before and 232 for the same week a year ago.

Rig counts in other states included:

Louisiana, 147, compared with 137 the previous week and 131 for the same week a year ago; New Mexico, 35, compared with 37 the previous week and 29 for the same week a year ago, and Oklahoma, 124, the same as the previous week and compared with 114 for the same week a year ago.

A total of 233 rotary rigs were working in Canada last week, compared with 215 the previous week and 193 for the same week a year ago.

#90050u1026 02/19/1990 ~United Press International

TALLAHASSEE, Fla. (FEB. 19) UPI - Fifteen of the nation's largest oil companies have agreed to move their tanker traffic 10 miles away from the Florida Keys to protect fragile coral reefs from spills, Gov. Bob Martinez announced Monday.

Martinez also announced that the U.S. Coast Guard has agreed to recommend that the International Martime Organization formally declare an ''avoidance'' or buffer zone for the same area.

The area extends from the Dry Tortugas through the Marquesas Keys and along the length of the Florida Keys to Biscayne National Park Near Miami, and includes the only living coral reefs in the continental United States.

''The coral reef areas along our coasts will be a much safer place,'' Martinez said during a news conference.

''This is a voluntary participation. We have no enforcement mechanism,'' said Ed Roland, president of Amoco Transport Company and chairman of the Marine Transportation Committee of the American Petroleum Institute. ''But certainly, there's moral suasion that goes along with it. I don't think there will be any violations of policy within the AMI.''

Other member companies were Arco, Ashland, BP America, Chevron, Exxon, Inter-ocean, Keystone, Mobil, Phillips 66, Shell, Sun, Texaco, Trinidad and Union. They conduct more than 25 percent of shipping through the Florida Straits each year. More than 5,000 ships pass through the straits annually, some carrying as many as 21 million gallons of oil.

The Coast Guard proposal, which will be presented in June to IMO, the United Nations agency which oversees international shipping, would apply to all major U.S. and foreign vessels carrying cargoes of oil or hazardous material and all other vessels of 175 feet or more.

Martinez first called for a buffer zone to protect the reefs and other fragile coastal areas in south Florida following last year's Exxon Valdez disaster in Alaska.

Last fall, three cargo ships ran aground on the reefs off the Keys within a three-week period.

The straits are an important shipping route for crude petroleum entering Gulf ports and for refined products bound for East Coast ports, said Roland. Moving the shipping lanes would permit the Gulf Stream to help carry any spillage out of harm's way.

''I suppose you could say there's always a potential for disaster, but this proposal removes that potential further from the coast line of Florida,'' Roland said.

He said increased shipping costs from the agreement have not been calculated.

#90050u1377 02/19/1990 ~United Press International

KNOXVILLE, Tenn. (FEB. 19) UPI - Whittle Communications said Monday it signed a contract with the international television news agency Visnews to provide news coverage for Channel One, the new educational cable channel.

Whittle's news program aimed at teenagers is scheduled to begin airing in high schools and junior high schools with a 12-minute daily broadcast beginning March 5.

Terms call for Channel One to have access to NBC News domestic material, Visnews international coverage, Visnews archives and the Visnews camera crews for special assignments under the supervision of Channel One producers.

Visnews, which operates 22 bureaus around the world, is owned by Reuters, NBC News and the British Broadcasting Corp. It is the world's largest supplier of international news to the televison industry.

Whittle Communications is based in Knoxville, tenn.

#90050u1627 02/19/1990 ~United Press International

DUBLIN, OH (FEB. 19) UPI - Wendy's International Inc. reported Monday fourth-quarter earnings of $5.7 million, or 6 cents a share, down from $6.8 million, or 7 cents a share, in the last quarter of 1988.

Revenues for the quarter were $261.1 million, up from $258.7 million in the last quarter of the previous year.

The fourth-quarter lower results reflected higher operating cost for the

fast-food chain. There are 2,637 Wendy's Old Fashioned Hamburgers restaurants worldwide, including 1,118 directly operated by the company.

For 1989, Wendy's reported earnings of $30.4 million, or 32 cents, up 7 percent compared with $28.5 million, or 30 cents, in 1988. Revenues for the year were $1.07 billion, compared with $1.06 billion.

The company said average net sales per domestic company restaurant reached $808,000 compared with $793,000 the previous year.''

ORANGE, CA (FEB. 20) BUSINESS WIRE - Tomar Financial Corp. operator of two thrift and loan associations based in Orange, has been sold to Fremont General Corp., Los Angeles, it was announced by Amir Habib, vice president of Sutro & Co. which arranged the transaction.

Sutro, founded in 1858, is the oldest investment banking firm in the Western United States. Habib is based at Sutro's headquarters in San Francisco. Terms of the sale of Tomar to Fremont General were not disclosed. Tomar Financial is based in Fresno. The companies operated by Tomar are Investors Thrift and Loan and Liberty Thrift and Loan.

Habib said the assets of the two thrift and loans total more than $180 million, making Tomar one of the ten largest thrift operators in California. The two companies have a total of 14 offices throughout the state.

Habib further noted that the sale of Tomar is the latest in a series of Sutro-arranged transactions involving financial institutions. Last year the firm engineered the merger of two of the largest commercial banks in California's Central Valley.

CHICAGO (FEB. 20) BUSINESS WIRE - Ameritech Bell operating company residential customers who use MCI for long-distance telephone service soon will have their MCI charges included on a separate page of their local Bell telephone bills, rather than receive separate bills directly from MCI.

MCI charges will begin appearing in Ohio Bell bills this month, in Indiana Bell and Michigan Bell bills in March, in Wisconsin Bell bills in April, and in Illinois Bell bills in September.

The combined local/long-distance service bills are the result of multi-year, multi-million dollar agreements signed by MCI and the five Ameritech operating companies. Ameritech Services, the planning company for the five Ameritech operating companies, negotiated the contracts with MCI.

Under the new agreements, the Ameritech operating companies will bill and collect for MCI long-distance calls that residential customers make from their homes. Also included in the bill will be charges for long-distance calls made with MCI CardSM, operator assisted calls, MCI PrimeTimeSM, and MCI SuperSaverSM charges, if applicable.

Ameritech is the Chicago-based parent of Bell companies serving Illinois, Indiana, Michigan, Ohio and Wisconsin, and several other information industry companies providing cellular communications, directories, lease financing, voice messaging and audiotex services. Its 1989 revenues were $10.2 billion.

Headquartered in Chicago, MCI Midwest is an operating division of MCI Telecommunications Corporation serving Illinois, Indiana, Ohio, Michigan and Wisconsin. The company owns and operates the world's second-largest communications network, providing a full range of global telecommunications services to businesses, residences and government agencies.

#90051b0049 02/20/1990 ~Business Wire
SAN JOSE, CA. (FEB. 20) BUSINESS WIRE - C-Cube Microsystems Inc. Tuesday introduced the first single-chip image compression processor that enables desktop computers, communication equipment and consumer electronics products to exploit the potential of multimedia applications.

The C-Cube CL550 is also the first processor to implement the proposed JPEG (Joint Photographic Experts Group) standard for image compression, as defined by the CCITT/ISO international standard organization.

The CL550 processor compresses still images or motion video by a factor of 20 -- without visible degradation in quality -- although compression levels as high as 200-to-1 are possible. The CL550 can compress/decompress a standard-size color photograph is less than one second and motion video in real-time (30 frames per second).

Image compression technology eliminates barriers -- including memory, network bandwidth and cost -- that have prevented the widespread implementation of multimedia applications such as color desktop publishing digital photography and digital video editing.

''Digital image compression is an enabling technology for computer, communications and consumer electronics applications,'' said Edmund Sun, co-founder, president and chief executive officer of C-Cube. ''We believe the new JPEG international standard for image compression and the CL550 will open vast opporunities in the multimedia marketplace, just as Ethernet and Postscript fueled the growth of large markets.''

Two version of the processor will be available -- the 10-megahertz (MHz) CL550-10 for still image compression and the 27 MHz CL550-27 for motion video compression.

The processors are sold to original equipment manufacturers of desktop comuters and peripherals, professional video and pre-press equipment, and manufacturers of consumer electronics products.

Industry standards, whether defacto or defined by a standards committee, speed market acceptance of new technologies. For example, the Group III facsimile and Ethernet standards resulted in rapid growth in the fax and local area network markets. The proposed JPEG standard is expected to do the same for image compression products. The CL550 is the first image compression processor to implement the proposed JPEG sandard.

The proposed JPEG standard is the result of more than three years cooperation between the world's leading imaging experts, including IBM, DEC, NEC and C-Cube. JPEG is a committee formed by experts from both the International Telegraph and Telephone Consultative Committee (CCITT) and the International Standards Organization.

As a core member of the JPEG development group, C-Cube performed basic research in support of the image compression standard. The company also participated on the JPEG Editing Committee, which was formed to specify and draft the proposed standard.

The use of photographic-quality images and digital motion video in computer applications is restricted by storage, central memory and bandwidth bottlenecks. A single 8.5-inch-by-11-inch color photograph or one second of motion video comsumes 25 megabytes of data space -- or about half of a typical personal computer hard disk.

Personal computers and workstations designed with a CL550 processor on their motherboards can easily store, edit and transmit over a local area network photographic-quality images. Motion video can be edited and

played back directly from a computer hard disk.

''The integration of photographic-quality color images and motion video into computer applications is one of the most significant market opportunities of the 1990s,'' said Alain Rossmann, C-Cubes's vice president of marketing.

The CL550 eliminates the memory and network bandwidth requirements that have limited the use of color in desktop peripherals, such as printers and scanners. Color printers require a large and costly memory buffer -- typically more than 30 megabytes -- to store an image before printing. Similarly, the large files generated by scanned photographic-quality images are difficult to manipulate with the limited memory of desktop computers. By addressing these problems, the CL550 makes it possible to design cost-effective, high-performance desktop peripherals.

In the consumer electronics market, image compression is a prerequisite for digital cameras and digital VCRs. ''Digital image compression has the potential to revolutionize the consumer electronics market,'' said Rossmann. ''With the CL550, consumer electronics manufacturers can develop a new class of products with next-generation capabilities, such as digital video editing.''

The CL550 is a full-custom VLSI (very large scale integration) design that incorporates the functional capabilities of four computer boards on a single chip. C-Cube has filed broad patents covering the original algorithms and architectures that the company developed to implement international image compression standards.

The highly integrated CL550 implements the baseline JPEG compression algorithm, and also integrates interfaces and data tables so that OEMs can economically implement JPEG-compatible designs.

The CL550 provides an on-chip video interface, including direct interfacing to an image strip buffer, on-chip support for RGB (Red-Green-Blue), CMYK (Cyan-Magenta-Yellow-Black) or YUV input and output with direct handling of 4:1:1, 4:2:2 and 4:4:4 video formats.

It also supports existing analog to digital video decoder chip sets. Other CL550 on-chip features include Discrete Cosine Transform and coding/decoding data paths and registers, Huffman and visibility coefficient tables, and a flexible 16/32-bit host bus interface.

With a highly pipelined architecture that performs more than 10 billion operations a second, the CL550-27 can compress still images or motion video at rates as high as 40.5 megabytes per second. The CL550-27 can compress a 300 dpi (dots per inch) 8.5-by-11-inch color photograph in one second and 720-by-576 resolution CCIR 601 digital video in real-time.

Four CL550-27 processors used in parallel can compress HDTV (high definition television) motion video in real-time. Compression ratios can be varied from 8-to-1 to 200-to-1, allowing CL550 customers to adjust the compression ratio to the needs of the application.

The CL550 is fabricated in low-power, 1.2 micron CMOS technology. The CL550-27 comes in a 144-pin PGA (Pin Grid Array) package, while the CL550-10 comes in a 144-pin QFP (Quad Flat Pack) package. The CL550 consumes less than 1.5 watts at 27 MHz.

The CL550-27 is priced at $155 in OEM quantities of 10,000 units. The CL550-10 is priced at $95 at the same quantity level. An OEM developer kit that includes a pre-production engineering sample, low level software drivers and design notes is available now for $550.

CL550-27 samples will be available in June 1990. Production is scheduled for September 1990, with production scheduled for December 1990.

A software version of JPEG, called the Compression Workshop, is available now for $500. It includes C and Pascal libraries, interfaces for HyperCard and TIFF (Tag Image File Format), as well as various plug-in modules. Source code licenses are available to qualified OEMs. Object code licenses are available to software developers.

C-Cube Microsystems is the leading developer of digital image compression technology used in multimedia applications such as color desktop publishing, digital photography and digital video systems. Based in San Jose, C-Cube was founded in July 1988 to establish its digital imaging technology as the industry standard for computer, communication and consumer electronics applications.

MONTREAL (FEB. 20) BUSINESS WIRE - NTN Canada Inc. (NASDAQ:NTNC) is pleased to announce the launch of the first French broadcast of a regular weekly trivia program.

Broadcast over the NTN Entertainment Network, ''Super Quiz,'' is aimed at

the 6 million French speaking people in the Province of Quebec as well as the French speaking people in other regions of Canada, such as New Brunswick, Ontario and Manitoba.

Live broadcast of ''Super Quiz'' began on Feb. 7, 1990, and the program will be broadcast each Wednesday from 5:30 to 7:30 p.m.

Montreal-based NTN Canada Inc. sees the introduction of ''SuperQuiz'' as an important and major step in expanding the popularity of its entertainment programming throughout Canada.

NTN Canada Inc. is the exclusive licensee in Canada for the NTN Entertainment Network by NTN Communications Inc. The NTN Entertainment Network provides an innovative range of two-way interactive television communications services to the hospitality industry and corporations for entertainment, training and education.

The Network permits ''players'' or users of the system to compete with other ''players'' throughout North America in a live environment during the telecast of live sporting events, such as Major League Baseball games and Monday Night Football.

Live sports entertainment includes QB1 (professional football, Diamond Ball (major league baseball), and PowerPlay (National Hockey League). NTN also provides popular live interactive trivia programming, featuring a variety of themes, including general, theme and sports trivia.

The live two-way interactive benefits of the Network are not only attractive to the hospitality and home entertainment industries, but to large corporations, such as General Motors of Canada, which have begun using the service for sales and marketing employee development programs.

NTN Canada common stock is traded on NASDAQ under the symbol NTNC. In fiscal 1989 the company reported record revenues of Cn$2.16 million, with record net income of Cn$182,000. NTN Canada has 29.1 million primary shares outstanding.

#90051b0105 02/20/1990 ~Business Wire

IRVINE, CA. (FEB. 20) BUSINESS WIRE - Computer Automation Inc. (OTC:CAUT) Tuesday reported a net loss from continuing operations of $240,000, or 10 cents per share, for the three month period ended Dec. 31, 1989.

Revenues from continuing operations for the second quarter of fiscal 1990 were $1,308,000. The company also reported an additional loss on the disposal of discontinued operations of $321,000, or 13 cents per share, as a result of reducing the estimated realizable value of the assets of the discontinued operations to $1.5 million from $2 million due to current discussions to sell the assets at the lower price.

The net loss totaled $561,000 for the quarter, or 23 cents per share. Income from continuing operations in the prior year quarter was $307,000, or 13 cents per share, which included royalty income of $485,000. Income from discontinued operations in the prior year quarter of $291,000, or 12 cents per share, brought the net income for the prior year period to $598,000, or 25 cents per share, on revenues from continuing operations of $1,772,000.

For the six month period ended Dec. 31, 1989, the company reported a net loss from continuing operations of $789,000, or 33 cents per share, and the additional $321,000 loss on disposal, resulting in a net loss of $1,110,000, or 46 cents per share, on revenue of $2,450,000.

In the prior year six month period, the company reported income from continuing operations of $261,000, or 11 cents per share, and income from discontinued operations of $439,000, or 18 cents per share, resulting in net income of $700,000, or 29 cents per share, on revenue from continuing operations of $3,497,000.

George Pratt, the company's chairman and chief executive officer, said that on Jan. 5, 1990 the company completed its agreement with a group of private investors, and received a loan of $3,150,000. Part of the proceeds of the loan were used to pay off the prior lender and the balance will be used for working capital purposes.

He cautioned that while these funds would meet the company's immediate cash requirements, a return to profitable operations and the conclusion of the sale of the automatic test equipment operations would be necessary to avoid cash shortages during the remainder of fiscal 1990.

Computer Automation is a manfacturer of board level computer products for industrial OEM applications. Through its wholly owned subsidiary, Talon Technology Corp., the company also manufactures high speed data communications coprocessors, data transmission systems, ruggedized microcomputers, and facsimile subsystems for sale in the defense, petroleum and general communications industries.

The company's automatic test systems are used in the production testing of electronic subassemblies by equipment manufacturers in the defense, telecommunications and computer industries.

HOUSTON (FEB. 20) BUSINESS WIRE - Howell Corp. Tuesday announced that Steven K. Howell resigned his positions as a director, president and chief operating officer of the company last week.

Howell stated that he had decided to resign in order to allow himself more time to pursue his political, charitable and other business interests. The company is grateful for Howell's many years of loyal service and we wish him the best of luck in his future endeavors.

The board of directors of Howell Corporation elected Paul W. Funkhouser to succeed Steven K. Howell as president and chief operating officer of the company. Until his election to succeed Howell, Funkhouser served the company as executive vice president and corporate secretary. His duties as corporate secretary will be assumed by Allyn R. Skelton II, the company's vice president and chief financial officer.

Funkhouser joined the company in 1983 as vice president and general counsel. From 1984 to 1988, he was president of Howell Petroleum Corp., the company's oil and gas exploration and production unit, and a vice president of the company. In August of 1988, Funkhouser was promoted to executive vice president of the company and assumed his role as corporate secretary shortly thereafter.

Funkhouser holds undergraduate and legal degrees from the University of Texas at Austin and an MBA from the University of Chicago. His wife, Jane and two children are long-time Houstonians. Howell Corp. (NYSE:HWL) is an energy industry holding company.

Through wholly-owned operating units, it is engaged in oil and gas exploration and production, crude oil marketing, technical fuels manufacturing and marketing, custom chemical processing, product terminalling and common carrier bulk liquids transportation of hydrocarbons and chemicals.

VANCOUVER, WA. (FEB. 20) BUSINESS WIRE - Pacific Telecom Inc.

(NASDAQ:PTCM) announced Tuesday that it completed the sale of Petroleum Communications Inc. (Petrocom), a company providing satellite-based cellular service in the Gulf of Mexico, on Feb. 15, 1990.

The company received $34 million in cash and will recognize a $13.8 million after-tax gain from the sale in its 1990 first quarter results.

The sale of Petrocom is a result of the company's commitment to dispose of non-core businesses, allowing management to focus its efforts on strengthening and expanding the operations of Pacific Telecom's principal communications subsidiaries.

WALNUT CREEK, CA (FEB. 20) BUSINESS WIRE - Longs Drug Stores Tuesday announced a 12 percent increase in net income and a 10 percent increase in sales for the quarter ended Jan. 25, 1990.

A 24-cent quarterly dividend was also announced by the company as well as the appointment of a board member.

Unaudited net income for the fourth quarter was $18,905,000, or 94 cents per share, as compared with $16,948,000, or 84 cents per share, reported for the comparable period last year. Net income for the fiscal year ended Jan. 25, 1990, increased 10 percent to $61,294,000, or $3.01 per share, as compared with $55,858,000, or $2.75 per share, reported for the like period last year.

Unaudited sales for the quarter were $604,542,000, as compared to $549,510,000 reported last year. Sales for the year increased 10 percent to $2,110,574,000 from $1,925,451,000 reported last year.

The board of directors declared a quarterly dividend of 24 cents per share of common stock to holders of record at the close of business March 6, 1990, payable April 10, 1990.

David G. Deschane was appointed to the board of directors to replace Dean E. McHenry who retired from the board on this date. Deschane was a vice president and district manager who served the company from 1951 through 1988.

Longs operates 248 stores in California, Hawaii, Alaska, Arizona, Nevada

and Colorado. Four new stores were opened during the quarter bringing the total of new stores opened during the fiscal year to 12.

#90051b0176 02/20/1990 ~Business Wire

TORONTO, Ontario (FEB. 20) BUSINESS WIRE - Corona Corp. reported Tuesday earnings before unusual and extraordinary items of $49.1 million, or 32 cents per share, for the year ended Dec. 31, 1989.

This compares with restated earnings, before unusual and extraordinary items, of $36.6 million, or 26 cents per share, for the year ended Dec. 31 1988.

The increase in earnings is largely due to a 34 per cent increase in gold production to 680,986 ounces in 1989 from 507,942 ounces in 1988. Corona reduced its cost of gold production in 1989 to an average of US $209 per ounce, in spite of a stronger Canadian dollar. During 1989, production was higher from the David Bell and William Mines. Also, the Santa Fe and Jolu Mines were in commercial production for the full year and the Marigold Mine started producing gold during the year.

The company's direct and indirect 49 percent interest in Poco Petroleums is accounted for in the above figures on an equity basis only. Poco recently reported its 1989 gross revenues to be $103.7 million which resulted in funds from operations of $53.6 million and net earnings of $8.2 million.

Notwithstanding the Nickel Plate Mine's positive contribution to 1989 cash flow and management's estimates that 1990 Nickel Plate production will be 81,000 ounces of gold, the directors of the company have prudently chosen to write-down the carrying value of this mine by $53.2 million to nil to reflect the marginal nature of the mine's ore grades at current gold prices. When this unusual non cash item is included in earnings calculations, the company reports earnings of $12.7 million, or $0.06 per share in 1989. The operating cash flow remains unchanged at $133.4 million.

In 1988, Corona wrote down the carrying value of the Nickel Plate Mine by $108 million to $51 million which resulted in a loss of $70.4 million or $0.58 per share after unusual and extraordinary items for that period. Operating costs have been reduced dramatically and during the last quarter of 1989 the mine recorded an operating profit of $1.4 million. The company intends to continue its efforts to reduce costs and maintain productivity at the mine.

The company has recently completed the issue of 9 million units consisting of one Class ''A'' share and one-half of a Class ''A'' share purchases warrant at a price of $10.75 per unit. The net proceeds of approximately $92.8 million were used to reduce debt which currently stands at $305 million. After this financing the number of Class ''A'' and Class ''B'' shares outstanding amount to 150.3 million.

Corona, which is the sixth largest gold producer in North America, has interests in 11 precious metals operations. In 1990 the company is scheduled to produce about 690,000 ounces of gold and gold equivalent at a cost of less than US $210 per ounce.

#90051b0184 02/20/1990 ~Business Wire

KANSAS CITY, MO (FEB. 20) BUSINESS WIRE - UtiliCorp United (NYSE:UCU) Tuesday reported audited financial results for 1989 that showed the company achieved records in consolidated net income, operating income, revenues and primary earnings per common share.

In 1989, net income increased 18 percent to $48.3 million, compared to $40.9 million in 1988. Operating income was $86.9 million, up 13 percent from 1988 operating income of $77.2 million.

Operating revenues were $732 million, up 9 percent from $673 million in the prior year. Primary earnings per common share were $2.04, versus $1.98 in 1988.

For the fourth quarter ended Dec. 31, 1989, UtiliCorp had net income of $13.9 million and revenues of $237 million, compared to net income of $10.7 million and revenues of $187 million in the 1988 quarter. Primary earnings per share were $.56 versus $.49 in the prior year period.

Average common shares outstanding increased from 19.4 million in 1988 to 20.9 million in 1989. Dividends on convertible preference stock issued in May 1989 also reduced earnings per common share for the year.

UtiliCorp chairman and president Richard C. Green Jr. said that 1989 financial results were attributable to strong gas sales and transportation to industrial customers, increased contributions from non-regulated subsidiaries, rate relief at two divisions and cost effective management of utility operations. The results were achieved despite relatively mild winter and summer weather in the company's various service territories.

Two of UtiliCorp's non-regulated businesses, PSI and UtilCo Group,

together contributed approximately 14 percent of 1989 consolidated net income. PSI, a marketer and transporter of natural gas with ownership positions in various gas reserves, had 1989 net income of $5.3 million. UtilCo Group, an owner, developer and operator of independent power projects, had 1989 net income of $1.3 million. Both subsidiaries are engaged in businesses fostered by utility deregulation.

UtiliCorp, based in Kansas City, provides gas and electric service in eight states through its divisions, Missouri Public Service, Peoples Natural Gas, Michigan Gasd Utilities, Northern Minnesota Utilities, West Virginia Power and Kansas Public Service. West Kootenay Power in British Columbia is a Canadian utility subsidiary.

PHOENIX (FEB. 20) BUSINESS WIRE - DATAPHAZ Inc. (NASDAQ:DPHZ) Tuesday announced that Edward E. Faber, 56, has been named chairman and chief executive officer of the company.

Thomas C. Niccoli, founder of DATAPHAZ and its chairman and president since it went public in 1987, initiated the move with unanimous approval from the DATAPHAZ board of directors, to gain the benefit of Faber's considerable management expertise and industry-wide knowledge.

Faber served as ComputerLand Corp.'s president from 1976 to 1983, its vice chairman from 1983 to 1985, and its chairman and chief executive officer from 1985 until the sale of the company in September 1987. One of the most respected executives in the computer field, Faber will direct his immediate attention to the year end results of DATAPHAZ with an eye toward the company's budget and strategic planning for the new fiscal year which commenced on Feb. 1, 1990.

Niccoli, the single largest shareholder of DATAPHAZ stock, remains the company's president and chief operating officer, reporting directly to Faber and will continue to serve on its board of directors.

DATAPHAZ Inc. continues to be ComputerLand Corp.'s largest domestic franchise with sales outlets in Phoenix, Tucson, Las Vegas and Denver. The company's corporate offices are located at 15002 N. 25th Dr., Phoenix, Ariz. 85023.

#90051b0201 02/20/1990 ~Business Wire

VAN NUYS, CA (FEB. 20) BUSINESS WIRE - Opening statements will be heard on Wednesday, Feb. 21, at 10 a.m. in Los Angeles Superior Court, Van Nuys, in a $109 million lawsuit filed by American Aviation Industries (AAI) against General Electric Co. and its subsidiary, General Electric Capital Corp. (American Aviation Industries v. General Electric Co., NWC 039965, Los Angeles Superior Court, Northwest District, Van Nuys, Department X).

In 1984, owners of AAI approached General Electric (GE) with a plan to retrofit the Lockheed JetStar corporate aircraft with more powerful GE-made CF34 Turbo Fan engines. These engines would allow the converted aircraft, called a ''FanStar,'' to fly with greater fuel efficiency at reduced noise levels and give it the capacity to make trans-oceanic flights.

The companies entered into a joint venture partnership -- with GE providing and installing the engines in the aircraft and AAI being responsible for the administration of the design and construction of the plane in an effort to receive FAA certification to fly. The companies would jointly market the aircraft to interested buyers. General Electric Capital Corp. (GECC) was to fund the project.

On Sept. 5, 1986, a FanStar prototype had its first of several successful flights.

When AAI needed a $2.5 million loan from GECC to pay its creditors, GECC required that AAI owners put up 100 percent of their AAI stock as collateral. ''AAI held up its end of the agreement,'' said A. Barry Cappello, the other plaintiffs' trial counsel, ''but GECC took the stock as collateral and then refused to fund the loan without management concessions from AAI.''

In response, AAI secured outside investors to provide financing so the project could continue. However, GECC management, according to the plaintiffs, dissuaded the investors by saying GECC was financing the joint venture. ''Had GECC not interfered with these outside funding sources, AAI could have gone ahead with the FanStar project,'' said Cappello.

Without funding, AAI fell behind with its creditors, including GECC, and GECC soon stepped in and began to liquidate AAI. GECC said it was terminating the relationship, in part, because it received a GE-commissioned market survey indicating only 20 FanStars could be sold. GECC said the market was too small to continue investing in the project.

Bezek and Cappello contend GECC was aware of other studies that forecasted sales of a minimum of 40 and as many as 90 FanStars. Also, within 45 days after the survey was completed, those individuals who conducted the study

joined a company called First American Aviation and that company approached GE, enthusiastically predicting it could sell as many as 104 of these same jets.

The plaintiffs are asking for $79 million in damages from the FanStar project (projected profits) and another $30 million for a similar retrofitting program slated for Gulfstream aircrafts. The trial is expected to last 2-1/2 months.

#90051b0206 02/20/1990 ~Business Wire

TORONTO (FEB. 20) BUSINESS WIRE - Four Seasons Hotels Inc. (TSE-MSE:FSH) announced Tuesday that net earnings for the year ended Dec. 31, 1989, were $15.0 million, a 15 percent increase over the $13.1 million earned before extraordinary items in 1988.

Net earnings for the three months ended Dec. 31, 1989, were $5.8 million, an 18.3 percent increase over the $4.9 million earned for the same period of the previous year. Earnings per share, after reflecting the two-for-one stock split in January 1990, were $ .76 for the year ($ .29 for the fourth quarter of 1989), as compared to $ .67 for the previous year ($ .25 for the fourth quarter of 1988). Fully diluted earnings per share for the year ended Dec. 31, 1989, were $ .74.

Revenues under management for the year ended Dec. 31, 1989, were up 5.1 percent to $634.3 million, compared to $603.4 million in 1988. The 3.8 percent decline in the U.S. dollar in 1989 had a $17.6 million negative impact on revenues under management. For the quarter ended Dec. 31, 1989, revenues under management were up 7.9 percent to $172 million, as compared to $159.4 million for the last quarter of 1988.

Management fee revenues were unchanged year-to-year, despite the weakness of the US dollar. Although there was a reduction in the fee structure at the Four Seasons Inn on the Park, London which occurred when a one-half interest in the hotel was sold in December 1988, this reduction was offset by management fees earned at the Four Seasons Chicago which opened March 10, 1989.

Earnings from management operations before interest and taxes were down $2.6 million or 18.2 percent, as compared to 1988, to $11.5 million. This was due primarily to the growth of Four Seasons Hotel's international management and sales organization which will enable Four Seasons to

prepare for its expanded North American and international hotel and resort operations. The current investment in the cost structure will be more than off-set by future years' earnings from management operations.

Earnings from ownership operations before interest and taxes were $12.7 million, as compared to $14 million in the previous year. This decrease was due primarily to the disposal of a 50 percent interest in the Four Seasons Inn on the Park, London in late 1988 which resulted in a reduction of $4 million in 1989 ownership earnings. However, the same transaction contributed to the $2.8 million decrease in net interest expense as the proceeds from the sale were used to pay down debt.

The combined effect of the foregoing, together with a reduction in the company's effective tax rate, resulted in 1989 net earnings in line with long-term growth expectations.

Funds generated from operations increased 5 percent to $26.7 million in 1989. The net interest coverage in 1989 was 5.3 times. The company's 1989 debt-to-equity ratio, net of cash, was .7:1.

Four Seasons Hotels is the world's largest operator of hotels and resorts exclusively in the luxury class, and currently owns and/or operates 22 properties in Canada, the U.S. and England.

#90051b0604 02/20/1990 ~Business Wire

REDMOND, WA (FEB. 20) BUSINESS WIRE - Responding to the requests of large corporate customers seeking an easier and more efficient means of distributing software throughout their organizations, Microsoft Corp. Tuesday announced Microsoft License Paks.

Available for each of the major Microsoft applications products, Microsoft License Paks will be a new Microsoft packaged product and will be distributed through Microsoft dealers, as are other software packages. License Paks are expected to be available at Microsoft dealers by March 15 1990. This will be a worldwide program; a phased implementation will begin in other English-speaking markets, followed by the European markets served by Microsoft subsidiaries.

The Microsoft License Pak consists of a sign-to-activate License agreement card with a return envelope, a license card that must be kept by the user and a documentation order form. (No disks or documentation are included in the package.) The License Agreement allows a user to make or distribute one copy of a Microsoft product for each License Pak purchased.

The Microsoft License Pak allows a corporate customer to distribute software throughout the corporation in a manner suited to its needs. Distribution methods include installing the software on a network server, pre-configuring hard disks, downloading from mainframes or distributing on a custom-pressed CD-ROM disc.

Many large corporations maintain extensive training and support networks, minimizing the need for documentation that accompanies full, retail packages of applications software. With the Microsoft License Pak, customers will no longer have stockpiles of manuals and packaging to manage, since the package includes only a License Agreement. And, since the License Pak is available through resellers, corporate customers continue to work with their established reseller.

Corporate customers must license at least one full packaged product for each software program. Customers may then acquire any combination of License Paks and full packaged products that suits their business needs. In addition, customers can order one set of documentation from Microsoft for each License Pak.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

MILPITAS, CA (FEB. 20) BUSINESS WIRE - Logic Modeling Systems Inc. Tuesday announced simulation model support for the Texas Instruments TMS320C30 digital signal processing chip.

Hardware models of these devices are currently available for use with Logic Modeling's LM-1000, the first simulator-independent hardware modeling system.

The TMS320C30 is the most recent addition to the family of Texas Instruments DSP hardware models available from Logic Modeling. Other available DSP models include the TMS32010, TMS32020, and TMS320C25. Over 600 full-function models of standard VLSI devices are available from Logic Modeling.

''Due to the complexity of designs, simulation models of DSP chips have become necessary development tools for high performance communications, aerospace, and military electronics,'' said Holly Stump, director of marketing at Logic Modeling Systems Inc.

''An advantage of LM-1000 DSP models is universality, the fact that models can be shared by members of a design team using a variety of simulators on multiple hosts.''

''The TMS320C30 is the industry-standard, highest-performing floating point DSP available today. We expect that the Logic Modeling TMS320C30 hardware model will greatly benefit designers by allowing them to fully simulate their products and avoid design iterations,'' stated Mitch Reifel TMS320C30 marketing manager at Texas Instruments.

Hardware modeling solves the simulation model availability problem for system and ASIC designers by allowing the physical VLSI device to be used as a model for design verification.

The LM-1000 provides designers with easy access to over 600 full-function hardware models of important VLSI devices on the market today, and ASIC models can be developed in less than one day. The LM-1000 hardware modeling system is platform and simulator-independent.

Logic Modeling sells through OEM relationships with EDA vendors including Cadence Advanced CAE Division, GenRad, Valid Logic Systems, Vantage Analysis Systems and Viewlogic Systems, and to companies with proprietary simulators.

Logic Modeling Systems Inc. is a privately-held company, with corporate headquarters located at 1520 McCandless Drive, Milpitas, Calif., 95035, telephone 408/957-5200.

PHOENIX (FEB. 20) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL/PSE:AWA), recently designated by the Department of Transportation as a major carrier, will re-establish service at San Francisco International Airport beginning May 1, 1990.

New San Francisco service will be to and from the airline's hub cities at Phoenix and Las Vegas where connections can be made to over 60 cities served by America West.

Peter Otradovec, vice president of planning for the airline said, ''We are pleased to re-enter San Francisco International Airport and increase our Bay area penetration with these new flights.'' America West currently has nine daily flights at Oakland.

Otradovec continued, ''America West first provided air service at San Francisco in 1984. Later that year, we moved our operation to Oakland due to various circumstances in the airline industry. At that time we had every intention on returning to San Francisco and we are finally able to do so.''

Otradovec noted that America West has built a nationwide route network which offers convenient service for San Francisco to major destinations on the East Coast, Midwest and Southwest. The airline seeks entry to the Pacific Rim in the near future.

''We will soon finalize our flight schedule and price structure for San Francisco. Passengers will be able to make reservations beginning April 2 '' he added.

America West, which began operations on Aug. 1, 1983, holds the national championship for on-time performance in 1988 and 1989. The carrier's routes extend from coast to coast with daily service to Hawaii and western Canada utilizing a fleet of 88 Boeing aircraft including 747s, 757s, 737s and Dash 8s.

In addition to the San Francisco service, the carrier will also begin new operations at Boston on March 15, 1990 and Bakersfield on April 1.

SAN JOSE, CA (FEB. 20) BUSINESS WIRE - Businessland Inc. Tuesday announced that Businessland (UK) Ltd. will sell, service and support the NeXT workstation in the United Kingdom.

The company is authorized by NeXT Inc. to address all sectors of the U.K. market, including education, developers and government. Derek Bytheway, managing director of Businessland (UK) Ltd. said, ''The NeXT workstation is one of the most significant computer products of the new decade. With our highly trained support staff and the experience of our U.S. colleagues to back us, we are in a unique position to make it a great success in the U.K.''

Businessland (UK) Ltd. systems consultants, technicians, trainers and

sales executives have undergone extensive training on the system. In addition, a group of senior staff have attended in-depth courses at NeXT headquarters in Palo Alto, Calif. These preparations will enable Businessland to fully support the NeXT product in the United Kingdom.

Customer training courses on the NeXT system, WriteNow word processing and FrameMaker desktop publishing, have been developed for the U.K. market and advanced courses are currently in development.

Product is available immediately from stock held by Businessland at its Langley, Berks. headquarters. The starting price for a system that comprises the NeXT cube, 8 megabyte RAM, MegaPixel display, NeXT keyboard, mouse, 256 optical drive, 40 megabyte accelerator drive and NeXT bundled software is 6,495.00 pounds.

Businessland (UK) Ltd. was formed in November 1987 with the acquisition of Granada Microcomputer Services Ltd. by Businessland Inc. of San Jose, Calif. It operates seven branch offices and employs nearly three hundred professional staff in the United Kingdom.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, two in West Germany and two in Canada. It reported sales of $1.2 billion in fiscal 1989.

#90051b0618 02/20/1990 ~Business Wire

MILPITAS, CA (FEB. 20) BUSINESS WIRE - Logic Modeling Systems Inc., developer of the first industry-standard hardware modeling system, Tuesday announced support for design and simulation of computer systems utilizing Intel's Extended Industry Standard Architecture chips.

Logic Modeling now offers full-function hardware models of the 82357 Integrated System Peripheral and the 82358 EISA Bus Controller for use with the LM-1000 hardware modeling system. Logic Modeling also offers

full-function hardware models of processors commonly used in personal computers incorporating the EISA standard, such as the Intel 80386 and 80486.

''Intel's EISA chip set is a significant technological advance in backplane communications for personal computers,'' said Holly Stump, director of marketing at Logic Modeling. ''With simulation and hardware modeling technology, system designers will be able to bring high-quality EISA systems to market very quickly.''

''As board and system manufacturers develop EISA products, the ability to use hardware modeling should significantly speed the design process,'' said Randy Wilhelm, marketing manager for Intel's 32-bit chip sets. ''This allows high-performance, EISA-compatible systems to come to market quickly.''

Hardware modeling solves the simulation model availability problem for system and ASIC designers by allowing the physical VLSI device to be used to model its own behavior during design verification.

Hardware models are full-function, full-fidelity and execute at hardware speed. The LM-1000 provides designers with easy access to over 600 hardware models of important VLSI devices on the market today, and ASIC models can be developed in less than one day. The LM-1000 hardware modeling system is platform- and simulator-independent.

Logic Modeling sells through OEM relationships with EDA vendors including Cadence Advanced CAE Division, GenRad, Valid Logic Systems, Vantage Analysis Systems, Viewlogic Systems, and to companies with proprietary simulators.

Logic Modeling Systems Inc. is a privately-held company, with corporate headquarters located at 1520 McCandless Drive, Milpitas, Calif., 95035, telephone 408/957-5200.

#90051b0619 02/20/1990 ~Business Wire

SEATTLE (FEB. 20) BUSINESS WIRE - Metropolitan Federal Savings and Loan Association of Seattle (NASDAQ:MSEA), an FDIC-insured financial institution with $566 million in assets, Tuesday announced that W. Gordon Dowling of Tacoma has been elected to its board of directors.

''Mr. Dowling brings to Metropolitan many years of banking and business experience gained, in part, through his previous service on the boards of three financial institutions in Tacoma,'' said Judson S. Shorett, president and chief executive officer. ''We are pleased that one of our new investors has accepted the association's invitation to serve on the board.''

Dowling served as president and general manager of West Coast Fruit and Produce for 25 years before retiring in 1989. He has been active in the Puget Sound banking community for many years having served on the board of directors of State Mutual Bank, prior to its acquisition by United Bank, A Savings Bank, in 1985. He then served on the board of United Bank until it was acquired by Rainier Bank, now Security Pacific Bank of Washington, in 1987. Currently, Dowling is a member of the board of directors of the Bank of Tacoma. Dowling has informed Metropolitan that he will resign as a director of the Bank of Tacoma in order to join Metropolitan's board.

Dowling will fill the seat of J. P. Firnstahl who has served on Metropolitan's board since 1967, following in the footsteps of his father, G. W. Firnstahl, who was one of the founders of Metropolitan in 1935. Prior to his retirement, Firnstahl served as the chairman of the board of Pacific Food Products and as president of Sunny Jim Co. He also served on the board of directors of Grove Land Co.

''The board of directors, officers and employees are deeply appreciative of the many contributions J. P. has made to the association,'' Shorett said.

Metropolitan announced on Feb. 5 that its total capital under Generally Accepted Accounting Principles was $28.4 million or 5.01 percent of total assets on Jan. 31, 1990. The association's capital now exceeds all present regulatory requirements including the risk-based capital requirements established by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

The association completed the sale of 1,875,000 shares of common stock at $8.00 per share on Jan. 9, 1990, in connection with Metropolitan's conversion from mutual to stock form. Net proceeds from the stock sale were approximately $13.4 million.

Metropolitan is an FDIC-insured, federally-chartered savings and loan association organized in 1935, with seven branch offices located in the greater Seattle area.

#90051b0620 02/20/1990 ~Business Wire

SUNNYVALE, CA (FEB. 20) BUSINESS WIRE - Advanced Micro Devices Tuesday announced an agreement with Sony USA that will provide for the transfer to AMD of state-of-the-art manufacturing technology for integrated circuits.

Under the terms of the agreement, Sony will establish an advanced submicron integrated circuit manufacturing operation in a currently idle portion of an AMD semiconductor manufacturing site in San Antonio, Texas. To accomplish the technology transfer, AMD will assign engineers to the operation who will gain access to Sony's manufacturing processes during a period of collaboration to last through 1994. AMD will also receive $55 million in cash in the sale of the facility to Sony.

AMD will gain manufacturing know-how related to high-volume manufacture of advanced CMOS (complementary metal oxide semiconductor) VLSI (very large-scale integration) products. Sony, making use of the existing facility and a skilled workforce already in place, can quickly establish itself as a domestic producer of semiconductors.

These technologies, in which U.S. integrated circuit manufacturers are generally acknowledged to lag behind their Japanese competitors, are most important for consistent, high-yield mass production and cost reduction in the manufacture of microchips.

The AMD San Antonio site consists of 50 acres with two buildings, one of which is presently unoccupied. AMD has approximately 650 employees in San Antonio. The San Antonio facility will be managed by Sony USA through a newly established subsidiary, Sony Microelectronics Corporation, which plans to offer continued employment opportunities for all AMD San Antonio employees.

The transaction includes an agreement under which Sony will provide a captive manufacturing line on which AMD can produce integrated circuits under its own management, using AMD processes and equipment, through the end of 1994.

AMD and Sony have also signed a letter of intent to further their collaboration in developing CMOS process technology aimed at the 0.5-micron level.

The agreement extends a close working relationship between the two companies that began more than five years ago and has resulted in a number of advances in both bipolar and CMOS process technologies.

Advanced Micro Devices, one of the five largest U.S. manufacturers of integrated circuits, produces microprocessors and related peripherals,

memories, programmable logic devices and circuits for telecommunications, office automation and networking applications. AMD has sales offices worldwide, and has manufacturing facilities in Sunnyvale and Santa Clara, California; Austin and San Antonio, Texas; Penang, Malaysia; Singapore; and Bangkok, Thailand. In its fiscal year ended December 31, 1989, AMD reported sales of more than $1.1 billion.

For 35 years Sony has developed advanced semiconductor technologies in support of its broad range of successful consumer and professional electronics products and began sales to outside customers in 1984. The total value of Sony's semiconductor production is expected to exceed $1 billion in the fiscal year ending March 31, 1990.

In 1989 Sony became one of the first companies to begin mass production of 1-megabit static random- access memories (SRAMs) using 0.8-micron technology. Sony has also announced the world's first prototype 4-megabit SRAM based on 0.5- micron technology.

#90051b0621 02/20/1990 ~Business Wire

LOS GATOS, CA (FEB. 20) BUSINESS WIRE - Motorola Inc. and Toshiba Corp. have entered agreements with Echelon to launch a new communications and control network technology that will usher in a new era in distributed intelligence.

This new era will be characterized by products that communicate and coordinate their activities for increased efficiency and automation.

Under the terms of the agreements, both Motorola's Semiconductor Products Sector and Toshiba's Semiconductor Group will manufacture and sell integrated circuits (ICs) designed by Echelon.

The ICs implement the LON System, a new technology platform developed by Echelon which created low-cost networks for sense, control, communications and identification applications. The agreements also entitle each company to design, manufacture and sell enhanced versions of the ICs.

The trademarked term ''LON'' was developed by Echelon to distinguish its network from Local Area Networks (LANs). Each local operating network is a collection of intelligent, programmable nodes. Included in each node in the network are ICs capable of sensing, controlling and reporting status

to any node as well as responding to messages received from other nodes.

LON Systems can range from simple networks controlling the on and off status of building lights to more complex ones tying together process control and inventory tracking systems in the factory.

A number of industry groups have been developing or are beginning to work on standards for their specific industry applications. Echelon has developed a universal, low-cost communications and control technology for use by multiple industries. The power and flexibility of this technology make the LON System the control method of choice in buildings, homes, factories, vehicles and many other applications.

Adoption of the LON System in these applications will create a high level of interoperability between products produced by different companies.

Toshiba America Electronic Components Inc. is the american manufacturing, sales and marketing arm of one of the world's largest suppliers of semiconductors and integrated circuits. Toshiba is the recognized leader in CMOS technology and has one of the broadest IC product lines in the industry.

LOS ANGELES (FEB. 20) BUSINESS WIRE - American Health Properties Inc. (NYSE:AHE) announced Tuesday that it has agreed to construct and own a $10.4 million 60-bed freestanding rehabilitation hospital on the campus of West Virginia University Hospital in Morgantown, West Virginia.

The hospital will be developed and operated by Rehab Systems Co. and leased to a joint venture comprising West Virginia University Hospital Monongalia General Hospital and Rehab Systems Co. The hospital is expected to open in the Spring of 1991.

This transaction calls for AHE to provide construction financing for the hospital with the lease term commencing upon the opening of the hospital. Rents on this hospital, like other properties owned by AHE, include base rental plus percentage rental based upon revenue growth.

American Health Properties is a real estate investment trust (REIT)

specializing in quality health-care facilities. The company's investments include thirteen acute care, rehabilitation and psychiatric hospital properties located in ten states.

WORCESTER, MA (FEB. 20) BUSINESS WIRE - Cambridge BioScience Corp. (NASDAQ:CBCX) Tuesday announced the granting of two sublicenses for the protein gp120, both for diagnostic use.

Cambridge BioScience is the exclusive licensee of the Harvard University patent covering gp120, a key envelope protein of the AIDS virus.

The two sublicensees, Behring and Pharmacia ENI Diagnostics Inc., will join four other companies which hold gp120 sublicenses from Cambridge, in the field of diagnostic use: Abbott Laboratories, Becton Dickinson, Smithkline Beckman and Baxter Healthcare Corp.

In making the announcement, Cambridge BioScience vice president of legal and regulatory affairs, Frederick V. Casselman, said: ''We welcome the newest members of the gp120 sublicensing program.

''Each opportunity for commercial development of gp120 reinforces the strength of our company's patent and licensing portfolio, and we expect royalties to be a significant revenue source for Cambridge BioScience over time, as a significant number of recombinant products are introduced.''

Cambridge BioScience Corp. is a biotechnology company utilizing the latest advances in genetic engineering and monoclonal antibody technology to develop products for the detection and prevention of human and animal infectious diseases.

SAN DIEGO, CA (FEB. 20) BUSINESS WIRE - TeleSoft, one of the world's leading suppliers of Software Engineering Productivity products and services, Tuesday announced that its second-generation TeleGen2 Ada

development technology has been selected for use in IBM's new RISC System/6000 workstation and servers series.

IBM has licensed TeleGen2 Ada development tools, including components of the compiler, a Source Level Debugger, Global Optimizer and Language Tools from TeleSoft.

The TeleGen2 technology is the foundation for the workstation's Ada development system, the IBM AIX Ada/6000. IBM will sell and support the product direct to users of the RISC System/6000 workstation.

The IBM AIX Ada/6000 for the RISC System/6000 is fully compatible with the Ada Development System for the IBM 370. It is designed to produce very high quality code and high-performance applications.

Written entirely in Ada, TeleGen2 is the only Ada technology now available on Cray supercomputers, IBM mainframes and workstations, DEC VAX systems, UNIX-based workstations, DOS-based workstations and personal computers, and Apple's Macintosh computer.

TeleGen2 has been chosen by such customers as Magnavox, McDonnell Douglas and General Dynamics for use on major programs, and used successfully by U.S. military contractors to develop large applications encompassing more than 1 million lines of code.

TeleSoft, a wholly owned subsidiary of TeleSoft AB, is the leading supplier of second-generation Ada software products and services and is one of the world's largest software companies dedicated to providing the tools required to develop large, complex software applications.

#90051b0639 02/20/1990 ~Business Wire

SANTA CLARA, CA (FEB. 20) BUSINESS WIRE - Inmac Corp. (NASDAQ:INMC), the world's leading direct response marketer of computer aftermarket data communications and computer accessory products, Tuesday announced sales of $71,025,000 for the second quarter ended Jan. 27, 1990, and net income of $750,000, or 8 cents per share.

This compares with sales of $62,737,000 and net income of $640,000 (7 cents per share) for last year's second quarter.

Inmac's president, Kenneth A. Eldred, said, ''This was our best quarterly pre-tax income since October of 1988, and we are just beginning to see the fruits of our investments in better customer service.

''All of our employees worldwide are recommitting themselves to showing major improvements in service this year. During this period, our earnings have improved in spite of our continued worldwide expansion. We have no doubts that our expansion will make us stronger in the future and provide us with a truly global perspective consistent with current world events.''

For the 26 weeks ended Jan. 27, 1990, Inmac posted consolidated sales of $135,421,000 which resulted in net income of $1,192,000 (13 cents per share). This compares with net sales of $119,291,000 and net income of $2,516,000 (27 cents per share) for the first six months' results reported last year.

Inmac Corp. markets its products directly to microcomputer and minicomputer users through its full-color catalogs. The company offers over 3,500 items, virtually all of which carry the Inmac brand name and are manufactured by the company or manufactured by others to Inmac's specifications.

#90051b0641 02/20/1990 ~Business Wire

HIGH POINT, NC (FEB. 20) BUSINESS WIRE - Culp Inc. (NASDAQ/NMS: CULP) Tuesday reported a gain in third quarter earnings and noted that its nine-month results reflected a sound turnaround in profits.

For the three months ended Jan. 27, 1990, Culp Inc. reported net income of $259,000, or six cents per share, compared with $45,000, or one cent per share, a year ago. Net sales for the quarter totaled $39,665,000 versus $41,950,000 in the year-earlier period.

The third quarter results brought earnings through the first nine months to $1,382,000, or 31 cents per share, compared with a net loss of $1,227,000, or 28 cents per share, in the year-earlier period. Net sales for the year-to-date were $122,739,000 versus $128,822,000 in the like period a year ago.

Robert G. Culp III, chief executive officer, said: "we are pleased with Culp's profit recovery and cash flow from operations thus far in fiscal 1990. We believe this performance is especially noteworthy because of the

prevailing softness within the home furnishings industry as a whole.

"As previously noted, we are experiencing lower sales this year due primarily to the phase-out from a year ago of certain fabric categories. We are confident that Culp's competitive position has been enhanced during fiscal 1990 in those fabric categories where we have concentrated our resources.

"The persistent weakness in retail demand for home furnishings, however, continues to be an adverse factor affecting furniture and bedding manufacturers. This, in turn, has limited the company's pricing flexibility and influenced our volume of shipments.

"We remain focused on containing operating costs and continuing to strengthen Culp's balance sheet. Long-term debt and interest expense are each down significantly from a year ago. We are committed to making the ongoing investments necessary to raise productivity and build Culp's market share through both our capital expenditure program and product development efforts."

Culp Inc. is a leading manufacturer and marketer of fabrics for the furniture, bedding, recreational vehicle, and institutional furnishings markets.

#90051b0643 02/20/1990 ~Business Wire

LOS ANGELES (FEB. 20) BUSINESS WIRE - ERLY Industries Inc. (NASDAQ:ERLY) Tuesday announced third-quarter results for the three and nine months ended Dec. 31, 1989.

ERLY, a food processing concern with headquarters in Los Angeles, reported net income of $2,171,000 and operating profit of $5,891,000 on sales of $99,911,000 for the three months ended Dec. 31, 1989. For the nine months, the company had net income of $1,982,000 and operating profit of $15,216,000 on sales of $297,585,000.

Net income increased 67 percent and sales increased 47 percent over the like nine months of 1988.

These results compare with operating profit of $4,250,000 and net income of $49,000 on sales of $86,120,000 and operating profit of $10,573,000 and net income of $1,186,000 on sales of $203,049,000 for the three and nine months ended Dec. 31, 1988.

Comet reported an operating profit of $4.6 million on sales of $66 million

for the current quarter, compared with an operating profit of $3.7 million on sales of $69 million for the comparable quarter last year.

ERLY, in conjunction with American Rice, is working toward the completion of the Comet Rice/American Rice merger, which was announced by the company in July. The completion of the transaction is subject to shareholder approval.

The ERLY Juice division also reported a third-quarter operating profit of $1.2 million on sales of $32 million.

The Beverage Source Inc. (TBS), ERLY's wine subsidiary, sold various retail brands and inventory in two unrelated transactions. The sales, completed in February, will allow TBS to concentrate on its original bulk wine business.

Two major transactions were previously reported in January. The company received approximately $24 mullion in cash and notes for its interest in Hansen Foods. The Chemonics division was refinanced, enabling the company to meet its interest payment on the 12-1/2 percent sinking fund subordinated debentures and providing funds for other current obligations.

A new domestic sales and marketing company called the ERLY Food Group has been formed and will be headed by The Beverage Source President Bill J. McFarland. By combining rice and juice sales and marketing, additional efficiencies and focus will further enhance the growth of the company's main products.

ERLY Industries Inc. is a diversified food processing company with its principal activities in rice milling and juice.

LOS ANGELES (FEB. 20) BUSINESS WIRE) - Live Entertainment Inc. (NASDAQ: LIVE) has signed a letter of intent to acquire a majority interest in VCL Communications GmbH, a leading West German home video distribution company, it was jointly announced Tuesday by Devendra Mishra, president and chief operating officer of Live Entertainment, and Roger R. Smith, president of Live Enterprises.

The acquisition of VCL - the leading independent home video distributor in Germany, with yearly revenues in excess of $25 million - will mark Live's debut in the overseas market of home video distribution, a move that has always been part of the company's long-term growth strategy.

Commented Mishra and Smith, "We are very excited about the prospect of moving into overseas video distribution. Live's managerial skills in the broad-based distribution of entertainment software, combined with VCL's existing marketing acumen, will improve VCL's position as a leader in the German market, to be compared with its sister company, International Video Entertainment, in the American market.

"This is a strategic opportunity to position ourselves in West Germany, the largest and strongest economy in the European Common Market." Rainbow Distribution Services, a wholly owned subsidiary of VCL, handles 3,200 direct accounts, which are serviced by a nationwide sales team. Also part of the VCL acquistion is a videocassette duplication facility, a mail-order business and telemarketing services.

Live Entertainment Inc., with headquarters in Los Angeles, is the parent of three primary operating subsidiaries: International Video Entertainment Inc. (IVE), Lieberman Enterprises Incorporated, and Strawberries Records, Tapes & CDs.

#90051b0650 02/20/1990 ~Business Wire

HONOLULU (FEB. 20) BUSINESS WIRE - Hawaiian Electric Industries Inc. (HEI) Tuesday announced that net income for 1989 increased 16 percent to $64.1 million, or $9.1 million above 1988. Earnings per share also rose to $3.06, an increase of six percent over 1988 earnings per share of $2.90.

Net income for the fourth quarter of 1989 was $13.1 million, up $1.0 million over the like quarter in the prior year. Fourth quarter earnings per share were 62 cents, compared with 59 cents for the like quarter in 1988.

Dividends paid in 1989 were $2.07 per share, up six percent over the $1.95 per share paid in 1988. This represents the 26th consecutive year in which HEI has paid higher dividends per share. There were 20,960,000 average common shares outstanding during 1989, an increase of ten percent over the 18,984,000 average shares in the prior year.

"HEI's 1989 performance is the result of Hawaii's continued economic growth and HEI's successful diversification strategy," said C. Dudley Pratt Jr., president of the Hawaii-based diversified electric utility holding company.

"With 1989's results, HEI has reported increased earnings per share in 25 of its last 26 years. But," Pratt said, "while our performance in 1989

added another year to our record of increasing earnings per share, the need for rate relief in 1990 which has been requested by two of our electric utility companies, could make 1989 hard to beat.

"Our principal operating companies all showed good growth in 1989," Pratt said. "Kilowatthour sales of HEI's electric utility companies grew 3.6 percent on top of strong growth of 5.5 percent in 1988.

"American Savings Bank (ASB) remained a bright spot in the nation's otherwise troubled savings and loan industry, ending the year with a 23.8 percent increase in assets to $1.6 billion and no REOs.

"The Hawaiian Insurance Group (HIG) turned in a strong performance with net premiums written increasing 26 percent over 1988. Revenue tons carried by Young Brothers, Hawaiian Tug & Barge's regulated interisland barge operation, increased 13 percent over 1988, reflecting the strong growth of Hawaii's economy."

Operating income of $131.9 million was 13 percent over 1988's results of $117.1 million. Excluding corporate expenses, the electric utility companies contributed 75 percent of operating income and the diversified companies contributed 25 percent, up from 22 percent in 1988.

PALO ALTO, CA (FEB. 20) BUSINESS WIRE - Hewlett-Packard Co. Tuesday announced it has begun shipping the HP Vectra 486 PC to customers worldwide.

HP believes it is the first established vendor to offer a personal computer based on the advanced Intel i486 microprocessor and the Extended Industry Standard Architecture (EISA). All Intel microprocessors used in the HP Vectra 486 PC have passed HP's stringent quality-testing procedures.

HP Vectra 486 PC customers will be able to use next-generation applications without having to replace their industry-standard PCs, peripherals and add-on devices. HP believes EISA architecture is a superior alternative to International Business Machine Corp.'s Micro Channel Architecture, which also provides extra performance but requires customers to make additional hardware purchases.

HP helped develop the EISA standard for a 32-bit input/output bus, which provides much faster routing of data within the computer today and offers the potential for even higher performance in the future.

EISA enables faster throughput for high-performance applications by supporting direct-memory access and bus-master functions for the next generation of high-performance EISA peripherals and software.

Complementing thousands of industry-standard architecture (ISA) cards, nearly 30 high-performance EISA adapter cards are being developed by third-party vendors. These will provide higher performance in networking, multiuser computing, video display and access to hard disks.

"EISA's evolutionary approach, which preserves customer investments in hardware, answers users' high-performance needs and readies them for the next generation of even higher-performance applications," said Robert L. (Bob) Puette, general manager of HP's Personal Computer Group.

"HP customers will be the first to benefit from this new high-performance technology, which is backed by HP's recognized leadership in quality, service and support."

The HP Vectra 486 PC features a new balanced system architecture that maximizes the capabilities of the advanced Intel i486 microprocessor and improves overall system performance. The HP Vectra 486 PC integrates breakthroughs in central-processing unit, memory and mass-storage technology, which traditionally pose processing bottlenecks in high-performance PCs.

Combining performance and reliability, the HP Vectra 486 PC sets new standards: It delivers minicomputer-level power designed for such applications as departmental-multiuser computing, and supports up to 64 users in a local-area network.

LITTLE ROCK, AR (FEB. 20) BUSINESS WIRE - Environmental Systems Co. (NYSE:ESC) (''ENSCO'') announced Tuesday that on Friday, Feb. 16, 1990, the United States District Court for the District of Delaware dismissed the only pending lawsuit in a series of three suits brought by Brambles USA Inc. against ENSCO.

The court, responding to ENSCO's Motion to Dismiss, rejected the Brambles complaint and dismissed all charges brought against ENSCO, its directors, and all other defendants.

Jack W. Forrest, president and chief executive officer of ENSCO, stated that: ''We are gratified that the court has upheld our position that Brambles should never have filed this lawsuit. I am hopeful that the court's decision will put an end to this costly series of non-productive legal maneuverings which have been in progress since last September.

''Perhaps now management and the board of directors can return their primary attention to the more serious task of increasing shareholder value by providing our customers with the highest possible quality waste management services.''

The court observed that ''Pursuant to its investigation, the Special Committee (appointed by the board to investigate Brambles' concerns) found that the ENSCO board had acted within the proper bounds of their business judgement in approving the Exceltech transaction and that the Exceltech transaction was fair to ENSCO.''

The court held that ''the (Exceltech) situation. . . was simply a consequence of a fixed contractual agreement known by Brambles prior to the time it bought its interest in ENSCO.''

Environmental Systems Co. provides integrated hazardous waste management services to private industry, public utilities and governmental entities. These services include chemical analysis, collection, transportation, processing and incineration of hazardous waste.

DENVER (FEB. 20) BUSINESS WIRE - U.S. Gold Corp. (NASDAQ:USGL) Tuesday announced that it is experiencing significant liquidity problems stemming

from the construction cost over-runs and delays at its Tonkin Springs project.

The bio-oxidation portion of the Tonkin Springs plant is undergoing start-up at the present time.

The company is considering a variety of alternatives aimed at solving its liquidity problemts including refinancing, sale of assets and potential joint venture arrangements.

In this respect, the company had negotiated successfully with third parties several proposals for transactions involving sale of assets and-or joint ventures. However, in each case the company was informed that those proposals were unacceptable to its senior lender, who may be required to approve such transactions. Further, the company has received a proposal from such a lender for additional debt financing on terms which the company feels it may not be able to meet.

The company continues to explore all its options, including restructuring with or without court assistance, to solve its present liquidity problems. Efforts continue in order to obtain agreement on prospective transactions with the senior lender and other parties.

U.S. Gold Corp. is a Denver-based gold mining company with producing mines in Nevada and gold properties in other Western states. The company is listed on the NASDAQ National Market.

#90051b0663 02/20/1990 ~Business Wire

WHITE PLAINS, NY (FEB. 20) BUSINESS WIRE - IBM Tuesday announced a new version of IBM Interleaf Publisher software that brings powerful desktop publishing to IBM mid-range computer users.

IBM Interleaf Publisher Version 1.1 supports the IBM Application System/400, enabling business professionals to increase productivity by running concurrent workstation sessions, using an AS/400 as a file and print server, and accessing data generated in an AS/400.

With this new support, users can transfer information from an AS/400 data base directly into a publishing document, such as a parts catalogue, business proposal, or financial report. This increases speed and accuracy by eliminating the need to re-type large volumes of data. In addition, documents can be shared by several users across many workstations.

"This announcement enhances IBM Interleaf Publisher's unique position as a high-end publishing solution with integrated word-processing and advanced graphics capabilities," said Richard Abineri, director of Publishing Solutions for the Applications Solutions Division.

"With this new version, a customer's publishing capability can grow from a single workstation to a network of workstations connected to an AS/400," Abineri said.

IBM Interleaf Publisher Version 1.1 also supports Novell local area networks, allowing a workgroup to easily share documents and printers; and features continuous tone-image editing and math equations support, which improves the presentation of technical information.

IBM Interleaf Publisher is a vital tool for consultants, financial analysts, engineers and other business professionals to create a variety of documents, from single-page memos to multi-volume reports and catalogues. IBM Interleaf Publisher takes advantage of 386 -based systems, allowing users to combine advanced text processing, sophisticated graphics and image-editing capabilities.

With this DOS-based software, users can import files from graphics, CAD, and spreadsheet packages. IBM Interleaf Publisher is an icon-based, fully WYSIWYG (what you see is what you get) package that incorporates pop-up menus and templates for frequently used document formats.

The new release continues to support PostScript page description language to a PostScript printer or output data file. Output from a user's text, graphics and image tools can be imported into an Interleaf document, saving time and protecting a user's investment in those other software tools.

#90051b0664 02/20/1990 ~Business Wire

BLUE BELL, PA (FEB. 20) BUSINESS WIRE - Unisys Tuesday announced new single chip a series mainframe processor (scamp) systems that the corporation believes will expand its share of the entry-level mainframe market.

The new scamp (S) models extend the performance range of Unisys A4 and A6 mainframe computers by over 50 percent and reduce processor component counts by from 50 to 75 percent, thereby improving system reliability. With its new multiprocessor A6 ''S'' models, Unisys also offers a partitioning option that, until now, was only available to users of medium and large mainframe systems. New A6 scamp models can be divided into two

independent systems

Two of the four new Unisys A6 ''S'' models are multiprocessor systems that can be software-partitioned into two independent systems for users who want operational resiliency and/or need the flexibility to help manage peak processing demands and application development schedules. Fully configured, the dual-processor A6 KS and the four-processor A6 NS systems have few single points of failure; their scamp processors have built-in integrity features for partitioned operations, the dual I/O systems are implemented in separate backplanes, and independent power and cooling supplies are available for each processor and cabinet.

Peripheral subsystems support dual-host/dual-initiator configurations, I/O base sharing, and mirror-disk capabilities for each A6 ''S'' model partition as well as for separate a series systems.

According to Unisys Ramp-C benchmark data, the dual-processor A6 HS and KS systems are comparable in transaction processing performance to the top-of-the-line IBM AS/400 model B70. For those environments running database audit and recovery, the new Unisys a series s models provide a significant price/performance advantage over comparable IBM AS/400 models.

KANSAS CITY, MO (FEB. 20) BUSINESS WIRE - ConCorde Career Colleges, which operates proprietary, post-secondary schools for allied health services, computer training and operations, travel services and multi-state review programs for the CPA examination, established all-time records in all segments of its business, including revenues, profits and enrollment in 1989.

For 1989 revenues amounted to $39,035,000 against $33,409,000, a gain of $5,626,000, or 16.8 percent.

Net income was $4,118,000, equal to 62 cents a share, on 6,678,976 average shares outstanding, compared to $3,293,000, equal to 51 cents a share, on 6,478,976 average shares a year earlier. The gain in profits over 1988 was 25.1 percent.

ConCorde became a publicly owned company on June 30, 1988, when 6,478,976 shares were distributed to shareholders in a spin-off by its former parent CenCor Inc.

In August the company publicly sold 500,000 common shares, primarily using the proceeds to repay short-term debt that was incurred for expansion purposes. There were no bank loans outstanding at Dec. 31, 1989; a year earlier such loans were $3.3 million.

At year-end there were 22 colleges providing specialist training and 51 locations providing review courses for the CPA examination. Net enrollments for the colleges were approximately 11,500, a gain of 14.2 percent for 1989. The number of CPA review students was 10,500, an increase of 15.4 percent.

Two allied health schools were opened in 1989. Plans call for the opening of 2-to-4 new schools in 1990 offering a variety of courses. The second paralegal course is anticipated to start in early March 1990, and 2-to-3 are anticipated in the new year.

The outlook for 1990 remains positive, with revenues expected to climb about 15 percent over 1989 and profits should increase between 15 percent to 20 percent.

LISLE, IL (FEB. 20) BUSINESS WIRE - Molex Inc., worldwide supplier of electronic interconnection products to OEMs, has entered into a 50/50 joint venture with Lan Alin Industries inc., based in Taipei, Taiwan.

The new joint venture company, named Molex-Alin, will take over the operation of Lan Alin, which employs 200 and manufactures a complete line of radio frequency (RF) coaxial connectors which will broaden Molex's product line.

Molex-Alin is one of the Far East's largest makers of coaxial connectors. These products, to be marketed globally by Molex, are used in computers, local area networks (LANs), cellular phones, business machines, instrumentation, and CB radios.

Molex's director of new ventures, Tom Lee, says the joint venture will retain its previous management, including former Lan Alin owner and chairman James Wu. Three Molex people will join the Molex-Alin staff -- a general manager, export sales manager, and a financial controller -- over the next 6 months, according to Lee.

''The RF product line offers excellent synergy with Molex's existing product and customer base. This joint venture will propel Molex into an extremely large RF market,'' says Lee.

Molex is headquartered in Lisle, near Chicago, and operates 46 plants in 20 countries, with 6,300 employees. Sales for fiscal 1989 (year ended June 30, 1989) wre $572 million.

NEW YORK (FEB. 20) BUSINESS WIRE - Rich Inc., the U.S. trading room systems subsidiary of Reuters Holdings PLC (NASDAQ:RTRSY) announced the U.S. launch of Digital Keydeals 2000, a trading turret system that Rich expects will set the standard for turret design in the trading room in the 1990s.

Digital Keydeals 2000 utilizes high-performance digital switching and

networking technology. Tuesday's announcement of its United States availability outlines a Rich strategy of extending its leadership of the North American trading room systems market by also becoming a leading supplier of trader telephone turret systems.

The system will be marketed and supported in the U.S. by Rich, which will now be able to offer its clients single-vendor voice, data, and video trading room system solutions complemented by comprehensive system support services.

Rich will serve its existing turret client base by supporting installed analog systems and by offering a migration path from analog to digital systems.

Digital Keydeals 2000 is developed and manufactured by Wyatts, an industry leader in telephone and trader turret technology. It was launched in Europe in the fall of 1989. Wyatts is also a wholly owned Reuter subsidiary headquartered in the U.K.

Rich Inc. is the leading integrator of trading room voice and information systems. It also provides comprehensive technical system support. There are more than 500 Rich systems insalled and contracted for in 24 countries.

Wyatts is the voice communicatios subsidiary of Reuters. There are over 300 Wyatts systems installed or contracted for in 25 countries.

CHATTANOOGA, TN (FEB. 20) BUSINESS WIRE - Vernon W. Cox, chairman and chief executive officer of Inter Federal Savings Bank (NASDAQ/NMS: IFED), reported Tuesday that primary earnings per share for the year were $2.05.

Net income totaled $2,121,791 for the year as compared with $2,899,724 last year. Cox explained that last year's income included one-time income of $625,000 due to sale of some securities.

Net income in both 1989 and 1988 included extraordinary income of $648,028 and $908,600, respectively, resulting from the utilization for tax purposes of prior years' net operating loss carryforwards.

Earnings for the fourth quarter were $522,846 as compared with $589,499 for the comparable quarter of 1988. Primary earnings per share amounted to 50 cents in the 1989 period compared with 57 cents in the prior year period.

"Planned profitable growth is our main goal and results in 1989 were very close to what was anticipated," according to Cox. He said: "We are pleased with the bank's performance and with our solid financial position. Total income increased along with interest expense. Losses on loans were minimal and operating expenses were below those of comparable institutions."

Asset quality remains high and now totals $309,659,913 as compared with $303,335,884 at the end of 1988. FDIC insured deposits grew by $10.6 million to a record $291,038,332.

Cox indicated his pleasure on the bank's progress since August 1987, when InterFed became a stock institution. Cox said: "Total earnings since that time are in excess of $5.5 million. We attribute this to our strategic long-range planning, our excellent experienced management team, our staff who are dedicated to personal caring service and our sensitivity to local needs.

"We will continue to move forward and will be offering more financial products and services as we enter the 90s." He added, "All of our services are offered at each of InterFed's eight offices which are located in Chattanooga, Signal Mountain, Rossville, and South Pittsburg."

Directors of the locally owned and operated bank in addition to Cox are Donald W. Bowman, Marble J. Hensley, Steve A. McKenzie, Earl A. Marler, C.A. Parks and Walter D. Schultz. Dr. Philip H. Livingston serves as an advisory director.

HOPKINTON, MA (FEB. 20) BUSINESS WIRE - EMC Corp. and Storage Technology Corp. (STK) signed the agreement that will enable STK to sell IBM 3090 central and expanded storage products manufactured by EMC for the next three years.

As a measure of enthusiasm for the deal, STK accompanied the signing of the contract with a purchase order for $4 million worth of product. The total value of the product, which became effective as of Feb. 1, is worth more than $100 million over the three years of the contract. STK will have exclusive marketing rights to central and expanded storage products for IBM 3090 class computers.

This agreement allows STK to offer a broader capability of high performance information storage and retrieval solutions and EMC a significant increase in worldwide exposure for its memory products.

EMC will also continue to manufacture, directly market and service IBM compatible 4381 and 3080 main memory, Solid State Disks for 438X systems and cache memory for IBM 3880 systems. EMC also offers memory, disk and cache products for IBM AS/400 and other midrange systems, DEC VAX, Hewlett-Packard and Wang computers. Both STK and EMC are publicly held companies listed on the New York Stock Exchange.

DAYTON, OH (FEB. 20) BUSINESS WIRE - NCR Corp. announced Tuesday the NCR Computer Integrated Manufacturing (CIM) Systems Integration Center in Wichita, Kan., and the Kansas Technology Enterprise Corp. (KTEC) have issued an $89,000 grant to Victor Frost, a Kansas University professor, for research at the University's Telecommunications and Information Sciences Laboratory (TISL).

This is the third research project commissioned by the CIMS Center and KTEC. ''The first project was developed from a graudate student's summer work at NCR,'' said Frost, director of TISL and associate professor of electrical and computer engineering. The project was designed to evaluate the corporation's small computer system interface.

''This evaluation helped NCR maximize its computer hardware resources and achieve efficiency in its systems,'' said David Malas, manager of NCR's CIMS System Integration Center.

The second grant incorporated a technique for modeling local area network (LAN) systems. Frost developed a system to predict performance of LAN's. ''The system made a significant improvement for effective data and information sharing at the NCR Wichita facility this year,'' said Frost.

The third grant involves the development of performance prediction tools and methodologies for analyzing network information systems. The information can help NCR market its LAN systems and integrate products into complete networking solutions.

''The support from NCR and KTEC has provided TISL's graduate students with excellent research problems that clearly have value,'' stated Frost. ''This project has helped further our goal of exposing TISL students to a multi-vendor, multi-operating system environment they will experience in industry.''

NCR Corp. develops, manufactures, markets and supports business information processing systems for worldwide markets.

MURRAY HILL, NJ (FEB. 20) BUSINESS WIRE - C.R. Bard Inc. (NYSE:BCR) said Tuesday that it will voluntarily withdraw the Mini-Profile balloon angioplasty catheter from the U.S. market.

The Company reported that it stopped shipping the product on Feb. 15 after contact by the FDA regarding whether appropriate regulatory procedures had been followed in connection with a change to the catheter in 1988.

While the Company has not yet completed reviewing its files, it has decided to act promptly to resolve this matter.

This catheter has had an excellent performance record. Over 100,000 catheters have been used. Bard will continue to sell the product outside the United States.

The effect of the withdrawal will be to reduce Bard's first quarter net income by no more than six cents per share.

The Company's recently introduced Sprint catheter provides customers with an alternative product with improved features. The Sprint catheter is now available nationally and was planned to replace the Mini-Profile catheter in most accounts over the next few months.

C.R. Bard Inc., headquartered in Murray Hill, N.J., is a leading multinational developer, manufacturer and marketer of health care products.

MINNEAPOLIS (FEB. 20) BUSINESS WIRE - MOCON (Modern Controls Inc.) announced Tuesday that its board of directors authorized the Company to repurchase shares of its common stock from time-to-time on the open market.

The repurchases of shares will not exceed the market price and will not exceed 60,000 shares in aggregate.

MOCON is a leading developer, manufacturer and marketer of high technology instrumentation designed to test packages and packaging materials for permeation of gases and water vapor.

MOCON testing instrumentation is used in quality control and research laboratories in the food and pharmaceutical industries, to test plastic packaging materials for cost effective protection against loss of color, flavor, fragrance, texture, potency and freshness.

The Company also manufacturers weighing and sorting instrumentation that helps the pharmaceutical industry maintain the rigid weight tolerances needed in producing drugs in capsule and tablet form.

MOCON's shares are traded over-the-counter and are listed in the NASDAQ National Market System. The Company's electronic NASDAQ trading symbol is MOCO.

NEW CASTLE, IN (FEB. 20) BUSINESS WIRE - Ameriana Savings Bank (NASDAQ/NSM:ASBI) Tuesday announced record results for the fourth quarter and year ended Dec. 31, 1989.

Additionally, the bank said its capital rose to 13.3 percent of total assets at year-end, up from 12.2 percent at the end of 1988.

For the year, Ameriana reported a 21 percent increase in income from continuing operations to $2,107,000, or $1.11 per share from $1,744,000 or 92 cents per share in 1988. Discontinued operations in 1988 reduced net income for that year to $55,000, or 3 cents per share. The bank also reported a 16 percent increase in net interest income to $9,183,000, compared with $7,926,000 in 1988.

For the fourth quarter of 1989, Ameriana's net interest income rose 5 percent to $2,423,000 from $2,298,000 in the year-earlier period. Net income for the quarter increased 34 percent to $473,000, or 25 cents per share from $352,000, or 19 cents per share last year. Net income in the fourth quarter of 1988 included an after tax gain on the sale of investment securities totaling $278,000.

Ameriana Savings Bank offers an extensive line of banking services to the east central Indiana area through offices in New Castle, Knightstown, Middletown and Greenfield. In addition to banking services, Ameriana, through Ameriana Financial Services Inc., has an interest in a life

insurance company headquartered in New Orleans, owns Thalls-Ameriana, a full-service insurance agency in New Castle, and provides a full line of investments and securities products in its brokerage center.

NEWTOWN, PA (FEB. 20) BUSINESS WIRE - Tseng Labs, Inc. (NASDAQ:TSNG) Tuesday announced its sixth consecutive year of record revenues and net income for the year ended December 31, 1989.

Revenues rose 45 percent to a record $31,136,000 from the previous record of $21,481,000 set in 1988. Net income of $5,150,000 or $.28 per share for 1989 increased 62 percent over 1988's record of $3,182,000 or $.18 per share.

Fourth quarter revenues totalled $6,303,000 and net income was $908,000 or $.05 per share. In the same period last year, there was net income of $1,088,000 or $.06 per share on revenues of $6,046,000. ''Tseng Labs' performance this year has again been outstanding,'' said Jack Tseng, chairman. ''In a year characterized by the challenge of lackluster growth in PC sales worldwide and intense price competition, it is particularly gratifying to achieve record performance. Bookings for the first half of 1990 are very strong and we believe we are well on the way to another record year in 1990.''

Tseng Labs, Inc. is a manufacturer of custom VLSI graphics chips and board level add-on enhancement products for personal computers.

#90051b0701 02/20/1990 ~Business Wire

CAMBRIDGE, MA (FEB. 20) BUSINESS WIRE - Lotus Development Corp. Tuesday announced it will ship a new version of Symphony, the company's integrated PC software package, before the end of March.

The product is currently in beta testing with customers.

The new version, Symphony 2.2, includes file linking to Symphony and Lotus 1-2-3 Release 2.01 and 2.2 files, Lotus Magellan viewer technology for fast file previewing, retrieving and linking, as well as improved support for expanded memory.

In addition, the new version expands the product's database functionality by incorporating the BASE add-in, offers better integration of the Allways publishing technology, simplifies macro debugging, and provides new display and printer drivers.

''With Symphony 2.2, Lotus is offering a new, powerful release of the industry standard in high-end integrated software,'' said Frank Ingari, vice president of Lotus' Personal Computer Spreadsheet Division.

''We believe that the nearly one million Symphony users worldwide will find Symphony 2.2 an even more capable platform for building and extending a range of business solutions from simple spreadsheets to advanced database and sophisticated compound document publishing applications.''

Symphony is a multi-function, fully integrated software program that incorporates 1-2-3 spreadsheet technology, windowing technology and an advanced command language. The product allows users to create turnkey applications that combine spreadsheet, database, word processing, graphics and communications capabilities, along with the ability to publish presentation-quality output.

These components are easily accessible to users through a consistent interface, which is tightly integrated through a single data model.

Improved File Linking

Symphony 2.2's file linking feature allows users to link a cell in an

active worksheet in memory to cells in worksheet files on disk. File linking makes it easier to build and maintain applications that depend on the same data. Symphony automatically updates the linked formula with the latest data, whenever a user retrieves a file.

Links may also be updated manually. Because Symphony users work side-by-side with Lotus 1-2-3 users and their files, file linking has been extended to include links to individual cells in both Symphony and Lotus 1-2-3 2.01 and 2.2 files.

Viewer Technology from Lotus Magellan

Lotus Magellan is a utility that helps users find, view and use information stored on their personal computer's hard disk. Symphony 2.2 contains an add-in built on Magellan technology, which allows users to locate and preview their Symphony .WR1 and 1-2-3 .WK1 files, Ashton Tate's dBase .DBF files, and ASCII files.

''The addition of the Magellan viewer speeds up file linking because you can immediately see the data you want and create a link with one keystroke '' said Danny Erdeljac, senior design engineer for Dow Chemical Co. in Houston.

Advanced Support for Expanded Memory

Advanced support for expanded memory enables users to build larger worksheets and applications with Symphony 2.2. End users, who previously exhausted conventional memory before the limit of their expanded memory, will now gain use of up to 4 megabytes of expanded memory (LIM 3.2).

New Access to Disk-Based Databases

Symphony 2.2 now provides expanded database capabilities and direct access to disk-based databases. The BASE add-in for Symphony, licensed exclusively from Personics Corp., enables users to access, modify, create, and manage dBase III files from within the familiar Symphony worksheet environment. Users can access multiple database files simultaneously and use databases of almost any size.

BASE provides a Lotus-style interface for managing and editing dBase III database files. The user can perform statistical database analysis; select search and sort criteria through menus; and use more than 20 DB functions which, when combined with the Symphony Command Language, provide a powerful application development environment for building advanced database and spreadsheet applications.

Users can extract data from dBase III files and import the data into existing Symphony database applications. In addition, the BASE

environment provides a full set of features for exporting Symphony and text files into dBase III formats, without requiring the user to exit from Symphony.

Enhanced Edit Mode for Allways Spreadsheet Publishing

Symphony is the only integrated package offering the Allways publishing capability. With Allways, users can enhance their spreadsheets with eight different font types, highlights, shadows, boxes, and grid lines. With Symphony 2.2, users can also edit cells directly from within Allways (What You See Is What You Get) mode by pointing to a cell and pressing the F2 edit function key.

In addition to spreadsheet publishing, the Allways technology brings integrated document publishing to Symphony users, allowing a user to merge text, graphics, data tables, and charts on a single page.

Macro Debugging and Additional Printer and Device Drivers

Symphony 2.2 provides an enhanced STEP mode for macro debugging. Symphony displays the macro commands as the macro is executed, so that users can easily locate bugs in their macros and modify them.

Symphony 2.2 offers users 25 new printer and display drivers. These include a variety of Enhanced Graphics Adapter and Video Graphics Adapter display drivers, as well as a PostScript printer driver.

Networking

Networked versions of Symphony 2.2 will be available 90 to 120 days after initial shipment of Symphony 2.2. In keeping with Lotus' network standards, Symphony 2.2 will be offered in three editions: Standard, Server and Node.

The Standard Edition authorizes use by one individual at a time on a PC and can be used on a network. The Server Edition includes a LAN administrator's guide, one complete copy of documentation, a license for one network user, and one set of software in both 5.25-and 3.5-inch media.

The Node Edition includes documentation and a license to add one more concurrent user to the network. The Standard Edition has a suggested retail price of $695; the Server Edition is priced at $795 and the Node Edition has a suggested retail price of $495. Network upgrade pricing will be announced when the network versions are available.

System Requirements, Pricing and Availability

Symphony 2.2 requires a hard disk, one floppy disk drive and 512K of

memory. The use of the Allways or BASE add-ins requires a minimum of 640K of memory.

Symphony 2.2 will be available in the first quarter of 1990, at a suggested retail price of $695. Upgrades for registered Symphony 1.0, 1.1 1.2, 2.0 and 2.0 Plus users have a suggested retail price of $150. Registered users who purchase or upgrade to Symphony 2.0 Plus from Feb. 20 1990, until 30 days after shipment of Symphony 2.2, are eligible to receive an upgrade to Symphony 2.2 for a $30 postage and handling charge. For upgrade information, customers should call 1-800-TRADE-UP.

Lotus Development Corp. is the worldwide leader in developing application software for personal computers and providing information services delivered on CD-ROM.

All prices and terms are for the U.S.A. only.

#90051b0703 02/20/1990 ~Business Wire

SAN JOSE, CA (FEB. 20) BUSINESS WIRE - Fujitsu America Inc. Tuesday announced that exports of its U.S.-made computer and telecommunications products for calendar year 1989 exceeded $24 million.

Among the variety of products and systems exported were disk and cartridge tape storage devices, cellular car phones and modems. These products were manufactured, designed and engineered in the United States at the company's four manufacturing facilities in Palm Bay, Fla.; Anaheim, Calif.; Richardson, Texas; and Hillsboro, Ore.

Fujitsu America products were exported in 1989 to Japan, Canada, South America, England, New Zealand, Australia, Mexico, Belgium and Taiwan:

-- The Hillsboro, Ore., facility manufactures and exports an advanced controller for the IBM compatible 2480 tape drive to Japan and Europe.

-- The Palm Bay, Fla., Fujitsu-designed modems are exported to Canada, South America and England.

-- The Anaheim, Calif., facility manufactures PBX telephone systems and exports them to Australia, South America, Canada, Mexico, Belgium and Taiwan.

-- In Richardson, Texas, Fujitsu-designed cellular phones are being shipped to Australia, New Zealand and Canada.

Major Plant Investments are Key

Fujitsu expects that recent major investments in its Richardson, Texas, research and development and manufacturing facility will help to increase export volumes. In 1989, the company broke ground on its $80 million North American Telecommunications Center that is slated for completion in 1992.

The facility is Fujitsu's first North American Center for advanced research, development and manufacturing of telecommunications products and technology.

Fujitsu America is the largest North American subsidiary of Fujitsu Ltd., Japan's leading computer maker and a world leader in telecommunications and semiconductor technology. Based in San Jose, Calif., Fujitsu America develops, designs, manufactures, markets and supports a broad range of computer and telecommunications equipment.

AKRON, OH (FEB. 20) BUSINESS WIRE - Resource America Inc. (NASDAQ:REXI) announced that it has obtained an option to acquire all assets of Langasco Energy Corp. (''Langasco'').

Anticipated acquisition price (actual price depending on the assets finally selected for acquisition) is in excess of $5 million and is subject to execution of further agreements and other contingencies.

Langasco, a privately-held Pittsburgh-based oil and gas production company has been a prominent participant in the oil and gas industry in eastern Ohio since its founding in 1982. It currently has interests in and operates over 550 oil and gas wells, and owns and operates approximately 200 miles of gas gathering pipeline systems serving those wells. Furthermore, it manages a number of investment partnerships related to the oil and gas industry.

Resource America Inc., assuming full exercise of the option, will hold interests in and operate approximately 1,100 oil and gas wells, own and/or

operate over 400 miles of gas gathering pipeline, and manage over 100 investment partnerships, located primarily in eastern Ohio and western New York - substantially increasing its status among the larger independent oil and gas companies in the Appalachian Basin.

Resource America Inc., acquired its option from St. Julien III Corp., a privately-held company controlled by Resource officers. The option is on exactly the same terms by which St. Julien agreed on Feb. 9, 1990, to acquire the Langasco assets.

Resource America Inc., reported net income of $656,519 in its first quarter of fiscal 1990, ending Dec. 31, 1989, compared to net income of $41,647 in the corresponding period in fiscal 1989. Per share earnings during those periods were 9 cents and 1 cent respectively. Total net income for fiscal 1989 was $1,650,242 compared to $594,328 in fiscal 1988.

In October 1988 present management assumed control of Resource America Inc., as a result of the issuance of new stock to a privately-held company controlled by president Bagnell and Edward Cohen, now chairman.

#90051b0712 02/20/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (FEB. 20) BUSINESS WIRE - Coral Gold Corp. and Amax Gold Inc. have completed an agreement to explore and develop Coral's 11,000-acre Robertson gold property near Battle Mountain in Lander County, Nev.

Under the agreement, finalized in Golden, Colo. on February 16th Amax will be the project operator and would spend up to U.S. $11.5 million on a four-phase exploration and development program to earn a 70 percent interest in the property by completing a bankable feasibility study and arranging project financing. Should Coral elect to participate in development and production financing, Coral's ownership would increase to 40 percent.

The initial phase will cover a term or up to eight months, beginnning immediately, during wihch Amax has committed to spend $1 million. Aproximately 75 percent of the first-stage funds will be allocated to testing the property's potential for hosting major deep gold deposits. A primary component of Phase One will be a deep drilling program, expected to test the property to depths of at least 2,500 feet. The remainder of expenditures will be used to establish the remaining near-surface heap leach gold potential.

The second phase, dependent upon positive results from Phase One, carries a $2 million commitment by Amax and will cover a period of up to 16 months. In the third phase, dependent upon Phase Two results, Amax

will spend U.S. $4 million in two stages of $2 million each over a period of up to 12 months.

It is only at the completion of phase three, which requires completion of a preliminary feasibility study, that Amax will have earned an interest in the property, which at that time will be 51 percent.

In order to earn an additional 19 percent (to bring Amax's ownership in the property to 70 percent), Amax is required to complete a bankable feasibility study and provide, directly or indirectly, a commitment to finance the project through to production.

Subsequent to Amax achieving such 70 percent ownership, Coral has the option of reacquiring an additional 10 percent interest (to bring Coral's ownership back to 40 percent) by providing 40 percent of the costs of exploration, development and production financing in excess of $11.5 million.

Coral Gold Corp. explores and develops gold properties in Nevada, holding interests in some 40,000 acres of mineral claims and leases in Northern Nevada, located primarily on the Battle Mountain and Carlin gold belts. Coral also presently holds an additional 11,000 acres of mineral claims in southern British Columbia.

Amax Gold Inc., is an international producer of gold, currently carrying on exploration in the United States and New Zealand. Amax Gold is listed on the New York and Toronto stock exchanges and is 87 percent owned by AMAX Inc.

#90051b0715 02/20/1990 ~Business Wire

DALLAS (FEB. 20) BUSINESS WIRE - Sun Coast Plastics Inc. (NASDAQ: SUNI) announced Tuesday that total revenue for the six months ended Dec. 31, 1989 was $30,018,000 vs. $25,950,000 for the six months ended Dec. 31, 1988, comprised of an increase of 14 percent in revenues from closure products and 16.3 percent increase in revenues from tableware and chemical products.

Net income for the six months ending Dec. 31, 1989 improved $574,000 (four cents per share) over the net loss for the first two quarters ending Dec.

31, 1988. Although the Company sustained a net loss of $152,000 (one cent per share) during the past six months, it was an improvement compared to the net loss of $726,000 (five cents per share) for the first two quarters of the last fiscal year.

For the quarter ending Dec. 31, 1989 revenues were $14,975,000 an increase of 17.5 percent over the $12,748,000 of revenues reported for the comparable quarter ending Dec. 31, 1988.

For the quarter ending Dec. 31, 1989 net income improved $362,000 (three cents per share) to a net loss of $81,000 (zero cents per share) compared with the loss of $443,000 (three cents per share) reported for the second quarter ending Dec. 31, 1988.

During the first two quarters ending Dec. 31, 1989 the Company repaid $2,125,000 of its total debt outstanding and reduced its total debt obligations outstanding to $21,050,000 as at Dec. 31, 1989.

CHICAGO (FEB. 20) BUSINESS WIRE - Ransburg Corp., a wholly owned subsidiary of Illinois Tool Works Inc. (NYSE: ITW), announced that it submitted an offer to combine with Binks Manufacturing Co. (AMEX: BIN) pursuant to which each stockholder of Binks would receive $45 per share in cash or in a combination of cash and ITW stock.

Binks has approximately 2,940,000 shares outstanding. Ransburg has assured Binks that it has financing available to consummate an all cash transaction for all Binks shares.

Ransburg also informed Binks that Ransburg intends to propose a slate of directors for election at the upcoming April 24, 1990, annual meeting of Binks stockholders.

Ransburg believes the offer is in the best interest of the stockholders of Binks. Ransburg hopes that the board of directors of Binks will respond positively, as failure by the Binks board to negotiate could adversely affect the value received by Binks' stockholders in a subsequent business combination.

Binks Manufacturing, headquartered in Franklin Park, Ill., is a manufacturer of spray coating application equipment with sales of approximately $200 million.

Ransburg is engaged in finishing and automation businesses. Its parent, ITW, (headquartered in Chicago), is a worldwide manufacturer of engineered components and industrial systems and consumables, with annual sales of approximately $2.17 billion.

LOS ANGELES (FEB. 20) BUSINESS WIRE - Norman H. Raiden, 57, former general counsel of the Federal Home Loan Bank Board from 1983 to 1985, will join Coast Savings and Loan Association as executive vice president in charge of the legal and subsidiaries groups.

Raiden resigned as a senior partner in the prestigious McKenna, Conner & Cuneo law firm in Los Angeles to accept the new position. He will join the $11.2 billion (assets) institution on March 1. Coast Savings is the principal subsidiary of Coast Savings Financial Inc. (NYSE/PSE: CSA).

In his new position, Raiden will oversee legal activities, mergers and acquisitions, major real estate projects, and subsidiaries offering insurance agency and business credit services. Robert A. Scott, senior vice president, remains general counsel of Coast and its holding company.

Raiden has served continuously with the McKenna firm since 1959, except for two years while he served as the top legal official at the federal regulatory agency for thrift institutions.

"Norm Raiden has distinguished himself as an attorney representing many of the largest financial institutions in the nation and as a public servant. We're pleased to have someone of his stature join Coast as we position ourselves to take advantage of new opportunities in the 1990's," said Ray Martin, chairman and chief executive officer of Coast.

Raiden's appointment follows the resignation of William S. Bradway III, 43 an executive vice president, who plans to relocate to New England for family related reasons.

#90051b0720 02/20/1990 ~Business Wire

COSTA MESA, CA (FEB. 20) BUSINESS WIRE - FileNet Corp. (NASDAQ: FILE) Tuesday reported revenue and net income for the fourth quarter and year

ended Dec. 31, 1989.

Revenues for the year were a record $83.1 million, a 31 percent increase from the $63.2 million reported in 1988. Net income was $3.0 million, or 29 cents per share, compared with $1.4 million, or 14 cents per share in 1988.

For the three months ended Dec. 31, 1989, revenues increased 44 percent to a record $26.5 million compared with $18.4 million reported in 1988's fourth quarter.

Net income was $2.8 million, or 27 cents per share compared with $0.6 million, or six cents per share in 1988. The final results for the quarter were approximately the same as the estimated results previously announced on Jan. 8, 1990.

Ted Smith, president and CEO stated, "Revenues for the fourth quarter reached record levels with the shipment of 36 new systems worldwide. Performance was well balanced with a record number of shipments to both the U.S. and international markets. For the year, we increased our installed base 50 percent and now have over 300 installations worldwide, which we believe to be the most of any company in the industry."

"While the year as a whole did not meet our expectations, we are pleased with the trned of activity we experienced in the fourth quarter, and are looking forward to a successful 1990." Smith added, "We are also proud to learn that FileNet was ranked number one in overall customer satisfaction in a recent AIIM/Datapro industry survey.

"FileNet's balance sheet continues to reflect its excellent financial condition with cash and marketable securities of $19.7 million and stockholders equity of $63.1 million."

FileNet Corp. manufactures and markets a family of integrated image and data processing systems that use optical disk technology and WorkFlo (R) software to electronically capture, store, transmit and manage document-images, data and text through paper-intensive organizations.

Headquartered in Costa Mesa, FileNet markets its products directly to end users through the company's sales offices in the United States, Canada, France and Germany. FileNet systems are also sold in 21 other countries by Ing. C. Olivetti & C.S.p.A., and other distributors.

#90051b0723 02/20/1990 ~Business Wire
NORTH MIAMI BEACH, FL (FEB. 20) BUSINESS WIRE - Home Intensive Care Inc. 1/8NASDAQ/NMS:KDNY (common stock) and KDNYW (warrants)3/8 Tuesday announced unaudited results for the first quarter ended Dec. 31, 1989.

Revenues for the first quarter of fiscal 1990, excluding revenues related to the terminated portion of the company's home dialysis business, and including revenues from the company's home infusion therapy business, were $7,867,000 compared to $11,638,000 in the first quarter ended Dec. 31, 1988. The company had a net loss of $406,000 or 4 cents per share for the first quarter of fiscal 1990 versus net income of $1,582,000 or 17 cents per share for the first quarter of fiscal 1989.

The above results for the first quarter of fiscal 1990 do not include revenues and operating income related to the terminated portion of the company's home dialysis business which amounted to $12,655,000 and $1,500,000, respectively. These revenues have been offset against operating expenses and the resulting operating income of $1,500,000 has been credited to the estimated liability, which may be incurred, for closing costs.

On Nov. 21, 1989, the United States Congress passed the Budget Reconciliation Act of 1989. This Act, which became effective Feb. 1, 1990 contains a provision that reduces the company's reimbursement rate for

home dialysis by approximately 50 percent. Because of the passage of this Act, Home Intensive Care no longer provides home dialysis to a majority of its Medicare patients; however, the company continues to provide home dialysis to patients with appropriate insurance coverage and to certain other patients in special circumstances.

The home infusion therapy business is expected to be a major contributor to the company's revenues in forthcoming quarters and is expected to increase, both in absolute dollars and as a percentage of total revenues. For the three months ended Dec. 31, 1989, home infusion therapy represented approximately 11 percent of consolidated revenues. Home Intensive Care's dialysis clinic operations are not effected by the Act, and the Company expects to open additional clinics in various locations in the near future.

Home Intensive Care Inc. provides high-tech home health care products and services including supervised chronic home hemodialysis services and home infusion therapy. The company also operates two kidney dialysis centers and 24-hour acute kidney dialysis services in many metropolitan areas. Its Lifeline Water Systems subsidiary markets water purification systems for commercial, industrial and residential use, while Medi-Sure Testing Inc. provides testing services for the insurance industry and pre-employment screening services.

FREMONT, CA (FEB. 20) BUSINESS WIRE - Sigma Designs Inc. (NASDAQ:SIGM) Tuesday announced that it plans to implement a stock repurchase program whereby up to 500,000 shares of its common stock may be purchased from time to time in the open market.

There are approximately 5,871,000 shares currently outstanding.

Thinh Tran, president, stated that ''the decision was made in view of the current low price of the company's stock which we believe does not reflect the true value of the company.''

Sigma Designs is a leading manufacturer of marketer of PC graphics products including standard graphics boards, high-resolution display sytems, video capture boards, and system enhancement products for IBM, IBM compatible and Apple personal computers.

#90051b0730 02/20/1990 ~Business Wire

WAYNE, PA (FEB. 20) BUSINESS WIRE - Soft Switch Inc. Tuesday announced the addition of 400-Link/OfficeVision to its 400-Link family of products.

It also announced that 400-Link/DISOSS has been enhanced to support OfficeVision/MVS. Other 400-Link products are 400-Link/PROFS, 400-Link/SYSM and 400-Link/MEMO.

400-Link is an easy-to-install yet sophistacted turnkey system for connecting IBM mainframe-based electronic mail networks with other electronic mail sytems via X.400. Each product has two models, the entry-level Model-10 and the production-ready Model-20.

Soft Switch is also extending its six-month pilot program to the 400-Link/OfficeVision product. This program includes installation of a 400-Link Model-20 system, customer training, and six months of use for a

monthly fee of $4,600. A significant portion of the monthly fee will accrue as purchase credits. At the end of the six-month pilot program, customers can return the system or purchase the product.

The entry level Model-10 is based on an Intel 80386SX processor with 4 megabytes of main memory, 2 Motorola 68000-based I/O processors, and a 40 Mb disk. One I/O processor connects to an IBM host via SNA LU6.2, and the other I/O processor connects to an X.400 network via X.25. The Model-10 is priced at $35,000 for all hardware and software.

The Model-20 is a high throughput system based on a 25 MHz Intel 80386 processor with 8 megabytes of main memory, 2 Motorola 68000-based I/O processors and a 322 Mb high-speed disk. The Model-20 is priced at $65,000 for all hardware and software.

Besides providing basic X.400 connectivity, these products provide a number of enhanced X.400 features that have made prior Soft Switch X.400 products successful. These features include the ability to connect to multiple public mail carriers simultaneously, a unique four-level access control system, automatic registration of new users into the 400-Link directory, and extensive system logging and analysis tools.

The products are available immediately and have already been certified to interoperate with the X.400 capabilities of SprintMail, MCI Mail, Western Union, TRT/FTC and Dialcom. AT&T Mail has announced its intention to certify interoperability with 400-Link.

Soft Switch Inc. provides standards-based connectivity, electronic mail network management and mail-enabled applications that add value to customers' expanding electronic mail networks. The company also licenses its technology to major office systems vendors and public electronic mail system vendors.

In addition to its Wayne, Pa., headquarters, Soft Switch has regional offices in Chicago, Dallas, Los Angeles and Washington. The company also markets its products internationally through distributors from its European headquarters in Amsterdam, Netherlands.

#90051b0732 02/20/1990 ~Business Wire

DALLAS (FEB. 20) BUSINESS WIRE - Northern Telecom (NYSE: NT) Tuesday

announced Integrated Services Digital Network (ISDN) Primary Rate Access (PRA) capabilities for its DMS-250 and DMS-250 SuperNode digital tandem switching systems, used by inter-exchange carriers and in private networks.

ISDN PRA capabilities will provide inter-exchange carrier customers and private network operators with a variety of advantages, including reduced trunk-line requirements, new services, increased network reliability, and reduced network costs.

ISDN PRA service offerings that will be offered initially include voice and data calling capabilities, transport of the calling party's telephone number (caller ID), and integrated service access (ISA).

ISA saves users of DMS-250-based services money by eliminating the need for multiple trunk groups and the required administrative functions associated with them. This reduces the number of facilities and connection types required to support various services residing in different nodes or networks.

Additionally, ISA allows for support of public, WATS (Wide Area Telecommunications Service), tie trunk and private network calls over a single trunking group and implementation of both public and private numbering plans over the same PRA facilities. Additional DMS-250 ISDN PRA supplemental services are under development and will be offered as they become available.

New DMS-250/SuperNode components required to add ISDN PRA capabilities include a Network Termination (NT-1) and a digital trunk controller for ISDN (DTCI) equipped with a D channel controller card, which provides 1 to 32 D channels per 480 trunks. Updated software used to control the DMS-250 is also necessary.

The DTCI is installed within the DMS-250 switching system and allows - through the same DTCI device - the connection of both ISDN PRA trunks and trunks using present in-band digital signalling.

The hardware and software components required for ISDN PRA capabilties on the DMS-250 will be available in March, 1990. Typical customer list price to add ISDN PRA capabilities to a DMS-250 is $286,000, engineered, furnished and installed.

#90051b0735 02/20/1990 ~Business Wire

DALLAS (FEB. 20) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday announced a number of enhancements to its Operator Services System for its DMS-250 and DMS-250 SuperNode digital tandem switching systems, used by inter-exchange carriers.

The enhancements are designed to improve system and operator performance and to help service providers comply with new federal regulations.

Among the new capabilities is a pre-call price quote feature that allows operators to notify callers of billing charges prior to call completion.

Other new features include the ability to identify if a particular carrier has billing agreements with a local exchange carrier before the call is processed and the ability to display messages to operators advising them of special conditions that apply to a particular carrier.

A new menu-driven interface allows service providers to easily customize status line message text to best suit their specific needs.

The DMS-250 SuperNode Operator Services System consists of two integrated systems: the DMS-250/SuperNode digital tandem switching system and the Compaq 286E-based Operator Network Center.

The Operator Services Systems are used by inter-exchange carriers to provide operator services to hospitals, hotels, motels, convention centers airports, executive housing complexes, shared tenant service facilities and universities.

The intelligent workstations used by system operators automatically provide call processing information in easy-to-read color-coded displays. Built-in administrative features help service providers monitor system and operator performance and adjust system parameters to maintain top efficiency. Optional automated attendant capabilities using advanced voice recognition technology are also available.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide.

#90051b0736 02/20/1990 ~Business Wire

TEMPE, AZ (FEB. 20) BUSINESS WIRE - Amtech Systems Inc. (NASDAQ: ASYS) Tuesday announced record revenues and record pre-tax earnings for the fiscal first quarter ended Dec. 31, 1989.

Revenues were $6.6 million for the recent quarter, up 52 percent from $4.4 million for the like period a year ago. Of the total revenues for the quarter just ended, 26 percent, or $1.8 million, were from the semiconductor equipment business and 74 percent, or $4.9 million, were from the temporary technical personnel business. The recent quarter includes $1.3 million in revenues from Echelon Service Co., which Amtech acquired in April of last year.

Pre-tax earnings for the recent quarter increased 43 percent to $332,661 from $232,420 for the like quarter last year. Net income decreased to $193,661, or ten cents per share, from $232,420, or 15 cents per share.

Net income for the quarter last year included a $93,000, or six cents per share, tax-loss carryforward. No such tax benefit was included in the recent quarter because it had been fully utilized during the first quarter last year.

"We are pleased with the strong results of the first quarter, with both business segments performing well," said J.S. Whang, president and chief executive officer of Amtech. "We expect weak sales in the semiconductor equipment business for the remainder of the year due to cyclical industry wide trends. However a turnaround in that business is anticipated in 1991." Whang also noted that the outlook for the temporary technical personnel business "remains excellent."

Referring to the company's diversification strategy to balance the four-year equipment business cycle, Whang added, "Because of the initial success of our diversification strategy, we plan to increase efforts to acquire similar businesses or products which meet our commitment to long-term profitability and growth."

Based in Tempe, Amtech Systems Inc. manufactures the ATMOSCAN, an

automated environmentally controlled process system which improves the yields of semiconductor manufacturers.

In addition, through its wholly owned subsidiaries, RTS Inc. and Echelon Service Co., Amtech provides technical temporary employment services to major aerospace, defense, computer and high technology companies throughout the Southwest and the Baltimore/Washington D.C. areas.

HOUSTON (FEB. 20) BUSINESS WIRE - Oshman's Sporting Goods Inc. (OTC: OSHM) Tuesday reported that preliminary sales information indicates that the fourth quarter of fiscal year ended Feb. 3, 1990, while expected to be profitable, will be less profitable than the corresponding quarter of the prior year and consequently, the company may report a loss for the fiscal year just ended.

The fourth quarter was adversely affected by poor snow conditions in the western United States which contributed to lost sales, excess inventory, and resulting increased markdowns. Beginning in January 1990, good late-season snow conditions have contributed to improved sales results of ski-related merchandise. The company expects to release its audited financial results in late March 1990.

The board of directors of Oshman's Sporting Goods Inc. has declared a regular dividend of five cents per share to all common stock shareholders of record on March 30 with the dividend to be payable on April 13.

CONTACT: Oshman's Sporting Goods, Houston, Edward R. Carlin, (713) 928-3171.

WHITE PLAINS, NY (FEB. 20) BUSINESS WIRE - IBM has reduced prices by as much as 28 percent on its Proprinter(a) family of impact printers--improving affordability for such customers as small business owners, office professionals and people who work out of the home.

Price reductions for the six models of Proprinters range from five percent to 28 percent, placing IBM in a solid price-competitive position among its major competitors. For example, under the new price structure a customer may purchase a basic Proprinter II for $449 compared to the previous price

of $575, or a top-of-the-line Proprinter X24E for $859 instead of the previous $899 price. In some cases, purchasers of IBM Proprinters can save upwards of $200 over comparable models offered by competitors.

IBM Proprinters--known for their reliability, easy-to-use paper handling capabilities and highly versatile printing functions--are ideally suited for correspondence, reports and presentations.

IBM Proprinters such as the X24E, winner of PC World's ''Best Buy'' award for 1989, are available through IBM's marketing branch offices and at over 1,900 IBM authorized dealers nationwide (1-800-IBM-2468).

ABINGTON, MA (FEB. 20) BUSINESS WIRE - Abington Bancorp Inc. (NASDAQ:ABBK) Tuesday announced results for the fourth quarter and year ended Dec. 31, 1989.

For the quarter ended Dec. 31, 1989, Bancorp reported a net loss of $1,469,000, or 71 cents per share, compared with net income of $226,000, or 10 cents per share, for the same period a year earlier. Bancorp also reported a net loss for the year ended Dec. 31, 1989, of $458,000, or 22 cents per share, compared with net income of $1,545,000, or 68 cents per share, for the corresponding period in 1988.

At Dec. 31, 1989, assets totaled $239,593,000, an increase of 1.9 percent since Dec. 31, 1988. Total outstanding loans and deposits at Dec. 31, 1989, were $134,052,000 and $163,502,000, respectively, compared with $124,921,000 and $140,547,000, respectively, at Dec. 31, 1988.

Stockholders' equity at Dec. 31, 1989, was $26,339,000, reflecting a stockholders' equity to assets ratio of 11 percent. Book value per common share at Dec. 31, 1989, was $13.63 and Bancorp's net interest rate spread for the year ended was 2.23 percent.

Bancorp's President and Chief Executive Officer Donald R. Eldridge said that the fourth quarter and fiscal year results reflect writedowns of real estate owned amounting to $739,000 and $1,054,000, respectively. Operating expenses for the fourth quarter and fiscal year ended Dec. 31, 1989, showed increases over the corresponding 1988 results, primarily attributable to the ongoing workout of Bancorp's non-performing assets.

In addition, management decided to substantially increase the provision for possible loan losses by adding $1,070,000 in the fourth quarter of 1989, compared to $450,000 for the same period in 1988. The provision for possible loan losses for the year-ended Dec. 31, 1989, was $1,290,000 compared to $730,000 in 1988.

Eldridge said that ''the writedowns of real estate and increase in the loan loss provision reflect the continued decline in the regional economy, which has been particularly pronounced in the fourth quarter of 1989.

''The bank's move is a response to what it considers to be a more conservative approach to losses and reserves in the industry as a whole. Current regulatory practices on determining the possibility of potential loan losses have caused management to take a more conservative viewpoint

toward the current value of existing loans and real estate owned.''

Abington Bancorp also announced that its board of directors declared a quarterly cash dividend of 4 cents per share, payable on March 20, 1990, to shareholders of record on March 6, 1990. Donald R. Eldridge further commented, ''we are pleased to be able to continue to pay a quarterly cash dividend, even though this payout represents a decrease from the prior quarter of 8 cents per share.

''The current banking environment continues to be difficult and we will continue to assess the appropriateness of our dividend payout on a quarterly basis.''

Abington Bancorp Inc. is a holding company that operates Abington Savings Bank as a wholly owned subsidiary. Abington Savings Bank is a Massachusetts-chartered savings bank whose deposits are insured by the Federal Deposit Insurance Corporation and the Mutual Savings Central Fund Inc. In addition to its headquarters and loan center located in Abington, the bank has two other branches located in Halifax and Kingston, Mass.

HOUSTON (FEB. 20) BUSINESS WIRE - Synercom Technology Inc. (NASDAQ:SYNR) Tuesday reported a net loss of $486,000, or 8 cents per share, on revenues of $2,958,000 for the company's first quarter ended Jan. 31.

In the first quarter of the prior year, the company reported net income of $688,000 or 11 cents per share on revenues of $4,249,000. Included in net income for the quarter ended Jan. 31, 1989, is an extraordinary credit

from tax loss carryforwards which had the effect of increasing net income by $227,000.

Revenues for the quarter ended Jan. 31, 1990, decreased 30.4 percent compared to the quarter ended Jan. 31, 1989. At the company's current revenue levels, financial results can fluctuate from quarter-to-quarter (and to a lesser extent, from period-to-period) as a result of the timing of certain large orders.

Synercom directs its marketing efforts towards major customers that can achieve substantial benefits through the use of its INFORMAP software system in a distributed environment.

Revenues from product licensing and sales comprised 51.5 percent of total revenues for the first quarter of fiscal 1990, compared to 62.1 percent of total revenues for the first quarter of fiscal 1989. Services revenues comprised 48.5 percent and 37.9 percent of total revenues for the quarters ended Jan. 31, 1990, and 1989, respectively.

The company has been successful in stabilizing the level of operating expenses. Total operating expenses increased 2.2 percent for the quarter ended Jan. 31, 1990, as compared to the quarter ended Jan. 31, 1989. The company continues to invest heavily in developing new products and enhancing its existing software product line.

Synercom is committed to providing solutions to the complex problem of managing corporate assets, including the integration of spatially related information into existing corporate information systems.

Synercom provides integrated spatial information management solutions for major commercial and governmental organizations worldwide. The company's software products, support services, and systems integration services increase the efficiency and accuracy with which customers record, track, analyze, and manage geographically dispersed assets.

Synercom offices and distributors of Synercom products are located worldwide.

#90051b0767 02/20/1990 ~Business Wire

HOUSTON (FEB. 20) BUSINESS WIRE - A. Earl Swift, chairman and president of Swift Energy Co. (ASE, PSE: SFY) Tuesday reported results for the year-end and fourth quarter 1989.

Record net earnings for the year ended Dec. 31, 1989 of $5.71 million ($1.35 per share) were up 22 percent when compared to the $4.68 million ($1.16 per share) earned during 1988. Net earnings for the fourth quarter of 1989 of $1.69 million (36 cents per share) decreased 3 percent from the fourth quarter 1988 net earnings of $1.74 million (43 cents per share).

The variation in fourth quarter earnings resulted primarily from the inclusion in fourth quarter 1988 earnings of earned interests from a major transaction which occured in December 1988. In the fourth quarter of 1989 the company sold an additional 660,000 shares of common stock in its successfully completed public offering. This increase in outstanding shares resulted in earnings per share for calendar 1989 increasing over 1988 levels 16 percent, while earnings increased 22 percent and resulted in a comparative fourth quarter earnings per share decline from 43 cents to 36 cents even though earnings in the two periods were virtually the same.

Revenues of $14.93 million for the year 1989 increased 18 percent while revenues of $3.78 million for the fourth quarter 1989 decreased 9 percent when compared to the same periods in 1988. The decrease in revenues for the fourth quarter was entirely due to lower levels of property acquisitions by the company-managed limited partnerships which had spent all of their funds available for property purchases by year-end 1989.

The major contributor to revenues continued to be the company's earned interest in its income and pension fund partnerships (and indirectly their producing oil and gas reserves), recognized when the partnerships acquire producing properties. For the year oil and gas sales represented approximately 27 percent, supervision fees 11 percent and earned interest and fees from income fund partnerships 59 percent, of total revenues.

Significant increases in revenues for both the last quarter and the full year of 1989 were realized from oil and gas sales and supervision fees, while earned interest and fees increased 9 percent for the year, principally in the first quarter of 1989.

Swift Energy Co. is an independent oil and gas company primarily engaged in the acquisition, explorations, development and operation of oil and gas properties through partnerships and joint ventures.

IRVINE, CA (FEB. 20) BUSINESS WIRE - Belcor announced Tuesday that its wholly owned subsidiary, Aargus Polybag Co. Inc. has received purchase orders from K-Mart, Walmart, and True Value Hardware stores for its high density transparent, printed, recyclable, trash separation bags.

These purchase orders are believed to be just the tip-of-the-iceberg in this new field. The action taken by these major national chains will help in influencing the city of Chicago to pass a voluntary trash separation ordinance. This ordinance is scheduled to come before the city council in late February 1990 and is expected to be approved.

Various other major cities including Los Angeles, are discussing the passing of ordinances that will eventually mandate the separation of residential trash into grass and yard waste, plastic bottles, newspapers, glass and aluminum cans.

Cities such as Madison, Wis. have already started using Aargus' bags for trash separation in their communities. Aargus was the first and still the only company to offer high density, transparent, printed, recyclable trash separation bags for residential use. In the future, the recyclable residential trash bag industry is expected to reach annual sales of over $1 billion.

DALLAS (FEB. 20) BUSINESS WIRE - International Broadcast Systems Ltd. (NASDAQ:IBSLA) announced today that its lawsuit with Minneapolis-based International Broadcasting Corp. has been settled.

Pursuant to the settlement, International Broadcasting Corp. has dropped all claims relating to this matter against IBS and the parties have agreed among other things, that IBS may continue to use its name in connection with its business operations.

The lawsuit was originally brought by IBS to establish that it was entitled to use the IBS name and logo in areas in which it conducts business. Subsequently, International Broadcasting Corp. counter-sued alleging that use of the IBS name and logo violated its rights.

To avoid any confusion over each company's NASDAQ stock symbols, IBS announced that effective March 1 its stock symbol on NASDAQ will be changed from ''IBSLA'' to ''IBTVA.''

With offices in Dallas; Los Angeles; Paris; Santiago, Chile; and Washington. IBS distributes television programming in more than 120 countries.

Additionally, the firm secures airtime and sponsorships internationally, provides product licensing and merchandising services, as well as broadcast management and consulting services to television stations domestically and abroad.

CAMBRIDGE, MA (FEB. 20) BUSINESS WIRE - BBN Advanced Computers Inc. announced Tuesday that it has received a $4.5 million contract from Lawrence Livermore National Laboratory (LLNL) for a 126-processor model of the BBN TC2000 massively parallel RISC-based computer.

The system will be used to develop a wide range of massively parallel production scientific applications. The TC2000 computer is a key component of Lawrence Livermore's Massively Parallel Computing Initiative, a three-year, $10 million effort to demonstrate practical applications for

massively parallel machines.

BBN Advanced Computers Inc. Vice President Dave Micciche said that several planned product enhancements will be released early for use in the Livermore machine. ''This relationship is significant in the industry,'' Micciche said. ''It marks the emergence of parallel processing machines as a platform for production computation, not just computer science research.''

The system's scalable performance allows a dramatic increase in total throughput Q to an architectural limit of 504 processors, 10,000 peak MFLOPS, 8,064 Mbytes of memory, and 2,520 Mbytes/s I/O bandwidth.

Researchers can group multiple processors into functional clusters, applying processing power simultaneously to both program development and application execution. BBN's nX implementation of UNIX 4.3 BSD is complemented by a set of advanced X-Windows-based software development tools created by BBN.

These tools enable programmers to interactively debug parallel software, easily setting and examining variables across multiple processors, as well as doing performance analysis tasks. Unlike other massively parallel systems, the TC2000 automatically balances the computing load across the system, without the necessity of writing configuration-specific code.

BBN Advanced Computers Inc. develops and markets high-performance multiprocessing computer systems for both supercomputing and realtime applications. For 10 years BBN has sold and installed parallel computing systems worldwide at major aerospace, industrial, government and university sites. Headquartered in Cambridge, Mass., BBN Advanced Computers is a wholly-owned subsidiary of Bolt Beranek and Newman Inc. (NYSE:BBN). For its fiscal year ended June 30, 1989, BBN had sales of $292 million.

ATLANTA (FEB. 19) BUSINESS WIRE - Norrell Corp., the parent company of Cosmopolitan Care Corp., has just received complaint from the New York attorney general's office.

We have yet to analyze the allegations to properly respond.

Norrell is disturbed by these allegations because for many years, the company has had a strict policy prohibiting discrimination in any form, including accepting or filling discriminatory job orders.

Norrell does not tolerate anything less than strict adherence to its EEO policies.

Norrell purchased Cosmopolitan a year and a half ago. Since the acquisition, Norrell began implementing its policies in an effort to ensure that its policies are adhered to by every employee. Norrell policy requires any Norrell associate who knowingly violates this policy to be immediately discharged.

Norrell Corp., and its affiliated companies, are equal opportunity employers. Norrell Corp. does not discriminate on the basis of race, color, national origin, sex, age, religion, handicap or veteran status.

#90051b0790 02/20/1990 ~Business Wire

CHARLOTTE, NC (FEB. 20) BUSINESS WIRE - Results of consolidated operations of Lance Inc. (OTC: LNCE) for the 52 weeks of 1989 show the following as compared with the 53 weeks of 1988 (in thousands except per share data):

LANCE INC. CONSOLIDATED OPERATIONS

	16 Weeks 12/30/89	17 Weeks 12/31/88	52 Weeks 12/30/89	53 Weeks 12/31/88
Net Sales and other operating revenue	$ 131,571	$ 133,542	$ 432,140	$ 407,683
Income before income taxes	19,519	15,277	69,864	60,381
Net income	$ 14,235	$ 9,753	$ 44,863	$ 39,143
Net income per share outstanding	45 cents	31 cents	$ 1.42	$ 1.23
Common shares outstanding at end of period	31,592,177	31,609,772	31,592,177	31,609,772

Even though there was one less week in 1989 than 1988, net sales and other operating revenue for the year was up six percent or $24.5 million as compared with 1988.

After discounting the effect of the closing of Nutrition-Pak Corp. in January 1989, approximately 60 percent of the sales increase came from price increases instituted in the summer of 1989 on snack foods and bakery products.

After taking into account the recording in the fourth quarter of 1988 of the loss on the closing of Nutrition-Pak Corp. of $2.8 million of nine cents per share, net income was up $2.9 million, or ten cents per share for the year due primarily to the product price increase in the summer of 1989.

LONDON (FEB. 20) BUSINESS WIRE - Feb. 20, 1990--British Gas (NYSE: BRG)

Chairman and Chief Executive Robert Evans Tuesday announced the launch of BG Ventures, a venture capital fund based in the United Kingdom. British Gas Corporate Ventures Limited (a subsidiary of British Gas plc) will inject 15 million pounds sterling into BG Ventures.

BG Ventures will then invest in small, primarily British, companies with potential for long term development where additional funds and associated support could make the difference between success and failure.

BG Ventures will be looking for companies bringing new technologies, products and services to the market place in activities related to the main business of British Gas - namely the exploration and production of oil and gas, gas transmission and distribution.

Evans, speaking to members of the Institute of Petroleum in London, said today that if British Gas was to continue to develop its business it must keep up the pace of innovation.

"We need to be flexible and can no longer afford to rely entirely on our own research efforts to meet the challenge," he said. "We recognize the importance of encouraging others to help us. With that in mind, BG Ventures the new venture capital fund is being launched. As a result, we - and we hope others - will benefit by sowing the seeds for future development."

The fund will be managed by Electra Innvotec, a firm of professional venture capital fund managers. This is possibly the first time a professionally managed fund with a single corporate investor has been established in the UK, although it is used in North America, where corporate venture capital investment is more common.

Electra Innvotec has been chosen because it specializes in investments in innovative companies and early stage financing, and takes a "hands-on" approach to its investments.

The fund management arrangements, which include the normal performance incentives for fund managers, should help ensure a good financial performance and long term commitment by the individuals in the fund management team to the fund's performance. In addition a member of British Gas' own staff will work on secondment as part of the fund managers' team.

Evans said, "In keeping with our global strategy, we have already invested $5 million in Utilities Venture Capital Corporation, a North American fund which specializes in investments in high technology companies, specifically of interest to our business."

#90051b0805 02/20/1990 ~Business Wire

OLDSMAR, FL. (FEB. 19) BUSINESS WIRE - Homestyle Buffet Inc., Tuesday reported record net earnings of $1.27 million or 33 cents per share for the fiscal year ended Jan. 3, a 122 percent increase over the $571,000 or 19 cents per share earned in 1988.

Net sales for 1989 were $22.9 million, a 122 percent gain over sales of $10.31 million the previous year.

In the 1989 fourth quarter, net income was $337,000 or eight cents per share compared to $62,000 or two cents per share earned in the comparable 1988 quarter. Net sales were $5.97 million vs. $3.04 million in the respective 1989 and 1988 fourth quarters.

Chairman Barry M. Rowles said the company's aggressive expansion program is proceeding according to plan. He noted that Homestyle began 1989 with ten restaurants in operation, all in Florida.

By the end of the year, eight more had been opened -- six total in Buffalo and Rochester, N.Y., and one each in Baltimore and Philadelphia. Two of the eight were opened in the final two weeks of 1989.

Two restaurants were opened in January 1990 -- one each in Baltimore and Port Richey, Fla. -- and at least eight more will be opened by the end of the year, mainly in the northeast and mid-Atlantic regions.

Rowles stated that sales so far in the first quarter of 1990 are ''excellent,'' and he expects to report good results at the quarter's end.

Homestsyle owns and operates a growing number of buffet restaurants in Florida and in the northeastern and mid-Atlantic states. The restaurants provide a wide variety of menu items comprising complete meals in a self-service, fixed-price buffet format.

MIAMI (FEB. 20) BUSINESS WIRE - American Bankers Insurance Group Inc. (NASDAQ: ABIG) announced Tuesday that earnings from insurance and other operations for the fourth quarter of 1989 were $12.1 million or 84 cents per share vs. $.6 million or five cents per share for the like period of 1988.

Net income for the fourth quarter of 1989 was $6.6 million or 46 cents per share vs. net income of $16.4 million or $1.26 per share for the like period of 1988. On a fully diluted basis, net income per share for the fourth quarter was 39 cents compared to 97 cents for the like period of 1988.

Included in net income for the fourth quarter of 1988 was an after tax gain of $25.3 million or $1.94 per share on the sale of the Company's U.K. subsidiary and a charge of $12.4 million or 95 cents per share for increased credit bond related reserves ($5.0 million) and the write off of certain impaired assets, primarily investments.

Net income for the year ended Dec. 31, 1989 was $20.2 million or $1.40 per share vs. net income of $30.8 million or $2.40 per share for the like period of 1988. On a fully diluted basis, net income per share was $1.29 for the year compared to $2.12 in 1988.

Gross collected premiums for the fourth quarter of 1989 were $243.0 million compared with $197.3 million for the fourth quarter of 1988. Gross collected premiums for 1989 were $868.5 million compared with $771.8 million (excluding $157.3 million for the Company's former United Kingdom subsidiary) for 1988.

As of Dec. 31, 1989, approximately 92 percent of the Company's bond portfolio was rated BBB or better according to the ratings published by Standard and Poors Corp., with the balance of the portfolio being comprised primarily of private placements.

Stockholders' equity was $157.7 million and Book Value per share was $10.93 at Dec. 31, 1989.

SIMSBURY, CT. (FEB. 20) BUSINESS WIRE - Kollmorgen Corp. (NYSE: KOL) announced Tuesday that it has sold its interest in Additive Products Co., a partnership owned jointly by Kollmorgen and Akzo, and all of the assets of the graphics part of Kollmorgen's PCK Technology Division to a joint venture formed by Akzo N.V. and AMP Inc.

Kollmorgen's Discrete Wiring Systems business is not included in this transaction.

The purchase price for this transaction is approximately $50 million, subject to certain adjustments. In addition, the AMP-Akzo joint venture has agreed to assume certain liabilities of the businesses.

Kollmorgen will recognize a gain from this transaction. The proceeds from this sale initially will be used to repay short-term indebtedness and for other corporate purposes.

''The consummation of this transaction represents a significant step in Kollmorgen's previously announced plan to sell our Electronic Interconnections segment. We are continuing to pursue actively the other elements of our restructuring plan, including the sale of the remaining parts of Kollmorgen's Electronic Interconnections businesses,'' said James E. Swiggett, chairman of the board and chief executive officer of Kollmorgen.

Kollmorgen also announced that the other joint venture between Kollmorgen and Akzo, Akzo Electronic Materials Co. (AEMC) of Schaumburg, Ill., was terminated. Akzo will remain in the gallium arsenide substrate business, through Crystal Specialties International of Colorado Springs, Colo.

Kollmorgen Corporation's continuing operations are focused on two business segments specializing in servo-motors and controls, and electro-optical instruments.

INDIANAPOLIS (FEB. 20) BUSINESS WIRE - Merchants National Corp. (NASDAQ:MCHN) announced Tuesday that its lead bank subsidiary, Merchants National Bank & Trust Co. of Indianapolis, holds $5 million of commercial paper issued by Drexel Burnham Lambert.

On Feb. 13, 1990, Drexel Burnham announced plans to file for bankruptcy protection under Chapter 11 of the Bankruptcy Code. Merchants National Bank is taking appropriate steps to protect its interest in the Bankruptcy Court. The effect on the corporation's earnings resulting from this situation cannot be determined at this time.

In a separate action, the board of directors of Merchants National Corp. today declared a normal quarterly dividend of 30 cents per share for the first quarter, payable March 23, to shareholders of record March 2.

Merchants has paid continuous annual dividends since 1867.

Merchants National Corp., an Indiana multibank holding company headquartered in Indianapolis, is the second largest publicly held bank holding company in the state. A network of 17 subsidiary banks with 138 banking locations serves the banking and financial needs of customers in Indiana and contiguous states. The corporation, through its subsidiaries, offers a broad range of commercial, retail, and mortgage banking services as well as trust and investment services.

Additionally, under a contract with the U.S. Department of Defense, the corporation's lead bank, Merchants National Bank & Trust Co. of Indianapolis, provides retail banking services to military personnel through 181 military banking facilities in West Germany, the Netherlands, Greece, the United Kingdom, Iceland, Philippines, Diego Garcia and the Republic of Korea.

NASHVILLE, TN (FEB. 20) BUSINESS WIRE - EQUICOR Equitable HCA Corp. has announced the acquisition of Total Health Systems Inc., a managed care company which owns and operates health maintenance operations in New York and New Jersey, which will be merged with an EQUICOR subsidiary.

Total Health serves more than 1,000 employer groups and over 120,000 members through its managed care plans in the two states.

Total Health's New York operation, Total Health HMO, has approximately 30,000 members in New York city's five boroughs and in Nassau and Suffolk counties on Long Island. Fifteen hospitals and more than 450 primary care physicians, 1,000 specialists and 75 dentists provide services to Total Health HMO members.

Total Health of New Jersey Inc., known as CoMED HMO, serves more than 87,000 members throughout the state with a network of 36 hospitals, more than 1,000 primary care physicians and 1,500 specialists. CoMED serves approximately 10 percent of New Jersey's HMO members.

''Through the Total Health plans, EQUICOR now offers a quality managed care option to our employee benefit clients in New York and New Jersey,'' said EQUICOR Northeast Region President Roger Jones. ''The Total Health plans are doing an excellent job serving their members and we anticipate that both plans will continue to operate much as they have before.''

The two HMOs will continue to operate under the same names -- CoMED in New Jersey and Total Health HMO in New York -- for the present, according to Jones. Bruce Carpenter will remain as president of Total Health Systems Inc.

EQUICOR is a national employee benefits company which is the sixth largest group life and health insurer in the United States. EQUICOR manages premiums and premium equivalents of $5.5 billion and had revenues of more than $2.5 billion for 1989.

EQUICOR's products include indemnity insurance plans, such as health, life dental and long-term disability; health-care cost-containment strategies; a full array of managed care products, including a network of EQUICOR Health Plan health maintenance organizations and EQUICOR Preferred PPOs; claims administration and other employee benefit services.

Headquartered in Nashville, EQUICOR covers 10 million employees and dependents nationwide under its various benefits plan. EQUICOR has 7,400 employees located at approximately 80 offices nationwide.

NEW ORLEANS (FEB. 20) BUSINESS WIRE - Freeport-McMoRan Inc. (NYSE: FTX) announced Tuesday that it had entered into an agreement to sell its shares in Freeport-McMoRan Gold Company (NYSE:FAU) for $17 per share or aggregate cash proceeds of approximately $428 million.

This sale is part of a transaction separately announced today involving a tender offer for all shares of FAU at $17 per share. The sale will result in an after-tax gain, net of minority interests, to FTX of approximately $170 million.

James R. Moffett, chairman of the board and chief executive officer of FTX said, "The sale by FTX of its interest in FAU represents a significant step in implementing the strategic restructuring plan announced on Nov. 29, 1989.

Proceeds from the sale will be used to reduce existing debt, thereby providing enhanced financial capability as FTX makes the substantial investments required to develop the previously announced world-class discovery of copper/gold in Indonesia and of sulphur in the Gulf of Mexico."

VAN BUREN, AR. (FEB. 20) BUSINESS WIRE - The common stock of Gemini Capital Corp. began trading on Jan. 16 in the NASDAQ market, Donald L. Walker, president and chief executive officer announced.

Gemini Capital Corp., whose trading symbol is GEMI is an oil and gas company based in Van Buren, Ark., whose major activity is re-entering and recompleting existing oil and gas wells in the Southern Texas area.

Gemini has acquired interests in extensive leasehold in San Patricio and Jim Wells counties, Texas, and have numerous well bores that were drilled in the 40s and 50s and abandoned in the late 50s or early 60s.

At the time the wells were abandoned, oil was selling for $3.50 per barrel and there was no market for natural gas. By re-entering these existing wells, Gemini has found virgin gas zones that have never been produced and is currently producing gas and oil.

Walker stated that Gemini's re-entry program continues to be successful, noting that they have just recently completed two additional wells. One, the Womack 2, began flowing into the Enron Pipeline on Jan. 24 at a rate of approximately 250 mcf gas per day and a small amount of condensate.

The second, the Lundberg 2, has been completed and is waiting on a pipeline connection at this time and is expected to produce in excess of 200 mcf of gas per day. These are in addition to the W.L. Roots 1 wll and the Ross Boothe 1 well, which were completed in late 1989.

''There are two drilling rigs now working full time on the South Texas leasehold,'' said Walker. ''With the expectation that each rig can complete a re-entry procedure in approximately 10 days.''

According to Walker, the operator Lucros International Corp. who owns one of the rigs and has contracted for the use of the other, has arranged for funding to complete an additional 15 to 20 wells.

''We hope to be adding between three and five new producing wells per month to our inventory,'' said Walker. ''This will give Gemini dramatic growth both in the short term and the long term.''

Gemini owns 33 percent working interest in the leases and is continuing to negotiate for additional leasehold.

APPLETON, WI (FEB. 20) BUSINESS WIRE - Preston H. Wilbourne, chairman, president and chief executive officer, has announced the appointment of William J. Andres and William H. Geenen to serve on the board of directors of both the airline, Air Wisconsin Inc., and the holding company Air Wis Services Inc.

Following action by the board of directors authorizing an increase in the board to 13 members, both corporate officers of the company will begin their term effective March 1, 1990.

Effective with the previously related May retirement of Wilbourne from his positions as president and CEO of both the holding company and the airline Wilbourne will remain as chairman of the board of both companies while Andres will assume the position of president and chief executive officer of both companies.

Andres, 46, has held the position of executive vice president and chief operating officer of Air Wisconsin Inc. since joining the airline in 1987 after serving in executive positions with United Airlines.

William H. Geenen, 52, has virtually been associated with the airline since inception in 1965, initially as the company's outside auditor.

In 1970, Geenen joined Air Wisconsin Inc., as controller and was elected treasurer in 1977. Elected as vice president of the airline in 1980, he currently is the chief financial officer as vice president and treasurer of the holding company and Air Wisconsin Inc.

Air Wisconsin is designated by the U.S. D.O.T. as a ''national carrier.'' Through a joint marketing agreement with United Airlines, the airline has been operating as ''United Express'' in all markets since 1986.

Air Wis Services Inc. is a publicly owned corporation whose stock is traded on the National Market System under the NASDAQ symbol ARWS.

HOUSTON (FEB. 20) BUSINESS WIRE - Units of Transco Energy Co. (NYSE:E) and Arkla Inc. (NYSE:ALG) jointly announced Tuesday that they have asked the Federal Energy Regulatory Commission (FERC) to approve a series of major proposals involving access to one billion cubic feet per day of domestic natural gas supplies from the Arkoma Basin in Oklahoma and Arkansas and the Anadarko Basin in Oklahoma.

Texas Gas Transmission Corp., Transco's unit headquartered in Owensboro, Ky., and Arkla Energy Resources (AER), a unit of Arkla Inc., have filed a joint application requesting authority for Texas Gas to acquire an undivided ownership interest in a 225-mile pipeline and related facilities (referred to as Line AC), which are already under construction by AER.

Line AC, which will include both 36 and 42-inch pipeline will stretch from Wilburton, Okla., to Glendale, Ark., and includes 19,250 horsepower of compressor facilities which AER will build at its New Malvern Compressor Station in Hot Spring County, Ark. The total cost of the AER facilities is approximately $240 million.

Texas Gas has requested authority to acquire an undivided ownership interest in Line AC at a cost of approximately $72.2 million. Texas Gas will initially own an interest equal to 300 million cubic feet of gas per day (MMcf/d) of capacity in Line AC.

In a separate filing with FERC, Texas Gas seeks authority to construct 69 miles of 30-inch pipeline (the Crossover Line) from the terminus of Line AC at Glendale, Ark., extending eastward to Texas Gas' mainline system near Cleveland, Miss.

The Crossover Line will have capacity of 500 MMcf/d. Texas Gas also requests authority to install 15,900 horsepower of compression at Glendale. The total cost of the proposed Crossover Line and related facilities is $83.6 million.

Pursuant to a separate application filed by AER on Oct. 31, 1989, Texas Gas will have the opportunity to purchase up to 350 MMcf/d under a 10-year sales service agreement with AER. Texas Gas has the right to begin purchasing 50 MMcf/d upon certification, increasing to between 75 and 100 MMcf/d one year after commencement of service, and up to 350 MMcf/d by 1995.

Arkla Inc., based in Shreveport, La., is a balanced gas company engaged in the transmission, distribution, exploration and production of natural gas.

Transco Energy Co., headquartered in Houston, is a producer, supplier and transporter of energy.

ATLANTA (FEB. 20) BUSINESS WIRE - In a speech delivered in San Diego to the National Association of Secondary School Principals (NASSP), R.E.

''Ted'' Turner, board chairman and president of Turner Broadcasting System Inc. (ASE:TBS.A, TBS.B), announced that CNN NEWSROOM, CNN's news program for schools, would be extended on a year-round basis.

Turner also announced that 7,000 schools had enrolled to use the program, which was launched at the beginning of the school year, and that over half the schools enrolled already were using CNN NEWSROOM.

''We at Turner Broadcasting are very happy to make CNN NEWSROOM available on a year-round basis for use in summer schools and by families who wish to use the program at home,'' Turner said. ''We also are very pleased that 7,000 schools have enrolled to use CNN NEWSROOM, and that, according to our surveys, over half those enrolled are actively using the program.''

Turner Educational Services will continue to produce daily classroom guides and provide them to teachers through the summer. These daily guides supplement the content of each day's newscast.

''The commitment of Turner Broadcasting to expand CNN NEWSROOM throughout the summer clearly establishes CNN as the news organization that really cares about a student's education,'' said Scott Thomson, NASSP executive director.

CNN NEWSROOM is provided as a public service of TBS and the cable industry. The 15-minute commercial-free daily newscast airs at 3:45 a.m. (ET), to be taped and replayed for classroom use. The program covers each day's top stories and provides in-depth features especially designed for the classroom.

CNN NEWSROOM debuted in September 1989 with an enrollment of just over 1,000 schools. Today's enrollment is in excess of 7,000 schools, with 10,000 expected by September 1990.

DALLAS (FEB. 20) BUSINESS WIRE - The board of directors of National Heritage Inc. (NYSE:NHR) Tuesday announced a number of officer appointments to more accurately reflect corporate responsibility at the nursing home management concern.

Hugh C. Shurtleff, formerly chairman and president, adds the title of

chief executive officer to his continuing role as chairman of the board. In addition to his position at National Heritage, Shurtleff serves as assistant to the chairman of Sybra Inc., a franchisee of Arby's Restaurants and is a director of Southmark Corp.

Before his retirement in early 1989, Shurtleff served as chairman of Sybra and as a senior executive of several public companies including T.I.M.E.-DC Inc., and Valhi Inc.

Robert M. Galecke, formerly vice chairman and executive vice president, has been promoted to president and chief operating officer while continuing as vice chairman. Galecke also serves as executive vice president and treasurer of Southmark Corp.

Prior to joining Southmark in 1986, Galecke was president and chief operating officer of Amrecorp Realty Inc., a property management company. Galecke was formerly executive vice president of First Bank Milwaukee and with the U.S. Treasury in banking regulation.

Joseph L. Rzepka was appointed chief financial officer, removing an earlier interim designation. Rzepka, a certified public accountant, continues as vice president and chief accounting officer. Since 1984 Rzepka has held increasingly responsible financial positions with National Heritage and its related companies.

Before joining National Heritage, Rzepka held various accounting positions with Finalco Inc., Stuart Petroleum Co. and Federal-Mogul Corp.

James D. Shelton was named to the vacant position of corporate controller. In addition to his duties at National Heritage, Shelton is senior assistant treasurer of Southmark Corp. where he has primary responsibility for servicing a $500 million mortgage portfolio.

National Heritage Inc. is one of the nation's leading managers of nursing homes, retirement centers and assisted living facilities.

MILWAUKEE (FEB. 20) BUSINESS WIRE - Autotrol Corp., Milwaukee, (NASDAQ:AUTR) Tuesday reported continued improvement in operating performance for the year and the fourth quarter ended Dec. 31, 1989.

For the three months, net income was $247,866 (13 cents per share) as compared with a net loss of $3,087,662 ($1.58 per share) a year earlier.

The 1988 fourth quarter included an addition to reserves related to operations discontinued in 1982. Sales were $8,261,449, up 7 percent from $7,736,672 a year earlier.

For the year, net income was $1,769,260 (91 cents per share) as compared with a loss of $2,433,633 ($1.25 per share) in 1988. Sales rose 9 percent to $34,700,923 from $31,849,721 a year earlier.

''Operating results of 1989 reflect our emphasis on and investment in activities of proven potential and profitability,'' James W. Schwerdt, president, said. ''The controls group continued its excellent performance and Aquatrol Corp. met objectives for operating improvement.''

Autotrol Corp. designs and manufactures process controls and systems used principally in the treatment of water and wastewater. The company serves residential, industrial, commercial and municipal markets.

NEW YORK (FEB. 20) BUSINESS WIRE - Tyco Toys Inc. (NASDAQ:TTOY) announced sales of $384,145,000 for the year ended Dec. 31, 1989 compared to $263,764,000 for 1988, an increase of 45.6 percent.

Net income for the year ended Dec. 31, 1989 was $15,681,000 or $2.33 per share ($2.25 fully diluted), compared to $11,700,000 for 1988, or $2.02 per share ($1.96 fully diluted).

For the fourth quarter of 1989, the company reported net sales of $115,234,000 compared to $63,332,000 for the 1988 period. Net income for the fourth quarter was $3,360,000, or 46 cents per share (46 cents fully diluted), compared to $2,712,000 for 1988, or 47 cents per share (45 cents

fully diluted).

Richard E. Grey, president and chief executive officer of Tyco, stated, ''The record sales and earnings were due to new 1989 products including the Oopsie Daisy doll and Hot Lixx computerized guitar, continuing products including radio control, Super Dough and food, combined with the third quarter acquisition of View-Master Ideal.''

Grey added, ''Given the strong trade acceptance of our 1990 line and our backlog position, we expect record sales and earnings in 1990.''

Grey also stated that the Board of Directors of Tyco had appointed Arnold Thaler to fill the remaining vacancy on the Tyco board. Thaler is chairman of View-Master Ideal Group Inc., which Tyco acquired in September 1989.

Tyco Toys Inc., is the fifth largest toy manufacturer in the United States marketing a broad line of toys.

HARTFORD, CT. (FEB. 20) BUSINESS WIRE - Aetna Tuesday denied allegations by the New Jersey Insurance Department that the company overcharged the Joint Underwriting Association (JUA) in its former role as a servicing carrier.

''Aetna has conducted its business properly and served its customers well in New Jersey,'' said John J. Martin, president of the personal financial security division. ''We do not owe the state one cent, and we're confident that a full review of the matter will support our position. This proceeding is totally without merit. Instead of dealing with the facts and looking for a real solution to the JUA problem, state officials continue to look for a scapegoat.''

Martin also said, ''This action is yet another outrageous example of state officials attempting to lay the blame for the JUA deficit at the industry's doorstep. More than three years ago, Aetna tried to persuade the state government to take the action needed to prevent the JUA's insolvency and to put it on a sound financial footing. Our recommendations were unheeded then.

''Now a new set of state officials has the unbelievable gall to try to blame this mess on us. This is nothing more than an expensive fishing

expedition to generate support for allegations that a previous administration could not substantiate.

''By today's action, the state has admitted that the surveys conducted by the previous administration were not full financial audits,'' Martin said. ''The misleading allegations by former Commissioner Merin in August 1989 were based on speculation and erroneous interpretaions. We didn't owe any money then, and we don't owe any money now.''

WASHINGTON (FEB. 20) COMTEX - The 10-Q report filed at the NASD shows American Consolidated Gold Corp. omitted filing a 10-Q financial statement of operations (Part I of its 10-Q), claiming exemption under Regulation 240, 13a-13(c)(3).

That regulation permits such an omission for mining companies primarily engaged in exploration for or the development of mineral deposits other than oil,gas or coal, with certain provisions of nonproduction and negligible production profits. As American Consolidated claims to meet these requirements, it exempted itself from filing.

#90051c0046 02/20/1990 ~Comtex
WASHINGTON (FEB. 20) COMTEX - A Senate panel heard testimony today on a bill sponsored by Sen. Daniel Inouye (D-HI) which would prohibit the loaning or leasing of soft drink equipment at less than fair market value.

The proposed legislation was brought about because of complaints that Coca-Cola Co. and PepsiCo Inc. are offering restaurants and other fountain customers dispensing equipment at little or no charge.

Proponents of the measure say these actions inhibit competition because small, independent equipment distributors cannot compete with Coke or Pepsi when they simply give away their equipment for free or at a huge discount. In addition, bottlers and independent beverage dispensers claim that when these large syrup manufacturers engage in these practices, other soft drink products are displaced because the beverage dispensing equipment is usually equipped to dispense only the syrup flavors that the manufacturer produces.

Opponents charge that existing antitrust laws are adequate to halt any equipment leasing practice that restrains competition and that the bill's economic impact on restaurant and fountain operators would affect the

quality of the products served to the public.

Coca-Cola and PepsiCo currently control approximately 85 percent of the fountain syrup market, leaving 15 percent to all other manufacturers.

A small distributor of soda fountain equipment and syrup claims that policies and forces in the marketplace directly attributable to the two dominant cola manufacturers has placed his 40-year-old family owned business in jeopardy.

"We cannot compete with free equipment; we cannot compete with small margins on syrup and still cover our overhead," Brook Jason, president of Jason Soda Systems Inc., told the Senate Subcommittee on Antitrust, Monopolies & Business Rights. "While I truly believe that it is not the intent of either Coke or Pepsi to put companies like ours out of business, we are caught in the proverbial 'squeeze play'. We do not have the buying power nor do we have the staying power long term to meet this type of unfair competition."

Mark A. Imbesi, general manager of Imbesi Bottling Group which is a 7UP/RC bottling company, said that competitors provide dispensing equipment free of charge in an effort to exclude competition.

"One of the major customers lost due to this program was ARA, the largest vending and food service company in the country," Imbesi said. "I was told by their vice president of purchasing that he likes 7UP and would like to continue using 7UP. However, if ARA did stay with 7UP, they would jeopardize the free equipment programs that had been introduced by our competitors.

The chairman of the National Soft Drink Association (NSDA), a national trade organization of the United States soft drink industry, countered that if the bill is enacted into law, it will hurt and not help smaller retailers.

"Subsidizing purchases of fountain dispensing equipment, which serves a finished beverage product to the consumer, is a prudent business policy for beverage suppliers for the simple reason that it places the burden of beverage quality and maintenance squarely on the beverage supplier," Alfred Griggs said. "Both the retailer and the bottler/supplier have high mutual concern for maintaining the highest quality possible for beverages at the lowest possible costs."

A spokesperson for the National Restaurant Assocation (NRA), a trade organization for the foodservice industry, said the assocation is opposed to the bill for a number of reasons.

"We are particularly concerned with the bill's certain economic impact on

operators, its likely effect on the quality of products we serve our customers, and the fact that it singles out just one among many similar promotional tools for prohibition," said Mark Gorman, senior director of government affairs for the association.

When Gorman told Sen. Howard Metzenbaum (D-OH) that the NRA had not undertaken a vote by its board of directors or a convention ballot on whether it supports the proposed the legislation, Metzenbaum wanted to know if Gorman was sure his testimony did indeed represent the NRA on this issue.

"If you have 150,000 restaurants, many may not be happy to see that McDonald's, Wendy's, and other large restaurants are getting free (soda fountain) equipment," Metzenbaum said.

"In consultation with our board members we know our association members are against the bill," Gorman said.

Metzenbaum urged Gorman to send a mail poll to his 150,000 members to vote for or against the legislation and Gorman said he would put the issue before his board of directors.

WASHINGTON (FEB. 20) COMTEX - Beaver Creek Silver Co. Inc. filed a registration statement with the NASD relating to 2.93 million shares of its common stock issuable upon the exercise of the company's Class A and B warrants. The prospectus also relates to the offering of up to 439,950 shares of common stock issuable upon the exercise of the company's 146,650 outstanding selected dealer's warrants in connection with the company's initial public offering.

The common stock of the company is quoted in the over-the-counter market. On Dec. 29, 1989, the National Quotation Bureau's pink sheets reported a

$0.01 bid and $0.10 asked price per share.

Beaver Creek is engaged in the development and production of mineral properties.

The company has had no operating revenues to date, had a stockholders' deficit of $393,421 and had a working capital deficit of $504,221 through Sept. 30, 1989.

Its executive office is located at 333 Skokie Blvd, Suite 106, Northbrook, IL 60062 and its telephone number is (708) 564-8100.

#90051c0059 02/20/1990 ~Comtex

WASHINGTON (FEB. 20) COMTEX - Executive Telecard Ltd. filed a Form 8-K

with the NASD stating on Feb. 9, 1990, subject to the approval of the Federal Communications Commission, Service 800 S.A. entered into a restructuring transaction. Pursuant to the restructuring agreement, Service 800 acquired 5.4 million shares of common stock of International 800 Telecom Corp. and eliminated $1.75 million of debt to Network Data Systems Ltd.

Service 800 is a wholly-owned subsidiary of International 800 Telecom Corp.

Worldwide 800 Services Inc, a privately owned company which owned 5.86 million shares of International 800 or 55% reduced its position to 461,000 shares or 9%. Network Data Systems, a Canadian public owned corporation who is the holder of 2 million shares of common stock of Executive Telecard increased its position from 19% to 38%.

In connection with the aforementioned transaction, Network Data Systems received 600,000 shares of the common stock of the company formerly owned by Worldwide 800 Services.

As a result, Worldwide 800 Services reduced its position in Executive Telecard to zero and Network Data Systems increased its position to 20%.

International 800 continues to hold 166,664 shares of Executive Telecard common stock and an option to purchase 1 million shares at $5.00 per share.

LONDON (FEB. 20) - The National Westminster Bank on Tuesday reported that its pre-tax profits for 1989 were down 71 percent on the previous year after further provision for non-performing loans to the Third World.

Pre-tax profits were down at 404 million pounds (686 million dollars) compared with 1.4 billion pounds (2.3 billion dollars) the previous year.

Analysts had been expecting a figure of between 410 million pounds and 490 million pounds.

TOKYO (FEB. 20) - Japan's Mitsubishi Heavy Industries Ltd. said it had finalised an agreement Tuesday with General Dynamics Inc. of the United States to develop a controversial new-generation jet fighter known as the FSX.

The agreement involves the two firms developing the aircraft with two other Japanese companies - Kawasaki Heavy Industries Ltd. and Fuji Heavy Industries Ltd. - at Mitsubishi's aerospace works in Nagoya, a statement said.

The announcement coincided with the arrival in Japan of U.S. Defense Secretary Dick Cheney who is expected to raise the issue of the joint development of the aircraft when he meets with Japanese officials.

The proposed joint development, agreed last year, still faces a number of

hurdles in Washington where several congressmen and administration officials are concerned about transfers of technology to Japan.

General Dynamics builds the F-16 aircraft while Mitsubishi Heavy is Japan's biggest arms manufacturer.

Kawasaki Heavy also plays a leading role in the country's defence industry, specialising in aircraft and submarines, while Fuji Heavy has recently strengthened its aircraft divsion.

#90051d4350 02/20/1990 ~French/German News Agency

MELBOURNE, Australia (FEB. 20) - Westpac Banking Corporation Ltd. Tuesday bought a 7.5 percent stake in the ANZ Banking Group Ltd., apparently to thwart its rival merging with the third of Australia's big three trading banks.

Westpac said in a statement it had made the purchase, worth some 415 million dollars (about 315 million U.S.), "after becoming aware that a major holder was a willing seller."

With its purchase of the Adelaide Steamship Co. Ltd's 7.5 percent stake Westpac became the biggest single shareholder in the ANZ Bank.

ANZ has long been seen as a potential merger partner for National Australia Bank Ltd. (NAB), the other member of the big three.

Analysts said Tuesday's move by Westpac effectively wiped out any chance of an NAB-ANZ merger for at least 18 months.

NAB, which recently purchased Britain's Yorkshire Bank Plc, holds about four per cent of ANZ shares.

Analysts said that senior Westpac executives were opposed to a merger and may have bought into ANZ as a strategic blocking stake.

Westpac managing director Stuart Fowler said the purchase was not expected to have any impact on his bank's earnings "due to our strong gearing ratio and the amount invested in short-term liquids."

Westpac paid 6.10 dollars for each ANZ share, well above their closing

price of 5.72 dollars.

#90051d4920 02/20/1990 ~French/German News Agency
PARIS (FEB. 20) - French tyremaker Michelin plans to raise 750 million dollars on the international financial market in the coming weeks, J.P. Morgan, which is involved in handling the operation, said here Tuesday.

Michelin said that the operation was designed to "re-establish the financial balance in general terms."

J.P. Morgan, which is handling the operation with Salomon Brothers, said that the operation would go ahead regardless of the U.S. government's position on Michelin's acquisition of tyremaker Uniroyal Goodrich.

Michelin said in September it was buying Uniroyal, North America's second largest tyremaker and the fifth in the world, for 1.5 billion dollars, including taking over 810 million dollars in debt.

The purchase requires the approval of both the U.S. and Canadian governments.

J.P. Morgan said that Michelin was seeking 750 million dollars over 15 years, repayable at any time.

The interest rate would be fixed for the first five years at 0.575 percent above the London interbank offered rate (Libor), which stood at 8.3 percent in London Tuesday.

For the next five years, the rate would be variable to a ceiling of 0.9 per cent above Libor and for the last five years the ceiling would be Libor plus 1.2 percent.

FRANKFURT, West Germany (FEB. 20) - Major West German groups Degussa and

Merck said Tuesday they planned to establish close links in the pharmaceutical sector, where they consider their current operations too small.

Precious metals group Degussa said it had said up a joint commission with Merck to study possible areas of cooperation in the pharmaceuticals sector.

Both companies said they considered their individual pharmaceuticals operations too small to support the heavy costs of research needed to ensure their survival.

Degussa's pharmaceutical sector accounted for only 1.12 billion Deutsche marks of the group's total turnover of 14.4 billion Deutsche marks in the year to the end of September, while Merck realises less than half its sales in pharmaceuticals.

#90051p0016 02/20/1990 ~PR Newswire
SACRAMENTO, CA (FEB. 20) PR NEWSWIRE - Occupational-Urgent Care Health Systems Inc. (NASDAQ: OUCH) today announced fourth quarter and 1989 results. Revenues for 1989 were $17,868,000, up 60 percent from $11,178,000 in 1988. Pretax profits rose 78 percent to $6,055,000, compared to $3,408,000 in 1988. Net income was $3,625,000 (37 cents per share), up from $2,208,000 (24 cents per share).

The fourth quarter of 1989 saw revenues grow to $4,604,000, compared to $3,479,000 in the like period in 1988. Pretax profits were $1,526,000, up from $539,000. Net income was $908,000 (9 cents per share), compared to $343,000 (4 cents per share). The growth in earnings per share comes despite a higher effective tax rate and a larger number of shares used in the per share calculation compared to 1988.

"We have begun shifting claims processing for certain of our customers to the Electronic Data Systems Corp. (EDS) system," stated OUCH President W. Robert Keen. "Consistent with the schedule we set up last June, transition to the EDS claims processing system is expected to be complete by the end of March."

"We have also recently brought on board several key marketing, sales and customer service executives. We believe these additions, along with our comprehensive approach to cost containment and the highly sophisticated

communications and claims processing tools we offer, positions us well within an industry for which we see extraordinary growth opportunities in the 1990s."

OUCH provides comprehensive medical and administrative cost containment programs to insurance carriers, third party administrators and employers. The company is headquartered in Sacramento.

#90051p0018 02/20/1990 ~PR Newswire

CONCORD, CA (FEB. 20) PR NEWSWIRE - Fibreboard Corp. (AMEX: FBD) announced today that Superior Court Judge Ira A. Brown Jr. has entered a Final Judgment in the ongoing asbestos insurance coverage trial which began in 1985. The Final Judgment affirms the tentative decisions previously announced in favor of Fibreboard regarding its insurers' obligation to provide coverage for personal injury claims. Fibreboard expects the insurers to file post judgment motions for reconsideration and to appeal the trial court judgment.

The Final Judgment provides that Continental Casualty Co. (Continental) and Pacific Indemnity Co. (Pacific) are obligated to Fibreboard to pay all defense and up to $500,000 in indemnity costs associated with each personal injury claim involving a first date of exposure to asbestos

products prior to March 1959 (as to Continental) and prior to May 1957 (as to Pacific). There is no aggregate limit on the number of claims for which Continental and Pacific are liable. Furthermore, a jury in phase six of the consolidated trial returned a verdict against Pacific awarding Fibreboard $6.1 million in compensatory damages for costs Fibreboard incurred prior to April 1985.

Commenting on the Final Judgment Fibreboard Chairman and President Lawrence C. Hart stated, "We are relieved that the trial phase of this 10-year-old legal action has finally ended with the Final Judgment being entered in our favor. While the appeal process is not anticipated to be concluded before 1992, and possibly later, we are nevertheless gratified to be one step closer to compelling our insurers to provide the coverage that we are entitled to."

Prior to 1972, Fibreboard was one of several companies to manufacture products containing asbestos. All use of asbestos in Fibreboard products ceased in 1971. Fibreboard has been named as a defendant in many thousands of personal injury claims for injuries alleged to have been caused by exposure to asbestos-containing products.

Fibreboard Corp., headquartered in Concord, manufactures lumber, hardwood plywood, moulding and millwork, agricultural container components, composite structural lumber, precision molded industrial insulation and fireproofing materials. It also owns and operates Northstar-at-Tahoe, a ski resort and year-round vacation and conference center in California.

TORRANCE, CA (FEB. 20) PR NEWSWIRE - A cooperative agreement was announced today by Ashton-Tate Corp. (NASDAQ: TATE) and General Parametrics (NASDAQ: GPAR). Ashton-Tate's recently introduced graphics software, APPLAUSE II, now supports General Parametric's line of VideoShow electronic presentation products.

A portable electronic presentation unit, the VideoShow system uses disks prepared on a personal computer. It can be connected to any color monitor or large screen video projector to give full color, high resolution presentations. The system has achieved a high degree of corporate acceptance and is used by more than 90 of the Fortune 100 companies.

APPLAUSE II is a new business graphics application designed for a broad range of corporate, business and government users. It features a new graphical user interface; charting, drawing and presentation capabilities; 37 chart types; a variety of output options including video, slides

overheads and charts, and a wide range of color. As the upgrade for the more than 300,000 MASTER GRAPHICS series (CHART-MASTER, SIGN-MASTER, DIAGRAM-MASTER and PRESENTATION PACK) and DRAW APPLAUSE users, APPLAUSE II began shipping last week.

APPLAUSE II is available for $99.95 until March 31, 1990 through an introductory promotion. Thereafter, APPLAUSE II will have a suggested retail price of $495. To locate the resellers nearest them or to obtain product product information, customers can call 800-437-4329.

General Parametrics' VideoShow is immediately available through the General Parametrics authorized reseller network. VideoShow prices range from $3,995 to $8,995. For additional information or to locate the resellers nearest them, customers should call 800-223-0999.

Based in Torrance, Ashton-Tate markets microcomputer business applications for DOS and Macintosh operating systems. Products are available in five major categories: database management systems, word processing, integrated decision support, spreadsheets and graphics. Ashton-Tate also markets a comprehensive line of service and support programs for individuals, corporations and government agencies.

General Parametrics was founded in 1981 and pioneered the electronic presentation industry when it introduced VideoShow in 1984. The company has become a leader in graphics presentation products, offering a complete line of desktop presentation solutions for the IBM and Apple marketplaces.

#90051p0020 02/20/1990 ~PR Newswire

SANTA BARBARA, CA (FEB. 20) PR NEWSWIRE - Geodynamics Corp. (NASDAQ: GDYN) announced today a planned 24 percent increase in facilities and a similar increase in scientific and technical personnel to satisfy requirements of its growing backlog.

Robert L. Paulson, president and chief executive officer, said the addition of approximately 35,000 square feet to four facilities in Colorado, Maryland, California and the District of Columbia will be completed within the within the next several months. The expansion will bring to a total of nearly 220,000 square feet the operating floor space occupied by its nine engineering and development facilities.

In parallel with the facilities expansion, Paulson reported that the company's complement of scientific, engineering and technical personnel will be increased between 10 and 15 percent, in specific categories, "but,

essentially, across the board."

"The expansion in facilities and personnel are the result of both recent and anticipated growth, and to position the company in close alignment with the shifting priorities of a changing defense strategy and military preparedness requirement," Paulson noted. As a strong indicator of the company's growth in its primary markets -- command, control, communications and intelligence systems; strategic weapons systems; and space systems -- the Geodynamics chief executive pointed to the fact that the company's backlog has grown 20 percent in just the past seven months, to a present total of $140,000,000.

"Fueling the rise in backlog," he said, "is the continuing, increased emphasis on more and more sophisticated intelligence and planning systems to support the altered requirements of a changing domestic defense posture."

Geodynamics is a major supplier of specialized systems engineering and software supporting a range of U.S. government intelligence and military applications. Its work is nearly equally divided between contracts its performs as prime contractor and as subcontractor.

#90051p0021 02/20/1990 ~PR Newswire

BOULDER, COL (FEB. 20) PR NEWSWIRE - Hauser Chemical Research Inc., a six-year-old technology company based in Boulder, will be traded on the NASDAQ (National Association of Securities Dealers Automated Quotation System) Over-the-Counter market beginning Feb. 21, 1990, under the symbol "HAUS." Hauser has been traded over-the-counter on the "pink sheets" since 1986 when it became a public company.

Simultaneous with the new NASDAQ listing, Hauser will enact a one for ten reverse stock split, which should make the stock price attractive to market makers who trade higher priced stocks. The new NASDAQ listing and reverse split are expected to broaden interest in the company's stock, according to Chairman and Chief Executive Officer, Dr. Dean P. Stull. Entry into the NASDAQ market provides brokers and others with immediate access to the best bid and asked prices and other information about the company's shares throughout the trading day. Those prices are available over more than 150,000 electronic terminals in brokers' offices throughout the United States and the free world. In addition to increased market visibility, NASDAQ gives Hauser the advantage of multiple market makers that compete to offer the best bid and asked prices, as opposed to a single specialist on the floor of a stock exchange.

Hauser recently met the requirements for inclusion in the NASDAQ system through a merger. As a result of the merger, Hauser Chemical Research Inc. acquired 100 percent of the stock of Hauser Laboratories Inc. in exchange for 4,000,000 shares of common stock. According to audited statements for Hauser Laboratories filed with the merger documents, Hauser Laboratories had revenues of $1,500,781 and proprietor's income of $212,842 in calendar year 1988, and revenues of $1,370,927 and proprietor's income of $104,179 in the calendar year 1987, the last two full years of operation of Hauser Laboratories. The combined companies showed revenues of $3,615,457 for the last full fiscal year ended April 30 1989. Combined total assets were $2,927,254 and combined stockholders' equity was $1,067,957 as of Oct. 31, 1989.

Founded in 1983, Hauser Chemical Research specializes in chemical research chemical analysis, engineering services, petroleum testing and the isolation and purification of high-value products and chemicals from natural sources. In 1984, the company developed proprietary chemical technologies that enable it to isolate and purify extracts and natural compounds at a higher quality level and lower cost than competing technologies. Hauser's proprietary technology has resulted in major contracts with Vipont Pharmaceutical Inc., with the National Cancer Institute for the extraction of natural compounds studied for their effectiveness against cancer and AIDS. The company has recently signed a letter of intent with Fries & Fries to develop vanilla and other extracts for the food industry.

#90051p0026 02/20/1990 ~PR Newswire

RICHMOND, VA (FEB. 20) PR NEWSWIRE - United Dominion Realty Trust, Inc. (NASDAQ-NMS: UDRT) a Richmond, Va.-based real estate investment trust, today reported 1989 funds from operations of $12,164,000 or $1.26 per share compared with $9,091,000 or $1.21 per share for 1988.

This represents an increase of 34 percent overall and 4 percent on a per share basis as a result of the additional shares outstanding in 1989. For 1989, rental income increased 16 percent to $37,173,000 from $32,130,000 last year, income from property operations before depreciation increased 15 percent to $22,937,000 from $19,877,000 last year, and net income increased to $5,474,000 or $.57 per share compared with $1,888,000 or $.25 per share for 1988. Net income for 1989 includes gains on sales of investments of $1,433,000 ($.15 per share), primarily from the sale of a shopping center. No significant gains were reported last year.

For the fourth quarter ended Dec. 31, 1989, the trust reported funds from

operations of $3,839,000 or $.33 per share on rental income of $9,822,000, income from property operations before depreciation of $5,993,000 and net income of $1,631,000 or $.14 per share. Each represents an increase from the fourth quarter of 1988 when funds from operations amounted to $2,651,000 or $.32 per share on rental income of $8,612,000, income from property operations before depreciation of $5,429,000 and net income of $659,000 or $.08 per share.

John P. McCann, president and chief executive officer, stated that despite some weakness in certain real estate markets that increased vacancy rates above levels expected, the trust again achieved record funds from operations for the year. For the trust's mature apartments (5,464 units in 1989 vs. 5,060 units in 1988), average occupancy declined slightly during 1989, while average rents increased 4 percent. The drop in occupancy was attributed to some market weakness at a few locations and an increase in the credit loss at several apartments. The trust has increased the number of apartments owned by 42 percent since the beginning of 1988 by acquiring primarily under-performing apartments that initially have a dilutive effect upon operating results. During 1989, these newer acquisitions (2,268 units) had average occupancy of only 72 percent. For the shopping centers and other commercial properties, occupancy gains at several shopping centers, particularly two that have undergone renovation, were somewhat offset by three larger tenant vacancies.

United Dominion Realty Trust Inc. is a self-administered equity real estate investment trust that owns and operates primarily aprtments but also shopping centers in the Southeast from Virginia to Georgia. The trust specializes in purchasing properties that can be upgraded by capital improvements and new management. The trust's common stock is traded in the National Market System of NASDAQ under the symbol "UDRT".

MOUNTAIN VIEW, CA (FEB. 20) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced price reductions for the IRIS POWER Series(TM) family of superworkstations. Price reductions include all POWER Series GTX graphics systems, server systems and system memory.

"The parallel RISC technology in the POWER Series has made these systems extremely popular among users who have high computational requirements," said Thomas Jermoluk, vice president, Advanced System Division. "With these aggressive price reductions we are able to bring the industry's leading parallel processing technology to more users and continue the long-term expansion of the POWER Series installed base."

Prices on the POWER Series graphics systems have been decreased by up to 21 percent - from $94,900 to $74,900 for the 4D/210 GTX. POWER Series server prices have been reduced by up to 36 percent - from $54,900 to $34,900 for the 4D/210S. Depending on the configuration, memory price reductions range from 50 percent to 67 percent.

Silicon Graphics, Inc. is the leading manufacturer of high performance workstations and computing systems for three dimensional applications. These workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulation of three dimensional products and services. The company's stock trades on the New York Stock Exchange under the symbol SGI.

IRIS is a registered trademark and IRIS POWER Series(TM) is a trademark of Silicon Graphics, Inc.

ATLANTA (FEB. 20) PR NEWSWIRE - Georgia Gulf Corp. (NYSE: GGG) announced today that it has entered into a definitive agreement to sell its subsidiary, Freeman Chemical Corp., to Cook Composites and Polymers, a joint venture formed by Cook Paint and Varnish Co., a Kansas City-based specialty chemical company and Total-Chimie S.A., a large French-based specialty chemical manufacturer.

Freeman manufactures and markets four specialty chemical product lines, including polyester resins, coating resins, urethane systems and polyester polyols and has annual sales in excess of $100 million.

Georgia Gulf said the purchase price for Freeman Chemical is $69.0 million cash, subject to certain adjustments, and the transaction is expected to close in early April of 1990.

James R. Kuse, chairman and CEO of Georgia Gulf, said "While Freeman held considerable promise for Georgia Gulf, the combination of Freeman and Cook Composites and Polymers will be a powerful force in the markets it serves and combines the extensive capabilities of the partners in manufacturing, technology and marketing."

In reference to the company's announced Plan of Recapitalization, Kuse noted the sale would not have a significant effect upon the Company's Plan and was a decision made independent of the Recapitalization.

#90051p0029 02/20/1990 ~PR Newswire

RICHMOND, VA (FEB. 20) PR NEWSWIRE - United Dominion Realty Trust, Inc. (NASDAQ-NMS: UDRT), a Richmond, Va.-based real estate investment trust, announced that it has received a private letter ruling from the Internal Revenue Service that will permit the trust to manage its own apartments, shopping centers and other properties.

All of the trust's apartments are presently managed by Summit Realty Group Inc., and most of the trust's shopping centers and other commercial properties have been managed by Planned Property Realty Corp. The ruling will permit the trust to directly employ leasing, property management and other property personnel.

The trust also announced that it has reached an agreement in principal with Summit Realty Group Inc. under which the trust will begin managing its own apartments effective Jan. 1, 1991. Barry M. Kornblau, president of Summit Realty Group Inc., will become an employee of the trust and will have responsiblity for the trust's apartment operations, which represent about 75 percent of its real estate portfolio. Summit's two other senior officers, Curtis W. Carter and Charles E. Walker, have also agreed to become employees of the trust, when the trust assumes management.

Earlier this year, the trust assumed the management of 16 of its 19 shopping centers and other commercial properties which have been managed by Planned Property Realty Corp. The trust is contractually obligated on the other three commercial properties to others.

John P. McCann, president and chief executive officer, stated: "We are extremely pleased with the favorable ruling from the IRS that will allow us to directly manage our properties. Beginning in 1991, we will be a fully integrated real estate organization with acquisitions, construction and operations all together. We expect in-house property management to provide certain cost savings and other benefits to the trust."

United Dominion Realty Trust Inc. is a self-administered real estate investment trust that owns and operates primarily apartments but also shopping centers in the Southeast from Virginia to Georgia. The trust specializes in purchasing properties that can be upgraded by capital improvements and new management. The trust's common stock is traded in the National Market System of NASDAQ under the symbol "UDRT".

#90051p0031 02/20/1990 ~PR Newswire

HOUSTON (FEB. 20) PR NEWSWIRE - Compaq Computer Corporation (NYSE:CPQ) sales in Europe passed the $1 billion mark in 1989, the company announced yesterday at an international press conference held in Paris.

"We added another $500 million to our international sales last year," said Eckhard Pfeiffer, Compaq president of Europe and International.

"This brought total international revenues outside North America to $1.3 billion, with Europe contributing 93 percent or $1.2 billion," he said.

This significant increase in sales moved Compaq to the No. 2 market share position in the European business PC market, according to Paris-based market research firm, Dataquest Europe. The research showed Compaq with a 9.5 percent estimated market share in value in 1989, a 2.4 percent point gain over 1988 and reflects a 65 percent growth overall across European markets compared to a market growth rate of 35 percent.

"As markets become larger, we naturally expect growth rates to slow in Europe, but industry analysts forecast that good growth should continue in Europe through at least 1992, and that U.S. market growth rates are expected to slow to around 10 percent," Pfeiffer said. "Compaq's European and other international sales could equal or surpass Compaq sales in the U.S. market in the same time frame," he added.

Compaq, which entered the European market with companies in Germany, the United Kingdom and France in 1984, now operates 11 wholly owned European subsidiaries, doing business through more than 1,500 authorized COMPAQ computer dealers. During the next several months the company will open wholly owned subsidiaries in Austria and Finland.

The company moved quickly to establish European manufacturing by opening a plant in Scotland in November 1987. Compaq in 1989 purchased the former Wang Laboratories plant at Stirling, Scotland, to house its international service and repair operations.

"The Scottish plant produced 49 percent of all COMPAQ personal computers shipped to international markets in 1989, a key factor in enabling Compaq to meet market demand for its products," Pfeiffer said.

Compaq Computer Corporation is a world leader in the manufacture of PC systems and desktop, portable and laptop personal computers. COMPAQ products are sold in 61 countries through a network of more than 3,000 authorized COMPAQ computer dealers.

NEW YORK (FEB. 20) PR NEWSWIRE - AmBase Corporation (NYSE: ABC) today announced that it has retained The First Boston Corporation to offer for sale its three insurance subsidiaries, The Home Insurance Company, US International Re, and Commonwealth Insurance Company. After an exhaustive study of its strategic and financial alternatives, in consultation with McKinsey & Co. and The First Boston Corporation, the Board of Directors concluded that the sale of the Company's insurance operations was in the best interests of its stockholders.

Marshall Manley, president and chief executive officer, said that the company was taking this action because it believes the company's shares are significantly undervalued. "Our recent share price does not fairly represent the inherent value of our Company. We have very fine subsidiaries which are operating profitably. AmBase reported a 1989 net income of $96 million or $2.82 per share. Certainly, the 1989 results do not justify the low multiple the market is according our stock.

"Upon the successful completion of the sales, the proceeds will be used to repay the company's outstanding debt. And, in conjunction with the sale of The Home, which requires regulatory approval, First Boston will advise AmBase with respect to a special dividend to stockholders. We felt it was prudent in the current environment for the company to be proactive in trying to obtain maximum value for our stockholders.

"Each of our insurance companies is a solid performer and has very good prospects. The Home's top flight management team has successfully transformed the company by executing a strategy that focused on larger risks and specialized coverages. The Home has steadily improved its combined ratio over the past four years, and in 1989 its combined ratio was better than the industry average. USI Re and Commonwealth, our Canadian subsidiary, have both consistently performed at top levels for the past four years," concluded Manley.

AmBase Corporation is an insurance, banking and investment services organization. Other subsidiaries include Carteret Bancorp, Gruntal Financial Corp. and Sterling Forest Corporation. The company's investment services and banking subsidiaries are operating profitably, well capitalized and positioned for improved performance in the 1990s.

ORANGE, CA (FEB. 20) PR NEWSWIRE - Bergen Brunswig Corporation (AMEX: BBC) today announced that its board has authorized a tender offer for up to $40 million principal amount of its 6-7/8 percent exchangeable subordinated debentures due 2011 at $800 per $1,000 principal amount of the debentures (the "exchangeable debentures").

The Exchangeable Debentures are currently exchangeable at the rate of $14.88 per share for Class A common stock of Commtron Corporation (AMEX: CMR) owned by Bergen Brunswick Corporation. The closing price of the Commtron Class A common stock on the American Stock Exchange on Friday, Feb. 16, 1990, was $6.00. The offer will not be conditioned upon any minimum number of debentures being tendered.

Bergen Brunswick Corporation presently has $43 million of the exchangeable debentures outstanding. The offer will be made pursuant to definitive offering materials which will be filed with the Securities and Exchange Commission and mailed to holders of the exchangeable debentures as soon as practicable.

Bergen Brunswig Corporation is one of the nation's largest distributors of prescription pharmaceuticals and other healthcare products and the largest national distributor of prerecorded video cassettes.

CONTACT: George E. Reinhardt Jr., VP and CFO of Bergen Brunswig, 714-385-4000; or Donald Reynolds or Gary Fishman of Donald Reynolds Associates, 212-661-1830, for Bergen Brunswig.

RICHMOND, VA (FEB. 20) PR NEWSWIRE - CSX Corp. (NYSE: CSX) and RF&P Corp. today announced the two companies, both of which are headquartered here, have entered into a definitive merger agreement which provides for the merger of RF&P into CSX.

Hays T. Watkins, chairman of CSX, and Frank A. Crovo Jr., president and chief executive officer of RF&P, hailed the merger agreement as a major achievement which "advantageously serves the long-term interests of the shareholders and customers of both companies. The merger provides RF&P shareholders with an attractive opportunity to share in the future growth of the combined CSX/RF&P operation, while permitting those RF&P shareholders who so elect to receive cash for their shares."

The merger agreement calls for each outstanding share of RF&P guaranteed stock, common stock and dividend obligations not owned by CSX affiliates to be converted into either one share of CSX common stock or the right to receive $34.50 in cash. Based on current values, the total consideration to be received by non-CSX affiliated RF&P shareholders is approximately

$385 million.

RF&P shareholders will be permitted to elect to receive either CSX common stock or cash, provided not more than 70 percent nor less than 40 percent of the RF&P shares not owned by CSX affiliates at the time of the merger will be converted into CSX stock. The agreement also provides that the boards of directors of CSX and RF&P may terminate the agreement if, among other things, the average price of CSX stock during the 10-trading day period immediately prior to the vote of RF&P shareholders either exceeds $39 per share or is less than $30 per share.

The merger is expected to qualify as a tax-free reorganization so that RF&P shareholders should recognize gain only to the extent that they receive cash.

Consummation of the merger is subject to certain customary conditions, including the approval of RF&P shareholders. It is contemplated that the annual meeting of RF&P shareholders, normally held in April, will be deferred and held during the late spring and that the merger proposal will be presented for approval at that time.

CSX Corp. is an international transportation company that offers a variety of rail, container-shipping, intermodal, trucking and barge services.

WASHINGTON (FEB. 20) PR NEWSWIRE - Danaher Corporation (NYSE: DHR) and Easco Hand Tools, Inc. (NASDAQ: TOOL), announced today that they had entered into a merger agreement under which Danaher would acquire Easco in a stock-for-stock transaction.

Upon consummation of the merger, each share of common stock of Easco will be converted into the right to receive 0.4175 shares of Danaher common stock.

Based upon closing prices as of Feb. 16, 1990, the value of the transaction, including Easco's net indebtedness, would be approximately $125 million.

The merger agreement has been approved by the board of directors of Easco acting upon the unanimous recommendation of a special committee of independent directors of Easco. The First Boston Corporation acted as financial advisor to the Easco special committee.

The Danaher board of directors, including its independent directors, has approved the merger agreement. Merrill Lynch Capital Markets acted as financial advisor to Danaher.

Following consummation of the combination, Danaher will compete in three business segments: tools, which will comprise approximately one-half of Danaher's sales, process/environmental controls, and transportation products.

Consummation of the merger is conditioned upon, among other things, the vote of the stockholders of both Danaher and Easco, and requisite governmental approvals. The proxy statement, which will contain details of the proposed merger, will be delivered to stockholders of Danaher together with the notice of its annual meeting as promptly as practicable. Stockholders of Easco will also receive the proxy statement together with the notice of a special meeting.

Danaher anticipates that the combination would cause minimal dilution to Danaher during the first 12 months, with positive contribution to earnings thereafter.

Easco is one of the world's largest producers of quality hand tools, including the Craftsman brand for Sears Roebuck and Co., and specialized automotive service tools supplying the professional, industrial and "do-it-yourself" markets.

Danaher is a leading manufacturer of tools, process/environmental controls and transportation products.

#90051p0041 02/20/1990 ~PR Newswire

EAST HARTFORD, CT (FEB. 20) PR NEWSWIRE - International Fuel Cells Corporation, a subsidiary of United Technologies Corporation (NYSE: UTX), and Toshiba, the other investor in International Fuel Cells (IFC), announce the formation of an IFC subsidiary, ONSI Corporation, for the commercial development, production and marketing of stationary, packaged fuel cell power plants up to 1,000 kilowatts. (Editors' note: The name ONSI was derived from "on-site installation").

ONSI's initial product, a 200-kilowatt system designated the PC25, has been ordered by leading gas distribution companies in the United States, Japan and Europe. An initial production lot of 53 PC25s has been ordered for delivery beginning in 1992.

Toshiba will invest more than $50 million in ONSI's product development, business development and the supply of some components for the initial 53 production units.

Toshiba will receive a license to the technology of present and future ONSI products. Toshiba plans independent development, production, and sale of stationary, packaged fuel cell power plants starting with a 50-kilowatt unit as well as producing PC25-based 200-kilowatt units for Japanese marketplace. ONSI will receive licenses to Toshiba-designed production units incorporating technology of IFC and ONSI and plans to introduce the 50-kilowatt unit into the United States after development by Toshiba.

The PC25 will produce 200 kilowatts of electrical power plus 700,000 Btu's per hour of thermal energy with a resulting overall energy efficiency of over 80 percent. The PC25 has negligible pollutant emissions making it the cleanest fossil fueled electric generating system. Development of this type of clean, efficient and quiet source of electricity has been underway since the early 1970s. Other than experimental, demonstration and field test units, to date IFC's fuel cells have found application only in NASA's manned space programs. Today's announcement marks the first time fuel cells will be manufactured in quantity for commercial use to provide energy service at an installation site ("on-site").

Initially, ONSI will establish a dedicated manufacturing, assembly and production test facility at UTC's Pratt & Whitney complex in Middletown, Conn. The production potential of the facility will be 200 units per year. Employment will reach 125 to 150. ONSI plans for location of its permanent engineering and production facility will depend upon business development during the next four years.

ONSI plans to solicit additional orders from domestic and international gas utility companies. Those companies stand to benefit from the potential of improved profits as a result of the on-site fuel cell power plant's unique features. Features such as high efficiency, environmental cleanliness, unattended operation, high reliability and wide latitude of operation are essential to compete in the demanding energy service marketplace.

#90051p0049 02/20/1990 ~PR Newswire

MOUNTAIN VIEW, CA (FEB. 20) PR NEWSWIRE - California Biotechnology Inc. (NASDAQ: CBIO) today announced financial results for its 1989 fiscal year, ended Dec. 31, 1989.

The company reported revenues of $12.4 million compared to $13.5 million last year. The company also reported investment and other income of $3.5 million compared to $3.4 million last year. The operating loss for the year was $8.2 million compared to $8.4 million last year, and the net loss was $8.2 million (72 cents per share) compared to $7.9 million (67 cents per share) last year.

In 1989, third-party contract research increased substantially, while license fees fell, resulting in an overall decline of $1.1 million in revenues. The current year's net loss includes a $3.5 million non-cash expense representing Cal Bio's equity in Karo Bio, its Swedish affiliate, and compares to a similiar $2.6 million non-cash expense for the like period in the prior year. Cal Bio's investments in its international affiliates were reduced to zero at the end of 1989. Therefore, no further negative impact on Cal Bio's financial results will occur due to these investments. At year end, Cal Bio had $34.5 million in cash and marketable securities compared to $36 million at the end of 1988.

For the fourth quarter, revenues were $4.3 million compared to $4.1 million in the 1988 quarter. Investment and other income was $900,000 compared to $800,000 in the 1988 period. The operating loss was $800,000 compared to $700,000 in the 1988 quarter with a net loss of $900,000 (8 cents per share) compared to a $1.1 million loss (9 cents per share) in the 1988 quarter.

"Our 1989 financial goal was to incur an operating loss no greater than that incurred in 1988," said Richard L. Casey, president and CEO. "We ended the year with an operating loss slightly less than in 1988 which reflects the company's successful efforts to control costs, particularly in the general and administrative areas. We will continue to contain general and administrative costs while increasing expenditures in the critical areas of product development and clinical testing.

"During the year, we made significant progress in bringing our focus area products into clinical trials. In January 1989, Cal Bio announced an agreement with Kaken Pharmaceutical Co., Ltd., for the development and marketing of Cal Bio's fibroblast growth factor (FGF) in the Far East. The active collaborative effort between Kaken and Cal Bio has resulted in accelerated development of FGF in both territories. One of two proprietary products, FGF, a potent wound healing factor, entered the clinic in the third quarter for the treatment of soft tissue wounds." Cal Bio is continuing Phase II human clinical studies with its other proprietary product, Auriculin(R) atrial natriuretic peptide (ANP), for acute kidney failure, contrast dye-induced nephropathy, and acute congestive heart failure.

"In 1990, we will continue to push toward commercialization and move products through the clinic as quickly as possible. We expect to initiate

expanded Phase II/III clinical trials for FGF and ANP in the U.S. In addition, FGF is targeted to enter Phase I human clinical trials in Japan " Casey said. "We would expect two additional products to enter clinical studies in 1990 - a diabetes agent for the control of blood glucose levels in Type II diabetics and human lung surfactant for the treatment of infant respiratory distress syndrome. We will also attempt to re-license the use of Cal Bio's Nazdel(R) technology for the intranasal delivery of insulin to a major international pharmaceutical company."

California Biotechnology Inc. is a biopharmaceutical company engaged in the development of human therapeutics and protein drug delivery systems. These products are being commercially developed by the company or through collaborations with major pharmaceutical companies.

#90051p0051 02/20/1990 ~PR Newswire

SALT LAKE CITY, UT (FEB. 20) PR NEWSWIRE - Two large areas of potential gold mineralization with associated base metals have been discovered by Teck Resources on property leased from Centurion Mines Corp. (U.S.A.) (NASDAQ: CTMC) in the West Tintic mining district in western Utah, Centurion President Barry F. Katona announced.

Teck Resources Inc., a wholly owned subsidiary of Teck Corp., based in Vancouver, British Columbia, has a lease on approximately 6,000 acres of Centurion's mining properties in the West Tintic district. Teck has just completed the first phase of an extensive exploration program aimed at discovering large, bulk-tonnage, mineable gold and silver and base metals deposits. The large areas of anomalous gold in soils were discovered by surface trenching, sampling and geophysical surveys.

Teck plans further detailed precious and base metal sampling and geophysical surveys on the properties this spring. This will immediately be followed by drilling. Centurion's management believes this further exploration work could lead to the discovery of a large, open-pit mineable gold and base metal deposit, Katona stated.

The West Tintic mining district is located approximately 80 miles southwest of Salt Lake City and about 12 miles west of the famous Tintic mining district. Gold and silver production in the West Tintic began in 1871 and continued until the late 1920s. The mining properties leased to Teck by Centurion were responsible for over 90 percent of the historic production and include more than 16 old gold and silver mines.

Teck Corp., with assets of over $1 billion, is a significant Canadian producer of gold as well as other metals including silver, zinc, copper and niobium. The company has international associations with firms in West Germany and Australia. Teck is participating in the important Hemio Gold Camp in Ontario, Canada, and through its controlling interests in Cominco Ltd., is involved in new mine developments in Alaska, British Columbia and Australia.

SOUTH WINDSOR, CT (FEB. 20) PR NEWSWIRE - Gerber Scientific, Inc. (NYSE: GRB), today reported third quarter and nine-month operating results. Sales for this year's third quarter ended Jan. 31, 1990, decreased 3 percent to $76,285,000 from $78,351,000 for the same period last year. Earnings per share of $.35 were unchanged from last year's third quarter based on average shares outstanding of 23,732,000 this year and 24,010,000 last year. Net earnings for the third quarter of this year were $8,310,000 compared with $8,484,000 for the third quarter of last year.

For the nine months ended Jan. 31, 1990, sales increased 3 percent to $226,255,000 from $219,455,000 for the previous year. Earnings per share rose to $1.01 in this year's first nine months from $.97 in the same period of last year based on average shares outstanding of 23,944,000 and 24,439,000, respectively. Net earnings in this year's first nine months were $24,102,000 compared with $23,780,000 last year.

The company reported that new orders received in the first nine months of this year were $221,200,000, substantially unchanged from $221,600,000 for the same period last year. Backlog at Jan. 31, 1990, was $77,800,000 compared with $84,700,000 at Jan. 31, 1989.

The company continued its program of purchasing shares of its outstanding common stock in the open market. Stock purchases in the nine months ended Jan. 31, 1990, totaled 304,000 shares at an average cost of $14.73 per share, or a total cost of approximately $4.5 million. From the beginning of the stock purchase program in October 1987 through Jan. 31, 1990, the company has purchased 2,613,200 shares, or approximately 10 percent of its previously outstanding stock, at an average cost of $16.66 per share, or a total cost of approximately $43.5 million.

Gerber Scientific, Inc., produces high technology factory automation systems for the apparel, automotive, aerospace, electronics, metalworking, printing, optical, graphic arts, and signmaking industries.

#90051p0058 02/20/1990 ~PR Newswire

TOKYO (FEB. 20) PR NEWSWIRE - Honda Motor Co., Ltd. (NYSE: HMC) today announced its unaudited consolidated financial results for the fiscal third quarter and first nine months ended Dec. 31, 1989.

Honda's consolidated net income in the third quarter amounted to 22.5 billion yen (Y) ($156 million), decreasing by 7.8 percent from the third quarter last fiscal year. Consolidated net income per common share for the three months under review totaled Y23.15 ($0.16). Net income per American share, each representing two shares of Honda common stock, for the quarter amounted to Y46.30 ($0.32) compared to Y49.56 ($0.34) for the corresponding prior period.

Third quarter earnings showed recovery from the first two quarters despite a general slow-down of the North American automobile market and Honda's increased depreciation burdens arising from capital expenditures for the expansion of automobile manufacturing facilities in both the United States and Japan. Although net income declined from the same period a year ago due to increased non-operating expenses, including foreign exchange losses and interest expenses, continued sales gains in major automobile markets, in addition to stabilization of currency exchange rates, are helping the earnings performance to steadily recover.

Honda's consolidated net sales for the third quarter rose by 8.5 percent over the same period a year ago, to Y942.8 billion ($6,547 million), mainly due to increased automobile sales in North America and Japan. This net revenue is the highest the company has registered for any three-month period. Ongoing cost-cutting efforts, along with a lowered yen, contributed to increasing consolidated operating income by 22.9 percent, to Y55.0 billion ($382 million), offsetting the increases in depreciation burdens and expenses, which included higher advertisement and general publicity expenses related to new model introductions.

For the first nine months ended Dec. 31, 1989, consolidated net income totaled Y55.1 billion ($383 million) decreasing by 24.4 percent over the corresponding period a year ago. Net income per share amounted to Y56.47 ($0.39) and net income per American share, each representing two shares of Honda common stock, amounted to Y112.94 ($0.78) compared to Y147.68 ($1.03) for the same period a year ago. Increased automobile sales, cost-cutting efforts and the trend towards a weaker yen contributed to increased net sales and operating income; however, foreign exchange losses included in non-operating expenses offset a part of such positive factors to negatively affect net income.

Consolidated net sales for the nine-month period totaled Y2,752.6 billion ($19,116 million), up 5.8 percent over the comparable period last year. Operating income rose 14.8 percent, to Y150.4 billion ($1,045 million). The reasons for these increases are essentially the same as described for the third quarter.

#90051p0060 02/20/1990 ~PR Newswire

LOS ANGELES (FEB. 20) PR NEWSWIRE - Westwood One Inc. (NASDAQ: WONE) today said that although it reported a net loss of $4,063,000 or 29 cents per share in its fourth quarter ended Nov. 30, 1989, it had sharp increases in revenue and operating income during the period, compared to the like period last year.

The company said the gains in revenue and operating income in its fourth quarter were primarily the result of actions taken by management over the past two years to build and redirect the company. The net loss was attributed primarily to investments in acquisitions, start-ups and turnarounds undertaken during the past two years and the interest costs and time required to generate returns from these efforts.

Last year in its fourth quarter, Westwood One had a net loss of $1,312,000 or 9 cents per share.

Revenue in the fourth quarter increased 49 percent to $38,648,000 from $25,981,000 in the prior year's fourth quarter.

Operating income during the fourth quarter increased to $1,055,000 from a loss of $309,000 in the like period of 1988.

Westwood One had a net loss for the year of $22,738,000 or $1.58 per share. On Jan. 19, the company said that it expected to report a net loss per share for the year of between $1.57 and $1.63 per share. In the prior year, Westwood One had net income of $1,592,000 or 12 cents per share.

Revenue increased 19 percent for the full year in 1989 to $130,608,000 from $109,997,000 in the prior year.

The company reported $5,232,000 in cash flow from operating activities, which is after interest expense and a $3.1 million payment for non-recurring legal costs for the year that just ended.

William J. Battison, president and chief financial officer of Westwood One said the increase in fourth quarter revenue and operating income were primarily the result of improvements achieved at the company's radio stations and radio networks.

"During the last four years," Battison said, "Westwood One has made six strategic acquisitions in radio valued at more than $215 million. All but one were either turnaround situations or start-ups. Cumulative losses at the time of acquisition were $20 million to $25 million.

"While we have made significant improvements in each of these operations, it takes time for results to show up on the bottom line. KQLZ, Pirate Radio, wasn't purchased until the second quarter of 1989, for example, " he said. "We immediately made a format change. Thus, we had the expense, but not the revenue from that station until the latter part of the year. Today, KQLZ is one of the top 10 rated stations in the Los Angeles market. In some parts of that market, we are number one.

"While we will show a loss for 1990, we nevertheless are very optimistic about the year," Battison said. "Assuming no major surprises, in terms of the economy, or aberrations in the market, we expect this to be a very strong year in terms of operating income, cash flow from operating activities, after interest expense and asset appreciation."

CONTACT: Katie Garber of Westwood One, 213-840-4383; or Michael S. Sitrick or Steven D. Stern, 213-208-1108, both of Sitrick and Co. for Westwood One Inc.

WORCESTER, MA (FEB. 20) PR NEWSWIRE - Cambridge BioScience Corporation (NASDAQ: CBCX) today announced the granting of two sublicenses for the protein gp120, both for diagnostic use. Cambridge BioScience is the exclusive licensee of the Harvard University patent covering gp120, a key envelope protein of the AIDS virus.

The two sublicensees, Behring and Pharmacia ENI Diagnostics, Inc., will join four other companies which hold gp120 sublicenses in the field of diagnostic use: Abbott Laboratories, Becton Dickinson, Smithkline Beckman,

and Baxter Healthcare Corporation.

In making the announcement, Cambridge BioScience Vice President of Legal and Regulatory Affairs Frederick V. Casselman said, "We welcome the newest members of the gp120 sublicensing program. Each opportunity for commercial development of gp120 reinforces the strength of our company's patent and licensing portfolio, and we expect royalties to be a significant revenue source for Cambridge BioScience over time, as a significant number of recombinant products are introduced."

Cambridge BioScience Corporation is a biotechnology company utilizing the latest advances in genetic engineering and monoclonal antibody technology to develop products for the detection and prevention of human and animal infectious diseases.

HAMILTON, BERMUDA (FEB. 20) PR NEWSWIRE - Sea Containers Ltd. (NYSE: SCR) announced today that it and Genstar Container Corporation had terminated by mutual consent the container purchase agreement of Nov. 13, 1989 to sell to Genstar its standard cargo container and chassis fleets in anticipation of selling these fleets to Tiphook plc if approved by the company's shareholders at the company's annual general meeting on March 15 1990. The agreement had provided for a $5 million fee to be paid to Genstar in the event it was not consummated. this fee, plus a small additional amount, has been paid to reward Genstar for voluntary termination before the shareholders meeting.

Sea Containers has also entered into an agreement with Itel Corporation to sell its tank container, tank chassis and tank forwarding businesses; however this transaction is about one-fourth the size of the Genstar sale. The company will seek to terminate this agreement before the shareholders meeting, and if Itel refuses, the sale will be put to the shareholders for decision. Tiphook has offered a higher price for these assets, so the Board will recommend to shareholders that they turn down the Itel sale and approve instead the Tiphook sale, assuming the matter is not resolved by mutual consent of the company and Itel before the meeting.

The company also announced that the tender offer materials relating to the tender offer by the company and certain subsidiaries for up to 7 million common shares of the company at $70 per share are being mailed today. The proxy statement and voting materials in connection with the March 15, 1990 annual general meeting will be mailed on Feb. 21, 1990 and the company asked that all shareholders respond promptly in view of the shortness of time until the meeting date.

AKRON, OH (FEB. 20) PR NEWSWIRE - The BFGoodrich Company (NYSE: GR) announced today that the Board of Directors has increased the dividend for

the first quarter from 50 cents per share to 53 cents per share.

The increased dividend is payable March 30, 1990, to shareholders of record on March 5, 1990.

BFGoodrich chairman and chief executive officer John D. Ong said, "The dividend increase reflects the continuing confidence of our management and our board of directors in the company's future prospects."

Goodrich raised its quarterly dividend in February 1989, from 43 cents per share to 50 cents per share.

Directors also approved regular quarterly dividends on the company's two series of preferred stock: $1.9625 on the $7.85 cumulative preferred stock, Series A; and $.875 on the $3.50 cumulative convertible preferred stock, Series D. The payment and record dates are the same as for the common dividend.

ATLANTA (FEB. 20) PR NEWSWIRE - Fuqua Industries Inc. (NYSE: FQA) today announced results for 1989.

For the year ended Dec. 31, 1989 net income from continuing operations was $7.2 million compared to $76.7 million reported for 1988. Fully diluted earnings per share from continuing operations for 1989 were $.34 compared to $3.42 per share reported for 1988. Sales for 1989 were $926 million compared to $934 million last year.

Included in 1988 net income from continuing opertions is an after-tax gain of $68.8 million resulting from the formation of Qualex Inc., Fuqua's 51 percent owned photofinishing subsidiary. However, the results from continuing operations exclude the operating results of Ajay Enterprises which was sold in August 1988 and Georgia Federal Bank which Fuqua sold in May 1989. Fuqua reported a fourth quarter loss from continuing operations of $1.7 million or $.08 per share compared with a loss of $15.5 million or $. 72 per share for the fourth quarter of 1988. Sales for the quarter were $214 million in 1989 and $233 million in 1988.

Fuqua's President, Lawrence P. Klamon, said that the 1989 results showed the impact of the inventory reduction program at Snapper Power Equipment, Fuqua's lawn and garden division. By decreasing production and increasing promotions, the inventory of Snapper products at the dealer and distributor levels has been substantially reduced. However, this program also severely reduced Snapper's earnings. Klamon said that Qualex,

Fuqua's photofinishing subsidiary, reported a significant increase in earnings for 1989, partially offsetting Snapper's earnings decline. For 1990 Klamon said that he expected significantly improved results form both Snapper and Qualex.

Klamon noted that Fuqua Industries had repurchased about 1,700,000 shares of its stock in the past several months and has authorization from its board to purchase up to a total of 4 million shares. He also noted that last week the board increased the dividend on the common stock by 12.5 percent to $.36 per year.

NEW YORK (FEB. 20) PR NEWSWIRE - Nasta International (AMEX: NAS) will be issued a patent on March 20, 1990, for its best-selling "Hit Stix" portable electronic drum toys, it was announced by Norman Spiegel, president.

According to Spiegel, this patent -- U.S. patent No. 4,909,177 -- will now result in legal action to be taken against several infringers. When Nasta introduced "Hit Stix" in 1988, the portable drum sound simulator became one of the most popular toys in the industry, and has occupied that same strong position ever since.

At the same time, Spiegel noted, the success of "Hit Stix" attracted "many imitators whose knock-offs will no longer be welcome on retailer shelves."

NEW YORK (FEB. 20) PR NEWSWIRE - Samuel Miller, senior vice president-finance of Liz Claiborne, Inc. (NASDAQ: LIZC), today announced record sales and earnings for the year and quarter ended Dec. 30, 1989.

Net sales for the twelve months of 1989 increased 19.1 percent to $1,410,677,000 from $1,184,229,000 for the 1988 year. Earnings for the 1989 year increased 49.2 percent to $164,591,000 from $110,341,000 for the prior year. Earnings of $1.87 per share reflect a 48.4 percent increase over the prior year's $1.26 per share.

Net sales for the 1989 fourth quarter of $375,858,000 increased 29.5 percent over the net sales of $290,241,000 for the prior year period. Earnings of $40,435,000 improved 52.0 percent from $26,601,000 for the prior year's comparable quarter. Earnings of $.46 per share reflect a 53.3 percent increase over last year's comparable quarter of $.30 per share.

Miller commented, "Management is extremely gratified that the company was able to achieve record sales and earnings which reflected the strong performance of its products at the wholesale and retail levels."

With respect to the previously announced program to purchase up to $50 million of its common stock, Miller noted that the company had recently commenced the program and has purchased approximately 200,000 shares to date.

The board of directors previously declared the regular cash dividend on the company's common stock at the rate of $0.05 per share to be paid on

March 5, 1990 to stockholders of record at the close of business on Feb. 14, 1990. Miller noted that the declaration and payment of future dividends would be subject to the company's earnings, financial position, capital requirements and other relevant factors.

NIAGARA FALLS, NY (FEB. 19) PR NEWSWIRE - Sevenson Environmental Services Inc. (NASDAQ-NMS: SEVN) today reported results for the year and fourth quarter ended Dec. 31, 1989.

Revenues for 1989 increased 34 percent to $52,061,000 vs. $38,960,000 in 1988. Net earnings from continuing operations for the year were $6,741,000, or $1.10 a share on weighted average shares outstanding of 6.13 million, compared to $4,382,000 and 88 cents a share on 5 million shares outstanding in 1988.

Revenues for the fourth quarter increased slightly to $14,470,000 vs. $14,072,000 in the fourth quarter of 1988. Net earnings from continuing operations for the quarter were $1,783,000, or 27 cents a share on 6.6 million shares outstanding, compared to $2,059,000, or 42 cents a share on 5 million shares, in the fourth quarter of 1988.

Differences in shares outstanding reflect the company's issuance of 1.6 million shares in its initial public offering in April, which brought the total number of shares outstanding to 6.6 million.

Sevenson provides a comprehensive range of field services for the remediation of sites and facilities contaminated by hazardous materials. The company, which is headquartered in Niagara Falls, N.Y., operates principally in the eastern United States and Canada. Since entering the site remediation business in 1979, the company has performed over 200 projects, including projects at the Love Canal and at other Superfund sites.

INDIANAPOLIS (FEB. 20) PR NEWSWIRE - Hurco Companies, Inc. (NASDAQ: HURC) today reported net income of $2,167,000, or $.38 per share, for the first fiscal quarter of 1990, a 70.8 percent increase over the same period last year. Revenue of $22,722,000 for the quarter ended Jan. 31, 1990,

compared with revenue of $18,410,000 for the first quarter of 1989, a 23.4 percent increase.

Backlog of $12,700,000 on Jan. 31, 1990, compared with $19,900,000 on Oct. 31, 1989. Orders for the first quarter of 1990 were $15,000,000 compared to $22,400,000 for the same period last year.

Brian D. McLaughlin, president of the company, indicated the lower order rate is due principally to decreased U.S. orders. McLaughlin said, "The reduced U.S. order level is a result of distributors adjusting their inventory levels and purchase commitments in response to recent uncertainty of the U.S. economy. Based on a recent market survey, we anticipate orders from the U.S. customers to increase over the last three fiscal quarters compared to the first fiscal quarter. In addition, the company expects substantially higher order levels in Europe and Asia compared to the first quarter."

TORRANCE, CA (FEB. 20) PR NEWSWIRE - NDE Environmental Corporation

(NASDAQ: NDEC) today announced the signing of agreements giving NDE the option to acquire all the stock of Pan Am Environmental Systems, Inc., NDE's principal licensee. The agreements involve Pan Am World Services, the licensee's parent corporation, as well as certain creditors of the licensee. Pan Am World Services is a subsidiary of Johnson Controls, Inc. which is not a party to the agreement.

In addition to giving NDE the right to acquire its principal licensee, the agreements would remove virtually all the licensee's debt, other than certain bank debt, and NDE would receive a covenant not to compete from Pan Am World Services. NDE would pay $375,000, deliver a note for $105,000 and issue 100,000 shares of common stock. Pan Am Environmental Systems, Inc., would grant a small contingent royalty. The transaction is scheduled to be completed by March 7, 1990, with NDE having the right to cancel subject to a cancellation penalty. By acquiring Pan Am Environmental Systems, NDE will assume nationwide control of the sale and use of NDE's patented VPLT System for leak testing in underground storage tanks.

John R. Mastandrea, president of NDE, stated: "Upon the completion of the transaction, NDE will implement an aggressive new nationwide program to market and sell tank testing services and to offer master and area franchises to utilize NDE's unique tank testing system. We are exploring a variety of financing strategies to maximize the potential of our highly rated VPLT System in the billion-dollar annual tank testing market generated by recent Environmental Protection Agency regulations."

Mastandrea also stated: "The results of Environmental Protection Agency testing of the VPLT System indicated it is the only periodic leak detection system that met EPA regulations for underfilled tank testing and was one of only four systems to meet regulations for overfilled tank testing."

In addition to the VPLT System, NDE provides other environmental systems and services including: testing and leak pinpointing for pipelines, underwater hoses, and spacecraft; impact testing on materials; and a variety of technical and consulting services.

SALT LAKE CITY (FEB. 20) PR NEWSWIRE - Huntsman Holdings Corporation announced today that the company has decided to terminate negotiations with Aristech Chemical Corporation (NYSE: ARS) and end pursuit of the company at this time.

Jon M. Huntsman, chairman and chief executive officer of Huntsman Holdings Corporation, said, "Over the past two weeks we have employed in excess of 50 professional people at a significant expense to complete our due diligence review of all aspects of Aristech's operations to determine prudently the maximum amount one should pay for this company. We have now completed that review and have concluded we will not make an offer to acquire Aristech for a price in excess of $27 per share. However, in the event the Mitsubishi offer is terminated and a Mitsubishi/Aristech merger is not consummated, we will reexamine our options and may determine to make a renewed offer to acquire Aristech.

"We have negotiated always in an open and honorable fashion with Aristech's chairman, Thomas Marshall," Huntsman continued. "We notified him in advance of every filing and key decision undertaken by Huntsman Holdings Corporation. We were, in fact, complimented by Mr. Marshall for our openness, candor, and 'friendly approach.' We were naturally very surprised with the announcement of Aristech's heavy management involvement with Mitsubishi Corporation.

"After our initial bid of $25 a share, our company and family were pleased that GE Plastics joined us in an effort to strengthen our position. GE Plastics indeed represents the very best in global corporate management," Huntsman added.

"Notwithstanding our deep sense of disappointment in not acquiring Aristech, we at the Huntsman family of companies are strongly committed to our continued sound growth in the chemical industry," Huntsman concluded.

Jon M. Huntsman currently owns 2.85 million shares of Aristech common stock which represents just under 9 percent of the total outstanding common shares.

Huntsman companies, headquartered in Salt Lake City, manufacture and market petrochemicals and thermoplastics including polypropylene, styrene monomer, expandable polystyrene, polystyrene, specialty compounded polymers and plastic packaging products. Huntsman companies' revenues for 1988 were $1.4 billion.

#90051p0095 02/20/1990 ~PR Newswire

PHOENIXVILLE, PA (FEB. 20) PR NEWSWIRE - The West Co. Inc. (NYSE: WST) today reported sales for the fourth quarter of 1989 of $79.7 million, compared with $72.6 million in the 1988 period.

Net income was $4.7 million, or $.29 per share, compared with $5.2 million or $.32 per share, during the fourth quarter of 1988.

Sales for the full year 1989 were $308.7 million, an increase of 8 percent over 1988 sales of $285.4 million. Net income in 1989 totalled $20.7 million, or $1.28 per share, representing a 19 percent increase over 1988 net income of $17.4 million, or $1.07 per share. The increase in sales reflects strong worldwide demand during the first half of the year for health care packaging components and the consolidation of a U.K. company, in which a majority ownership was acquired in the third quarter of 1988. The increase in net income was due to higher sales and productivity improvements. The 1988 results included a charge in the first quarter relating to an early retirement program equivalent to $.06 per share.

Rene L. Guerster, president and chief executive officer, reported, "The progress we have made confirms the confidence we have in our long- term business and financial prospects. Our earnings grew more than double our growth rate of sales. Our emphasis on return on equity was rewarded with an increase to 11.8 percent. We are also receiving increased recognition as the premier supplier of quality products and services worldwide. We expect that our business and financial performance will continue to prosper in the 1990s."

The West Co. Inc. is the premier supplier of specialized packaging systems and components for the worldwide pharmaceutical and hospital supply/medical device industries and the domestic consumer products industry, with more than 85 percent of its revenue generated by the health care markets. West's products include stoppers, closures, containers, medical device components and assemblies made from elastomers, metal, plastic, glass and combinations thereof, plus related packaging machinery.

BILTHOVEN, THE NETHERLANDS (FEB. 20) PR NEWSWIRE - ASM International N.V. (NASDAQ: ASMIF) announced today that 1989 net profit is currently expected to be somewhat lower than the previously anticipated Dfls 10-12 million, due to a lower margined product mix and unusually high expense levels in the fourth quarter, related to startup costs at the Singapore and China facilities, various year-end items and accelerated R&D investments to broaden the new Advance 600 product line, addressing additional high potential CVD applications.

Net sales for the year, according to preliminary numbers, have been strong

at about Dfls 415 million guilders, up 15 percent over 1988. The company is in the process of finalizing its 1989 figures and will report audited results in early April.

ASM International N.V., headquartered in Bilthoven, is a diversified designer, manufacturer and marketer of equipment and materials used in the production of semiconductor devices and integrated circuits. ASMI serves the world's major semiconductor markets through facilities in the Netherlands, the United States, Hong Kong and Japan. U.S. operations are headquartered in Phoenix, Ariz.

At Feb. 15, 1990, 1.8890 Dutch Guilders equaled one U.S. dollar.

HOUSTON (FEB. 20) PR NEWSWIRE - Vallen Corporation (NASDAQ: VALN) today announced the closing on the purchase of the business and assets of Custom Plastics Manufacturing, Inc., Houston.

Custom Plastics molds and vacuum forms products on a contract basis for various customers, including the company's subsidiary, Encon Safety Products, Inc. Custom Plastics' sales for the year ended Sept. 30, 1989 were $1.1 million.

According to J.M. Wayne Code, president of Vallen: "The acquisition of Custom Plastics will allow the company to pursue the custom market for plastic molding, as well as molding more of its own product components. It will also facilitate the continued expansion of the Encon line of products. This unit will operate as Encon Custom Plastics, a division of Encon Safety Products, Inc. Pete Gibbs, the former owner of Custom Plastics, brings substantial technical expertise to our organization. Gibbs will continue as plant manager and report to Woodie M. Zachry Jr., vice president and general manager of Encon."

Vallen's distribution subsidiary sells a wide variety of industrial safety and health products designed for the protection of the individual worker, his work place and the environment. It currently operates from 30 locations throughout the U.S.A.

Encon Safety Products, Inc., the company's manufacturing subsidiary, is the leading producer of emergency showers and eyewash fountains for industry. Encon, headquartered in Houston, also molds optical quality protective eyewear at its plant in Coudersport, Pa.

#90051p0107 02/20/1990 ~PR Newswire

NEW YORK (FEB. 20) PR NEWSWIRE - At a major company presentation for security analysts in New York City today, Stephen G. Shank, chairman and CEO of Tonka Corporation (NYSE: TKA), said the company expects continued profitability in 1990 based upon expected growth in International revenues led by Real Ghostbusters and Sports Stars soccer figures, a rebound in Parker Brothers' game business, and the favorable reaction from retailers to 1990 product lines.

Shank indicated the company would have to offset the further decline in SEGA video game sales and an expected decline in Real Ghostbusters sales in the U.S. market. He said the key swing factors in the 1990 sales outlook included "the level of Real Ghostbusters volume we achieve and, of course, the success of our new introductions in 1990."

According to Shank, the company's new Beetlejuice line "looks especially promising with excellent retail sales results since we began shipping in December," and the new Batman line "is attracting a high level of trade interest given the excellent performance of Batman toys during the holiday season." Tonka's new Batman line should begin reaching retail shelves in April.

The company commented to analysts that it expects some improvement in the gross profit rate for 1990, with gross profit in the range of 48 percent on an improved sales mix, up from 47 percent in 1989. The company also indicated it expects an increase in operating expenses in 1990. Advertising expense should be in the range of 17 to 18 percent of sales in 1990, compared to 16.9 percent in 1989, as the company launches a broader lineup of new products in 1990.

Selling, General and Administrative (SG&A) expenses are expected to grow to slightly over $140 million, compared to $128 million in 1989. Partially offsetting these increases in operating expenses is an expected decline in interest expense reflecting $98 million in net proceeds from the sale of common stock during the fourth quarter of 1989. Interest expense is expected to be in the range of $80 million, down from $94 million last year. The company commented that the actual interest expense is subject to a number of variables, including the timing and amount of subordinated debt retired during 1990.

The company stated that it expects improvement in the effective income tax rate in 1990 on a more favorable mix of U.S. and foreign earnings. Shank

told analysts that he expects the tax rate applicable to pre-tax earnings before Goodwill amortization charges to be approximately 38 percent in 1990, compared to 47 percent in 1989.

Tonka Corporation recently reported a return to profitability in 1989 with full-year net earnings improved significantly on sales of $870.5 million, 4 percent lower than the $907.7 million in revenues reported in 1988. Net earnings before extraordinary charges for the 12 months ended Dec. 30, 1989, were $7.7 million, or 90 cents per share, on 8.5 million average shares outstanding, compared to a loss of $5.8 million, or 75 cents per share, on 7.7 million average shares outstanding. Tonka reported a $2.0 million, or 23 cent-per-share extraordinary charge relating to the early retirement of debt in 1989.

Tonka Corporation, headquartered in Minnetonka, Minn., is the world's third-largest manufacturer and marketer of quality toys under the Kenner, Parker Brothers and Tonka brand names.

DENVER (FEB. 20) PR NEWSWIRE - Apache International Inc. has been granted exploration rights by the government of The Republic of the Congo on the 235,000-acre Marine VIII permit located in the Coastal Congo Basin, the company announced today.

Apache Oil Congo Inc. holds a 20.2 percent participating interest in the offshore permit. Partners include Arco Congo Exploration Ltd. as operator (26.8 percent), Citizens Energy Corp. (3 percent) and Hydro Congo, the national oil company (50 percent).

The Marine VIII permit abuts the Marine III permit awarded to Apache, Elf Congo, Arco and Hydro Congo by the government last year.

In addition to the Congo, Apache International has exploratory interests in Aruba, Angola, Argentina, France and Gabon.

Apache International is a subsidiary of Apache Corp. (NYSE: APA), an independent oil and gas exploration and production company with securities traded on the New York and Midwest Stock Exchanges (symbol APA).

GLENVIEW, IL (FEB. 20) PR NEWSWIRE - Zenith Electronics Corporation (NYSE: ZE) today reported 1989 results from its continuing consumer electronics and components operations: a loss for the full year and a profit for the fourth quarter.

Results for Zenith's discontinued computer business, which was sold on Dec. 28, 1989, are not yet available because of a "major dispute" with the buyer over the final sale price of the computer business.

Zenith reported a 1989 after-tax net loss from continuing operations of $17.0 million, or 64 cents per share, compared with a net loss of $11.0 million, or 42 cents per share, in 1988. On a pre-tax basis, the 1989 loss from continuing operations was $16.8 million, compared with a $10.2 million loss in 1988. (Pre-tax results include other income, primarily gains from the disposition of properties, of $1.1 million in 1989 and $6.6 million in 1988.)

Losses for continuing operations in 1989 were attributed to higher material and labor costs, which offset the positive effects of higher volume and efficiency improvements.

Zenith's 1989 sales from continuing operations were $1,549 million, up 11 percent from $1,401 million in 1988.

-- Consumer electronics sales in 1989 were $1,288 million, up 9 percent from $1,186 million in the prior year, principally due to higher shipments of color television sets, picture tubes sold to other manufacturers and "flat tension mask" high-resolution color monitors.

-- Components sales of $261 million in 1989 were up 21 percent from $215 million in 1988 as a result of increased shipments of monochrome display products and power supplies.

Zenith's continuing operations were profitable in the fourth quarter. Net income was $4.0 million, or 15 cents per share, compared with $7.5 million or 29 cents per share, in the fourth quarter of 1988.

Sales from continuing operations in the fourth quarter were $443 million, compared with $440 million in the 1988 period.

OTTAWA, ONTARIO (FEB. 20) PR NEWSWIRE - SHL Systemhouse Inc. (NASDAQ:

SHKIF) today announced that it anticipates earnings to be below current analysts' forecasts for the second quarter ending Feb. 28, and in the second half of this year.

Systemhouse expects revenues of between $180 million and $190 million for the current quarter with net income of slightly less than 5 cents per share. Second half revenue is expected to be between $380 million and $400 million, an increase of about 10 percent to 12 percent from the first half.

Operating income has been affected by delayed start-up on several projects in the Systemhouse operations, resulting in lower utilization of professional resources and consequently lower margins. The months of December and early January were particularly slow in customer authorizations to proceed with projects. This situation has improved in the last few weeks and is expected to provide the basis for improved margins and earnings in the third and fourth quarters.

The micro-integration business, carried on through ComputerLand Canada, suffered from industry-wide erosion of product margins as a result of competitive pressures. This erosion has been partly offset by continuing increases in the share of revenues coming from integration and support services, and by tight control of operating expenses. The price pressure is expected to continue through the second half, but operating income is expected to reflect the benefits of higher services revenues and the full effect of cost reduction measures implemented in the first half of the year.

In light of these factors, SHL Systemhouse Inc. expects that earnings per share for the second half of this year will show substantial growth over the second half of last year which was 25 cents per share on 37.5 million shares outstanding.

Systemhouse Chairman Rod Bryden said, "We are very pleased to be focused in the systems integration area of the computer and communications industry. The customer is more demanding than ever to ensure maximum value from new investment in technology and our company is in an excellent position to respond to these demands to the benefit of both our customers and our shareholders."

GREENWICH, CT (FEB. 20) PR NEWSWIRE - The XTRA Corporation (NYSE: XTR) Independent Stockholders Committee today announced that it had unanimously

elected an executive committee to supervise the transition period should its slate be elected at the XTRA annual meeting on Feb. 28.

The executive committee will consist of John J. Lee, Donald B. Smiley, Herbert C. Knortz and Lewis Rubin.

Lee currently is a director of Tosco Corporation and has previously served as president and chief executive officer of Phibro Resources, a subsidiary of Phibro-Salomon, Inc. and as president and chief executive officer of Barber Oil Corporation.

Smiley is the retired chairman and chief executive officer of R.H. Macy & Co., Inc. and was a director of Ralston Purina Company, Metropolitan Life Insurance Co., United States Steel Corp., the Irving Trust Company, RCA Corp., National Broadcasting Company and the New York Stock Exchange. He will have primary responsibility for coordinating the search to select a new permanent chief executive officer for XTRA.

Knortz, now retired, was executive vice president and a director of ITT Corporation and chairman of the National Association of Accountants. He will lead the transition team's audit and financial review of XTRA.

Rubin, the former chief executive officer of Gelco CTI and Flexi-Van Corporation, two transportation leasing companies, will assume the responsibility for operations of XTRA during the transition period.

Members of the XTRA Corporation Independent Stockholders Committee beneficially own 21.6 percent of the XTRA shares outstanding. In addition to Lee, Smiley, Knortz and Rubin, the other nominees on the Independent Committee's slate are Robert M. Gintel, Robert B. Goergen and J. Russell Duncan.

MINNEAPOLIS (FEB. 20) PR NEWSWIRE - Donaldson Company, Inc. (NYSE: DCI), today reported second-quarter and six-month sales and earnings for the period ended Jan. 31, 1990. For the quarter, sales of $98.3 million were up 1 percent from prior year sales of $97.6 million. Net earnings of $4.0 million, or 41 cents per share, compare to prior year earnings of $2.5 million, or 26 cents per share.

For the six months, sales were up 1 percent to $201.6 million from $199.0 million last year. Net earnings were $8.7 million, or 90 cents per share, compared to $7.8 million, or 82 cents per share year ago.

Last year's second-quarter results included expenses related to the closing of the company's Integrated Air Systems (IAS) operations. The pre-tax charge of $1.6 million reduced net earnings by $1.1 million, or 11 cents per share.

Hard order backlogs -- goods scheduled for delivery in 90 days -- stood at $77.6 million as of the end of the second quarter. This compares to $75.3 million at the end of the first quarter and $75.4 million at the end of the second quarter last year.

Donaldson Company, Inc., is a worldwide manufacturer of air cleaners, liquid filters and exhaust products and accessories for heavy-duty mobile equipment; in plant air cleaning systems; air intake systems and exhaust

products for industrial gas turbines; and specialized filters for computer disk drives, copiers and clean room components. Products are produced at plants in Illinois, Indiana, Iowa, Kentucky, Missouri, Wisconsin and nine other locations around the world. The company's shares are traded on the New York Stock Exchange under the symbol DCI.

ORLANDO, FL (FEB. 20) PR NEWSWIRE - Holiday RV Superstores, Inc. (NASDAQ: RVEE), today announced plans to import a European manufactured line of motorhome frame rail chassis via a pending 10-year exclusive North American Distribution Agreement with DB Foreign Trade Company, Inc., Miami.

Newton C. Kindlund, president and chief executive officer of Holiday RV Superstores, Inc. said, "In late January we signed a Letter of Intent with the U.S. importer DB Foreign Trade Company, Inc. which, subject to our finalization, grants us an exclusive North American distributorship that will enable our company to enter the lucrative U.S. motorhome chassis market. We intend to establish assembly operations near the port of Jacksonville, Fla. and will up fit his unique chassis with a Chrysler Acustar V-10 engine and drive train. The full impact of this project will not be expected to contribute significant revenues until our 1991 fiscal year."

Holiday RV Superstores, Inc. is the nation's only publicly traded recreational vehicle dealership that sells and services RVs from major manufacturers. The company has expanded its 6 superstore dealership network into Florida, Georgia and South Carolina.

#90051p0124 02/20/1990 ~PR Newswire

ATLANTA (FEB. 20) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) and Great Northern Nekoosa Corp. (NYSE: GNN) announced today that they have entered into a definitive merger agreement, providing for the acquisition of Great Northern Nekoosa for $65.75 per common share by NM Acquisition Corp., a wholly owned subsidiary of Georgia-Pacific.

The agreement, which was approved by Georgia-Pacific's and Great Northern Nekoosa's boards of directors, provides that Georgia-Pacific will amend its existing cash tender offer to increase the price offered for all outstanding common shares of Great Northern Nekoosa from $63 per share to $65.75 per share. The board will recommend that Great Northern Nekoosa's shareholders accept the offer and approve the merger.

The offer is conditioned upon, among other things, a number of common shares being validly tendered and not withdrawn which, when added to the number of common shares beneficially owned by Georgia-Pacific, will constitute a majority of the common shares outstanding on a fully diluted basis on the date of purchase. Georgia-Pacific presently owns 349,900 common shares.

The offer will be followed by a merger of NM Acquisition Corp. into Great

Northern Nekoosa in which each outstanding common share will be converted into $65.75 in cash. Consummation of the merger is subject to the satisfaction of certain conditions, including approval, if required by law, of the subsequent merger by Great Northern Nekoosa's shareholders.

The merger agreement also provides that Great Northern Nekoosa will pay its previously declared quarterly dividend of 33 cents per share on March 31, 1990, to shareholders of record on March 2, 1990.

T. Marshall Hahn Jr., Georgia-Pacific's chairman and chief executive officer, said, "The combination of our two organizations will create the nation's preeminent forest products company, with the enhanced strength and flexibility required to succeed in today's more competitive and global marketplace. It's the old-fashioned kind of business combination whose greater resources and opportunities will benefit shareholders, employees, customers, suppliers, and the communities where we operate."

William R. Laidig, chairman, president and chief executive officer of Great Northern Nekoosa, stated, "The time has come for Great Northern Nekoosa to join Georgia-Pacific. I encourage our employees to work as enthusiastically with their new associates as they have in the past to make the combined concern the best in the industry."

According to the merger agreement, Georgia-Pacific and Great Northern Nekoosa have agreed to dismiss with prejudice all litigation between them. Georgia-Pacific also has withdrawn its request for a shareholder referendum on the Great Northern Nekoosa rights plan and the proposals put forth by Georgia-Pacific, among other things, to remove the existing Great Northern Nekoosa directors.

#90051p0126 02/20/1990 ~PR Newswire

VOORHEES, NJ (FEB. 20) PR NEWSWIRE - Plasma-Therm Inc. (NASDAQ: PTIS) announced today that it will report record sales and earnings for the fiscal year ended Nov. 30, 1989.

The company will report net income of $1,478,825 ($.19 per share) on sales of $28,974,121 for 1989. Both amounts reflect a sharp increase over 1988 sales and net earnings of $21,646,603 and $641,582 ($.08 per share), respectively. For fiscal 1989, sales increased by 34 percent and net income climbed 130 percent over 1988 net income. Earnings per share was computed based on 7,978,163 outstanding shares for 1989 and 7,874,838 for 1988.

For the fourth quarter 1989, sales and net income amounted to $10,127,865 and $554,422 ($.07 per share) as compared to $6,207,464 and $211,073 ($.03 per share) in fiscal 1988, respectively. Earnings per share was computed based on 8,090,631 outstanding shares for 1989 and 7,901,470 for 1988.

While the company experienced increased sales for all of its major product lines, sales of inline plasma etching systems, particularly in Japan, provided the majority of the increase.

Management noted that fiscal 1989 and 1988 net income were reduced by inventory write-downs of approximately $1,504,000 and $454,000, respectively of which approximately $775,000 and $340,000 were charged off during the respective fourth quarters.

Management further stated that net income was aided by reduced effective tax rates resulting primarily from certain deductions for tax purposes not charged to consolidated book income for 1989 and from the tax benefit of operating loss carryforwards in 1988.

Plasma-Therm Inc., headquartered in Voorhees, is a producer of plasma process equipment and radio frequency "RF" component products used primarily by manufacturers of semiconductor devices.

NEW YORK (FEB. 20) PR NEWSWIRE - Kidder, Peabody & Co. Incorporated today announced the appointment of Ken Saito, as senior vice president and director of the firm's mergers and acquisitions efforts in Japan. Saito will be based in Tokyo and will report to B.J. Megargel, managing director and head of Kidder, Peabody's mergers and acquisitions department. The appointment is effective immediately.

Saito, 42, was the joint general manager in charge of mergers and acquisitions for the Sumitomo Bank, Limited where he had worked for more than 20 years. He was deputy general manager of the bank's Tokyo business promotion department, 1984-1986, and assistant general manager of its merchant banking department, 1982-1984. For five years, he worked in the bank's credit and corporate research departments. Saito has previously worked for Sumitomo in both New York and Los Angeles.

Commenting on the appointment, Megargel said, "We are very pleased to have Saito associated with Kidder, Peabody. He is a highly respected banker, and his long association with the Sumitomo Bank has given him tremendous depth of experience in mergers and acquisitions, global capital markets and credit risk analysis. We are confident that he will be a tremendous

asset to our organization."

Kidder, Peabody is a leading investment banking and brokerage concern. GE Financial Services, a unit of the General Electric Company, (NYSE: GE) holds an 80 percent interest in the 125-year-old company.

ST. PAUL, MN (FEB. 20) PR NEWSWIRE - Ecolab Inc. (NYSE: ECL), announced earnings of 10 cents per share for the year ended Dec. 31, 1989, compared with earnings of $1.63 one year ago. Ecolab had a loss of (72 cents) per share for the fourth quarter, including a previously announced one-time charge of $31.5 million, or ($1.15) per share, compared with earnings of 52 cents per share for the same period last year. Earnings per share for 1989's fourth quarter and full year would have been 43 cents and $1.25, respectively, without the charge. The one-time charge was primarily to provide for the costs associated with refocusing and rebuilding Ecolab's ChemLawn subsidiary as well as the write-off of an unsuccessful international business acquisition.

Sales for the year were $1.306 billion, up 8 percent from $1.212 billion last year. Fourth quarter 1989 sales increased 9 percent to $341 million from sales of $312 million for the fourth quarter last year.

International sales increased 12 percent to $81 million for the fourth quarter of 1989 from $73 million for the fourth quarter of 1988. Sales increased 7 percent for the full year to $303 million in 1989 from $282 million in 1988. Sales increased 14 percent in the fourth quarter and 10 percent for the year when measured in local currency. Sales of solids products, a key component of International's growth strategy for its Institutional business, increased 30 percent over 1988.

Ecolab also announced the successful completion of its $110 million stock repurchase program which began in December 1989. The program was announced on Dec. 11, 1989, in conjunction with Ecolab's sale of its Series A convertible Preferred Stock to Henkel KGaA, Dusseldorf, West Germany. The company has approximately 600,000 shares remaining to be repurchased under previous stock repurchase program authorizations.

Ecolab Inc. is a leading worldwide developer and marketer of premium cleaning, sanitizing and maintenance services for the hospitality, institutional and residential markets. Ecolab's shares are traded on the New York Stock Exchange and the Pacific Stock Exchange under the symbol ECL.

OLD GREENWICH, CT (FEB. 20) PR NEWSWIRE - American Brands, Inc. (NYSE: AMB) announced that its U.K.-based Gallaher Limited subsidiary today acquired Whyte & Mackay Distillers Limited from The Brent Walker Group PLC for a cash consideration of 160 million pounds sterling.

Whyte & Mackay, which has its headquarters in Glasgow, has three distilleries in Scotland. It is a leading distiller and blender of whisky has 15 percent of the U.K. scotch whisky market, and distributes worldwide Whyte & Mackay Special and The Claymore as well as the single malts The Dalmore, Tomintoul-Glenlivet and Old Fettercairn. It also has worldwide or U.K. marketing rights for a number of other brands.

Whyte & Mackay changed its fiscal year-end in 1989 to Dec. 31. Unaudited sales for the 15 months through Dec. 31 were 179.1 million pounds, and net profit before interest and tax was 14.1 million pounds. The company has 800 employees, and the entire operation will remain based in Scotland under present management.

Jim Beam Brands, American Brands' existing distilled spirits operation, reported 1989 revenues of $735.4 million and operating income of $106.8 million. Its flagship Jim Beam brand is the leading bourbon in the world,

and Jim Beam Brands has a major presence in other categories with five additional million-plus case brands in the United States: Windsor Canadian Supreme Whisky, DeKuyper cordials (the largest selling line of cordials in the U.S.), Gilbey's gin, and Gilbey's and Kamchatka vodkas. Jim Beam and Cola sold more than one million cases worldwide in 1989.

Gallaher became the No. 1 tobacco company in the United Kingdom in 1987 and has continued to achieve strong gains in market share and profits. In 1989, its cigarette market share rose from 41.6 percent to 44 percent on a 6 percent increase in unit sales. Gallaher also has leading positions in optical retailing, housewares and retail distribution.

American Brands is a global consumer products holding company with four core businesses -- tobacco, distilled spirits, life insurance and office products. Each has brand name leaders in its industry.

SYRACUSE, NY (FEB. 20) PR NEWSWIRE - Advanced Medical Products Inc.

(NASDAQ: ADVA) reported today the results of operations for the second quarter ended Dec. 31, 1989. Net income for the three months was $71,348 on revenue of $1,427,952. This represents a 16 percent increase in sales compared to the prior year, and the sixth consecutive profitable quarter for AMP. Net income for the six months ended Dec. 31, 1989, was $136,324 on revenue of $2,827,402.

"The company's consistent sales growth, and continuing profits, are primarily due to our maturing worldwide distribution network, and increasing Holter Monitoring market share," said Clarence Groff, president and CEO of AMP. "Our future growth will be built around the stability of our distribution network, loyalty of our Holter Monitoring customer base, and our strength in designing clinical diagnostic systems uniquely suited for use by office-based physicians."

ADVANCED MEDICAL PRODUCTS INC.

Period ended Dec. 31:	Quarter		Six Months	
	1989	1988	1989	1988
Revenue	$1,427,952	$1,232,318	$2,827,402	$2,523,600
Net income(A)	71,348	79,078	136,324	152,036
Per share(A)	.0268	.0298	.0513	.0573
Shares outstanding	2,651,699	2,651,720	2,651,699	2,651,720

(A) -- Includes tax credits from operating loss carryforwards. According to a recent Wall Street Journal review of advances in medical technology, over 90 percent of primary care physicians now perform in-office clinical diagnostic testing. The availability of rapid in-office results has allowed primary care physicians to initiate therapy, and relieve a patient's anxiety, sooner.

Advanced Medical Products is an emerging leader in the design of new generations of clinical diagnostic systems specifically for office-based physicians. AMP currently offers systems which are instrumental in the diagnosis of cardiovascular disease, hypertension and prevention of sudden cardiac death.

HOUSTON (FEB. 20) PR NEWSWIRE - Synercom Technology, Inc. (NASDAQ: SYNR) today reported a net loss of $486,000 or $.08 per share on revenues of $2,958,000 for the company's first quarter ended Jan. 31, 1990. In the first quarter of the prior year, the company reported net income of $688,000 or $.11 per share on revenues of $4,249,000. Included in net income for the quarter ended Jan. 31, 1989 is an extraordinary credit from

tax loss carryforwards which had the effect of increasing net income by $227,000.

Revenues for the quarter ended Jan. 31, 1990 decreased 30.4 percent compared to the quarter ended January 31, 1989. At the company's current revenue levels, financial results can fluctuate from quarter-to- quarter (and to a lesser extent, from period-to-period) as a result of the timing of certain large orders.

Synercom directs its marketing efforts towards major customers that can achieve substantial benefits through the use of its INFORMAP software system in a distributed environment.

Revenues from product licensing and sales comprised 51.5 percent of total revenues for the first quarter of fiscal 1990, compared to 62.1 percent of total revenues for the first quarter of fiscal 1989. Services revenues comprised 48.5 percent and 37.9 percent of total revenues for the quarters ended Jan. 31, 1990 and 1989, respectively.

The company has been successful in stabilizing the level of operating expenses. Total operating expenses increased 2.2 percent for the quarter ended Jan. 31, 1990 as compared to the quarter ended Jan. 31, 1989. The company continues to invest heavily in developing new products and enhancing its existing software product line. Synercom is committed to providing solutions to the complex problem of managing corporate assets, including the integration of spatially related information into existing corporate information systems.

Synercom provides integrated spatial information management solutions for major commercial and governmental organizations worldwide. The company's software products, support services, and systems integration services increase the efficiency and accuracy with which customers record, track, analyze, and manage geographically dispersed assets. Synercom offices and distributors of Synercom products are located worldwide.

#90051p0143 02/20/1990 ~PR Newswire

SEATTLE (FEB. 20) PR NEWSWIRE - Boeing 737 number 1,833 rolled off the Renton, Wash., assembly lines and into the history books last week, its completion meaning that more 737s have been produced than any other commercial airliner in the world, Boeing Commercial Airplane Group announced today.

The 737-300 number 1,833 will be owned by Ansett Worldwide, an Australia

leasing firm, and leased to British Midlands, an English charter carrier.

The 737 is one of the most versatile planes built. A 737-100 operated by Lufthansa of West Germany entered commercial service in Europe on Feb. 10, 1968 -- less than one year after its first flight. On April 28, 1968, United Airlines began using the -200 model in the United States.

The original 737-100 has 96 seats in a mixed class configuration, however the slightly longer 737-200 was developed concurrently. Both were certified for airline service in December 1967. Both featured the standard six-abreast seating popularized by earlier Boeing jetliners. The 737-200 with mixed class seating for 108 passengers quickly proved to be popular and became the basic 737 size for many years.

It deserves much of the credit for making the 737 -- which has garnered 146 customers worldwide -- the best-seller that it is. Its twinjet reliability and its versatile range ability gave it a flexibility the airlines found invaluable. Of all 737s ordered so far, 1,114, or 40 percent, are the -200. The last one was delivered in August 1988.

In March 1981, the 737-300 was given the official go-ahead by Boeing. This plane, a re-engined derivative of the 737-200, with other upgraded features, rolled-out of the Renton plant on Jan. 17, 1984, and made its initial flight Feb. 24. The -300 was certified by the U.S. Federal Aviation Administration Nov. 14, 1984.

The 737-300 takes advantage of its longer body, more efficient engines, advanced technology flight deck and lightweight materials to make it the most economical new-technology twinjet in its class.

The 737-400, formally launched in June 1986, was designed to augment the fleets of carriers needing more capacity to meet near-term traffic growth. Rollout of the first -400 occurred on Jan. 26, 1988.

The newest and smallest member of the 737 family is the 737-500.

The airplane these new-generation 737s have superseded, Boeing's 727, was the first trijet in commercial service and became extremely popular. Designed in the early 1960s, the 727 production extended to August 1984 -- a remarkable length of time considering the original market forecast was for 250 airplanes. As it turned out, 1,832 were built and by September 1984, when the last one was delivered, this fleet of versatile trijets was flying into almost every airport in the world. Today, more than 1,750 are still in service, carrying more than 18 million passengers each month.

#90051p0148 02/20/1990 ~PR Newswire

MINNEAPOLIS (FEB. 20) PR NEWSWIRE - Norstan, Inc. (NASDAQ: NRRD), announced today the results of its third quarter ended Jan. 27, 1990.

Net income increased 91.4 percent to $1,114,000 for the third quarter of fiscal 1990 compared to $582,000 last year. Earnings per share increased 75 percent to $.35 per common share compared to $.20 per common share for the same period last year. Net sales for the quarter increased 15.8 percent to $29,322,000 compared to $25,326,000 last year.

For the first nine months of fiscal 1990, net income increased 40.7 percent to $2,352,000 as compared to $1,672,000 last year. Earnings per share increased 59.6 percent to $.75 per common share for the same period last year. Net sales increased 9.9 percent to $83,570,000 compared to $76,048,000 last year.

The improvement in net income in the nine-month period as well as for the quarter ended Jan. 27, 1990, reflects increased sales volume and continued strong gross margins attributable to the favorable mix of product sales, as well as the strong operating results of the Eastern Region which is headquartered in Cleveland, Ohio, and the previously owned equipment division which sells ROLM used equipment throughout the United States. Operating income for the nine months ended Jan. 27, 1990, increased 45.1 percent to $4,781,000 as compared to $3,295,000 last year. Operating income increased 83.3 percent to $2,255,000 for the quarter ended Jan. 27, 1990, as compared to $1,230,000 last year. These increases have been offset partially in fiscal 1990 by increased interest expense related to the borrowing of funds used to acquire the Southwest Region in June of 1988 and to repurchase common stock under the stock repurchase program and tender offer which was completed in November 1988.

Paul Baszucki, vice chairman and CEO, stated that "We remain optimistic and on plan for the year. Bookings are strong, and we believe the performance shown during the first nine months of fiscal 1990 will continue for the remainder of the year."

Norstan is a telecommunications services company with offices in 21 cities and 10 states.

ENGLEWOOD, NJ (FEB. 20) PR NEWSWIRE - McCaw Cellular Communications, Inc. (NASDAQ/NMS: MCAWA) and Graphic Scanning Corp. (NASDAQ/NMS: GSCC) today announced they have agreed to establish a joint venture, transfer certain cellular telephone properties and settle litigation between the two parties.

The settlement calls for McCaw's cellular properties around Indianapolis to be transferred to Graphic, which has an existing cellular interest in Indianapolis. In addition, under the settlement McCaw and Graphic have agreed to create a regional joint venture by combining Graphic's interest in Milwaukee with McCaw's cellular interests in Wisconsin and Rockford, Ill. McCaw will manage the joint venture's operations and own a 92 percent interest in the venture, with Graphic owning 8 percent. (See table for list of markets.) Graphic previously owned 1,315,000 "pops" in Indiana and Wisconsin; after the settlement, Graphic's pro rata pop ownership interests will increase to 1,384,000.

Both parties have also agreed to the settlement of a lawsuit involving Graphic's cellular telephone interests in Milwaukee and have entered into a binding agreement with the Federal District Court in Western Washington on the matter. The settlement is subject to federal and state regulatory approvals, which are expected.

McCaw Cellular Communications, Inc., the nation's largest cellular telephone company, will have 58.7 million "pops" following the completion of this transaction, its sale of south-central cellular systems to Contel, the completion of the tender offer and LIN's completion of its pending acquisition of 6.9 million "pops" in New York from Metromedia. ("Pops" are a key cellular industry yardstick derived by multiplying market area populations by the percentage ownership of the cellular systems serving those markets.) The company currently offers cellular service, primarily under the "Cellular One" name, in 127 markets in 26 states across the country. McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast.

Graphic Scanning is a leading provider of telecommunications services in the United States and a growing provider of telecommunications services in the United Kingdom. Graphic Scanning operates one of the nation's largest radio paging businesses, is a major holder in two cellular radio telephone partnerships, and serves the corporate syndicate communications needs of the country's investment banking community.

NEW YORK (FEB. 20) PR NEWSWIRE - The First Australia Prime Income Fund, Inc. (AMEX: FAX), a closed-end bond fund, today declared a regular monthly dividend of 9 cents per share, payable on March 16, 1990, to all shareholders of record on March 5, 1990.

This dividend is consistent with the policy adopted by the fund's board of

directors on Oct. 24, 1988, of declaring a regular monthly dividend of 9 cents per share, which commenced in February 1989. Qualifying U.S. taxpayers are additionally entitled to a foreign withholding tax credit on this dividend, and will be informed as to the amount at a later date.

At the time of its offering in April 1986, the First Australia Prime Income Fund was the largest-ever initial public offering on the American Stock Exchange. The fund has net assets in excess of $1 billion. The fund's policy is to invest at least 65 percent of its portfolio in Australian issuers or debt securities rated "AA" or better. The First Australia Prime Income Fund trades on the American Stock Exchange and the Pacific Stock Exchange. The fund is advised by EquitiLink Australia Limited, the largest independent mutual fund manager in Australia. Devoting itself only to the business of fund management, the EquitiLink Group manages more than $1.8 billion on behalf of more than 240,000 investors worldwide.

LONG BEACH, CA (FEB. 20) PR NEWSWIRE - McDonnell Douglas Finance Corp. recently completed a $4 million take-out fixed-rate loan for The Wetmore Building located at 2731 Wetmore Ave., Everett, Wash.

The 60,000-square-foot office building was originally constructed in 1915. The building was completely rebuilt in late 1988 by the borrowing entity, the Red Rose Partners of Earl Person and Jack Walkley of Everett.

Don Venables of Glacier Real Estate Funding of Seattle, the mortgage broker for the transaction, said, "This loan was tailored to owner's needs."

Ned Hosken, regional manager of McDonnell Douglas Finance, said, "We were able to offer an optimum initial funding amount by providing a fixed-pay rate structure with the opportunity for an additional funding occurring with the increase in tenancy."

McDonnell Douglas Finance, based in Long Beach, is a wholly owned subsidiary of McDonnell Douglas Corp. (NYSE: MD). It provides to large and small businesses throughout the United States a wide range of financial services, including the financing of commercial and private aircraft, medical and commercial equipment and real estate, and the full-service leasing of trucks and trailers.

HOUSTON (FEB. 20) PR NEWSWIRE - Quanex Corp. (NYSE: NX), Houston-based metals company, yesterday announced that 317 members of the Progressive Steelworkers of Hammond at its LaSalle Steel Co. in Hammond, Ind., went on strike after their contract expired at midnight on Feb. 14. On Sunday, Feb. 18, the company's proposal was rejected by a vote of the union membership. The Progressive Steelworkers of Hammond is an independent union, not affiliated with the United Steelworkers or the AFL-CIO. "The union employees at LaSalle already had the highest wage and benefit package in the cold finished bar industry, and the offer they rejected was higher than any of the known settlements of our competitors. Our proposal asked for no concessions and offered increases in both wages and pension benefits," said Robert Snyder, Quanex's president.

"No further meetings with the union are scheduled at this time. LaSalle will continue to operate with salaried personnel and will be shipping products to our customers," Snyder said.

"It is too early to tell if the work stoppage will have any significant effect on the company's second quarter earnings. That will depend, of course, on the length of the strike," Snyder said.

LaSalle Steel, one of 16 plants Quanex operates, produces cold drawn steel bars for the machinery and transportation markets.

Quanex's other businesses include the manufacture of specialty metals including steel, aluminum and titanium products for transportation, capital equipment, home building and remodeling and energy processing markets.

CONTACT: W.F. Cleary, or C.A. Meador, 713-961-4600, both of Quanex Corp.

COLLEGE POINT, N.Y. (FEB. 20) PR NEWSWIRE - Cellular Telephone Enterprises, Inc. (CTE) (OTC) today announced the closing of a multifaceted transaction with Carrier Paging Systems, Inc., (Carrier) a radio common carrier operating a system serving radio pager accounts in the tri-state, metropolitan area.

Pursuant to four separate but interrelated agreements, Cellular Telephone Enterprises, Inc.: (i) acquired a sublicense to utilize Carrier's system for ten (10) years with an option for an additional ten (10) years; (ii)

received a right of first refusal to purchase certain assets and securities of Carrier; and (iii) will receive technical support and maintenance services from Carrier.

In consideration, CTE agreed to issue an aggregate of 500,000 shares of its common stock to Carrier representing a 6 percent equity interest in CTE as of the date of the agreements and valued at $1 million. In addition, CTE agreed to implement a secondary public offering of its equity securities within 12 months, to allocate a portion of the net proceeds to the purchase and installation of certain telecommunications equipment, and to grant carrier representation on CTE's board of directors under certain circumstances.

Commenting on the transaction, Leonard D. Weiss, CTE's president stated that "the implementation of the Carrier transaction is expected to generate $5 million in net earnings to CTE over the course of the agreements; and is expected to expedite CTE's growth while at the same time affording us the opportunity to diversify the nature and extent of the services we are presently offering."

CTE is principally engaged in the sale of radio paging equipment and supplies and in the sale and installation of cellular telephones.

HOUSTON (FEB. 20) PR NEWSWIRE - Oshman's Sporting Goods, Inc. (NASDAQ: OSHM) reported today that preliminary sales information indicates that the fourth quarter of fiscal year ended Feb. 3, 1990, while expected to be profitable, will be less profitable than the corresponding quarter of the prior year and consequently, the company may report a loss for the fiscal year just ended.

The fourth quarter was adversely affected by poor snow conditions in the western United States which contributed to lost sales, excess inventory and resulting increased markdowns. Beginning in January 1990, good late season snow conditions have contributed to improved sales results of ski related merchandise.

The company expects to release its audited financial results in late March 1990.

The board of directors of Oshman's Sporting Goods, Inc. has declared a regular dividend of five cents per share to all common stock shareholders of record on March 30, 1990, with the dividend to be payable on April 13,

1990.

ST. LOUIS (FEB. 20) PR NEWSWIRE - Engineered Support Systems, Inc. (NASDAQ-NMS: EASI) today reported sharply improved earnings and revenues for the first quarter of fiscal 1990, compared with the prior year's first quarter.

Net income was $131,000, or 4 cents per share, for the first quarter ended January 31, compared with a net loss of $336,000, or 10 cents per share, the year before.

Revenues increased 29 percent to $12.5 million, from $9.7 million in the prior year's first quarter.

Michael F. Shanahan, chairman of the board and chief executive officer, commented: "Engineered Support Systems progressed into fiscal 1990 having completed first article qualification and testing on a substantial number of new products. As a result, production levels in the first quarter were significantly higher than at the same time last year.

"The financial results reflect the continuing positive momentum established during the past three quarters," Shanahan noted. "With our production levels anticipated to increase further in the second quarter, we expect continued growth in revenues and earnings for the remainder of fiscal 1990."

Key programs scheduled for full-scale production in the second quarter and for the remainder of the year include: H-1 Heaters, which provide a compact, lightweight and efficient source of heat for such applications as preheating aircraft and vehicle engines, deicing aircraft wings and rotors and heating various enclosed structures; Laundry units, which are self-contained systems designed to provide troop units with field laundry service; and Reverse Osmosis Water Purification Units (ROWPU), which provide purified water in the field from salt water or water that is highly polluted or contaminated.

"Despite the higher level of shipments in the first quarter, Engineered Support Systems' backlog remained strong, providing a solid foundation for continued progress," Shanahan said. Funded backlog at January 31, 1990, stood at $123.2 million.

Engineered Support Systems, Inc. produces a broad range of ground support equipment for the military. Products include heaters and air conditioners; water and petroleum distribution systems; nuclear, biological and chemical defense systems; and other support equipment.

ATLANTA (FEB. 20) PR NEWSWIRE - Haverty Furniture Companies Inc. (NASDAQ-NMS: HAVT, HAVTA) today reported higher earnings for the fourth quarter and year ended Dec. 31, 1989.

Net sales for the fourth quarter totaled $63.6 million, up 4 percent from $61.2 million in the year-earlier period. Net income for the quarter was $3.8 million, or $0.65 per share, compared with $2.3 million, or $0.41 per share, a year ago.

For the year, net sales amounted to $232.1 million, up 2 percent from $228.0 million in 1988. Net income for 1989 was $7.8 million, or $1.35 per share, vs. $7.7 million, or $1.32 per share, in the prior year.

Rawson Haverty, chairman and chief executive officer, said that earnings for the fourth quarter were aided by a favorable year-end inventory (LIFO) ajustment of $0.16 per share. He remarked, "Our estimate for changes in merchandise prices proved higher than required based on the final

government indices published for 1989.

"The gain in revenues for 1989 marked a new record for Haverty's. Although sales from showrooms open one year or longer declined 3.5 percent for the year, the momentum in our same-store sales improved during the fourth quarter. The overall environment for retail sales remains very competitive, but we are encouraged by this latest trend in our sales which appears to be carrying over into 1990.

"Our expansion during 1989 included three new showrooms, each in or near markets where we have other stores. We are planning a more active program during 1990 in new store development, including the opening of at least seven new showrooms as well as a new regional distribution center in Mississippi. We are also continuing to invest in expanded management information systems to support the company's future growth."

Haverty noted that the company's record of continued cash dividends was extended in 1989 to 55 years. This was also the 14th consectuive year in which the company has paid a higher annual dividend to stockholders.

Haverty's currently operates 85 retail furniture showrooms in 10 states through the Southeast and Southwest. The company's two classes of common shares are traded on the NASDAQ National Market System under the symbols HAVT and HAVTA.

#90051p0177 02/20/1990 ~PR Newswire

MOLINE, IL (FEB. 20) PR NEWSWIRE - Deere & Company (NYSEL DE) today reported first quarter 1990 net income of $78.5 million or $1.04 per share compared with net income of $48.4 million or $.65 per share in last year's initial quarter. First quarter results last year were affected by the manufacturing start-up and shipping delays of new combines and large tractors. The first quarter of Deere & Company's fiscal year ended Jan. 31.

Worldwide net sales and revenues increased 20 percent to $1.640 billion in the first quarter of 1990 from $1.372 billion in the same period last year. Net sales and revenues include net sales to dealers of farm and industrial equipment, which were $1.376 billion in the current quarter, an increase of 21 percent over sales of $1.141 billion in the first quarter last year. Production tonnage was 20 percent higher than in 1989's first quarter. Net sales and revenues also include revenues from the company's credit, insurance and health care operations, which grew 14 percent to $237 million this year from last year's $209 million.

In a joint statement, Deere & Company Chairman Robert A. Hanson and President and Chief Executive Officer Hans W. Becherer said, "Retail sales of each of our equipment lines increased in the first quarter over last year's comparable volumes. North American retail sales of John Deere agricultural equipment were particularly strong in the first quarter, continuing the increase experienced in the last half of 1989.

"Our 1990 production schedules remain about 5 percent higher than actual 1989 output," Hanson and Becherer said. "North American agricultural equipment and lawn and grounds care production are scheduled for the largest increases, partially offset by lower production overseas."

The company's equipment operations, which exclude the financial services subsidiaries, had net income of $42.9 million in the first quarter this year, up from $14.3 million in the same period of 1989. The company's North American operations generated this increase as sales, production and operating efficiency were improved over last year's results. Net income of the company's credit, insurance and health care operations was $34.3 million in the first quarter this year, compared with net income of $31.1 million in the year-ago period.

Operating profit of the company's North American farm equipment division, which includes both agricultural equipment and lawn and grounds care operations, was significantly higher in the first quarter of 1990 compared with the same period last year. Industrial equipment operating profit was lower in the first quarter this year, while overseas operating profit was about the same as in last year's initial quarter. Operating profit is defined as income before interest expense, income taxes and certain other expenses.

HOUSTON (FEB. 20) PR NEWSWIRE - NaTec Resources, Inc. (NASDAQ: NATC) announced successful completion of performance testing and commencement of operation for the first commercial application of its process for removing acid rain pollutants from flue gas by dry sodium injection. The NaTec system has been engineered to remove at least 70 percent of the sulfur dioxide emissions from the calciner at Western Slope Refining Company (WSRC) in Fruita, Colo.

Under a contract estimated a $5.5 million, NaTec is supplying WSCR, a producer of calcined coke, with injection equipment, technical services and processed sodium bicarbonate for a three year period.

"We are pleased to report that the results of the performance tests easily met the design parameters of the system," observed Socrates S. Christopher chairman and CEO of NaTec.

NaTec's system of removing SO2 and NOx has been proven on four coal- fired utility demonstrations, allowing NaTec to offer performance warranties to its clients. "Currently available alternate technologies, such as wet and dry scrubbers, lime injection and coal cleaning, generally do not provide the combination of benefits of our system. In comparison, we offer low capital costs, short installation time and no plant downtime as well as simultaneous removal of both sulfur dioxide and nitrogen oxides," Christopher noted.

He added that the lower capital costs may make a critical difference in decisions about whether to shut down older facilities rather than bearing the expense of meeting new emission standards.

NaTec is committed to the control of pollutants commonly associated with acid rain. The company provides consulting engineering, injection system installation, operations and maintenance services, and processed sorbent supply. Primary markets are utility and industrial power including pulp and paper and refining.

#90051p0180 02/20/1990 ~PR Newswire

MINNEAPOLIS (FEB. 20) PR NEWSWIRE - Varitronic Systems Inc. (NASDAQ: VRSY) announced today that net sales for the second quarter ended Jan. 31, 1990 were $10,111,000, a decrease of 27 percent from net sales of $13,905,000 in the second quarter of last year. Net income for the quarter was $835,000 or 19 cents per share, a 57 percent decrease from net income of $1,925,000 or 35 cents per share in last year's second quarter, but a significant increase over first quarter net income of $2,000, or less than one cent per share.

Net sales were $19,926,000 and $27,166,000 for the six-month periods ended Jan. 31, 190?, and Jan. 31, 1989, respectively. Net income for the six months ended Jan. 31, 1990 was $837,000 compared with net income of $3,698,000 in the year-ago period.

There are currently 4,262,000 shares of common stock outstanding following the repurchase of 1,322,000 shares between Oct. 9, 1989, and Jan. 31, 1990. Weighted average shares outstanding during the quarter ended Jan. 31, 1990 were 4,397,000 compared with 5,507,000 shares in the comparable period last year.

Scott Drill, president and chief executive officer, commented: "Although sales in the quarter ended Jan. 31, 1990 were down relative to the comparable quarter last year, both sales and earnings were consistent with our expectations, and net income of $835,000 represented a significant improvement over first quarter net income of $2,000.

"We completed the relaunch of our Typestyler(TM) Page and Presentation System in December 1989, and we introduced several new incentive programs to our dealers to rekindle interest in the product. While the Typestyler's contribution to second quarter revenues was not significant, we intend to support the product line with sales incentive programs designed to increase field demonstrations. This should result in improved sales in the second half of fiscal 1990.

"Our Nov. 2, 1989, retructuring was successful, and has resulted in a streamlined, effective organizational structure and reduced operating expenses, which positively impacted second quarter earnings," stated Drill.

Varitronics is a Minnesota-based developer, manufacturer and marketer of business graphics products that enhance the quality, professionalism and effectivness of business communications.

HOUSTON (FEB. 20) PR NEWSWIRE - ConVest Energy Partners, Ltd. (AMEX: CEP) today reported net income of $2,580,000, or $.43 per unit, for 1989 compared to a net loss of $356,000, or $.06 per unit, for 1988. Total revenues for the year ended Dec. 31, 1989, were $10,858,000 compared to 1988 revenues of $7,854,000.

The increase in total revenues and net income for 1989 is attributable to settlement of gas contract disputes and litigation during the first half of the year, aggregating over $1.5 million; profits from Osaka Field;

higher oil prices; added gas production from existing assets, including reserves added during the year, and lower lease operating expenses. The acquisition of proved oil and gas reserves and successful drilling activities over the past year contributed to lower CEP's depletion rate per equivalent barrel by about 8 percent.

ConVest Energy Partners realized net income of $425,000, or $.07 per unit, for the three months ended Dec. 31, 1989, compared to net income of $21,000, or $.01 per unit, for the same period in 1988. CEP had revenues of $2,602,000 for the fourth quarter of 1989 compared with revenues of $1,974,000 for the fourth quarter of 1988.

Total revenues for the fourth quarter of 1989 exceeded the corresponding 1988 period due to higher oil and gas sales. The primary reasons for this increase are added oil production from the Osaka and Altamont-Bluebell Fields and higher oil prices; such prices were over $6 per barrel higher in 1989 as compared to the last quarter of 1988. Cash flow provided by normal ongoing operations for the fourth quarter of 1989 was $1,309,000, compared to $1,082,000 for the third quarter of 1989.

For the year and three months ended Dec. 31, 1989, depreciation, depletion and amortization of oil and gas properties was $3,043,000 and $821,000, respectively. This compares to $2,861,000 and $717,000 for the same periods in 1988.

The present value of CEP's estimated future net revenues from proved reserves was $39.2 million at Dec. 31, 1989, compared to $29.4 million at Dec. 31, 1988. The 1989 increase is the result of the expansion of CEP's asset base through acquisition and drilling activities and higher oil and gas prices.

ConVest Energy Partners, Ltd. is a publicly traded master limited partnership whose principal business activities include the development and operation of oil and gas properties and the acquisition of additional producing properties. ConVest Energy Corporation serves as general partner of CEP and currently owns a 14 percent equity interest.

CORPUS CHRISTI, TX (FEB. 20) PR NEWSWIRE - Marine Drilling Company (NASDAQ-NMS: MDCO) today announced that a special meeting of shareholders will be held on March 12, 1990, to consider and vote upon the previously announced proposed business combination of Marine with Keyes Offshore Limited Partnership and related Keyes entities.

The board of directors of Marine has set a record date of Feb. 7, 1990, for determining shareholders entitled to notice of, and to vote at, the special meeting. Marine has recently mailed proxy solicitation materials to its shareholders. Keyes Offshore Limited Partnership will also hold a special meeting of limited partners on March 12, 1990, to consider and vote upon the business combination.

If the business combination is consummated, Marine, Keyes Offshore Limited Partnership and related Keyes entities will become subsidiaries of Marine Holding Company, a new holding company. In the business combination, each outstanding share of Marine's common stock and preferred stock will be converted into one share of Marine Holding Company's common stock and preferred stock, respectively.

The completion of the business combination is subject to several conditions, including approval by Marine's shareholders and Keyes Offshore Limited Partnership's limited partners. The required waiting period under the Hart-Scott-Rodino Act to consummate the business combination has already expired. If Marine's shareholders and Keyes Offshore Limited Partnership's limited partners approve the business combination at their respective schedule meetings, and the other conditions to the business combination are met, the business combination will be completed shortly after the scheduled meetings of March 12, 1990.

Marine and the Keyes entities are each engaged in the contract drilling of oil and gas wells in the U.S. Gulf of Mexico for independent and major oil companies. Marine has 16 mobile offshore jackup drilling rigs available for operation and the Keyes entities operate seven rigs.

TEL AVIV, ISRAEL (FEB. 20) PR NEWSWIRE - Mair Laiser, president and chief executive officer of ECI Telecom Ltd. (NASDAQ: ECILF), today reported audited results of operations for the year ended Dec. 31, 1989.

Sales for all of 1989 increased to $52,667,000 compared with $38,392,000 in 1988, an increased of 37 percent. Gross profit for 1989 rose by 54 percent over 1988. Net income rose 91 percent to $5,284,000 compared with $2,770,000 in 1988. Fully diluted earnings per share were $.93 compared with $.52 in 1988.

Sales for the fourth quarter of 1989 grew to $13,922,000 compared with $12,880,000 in the fourth quarter of 1988, an increase of 8 percent. Gross profit for the period rose 43 percent over the 1988 period, while net income increased to $1,613,000 compared with $1,069,000 in the corresponding 1988 period, an increase of 51 percent. Fully diluted earnings per share were $.28 compared with $.20 in the corresponding period of 1988.

The company's net margin increased from 7.2 percent in 1988 to 10.0 percent in 1989. This improvement in profitability is primarily attributable to the almost 5 percent improvement in gross margins, a result of improved production efficiency in the company's new facility.

The audited balance sheet also reflects an overall improvement in the company's financial structure. Cash flow from operations exceeded $25,000,000. Most of this amount went to pay down short-term bank credits.

"Our commitment to total customer support is evidenced by the large volume of repeat orders for the company's digital circuit multiplication equipment ("DCME"), especially the DTX-240D, from almost every major long-distance telecommunications carrier in the world," said Laiser.

Nineteen-ninety will see the introduction of two new DCME products aimed at widening the DTX-240 product line. First units of the previously announced DTX-240F, which will enable the transmission of six "fax" calls over a single digital satellite, will be shipped in the third quarter. The DTX-240T for "thin" traffic digital satellite routes will enable the transmission of up to 30 simultaneous data, facsimile or voice calls over

8 channels. Initial orders for these products are now being received. "Market reaction is extremely favorable", said Laiser.

ECI Telecom designs, develops and markets telecommunications and communications systems employing digital speech processing, switching technologies and ISDN- (Integrated Services Digital Network) compatible technologies. These systems are designed to increase the conversation and data carrying capacity of telecommunications networks operated by domestic and international long-distance carriers, PTT's and private line users. Other systems manufactured by the company are designed to improve command, control and communications networks.

PARIS (FEB. 20) PR NEWSWIRE - PaineWebber International has hired the Paris-based financial futures and options team of Drexel Burnham Lambert, which provides services to European institutions. The team, headed by Eric Bertier and Marc Fiorentino, numbers 20 people, including the floor operation on the MATIF exchange in Paris.

The group specializes in providing interest rate and currency risk management products, both exchange traded and over-the-counter, in the U.S. and European markets. Also joining PaineWebber are three former Drexel brokers based on the floor of the Philadelphia Stock Exchange.

Bertier and Fiorentino join PaineWebber as first vice presidents reporting to Eric Lecler, who will head up PaineWebber's new activities in Paris. Lecler is a director of PaineWebber International Futures Limited, a U.K.-based company. Marc Robert will continue as manager of PaineWebber's institutional securities activities in Paris.

PaineWebber Group Inc. (NYSE: PWJ) -- together with its subsidiaries, PaineWebber Incorporated and PaineWebber International -- serves the investment and capital needs of a worldwide client base.

#90051p0195 02/20/1990 ~PR Newswire

BOCA RATON, FL (FEB. 20) PR NEWSWIRE - Reflecting improved margins, Computer Products, Inc. (NASDAQ-NMS: CPRD), an electronics manufacturer based in Boca Raton, Fla., today reported 1989 earnings of $7 million, or 34 cents per share, on sales of $119.5 million. This compares to a loss of $10.3 million, or 52 cents per share, on sales of $123.6 million in 1988.

The earnings were the company's highest in five years.

Sales in 1989 of ongoing product lines actually increased by 3.5 percent, after adjusting for approximately $8 million in products discontinued in 1988. European sales in the company's Power Conversion business grew by 17 percent. Sales also increased 13 percent in the company's Measurement and Control business. Only the company's U.S. Power Conversion business failed to grow. Its flat sales reflected the continuing softness in the domestic computer industry and other electronics markets.

Fourth quarter earnings in 1989 were $2 million, or 10 cents per share, on sales of $28.3 million, compared to earnings of $1.2 million, or 6 cents per share, on sales of $31.9 million, reported at the end of the fourth quarter last year.

The actual fourth quarter net income from operations was 10 cents per share and the total 1989 net income from operations, 30 cents per share. During the fourth quarter the company, as an extraordinary activity, repatriated foreign earnings which caused a 10 cents per share income tax charge. For accounting purposes, that charge was imposed against earnings. At the same time, the company was able to take advantage of prior years' net operating losses of 10 cents per share so that no U.S. tax was required to be paid on the repatriated earnings. Also, an additional 4 cents per share of income for the year was realized from other tax credits.

Expenses and costs of goods sold were reduced by more than $12 million compared to 1988, fueling an increase in gross margins from 30.9 percent in 1988 to 38.1 percent in 1989. Inventories in 1989 were reduced by $5.5 million and accounts receivable by nearly $5 million. Those reductions helped increase the company's cash from $5.5 million to $25 million during 1989.

In North America, Computer Products completed the consolidation of three Power Conversion Divisions into a single organization, with a central engineering, marketing and operations-management organization. The streamlining reduced overhead and improved gross profit margins. In Europe, the company opened a Power Conversion sales office in England and added new distributors to its sales network, which has grown to 27 distributors in 20 countries. Computer Products now has one of the power supply industry's most extensive distribution and sales networks, with factories in the United States, Republic of Ireland and Hong Kong.

In 1989, the company continued to introduce its technically advanced "universal input" switching power supplies, products that let customers plug into any alternating current (AC) wall socket, anywhere in the world. These new products earned widespread acclaim as an industry first and have been a major sales catalyst.

The company also unveiled G 2, an "intelligent" preprocessor used in real-time process control. G 2 received widespread publicity and promises to become a major income contributor in 1990.

"We saw significant improvement in all operating areas in 1989, despite sluggish market conditions in the United States. Our profits were up dramatically, and our sales, after adjusting for discontinued product lines, grew 3.5 percent. Our margins and cash improved considerably as a result of an internal restructuring, which made a leaner, more competitive company. We are now poised to take full advantage of the expected improvement in demand for our products. In the meantime, we are continuing to look for ways to improve the efficiency of our operations and strengthen our competitive position in domestic and overseas markets," said John N. Lemasters, chairman, president and chief executive officer of Computer Products.

Computer Products, Inc. specializes in three businesses: Power Conversion Measurement and Control, and Government Electronics. The company is headquartered in Boca Raton, Fla., and employs 1,700 people in the United States, Hong Kong and the Republic of Ireland. The company is listed on the NASDAQ national market system under the symbol CPRD.

TULSA, OK (FEB. 20) PR NEWSWIRE - Kern River Gas Transmission Company today announced it has signed a firm contract with Mobil Natural Gas Inc. to transport 85 million cubic feet per day (MMcfd) of natural gas on its proposed pipeline from Wyoming to California.

Kern River's firm, long-term contracts now total 605 MMcfd. Within the past week, Kern River also signed contracts with two major Canadian producers -- Petro-Canada Inc. (for 120 MMcfd) and Salmon Resources, a U.S. subsidiary of Shell Canada Limited (for 30 MMcfd).

"With the signing of Mobil Natural Gas, we have contracts with five companies that plan to use gas from the Kern River line for enhanced oil recovery in California," said Cuba Wadlington Jr., executive vice president of Kern River. "We already signed Chevron U.S.A. Inc., Shell Western E&P, Union Pacific Resources, and the M.H. Whittier Corporation."

Kern River also has a contract for 40 MMcfd with the city of Long Beach, Calif., which will use the gas to supply residential, commercial and industrial customers. To complete the full initial capacity of the pipeline, Kern River is continuing to convert its remaining letters of intent to firm contracts.

The 904-mile Kern River pipeline will originate in southwest Wyoming and terminate in Kern County, Calif., where -- in addition to enhanced oil recovery and distribution by utility companies -- the gas will be used for production of electricity, cogeneration of electricity and steam and other industrial applications.

The Kern River pipeline will provide California with gas supplies from Canada and from the Overthrust Region of the Rocky Mountains. Initial capacity of the 36-inch diameter line will be 700 MMcfd.

Last summer, Kern River began detailed design and engineering and is scheduled to award construction contracts later this year.

Kern River is a joint venture of The Williams Companies, Inc. and Tenneco Inc.

The Williams Companies, Inc. (NYSE: WMB) is a Tulsa-based corporation that operates a nationwide digital telecommunications network and more than

25,000 miles of pipelines, which transport natural gas and petroleum products.

Tenneco Inc. (NYSE: TGT), is a Houston-based, diversified company with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals and minerals.

CARLSBAD, CA (FEB. 20) PR NEWSWIRE - Specialized Systems Inc. (SSI) (NASDAQ: SSII) today announced that it had signed a letter of intent to acquire a diversified construction company located near its Richland Chambers Reservoir project outside Corsicana, Texas. The privately held company is one of the top ten builders of Texas State Government projects and has built, among other projects, highways, bridges and schools. The acquisition is subject to negotiation of a definitive agreement and the company obtaining adequate financing to complete the transaction.

Preliminary terms of the agreement are that SSI shall purchase all of the outstanding shares of the potential acquiree in exchange for $5 million in cash, 16,242,500 shares of SSI stock and obtain adequate financing for the combined entity to allow the principal of the construction company to terminate his current personal liability on project completion bonds.

Audited financials provided to SSI by the principal of the potential acquiree indicate that for the period ended Sept. 30, 1989, the construction company had total assets of $44,556,875 and shareholders equity of $13,835,496. Using the percentage of completion method of accounting the company had contract revenues for the 12 months ended Sept. 30, 1989, of $39,471,725 upon which it had gross profits of $4,903,145 and a pre tax loss of $2,583,607. The company had contracts in progress at Sept. 30, 1989, worth a total of $102,351,775.

SSI management and the principal of the potential acquiree have met with an investment banking firm to discuss financing for the transaction and expect to do so again in the near future to determine as soon as possible whether the acquisition can be completed.

MONTREAL (FEB. 20) PR NEWSWIRE - Dominion Textile Inc. (Montreal: DTX) announced today that it will proceed with a public offer for all of the common shares outstanding of Textiles Dionne Inc., a Quebec-based yarn manufacturer. Documents related to the offer will be mailed to Dionne shareholders on Feb. 21.

Under the terms of the offer, Dionne shareholders have the option of receiving .3125 of a Dominion Textile common share for each Dionne common share, or $4.75 per share in cash. The major shareholders, who hold 68.8 percent of the Dionne common shares outstanding, have already agreed to tender their shares and to receive Dominion Textile common shares under the exchange provision of the offer.

If all shareholders elect to receive Dominion Textile common shares, such an offer would result in the issue of a maximum of approximately 1,250,000 Dominion Textile common shares. The total value of the transaction will be approximately $19 million.

The offer, which expires at 11:59 p.m. Montreal time on March 16, is conditional on, among other things, obtaining not less than 90 percent of all the outstanding common shares of Dionne. In addition, Dominion Textile is awaiting federal regulatory approval for the acquisition.

Charles H. Hantho, president and chief executive officer of Dominion Textile, said the corporation was pursuing the acquisition of Dionne to better position its North American sales yarn operations which generated $227 million in sales in the last fiscal year ended June 30, 1989.

Dionne manufactures spun yarn from cotton and synthetic fibers at plants in Saint-Georges de Beauce, Montmagny and Drummondville, Quebec, Canada, for sale to manufacturers of apparel, home furnishings and industrial products. The company recorded sales of $50.9 million in the fiscal year ended Sept. 30, 1989.

Dominion Textile, based in Montreal, is a leading international manufacturer and distributor of textiles and textile-related products with more than 40 manufacturing facilities and a presence in some 50 countries around the world.

TROY, MI (FEB. 20) PR NEWSWIRE - Standard Federal Bank (NYSE: SFB) led all other mortgage lenders in the four-county area of Wayne, Oakland, Macomb and Washtenaw during the month of December for residential mortgage

loan recordings of $250,000 or less, according to Lawyer's Title Insurance Company.

As a result of this activity and the bank's level of closings for the previous 11 months of 1989, Standard Federal was the leading home mortgage lender in the metropolitan Detroit area again in 1989. Standard Federal has been the leading home mortgage lender in this area for 13 of the last 16 years.

"We are very pleased that Standard Federal continues to be the No. 1 lender for home mortgage loans in southeastern Michigan," stated Thomas R. Ricketts, chairman and president of Standard Federal.

"In 1990, Standard Federal will remain committed to the continued development of new mortgage loan programs that will meet the needs of all the communities we serve," said Ricketts.

Headquartered in Troy, Standard Federal Bank has assets of $9.6 billion and operates 113 branch offices throughout Michigan and Indiana.

#90051p0207 02/20/1990 ~PR Newswire

CHICAGO (FEB. 20) PR NEWSWIRE - Midway Airlines Inc. (NYSE: MDW) today reported a net loss of $20,738,000 or $2.15 per fully diluted share for the year ended Dec. 31, 1989, compared with net income of $6,545,000 or $.60 per fully diluted share in 1988.

For the fourth quarter of 1989 the company had a net loss of $26,875,000 or $2.78 per fully diluted share. During the comparable 1988 period, the company reported net income of $502,000 or $.05 per fully diluted share.

According to David R. Hinson, chairman and chief executive officer, the company charged against the 1989 fourth quarter results the cost associated with the establishment of its second hub at Philadelphia International Airport. The airline commenced Philadelphia hub operations on Nov. 15.

"While startup costs related to Philadelphia contributed substantially to the adverse fourth quarter results, our investment in the second hub is the cornerstone of our long-term business strategy," said Hinson. "Initial public response to our new Philadelphia service has been excellent with passenger traffic volumes and reservations activity exceeding expectations."

Fourth quarter results were also adversely impacted by an increase in fuel costs during the month of December.

On Dec. 31, 1989, Midway Airlines had 10,008,477 shares of common stock outstanding.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

BENTON HARBOR, MI (FEB. 20) PR NEWSWIRE - Whirlpool Corporation (NYSE: WHR) today reported that the strong earnings performance demonstrated in its third quarter continued through 1989, resulting in double-digit earnings growth for both the fourth quarter and the 1989 year.

Fourth-quarter net earnings from continuing operations rose 20.8 percent to $49.4 million, or $.71 per share, from $40.9 million, or $.59 per share in the fourth quarter 1988. The company's decision to close its Mt. Sterling, Ky., division resulted in a pre-tax facility consolidation charge of $9.2 million in the fourth quarter. Excluding this provision, 1989 fourth-quarter net earnings would have been $55.0 million, or $.79 per share. Fourth-quarter consolidated net revenues increased to $1.57 billion, up from $1.02 billion in 1988.

For the year ended Dec. 31, 1989, consolidated net earnings were $187.2 million, or $2.70 per share, compared to 1988 earnings from continuing operations of $161.3 million, or $2.33 per share, a 16.1 percent improvement. The decision in 1988 to sell the company's kitchen cabinet business resulted in a 1988 after-tax loss of $67.2 million, which included an estimated loss on disposal of $45 million. Taking this into account, consolidated net earnings for 1988 were $94.1 million, or $1.36 per share. The inclusion of the $45 million loss provision in the fourth quarter 1988 resulted in a net loss of $12 million, or $(0.17) per share.

Consolidated net revenues for 1989 were $6.29 billion, compared to $4.42 billion in 1988. The 1989 results include all of the revenues of Whirlpool International B.V. and 53 percent of the net earnings of the joint venture in line with the corporation's ownership position.

The stronger results in 1989 were fueled by continued improvement in North American operating margins in most product categories and by strong equity earnings from the company's affiliates in Brazil and Vitromatic in Mexico.

Whirlpool International B.V. contributed positively to net earnings and posted volume increases that outpaced the European marketplace.

These improvements were tempered by increased interest expense, a higher effective tax rate for the corporation and weakening margins in Europe.

Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, the company manufactures in ten countries and markets products under nine major brand names in more than 45 countries.

BENTON HARBOR, MI (FEB. 20) PR NEWSWIRE - Whirlpool Corporation (NYSE: WHR) announced on behalf of the board of directors that Jan Prising, president, chief executive officer and senior managing director of Whirlpool International B.V. (WIBV), and Ralph F. Hake, Whirlpool corporate vice president of corporate planning and development, were elected to new positions at the board's meeting today.

Prising was elected a vice president of Whirlpool Corporation. He was named to his post at WIBV on Jan. 17, 1990, succeeding Wilhelmus G. (Bill) Maeyer, who retired Feb. 1. WIBV is the joint venture that was created when Whirlpool Corporation gained a 53 percent interest in N.V. Philips' major domestic appliance business in January 1989.

Hake, already an elected vice president, additionally was elected corporate controller.

In his new position, Hake assumes responsibility for strengthening the company's worldwide financial information and reporting systems in order to help the financial decision-making process, according to James R. Samartini, executive vice president and chief financial officer, to whom Hake reports. Reporting to Hake as well are assistant corporate controllers Russell B. Collingwood and Allan D. Vingelen.

Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, the company manufactures in 10 countries and markets products under nine major brand names in more than 45 countries.

LOS ANGELES (FEB. 20) PR NEWSWIRE - Nissan Motor Corporation in U.S.A. announced today that all its dealers would use refrigerant recycling equipment to prevent release of CFC 12 during vehicle servicing.

CFCs, or chlorofluorocarbons, have been linked to depletion of the earth's ozone layer, which protects against hazardous ultraviolet radiation.

Nissan will be among the first automotive manufacturers to require dealers to use recycling equipment. The equipment, manufactured by Kent-Moore Inc. of Warren, Mich., has been tested and approved by Underwriters Laboratory. It is expected to be in operation at all Nissan dealerships by spring 1990.

In addition, Nissan in 1990 will cease the sale of CFC 12 in 14-ounce cans for after-market use by customers and dealers.

"We at Nissan are seriously concerned with the environmental aspects of motor vehicle operation," said John Schutz, director of testing and evaluation for Nissan Research and Development Inc. "Nissan is making a concerted effort to reduce the use of CFCs and eventually cease CFC use in production altogether."

Schutz said that most Nissan vehicles produced after July 1990 will be equipped with air conditioning units using reduced CFC levels. Nissan is also developing an air conditioning system using alternate refrigerants that will be mounted on new vehicles beginning in 1993, with all models equipped by the mid-1990s.

PARAMUS, NJ (FEB. 20) PR NEWSWIRE - Bob Johnson, chairman of Bell Atlantic Data 3, announced today that the company is changing its name to Bell Atlantic Computer Products to reflect a new marketing focus.

The change takes effect immediately

"Bell Atlantic Computer Products is today a single source provider of midrange IBM and DEC equipment and related services. It is our feeling that the name Bell Atlantic Computer Products better identifies the company's objective and purpose, and emphasizes our Bell Atlantic affiliation," he said.

Founded by Johnson in 1975, the Minnesota-based company was historically a remarketer of customer premised telecommunications and computer equipment in a dealer-to-dealer market. Since joining Bell Atlantic, the company has shifted its market focus and product and service mix to offer a range of hardware options (including new, used and plug compatible), and support services such as maintenance, education, financing and disaster recovery, in conjunction with its Bell Atlantic affiliates and other strategic alliances.

The company, which has 105 employees, will continue to operate out of its Minneapolis and Dallas locations.

Bell Atlantic Computer Products is a subsidiary of Bell Atlantic Corp. (NYSE: BEL). Philadelphia-based Bell Atlantic is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone (Delaware) and the Chesapeake and Potomac Telephone Companies of Maryland, Virginia, West Virginia and Washington, D.C.

Bell Atlantic is also a leader in computer maintenance, financial services and mobile communications.

#90051p0223 02/20/1990 ~PR Newswire
CHICAGO (FEB. 20) PR NEWSWIRE - Oil-Dri Corporation of America (NASDAQ: OILC) today reported sales of $23,790,000 for the quarter ended Jan. 31, 1990. This is a 15 percent increase over sales of $20,732,000 in the second quarter of last year. The six month sales of $48,060,000 were a record high for the company and 17 percent higher than the $41,222,000 reported for the comparable period a year ago.

Although sales were excellent for the period, increased costs and operational difficulties resulted in modest earnings increases. Net income for the quarter was $1,551,000 or $0.28 per share, an increase of 6 percent over the $1,458,000 or $0.26 reported for the same quarter last year. Net income for the six months was $3,576,000 or $0.64 per share. This is an increase of 7 percent over the $3,337,000 or $0.60 earned in the first half of last year.

Oil-Dri's president, Richard M. Jaffee, discussed the company's sales by market:

"The consumer division showed strength in all major products. Fresh Step(R) Cat Litter had excellent shipments for the period and Control(R) Cat Litter continued to expand distribution. Both products are manufactured by Oil-Dri for the Clorox Company."

"Cat's Pride(R) Premium, Oil-Dri's flagship cat litter brand, had very healthy shipments. Marketing support in the form of the American Humane Association endorsement program, and the recent print campaign have contributed to sales and distribution growth."

"Private label shipments to Wal-Mart have been very strong. Oil-Dri maintains its position as sole supplier of Wal-Mart's private label cat litters and a special size of Cat's Pride(R) Premium."

"Ultra-Clear(R) and Pure-Flo(R) had strong growth in both domestic and export markets. Unfortunately, unfair trade restrictions continue to limit Pure-Flo(R) business in Malaysia. The company is considering legal action to break down these barriers. Demand for Select(TM) Gellant Clay for use in tape joint compounds also grew."

"The company experienced rapid and dramatic increases in fuel costs during the quarter. The increases, which were greater than those experienced during the oil embargo of the 1970's, affected both transportation and processing costs. Fuel surcharges have been added to deliveries and price increases have been implemented to offset these costs."

"Severe cold in December interrupted plant operations during our peak shipping season. In order to meet market demand, expensive overtime and round-the-clock operation were required. With price increases in place and the plants back to normal operations, we anticipate continued strong sales in the second half and an improvement in the bottom line."

Oil-Dri Corporation is a leading producer of sorbent technologies for consumer, agricultural, specialty and industrial applications. The corporation is headquartered at 520 N. Michigan Ave., Chicago, Ill., 60611.

DALLAS (FEB. 20) PR NEWSWIRE - International Broadcast Systems, Ltd. (IBS) announced today that its lawsuit with Minneapolis-based International Broadcasting Corporation has been settled.

Pursuant to the settlement, International Broadcasting Corporation has dropped all claims relating to this matter against IBS and the parties have agreed, among other things, that IBS may continue to use its name in connection with its business operations.

The lawsuit was originally brought by IBS to establish that it was entitled to use the IBS name and logo in areas in which it conducts business. Subsequently, International Broadcasting Corporation counter-sued alleging that use of the IBS name and logo violated its rights.

To avoid any confusion over each company's NASDAQ stock symbols, IBS announced that effective March 1 its stock symbol on NASDAQ will be changed from "IBSLA" to "IBTVA."

With offices in Dallas, Los Angeles, Paris, Santiago and Washington, D.C.,

IBS distributes television programming in more than 120 countries. Additionally, the firm secures airtime and sponsorships internationally, provides product licensing and merchandising services, as well as broadcast management and consulting services to television stations domestically and abroad. The company's Class A Common Stock trades under the NASDAQ symbol "IBSLA."

NORTH MIAMI BEACH, FL (FEB. 20) PR NEWSWIRE - Fred Rosemore, president of Pro-Med Capital, Inc. (AMEX: PMC), announced that portfolio and earnings reached record levels for the sixth consecutive year. The president stated, "We are extremely pleased with the earnings of 1989 and especially encouraged with the fourth quarter results. As a result of our continually expanding the investment parameters of Pro-Med we will enter the decade of the 1990s from a position of greater strength."

The portfolio has increased by 34.1 percent to $38,670,518 including serviced loans. The company continues to increase its investment income while maintaining control over its overhead which reinforces the company's ability to increase both net income and earnings per share.

The following table contains comparative selected financial data for the quarters and years ended Dec. 31, 1989 and 1988.

PRO-MED CAPITAL, INC.

Three Months Ended Dec. 31,	1989	1988	Increase Pct.
Net income	$515,632	$350,242	47.2
Per Share	11.1 cts	9.3 cts	19.4
Revenues	1,205,412	877,743	37.3
Weighted Average Number of Common Shares Outstanding	4,460,427	3,458,458	29.0

Twelve Months Ended Dec. 31,	1989	1988	Increase Pct.
Net income	$1,811,895	$1,274,885	42.1
Per Share	40.5 cts	36.9 cts	9.8
Revenues	4,061,938	3,208,065	26.6
Weighted Average Number of Common Shares Oustanding	4,336,388	3,376,815	28.4

The above table does not reflect the additional deferred income and earnings per share as a result of the company's implementation of F.A.S.B.

91. As a result of this accounting change, during the years, ended Dec. 31, 1989 and 1988 $143,849 and $124,491 (3.4 cts and 3.7 cts per common share) respectively was the net effect deferred to future earnings and will be reported as interest income in subsequent years.

(A) -- Deferred income tax is computed on a partial application basis, while foreign exchange losses are deferred and amortized to coincide with the actual repayment of outstanding foreign currency obligations. The effect of these methods is to increase net income by P1.4 million ($60,000) for the fourth quarter and P15.2 million ($700,000) for the year 1989 (but to decrease net income by P600,000 ($30,000) for the fourth quarter and increase net income by P7.5 million ($400,000) for the year 1988).

(B) -- Earnings per share are based on the weighted average number of common shares outstanding. 1989 earnings per share were as adjusted to give effect to the 15 percent and 100 percent stock dividends declared on Feb. 14, 1989.

(C) -- Benguet is a Philippine corporation and its books of accounts are kept in Philippine pesos. U.S. dollar figures are shown purely for convenience and are computed based on the interbank guiding rate at Dec. 31 of P22.43 to $1 in 1989 (P21.34 to $1 in 1988).

LONG BEACH, CA. (FEB. 20) PR NEWSWIRE - McDonnell Douglas Finance Corp. has funded a five-year fixed rate $5.1 million refinance loan for two warehouse/distribution properties located in Elwood, Kan., and St. Joseph, Mo. The borrowing entity is SJ Associates L.P. of Dallas with Robert M. Petrucello as general partner. The financing was arranged by Marion Hicks and James Neil of Miller Wallenstein and Associates' Dallas office.

The Kansas property has 283,509 square feet and is 100 percent leased to two tenants, including a public warehouse concern. The Missouri property contains 109,456 square feet and is 100 percent occupied by Mead Corp.

Tim Bryant, regional manager of McDonnell Douglas Finance's Rolling Meadows, Ill., office, said, "We were able to provide financing, in excess of 80 percent loan-to-value, on older but well-maintained properties."

McDonnell Douglas Finance, based in Long Beach, is a wholly owned subsidiary of McDonnell Douglas Corp. (NYSE: MD). It provides to large and small businesses throughout the United States a wide range of financial services, including the financing of commercial and private aircraft, medical and commercial equipment and real estate, and the full-service leasing of trucks and trailers.

WASHINGTON, (FEB. 20) PR NEWSWIRE - The 175 Henson (USAir Express) flight attendants, represented by the Association of Flight Attendants, AFL-CIO, ratified today, by mail ballot, a first-time contract with the airline's management.

The new agreement, which will go into effect March 1, was approved by 95 percent of those flight attendants who returned their ballots.

AFA and Henson management reached a tentative agreement on a three- year contract Jan. 13, 1990. Negotiations between the Henson flight attendants and management began on Feb. 3, 1989.

During the first year of the contract, hourly-rate increases will range from 9 percent to 38 percent, and lump sum bonuses will be paid according to seniority. Pay increases will equal to 3 percent the second year and 3 percent the third year. An hourly pay scale was established for up to 12 years of service.

The contract establishes and improves important work rules. AFA negotiated a 14-hour duty scheduling maximum and a guaranteed eight-hour minimum rest break at layover stations. A 10-hour minimum rest break at the flight attendant's domicile was also negotiated. Other improvements were made in sick leave accrual, per diem, maternity leave, and uniform allowance. Additionally, scope, merger and protectorship protection was negotiated. AFA was also successful in obtaining a grievance procedure including binding arbitration if necessary, and agency shop and dues check off provisions.

"The AFA negotiating committee at Henson persevered until they made improvements in almost every facet of their work life," said Susan Bianchi-Sand, AFA national president. "Not only will this contract improve work standards for the Henson flight attendants, but it should

also have a ripple effect on other regional carriers."

The Association of Flight Attendants, AFL-CIO, represents 28,000 flight attendants on 18 airlines and is the largest flight attendant union in the world.

COLORADO SPRINGS, COL (FEB. 20) PR NEWSWIRE - Top Source, Inc. (formerly Top Sound International, Inc.) (NASDAQ: TOPS) today announced that it has decided to proceed with the development of its own exclusive auto safety technology and, therefore, it has initiated a mutual termination of its licensing agreement with Life Force, Inc. of St. Louis.

Roger Rankin, Top Source president, said the decision represents "an extremely important corporate strategy" that will increase Top Source's profit potential since the company will now have 100 percent ownership of future patents and 100 percent participation in any future revenues stemming from its safety technology.

The termination agreement between Top Source and Life Force included mutual resolution of all outstanding financial matters, plus general releases of all claims. It also specifically acknowledges that either party may develop and market safety-related products.

Among the provisions, the termination agreement states that Top Source will pay Life Force a one-time cash payment of $100,000 and will forgive repayment of a loan it had made to Life Force. Also, Top Source is relieved of its obligation to deliver to Life Force 350,000 registered shares of Top Source common stock.

Under the direction of Dr. Neil Singer, who holds a Ph.D. in engineering from the Massachusetts Institute of Technology (MIT), Top Source has assembled and contracted with a highly recognized team of scientists and engineers. This team has been developing a unique approach to a safety seat designed to help alleviate injuries stemming from frontal collisions of automobiles in circumstances where occupants of a car are "submarined" under seat belts or air bags.

Singer reported that the team has already made a "great deal of progress" in developing computer crash simulation tools and seat motion trajectory studies to help optimize the value of seat motion as an added vehicle safety feature. While there is no assurance of marketing success, Top Source added that its scientific findings would be made available to

vehicle manufacturers, insurance companies, and government and private safety activists.

Top Source announced that it is now seeking to position itself as a technology developer and broker and is also evaluating technologies being developed at leading universities, as well as in the private sector.

#90051p0243 02/20/1990 ~PR Newswire

LONG GROVE, IL. (FEB. 20) PR NEWSWIRE - ''We are witnessing a classic case of market overreaction in the high-yield securities market,'' said Joseph E. Luecke, Kemper Corp. (NYSE: KEM) chairman of the board, president and chief executive officer. ''When the dust settles, I hope that it will be apparent that not all high-yield portfolios were created equal,'' Luecke said.

One of Kemper Corp.'s long-standing investment strategies has been to put together a well-diversified group of carefully selected high-yield issues -- below investment grade securities -- as part of its overall portfolio, said Luecke.

Despite the 1989 decline in the value of high-yield securities, the ratio of market value to carrying value of Kemper Corp.'s total fixed maturity investment portfolio increased from 97.9 percent at year-end 1988 to 98.4 percent at year-end 1989.

Kemper Corp.'s investment portfolio is managed by its subsidiary Kemper Financial Services, Inc. (KFS), which has a recognized expertise in high-yield investing. For example, the Kemper High Yield Fund, managed by KFS, was recently ranked first in total return for the ten year period ending Dec. 31, 1989 by Lipper Analytical Services, Inc., not only among high-yield funds, but also among all bond mutual funds.

KFS also manages the portfolios of Kemper Investors Life Insurance Company and Federal Kemper Life Assurance Company, Kemper Corp. subsidiaries that engage in annuity sales. Their combined $6.3 billion portfolio represents about 80 percent of Kemper Corp.'s invested assets. The weighted average quality of the life insurance companies' rated fixed maturity investment portfolio equates to a Moody's/S&P ''A'' rating. A.M. Best Company gives both life insurers ''A'' (Excellent) ratings.

''For more than a decade we have maintained that with the proper credit analysis, the additional income opportunities from selected high-yield bonds can more than compensate investors for any additional risk, as long as self-imposed limits keep such investments only one element in a

diversified, well-managed portfolio,'' said Executive Vice President and Kemper Financial Services, Inc. Chief Investment Officer Stephen B. Timbers. ''As part of this strategy, Kemper always maintains more than adequate liquidity by placing a significant proportion of its portfolio in short term, U.S. Government and investment grade securities,'' Timbers said.

High-yield securities, including not-rated issues, represented about 19.4 percent of the Kemper Corp.'s $8.2 billion in cash and invested assets at year-end 1989. Kemper Corp. had 23.9 percent of its portfolio in investment grade securities, 19.1 percent in U.S. Treasury securities, 14.6 percent in mortgage loans and 7.5 percent in cash and short-term maturities (see accompanying chart).

''We expect 1990 should eventually turn out to be a good year for high-yield bonds,'' said Timbers. ''We're always looking for issues that strike the right balance between high-yield and safety. We favor defensive, recession-resistant industries over cyclical ones.

While we expect growth to continue at a slow pace in 1990, you don't need a booming economy to service high yield debt. The high-yield market simply needs stable cash flow to service debt. Demand for high-yield bonds sparked by attractive yield spreads, should outstrip supply. The current discounted prices and record spreads over Treasuries have created potentially exceptional values in the high-yield market. We believe many of the available credits to be sound issues. And over the long term, high-yield bonds should remain one of the bond market's most desirable sectors,'' he concluded.

#90051p0245 02/20/1990 ~PR Newswire

DETROIT (FEB. 20) PR NEWSWIRE - General Motors has announced that its Fisher Lumber Corporation subsidiary has selected two groups with longstanding interests in wildlife and conservation to acquire some 57,000 acres of Louisiana farmlands, bottomland hardwoods and wetlands which GM has owned since 1926 when wood was used in automobiles.

Fisher Lumber property in the State of Louisiana totals 57,138 acres and is located in the parishes of Franklin, Catahoula, Concordia and Tensas.

Approximately 46,000 acres of the property will be conveyed to Muirfield-Pitts, a partnership interest in continuation of bottomland hardwood/wetland ecosystems in the Mississippi delta region. Through the placement of conservation easements on significant portions of the timberlands and wetlands, GM and Muirfield-Pitts will ensure that the

property will continue to supply wildlife habitat, recreational opportunity and economic benefits in the future.

The remaining 11,000 acres of Fisher property will be conveyed to The Nature Conservancy, a significant portion of which will be in the form of a donation by General Motors. The Nature Conservancy is an international organization that has protected over 5 million acres of wildlife habitat in the United States. GM has been a supporter of The Nature Conservancy for several years and shares the organization's commitment to conserving natural resources, property and wildlife.

"We are pleased to reach agreements with both Muirfield-Pitts and The Nature Conservancy," said William J. O'Keefe, executive director of GM's Corporate Services Staff and vice president of Fisher Lumber Corporation. "Our highest priority has been to ensure that the new owners would have conservation goals consistent with ours, and we believe the conveyance to these two groups will accomplish this."

"The Fisher properties contain some of the largest stands of bottomland hardwoods remaining in the South and thousands of acres of wetlands habitat," explained O'Keefe. "Both types of property are rapidly disappearing from the American scene and we're happy that, particularly in view of Fisher's rich history, they will be available for enjoyment by future generations."

Fisher Lumber Corporation was incorporated by General Motors in 1926 as a source of hardwoods and wood milling services for the variety of wood products that were used in automobiles at that time. When wood ceased to be used as a main component in the U.S. automobile in the late 1930s, GM continued to care for the property.

The final conveyance of the Fisher Lumber properties is scheduled to be completed in early 1991.

#90051p0246 02/20/1990 ~PR Newswire

LAS VEGAS, NEV (FEB. 20) PR NEWSWIRE - The Nevada Power Company (NYSE: NVP) today reported that earnings for the year 1989 were $51,467,000 compared to $50,224,000 for 1988. Net income, after requirements for preferred stock dividends, was $48,409,000, equal to $1.81 a common share, compared to $47,537,000 or $1.78 a common share.

Electric revenues for 1989 were $418,373,000 compared with $409,013,000 in 1988. The number of weighted average common shares rose to 26,693,000 from 26,667,000.

Nevada Power also reported that earnings for the fourth quarter of 1989 were $2,978,000, compared to $2,479,000 for the same period a year ago. Net income, after requirements for preferred stock dividends, was $2,231,000, equal to 8 cents a common share, compared to $1,753,000 or 7 cents a common share for the fourth quarter of 1988.

Electric revenues for the fourth quarter of 1989 were $89,494,000, compared to $84,887,000 for the fourth quarter of 1988. The number of weighted average common shares for the quarter rose to 26,796,000 from 26,671,000.

Although kilowatt-hour sales increased by 8.0 percent in 1989, the September 1988 general rate reduction contributed to the fact that revenues increased only 2.3 percent in 1989. The increase in revenues was partially offset by increased operating and interest expenses.

#90051p0248 02/20/1990 ~PR Newswire

LAKE WORTH, FL (FEB. 20) PR NEWSWIRE - Cenvill Development Corp. (AMEX: CVL) today reported operating results for the fourth quarter and fiscal year ended Oct. 31, 1989.

Revenues for the fourth quarter of fiscal 1989 were $33,025,000 and net income was $207,000 or 1 cent per share, compared with $65,945,000 in revenues and $6,009,000 or 42 cents per share of net income for the fourth quarter of fiscal 1988.

Revenues for the fiscal year ended Oct. 31, 1989 were $125,369,000 and net income was $3,292,000 or 23 cents per share, compared with $179,306,000 in revenues and $10,759,000 or 75 cents per share of net income in fiscal 1988. Included in the fourth quarter and fiscal 1988 results is $20,970,000 in revenue and $3,057,000 or $.21 per share in net income related to the sale of a shopping center.

Richard Siemens, president and chief executive officer of the company said..."The fiscal 1989 results reflect the impact of delivering fewer housing units in our various communities, and the delivery in early fiscal 1989 of the remaining parcels of improved land at our Polo Club project." During 1989, 953 units valued at $83,692,000 were delivered, compared to 1,214 units valued at $102,681,000 last year. Land sales at The Polo Club amounted to $13,491,000 in 1989 compared to $28,335,000 in 1988.

Siemens added, "New sales contracts written during 1989 were up considerably, increasing from 1,090 in 1988 to 1,323. The backlog of

units sold and not yet delivered at year end stood at 931 valued at $116.3 million, compared to 561 units valued at $66.6 million last year." Included in the 1989 backlog are 232 units valued at $53.3 million of sales by the Oceania Joint Venture.

Siemens further stated, "The uncertainties associated with the financial difficulties experienced by our majority stockholder last year, which culminated in the Dec. 15, 1989 takeover of First American Bank and Trust, have caused temporary interruptions in certain of the company's operations. The board of directors has provided a clear direction by unanimously authorizing the hiring of a financial advisor to assist in the sale of either the company or all of the company's assets. Meanwhile, we are proceeding with the construction and development in our various operating communities in a manner consistent with historical activities."

DENVER (FEB. 20) PR NEWSWIRE - Premier Resources Ltd. (BSE: PRL) reported a net loss of $38,300, less than 1 cent per share, for the quarter ended Dec. 31, 1989. In the first quarter of the prior fiscal year, the company reported a net loss of $31,600.

Oil and gas sales increased by 9.7 percent over the comparable quarter of last year due primarily to prices. However, operating revenues decreased by 24.9 percent due to one time gas contract settlements of $261,000 recorded in the prior fiscal year.

In January, 1990 the company entered into an agreement to sell all of its New Mexico oil and gas properties for a total consideration of $380,000. Proceeds from the sale will be used to retire part of the U.S. bank debt and provide working capital. The future net revenues attributed to these properties represents approximately 6 percent of total future net revenues (discounted at 10 percent) attributed to all corporate properties as of Sept. 30, 1989.

WESTWOOD, MA (FEB. 20) PR NEWSWIRE - Bird Incorporated (NASDAQ: BIRD) announced the best annual earnings in its history of $19,692,000 on sales of $125,326,000 for the year ending Dec. 31, 1989. After provision for preferred and preference dividends, primary earnings per common share amounted to $4.55. This compares to $1.05 per share for the fiscal year 1988.

For the fourth quarter 1989, earnings were $7,964,000 on sales of $29,149,000, resulting in earnings per common share (after preferred and preference dividends) of $2.10, as compared to 6 cents per share in the fourth quarter of 1988.

Earnings from continuing operations for the year and fourth quarter ended Dec. 31, 1989, amounted to $9,886,000 and $7,098,000, respectively and, for the year, included a pre-tax credit of $6,478,000 related to discontinued business activities. This compares with 1988 earnings from continuing operations for the year and fourth quarter of $3,986,000 and $427,000, respectively. The year 1988 included a pre-tax charge of $795,000 related to discontinued business activities.

Sales from continuing operations declined 5.4 percent for the quarter and 4.7 percent for the year, reflecting primarily reduced housing related markets in the Southwest and the Northeast. Chairman George J. Haufler stated, "We are pleased with our restructuring efforts of the past several months which have eliminated all bank debt, established a strong balance sheet, and are providing strong earnings and positive cash flow from continuing operations. Despite the downturn in housing-related volumes, the impact of productivity investments in equipment, systems and people pursued over several years has resulted in improved profitability. Our strong financial position facilitates our search for attractive acquisitions at what appears to be an appropriate time in the financial cycle."

In the fourth quarter of 1989, the company adopted the liability method of accounting for income taxes according to FASB 96. The impact of this change in accounting principle was not significant and its adoption permits a simpler presentation of our earnings statement.

Bird Incorporated is a manufacturer and distribution of building material

products and a provider of environmental services.

Sales, earnings and earnings per common share for the year and fourth quarter follow.

LIBERTY CORNER, NJ (FEB. 20) PR NEWSWIRE - Blessings Corporation (AMEX: BCO) announced today that net sales for the fiscal year ending Dec. 30, 1989, reached $101,798,200, 14 percent ahead of the previous record of $89,017,300 set in the prior year. Net earnings on continuing operations during the fiscal year amounted to $5,664,100 or $1.74 per share compared with $3,283,600 or $1.01 per share attained during the fiscal year ending Dec. 31, 1988.

Ivan E. Becker, president and chief operating officer of Blessings Corporation, stated, "These outstanding results were achieved despite our having unstable raw material costs at the Edison Plastics Division, an intensely competitive pricing environment at Geri-Care Products, and slow but sustained progress towards breakeven at the Advanced Compounding Division."

With reference to the Edison Plastics Division, Becker noted that "1989 proved to be a year of progress on virtually all fronts. Demand for the products of the Edison Plastics Division was strong throughout the year and led to the decision to construct a new technical and commercial development center at a capital cost of $7,700,000 on newly acquired land in Newport News, Va. The new facility will be constructed adjacent to the Newport News plant, which was acquired by the company in August of 1989."

Separately, the board of directors of Blessings Corporation at its meeting today established and set April 2, 1990, as the record date of shareholders for notice of and voting rights at the annual meeting of shareholders to be held on May 15, 1990.

SIMSBURY, CT (FEB. 20) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) announced today that it has sold its interest in Additive Products Company a partnership owned jointly by Kollmorgen and Akzo, and all of the assets of the graphics part of Kollmorgen's PCK Technology Division to a joint venture formed by Akzo N.V. (NASDAQ-NMS: AKZOY) and AMP Incorporated (NYSE: AMP). Kollmorgen's Discrete Wiring Systems business is not included in this transaction.

The purchase price for this transaction is approximately $50 million, subject to certain adjustments. In addition, the AMP-Akzo joint venture has agreed to assume certain liabilities of the businesses. Kollmorgen will recognize a gain from this transaction. The proceeds from this sale initially will be used to repay short-term indebtedness and for other corporate purposes.

"The consummation of this transaction represents a significant step in

Kollmorgen's previously announced plan to sell our Electronic Interconnections segment. We are continuing to pursue actively the other elements of our restructuring plan, including the sale of the remaining parts of Kollmorgen's Electronic Interconnections businesses," said James E. Swiggett, chairman of the board and chief executive officer of Kollmorgen.

Kollmorgen also announced that the other joint venture between Kollmorgen and Akzo, Akzo Electronic Materials Company (AEMC) of Schaumburg, Ill., was terminated. Akzo will remain in the gallium arsenide substrate business, through Crystal Specialties International of Colorado Springs, Colo.

Kollmorgen Corporation's continuing operations are focused on two business segments specializing in servo-motors and controls, and electro-optical instruments.

#90051p0265 02/20/1990 ~PR Newswire

DENVER (FEB. 20) PR NEWSWIRE - Amoco Production Company today announced a significant natural gas test at its Amoco McEntire No. 1 well in the Oklahoma portion of the Arkoma Basin.

This is Amoco's fifth significant natural gas discovery well in the area in the last 14 months. Five additional Amoco exploratory wells are planned for the Arkoma Basin in 1990.

According to W.S. Davis, Amoco's Denver region exploration manager, the well tested at a daily rate of 9.5 million cubic feet of natural gas through a 24/64-inch choke with a flowing tubing pressure of 2,775 pounds per square inch. The well tested the Spiro/Wapanucka formation below 7,900 feet, where it encountered 62 feet of net productive pay.

Amoco Production is the operator of the McEntire No. 1 with a 77 percent interest. Peko Oil USA has the remaining 23 percent interest. The well is 25 miles southwest of McAlester in Atoka County.

Last December, Amoco announced the No. 1 Scott well, which tested at a daily rate of 18 million cubic feet of natural gas. Earlier announcements of Amoco discoveries in the area include the No. 1 Zipperer, which flowed at a daily rate of 48 million cubic feet, the No. 1 Garrett, which tested at a daily rate of 17 million cubic feet, and the No. 1 Patterson, which flowed at a rate of 14.5 million cubic feet per day.

Amoco Production is the worldwide exploration and production subsidiary of Amoco Corporation (NYSE: AN).

HERZILIA, ISRAEL (FEB. 20) PR NEWSWIRE - Scitex Corporation Ltd. (NASDAQ: SCIXF) announced today a net profit of $35,436,000, or $2 per share, for the year ended Dec. 31, 1989, a 139 percent increase as compared with a net profit of $14,829,000, or $1.26 per share, in 1988. In the fourth quarter of 1989, the company reported a net profit of $13,749,000, or $0.76 per share, a 147 percent increase as compared with $5,575,000 in the fourth quarter of the previous year.

The board of directors of Scitex has declared an interim cash dividend of $0.30 per share, to be paid out of the profits of the company as of Dec. 31, 1989, and will recommend to the annual general meeting of shareholders to approve the dividend as final with respect to the year 1989. The shareholders entitled to the dividend will be shareholders of record as of the close of business on March 12, 1990. The dividend will be paid on or about March 30, 1990, net of taxes to be withheld at source and in compliance with Israeli foreign currency law.

Revenues for the year totalled $237,962,000, a 24 percent increase over 1988 revenues of $192,108,000. Revenues in the fourth quarter totalled $67,412,000, compared with $53,538,000 for the comparable 1988 fourth quarter. Demand for the company's products continued to be strong worldwide, most particularly in Western Europe, where revenues grew to $98,771,000, 28 percent over their 1988 levels, and in the United States, where they reached $95,375,000, a 27 percent increase as compared to 1988.

Profit margins improved steadily throughout the year. Gross profit margins amounted to almost 54 percent of revenues in the year, compared with 49.5 percent in 1988. Operating margins reached 20 percent, while net margins at 15 percent of revenue were almost double the 1988 level. At year end, the company's total liquid resources stood at $140 million. The company said it intends to use some of these funds for its strategic development and to reduce bank debt.

The company increased its gross research and development expenditure by 20 percent over 1988 levels and they totalled almost $21 million, or 9 percent of revenues for the year. Out of a total of more than 1,500 employees worldwide, the company currently has approximately 300 people engaged in R&D, as it continues to give priority to technological leadership and bringing new products to the marketplace. Later this week,

the company will be unveiling a substantial number of new products before a group of more than 50 trade journalists from Western Europe, the United States and Japan. These products will be publicly exhibited for the first time in April at DRUPA, the world's largest trade show for the printing and publishing industries which takes place once every four years in Dusseldorf, West Germany.

Scitex Corporation Ltd. designs, develops, manufactures, markets and services interactive computer imaging systems used primarily in the printing and publishing industries. Scitex products are also used in the cartographic and textile industries, as well as for certain applications in printed circuit board manufacturing and seismic exploration industries. Scitex operates marketing, sales and service divisions in North America, Europe and Japan.
